Benefits of TFL

TFL decorative panels have excellent scratch and wear resistance. They are widely used in laminate flooring, office furniture, closet system components, store fixtures and cabinets. It is also an appropriate spec in health care, hospitality, commercial and retail settings. Due to its performance, design flexibility and cost advantages, TFL offers an excellent option for designers and specifiers.

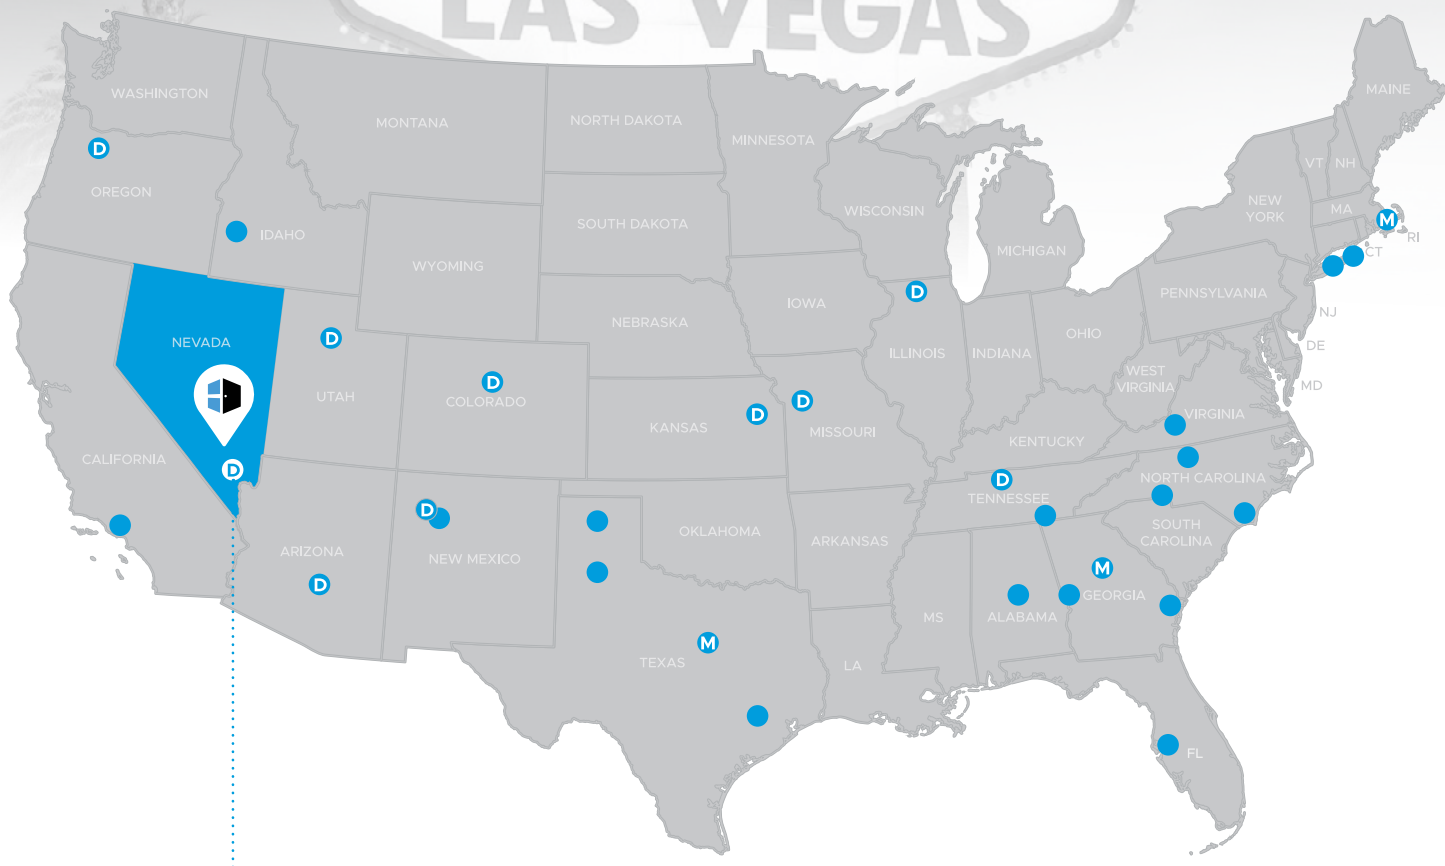

TFL has other distinct advantages. It is both a decorative surface as well as a construction material and can be easily processed on typical panel processing equipment. As such, it eliminates the need for furniture and cabinet makers to install laminating lines. An important advantage of TFL is its matching capabilities with high pressure laminate (HPL) and three-dimensional laminates (3DL). While TFL and HPL materials are produced in different systems, the same decor prints can be used in the production of each, providing for exact matches. TFL and HPL are often specified and used in the production of furniture, cabinets and fixtures.
