Architectural Building Products

Tafisa®'s decorative panels (TFL) are manufactured using 100% recycled and recovered wood materials. Available in more than 122 standard color and texture combinations. It comes with a complete, harmonized line of HPL to our TFL Prélude and Sommet embossed in-register (EIR) Series. Besides, the collection comes with the most comprehensive complementary products program of the industry.

TFL

Tafisa's decorative paper layer
Tafisa particleboard: EPA TSCA Title VI or ULEF available
Tafisa's decorative paper layer

One-step process

TFL decorative panels are manufactured in one step.

Top and bottom impregnated decorative layers are pressed and permanently thermofused to particleboard or MDF. Large steel press plates are used during this process to create the surface texture. The finished panels are ready for use.

HPL

Wear layer protection
Tafisa's decorative paper layer
Kraft paper layers
Tafisa's decorative paper layer
Wear layer protection
Tafisa particleboard: EPA TSCA Title VI or ULEF available

Two-step process

HPL panels are manufactured in two steps.

The first consists of thermofusing the wear and decorative layers to multiple layers of kraft paper to form a single laminated sheet. Steel press plates are used to create the surface texture. The sheet is then bonded to a substrate (particleboard, MDF or other) by the end-user to create a finished product.

The Finishing Touch

Sourcing and matching TFL panels or HPL sheets to complementary products is key to producing design harmony. At Tafisa®, it's an integral part of our design and product development process. So, we're proud to offer you the most extensive complementary products program on the market.

Door Mouldings

These mouldings are made from MDF profile wrapped with treated base paper. This type of moulding frames a central panel in order to create a cabinet door. The many profiles and colors available are perfectly matching Tafisa®'s TFL and HPL decorative panels.

Alpha

Edgebanding

Edgebanding are narrow polyester, PVC or ABS strips that match the products used to cover edges for aesthetic and durability purposes.

5-Piece and Slab Doors

Designed using four profile-wrapped pieces forming a frame around a central panel, these 5-piece doors offer a distinctive wood cabinet appearance, synonymous with durability, sophistication and quality, available in several styles, finishes and Tafisa® colors.

HOW TO CHOOSE THE RIGHT PRODUCT

RECOMMENDED USE FOR TFL:

Commercial, residential, hotel, healthcare, retail and institutional applications:

These include furniture, bathroom and kitchen furnishings, doors of all kinds, storage system, wall/ceiling cladding, etc. Recommended for vertical and horizontal applications with moderate impact and moderate use.

RECOMMENDED USE FOR HPL:

Commercial, residential, hotel, healthcare, retail and institutional applications:

These include countertops, tables, furniture, bathroom and kitchen furnishings, doors of all kinds, storage system, wall/ceiling cladding, etc. Recommended for vertical and horizontal applications requiring high impact and high wear resistance.

At Tafisa®, we're fully committed to meeting our wood-supply needs without compromising the environment for future generations. So, naturally, after the construction of our woodrecycling facility, aptly named Rewood™, we soon began using wood materials recycled from the construction and demolition sector in the composition of our panel products. Today, the use of recycled wood throughout our production process is fully integrated for the good of all.

PRĒLUDE[®]

SERIES

Imagine.
Create.
Combine.

If you can imagine it, you can create it with the complete collection of Prēlude products, as varied and colorful as they are practical and durable. Choose from a wide variety of textures and colors and combine them to create a world all your own.

Prēlude Textures

karisma

karisma's magnetism has made it a go-to industry staple. Its random mix of brushstroked embossing and matte-infused accents give it a natural, authentic look.

new

alto

alto's linear design mimics the look of reconstituted wood veneer. It features a striking fusion of matte and glossy accents woven throughout the pattern.

crystalite

An industry classic, **crystalite** features a simple, universal pattern. With high wear resistance, it's designed to stand the test of time.

smoothwood

The **smoothwood** finish is reminiscent of hardwood cabinetry. Its soft, satin surface and gentle pores give this texture designer approved finesse.

isola

Soft to the touch, **isola** diffuses light like no other texture. Elegant and durable, it's a perfect complement to solid colors.

urbania

urbania is inspired by the woodgrain pattern commonly found on quarter cut and rift cut veneers. With a clean linear look, this texture is modern yet timeless.

Prēlude Panels

Sizes	4' x 8' to 5' x 12'
Width	49" & 61"

FERÍA™

Once again, Tafisa is proving its design leadership with a brand-new addition to the Sommet® Series. FERÍA™ appeals to the senses with an original look that captures the essence of hickory, a trusted wood known for its lightness and durability. With its grain and color of warm variations and inviting appearance, FERÍA™ evokes movement and rhythm – like a laidback, yet lively celebration that sets the soul and the imagination alight.

BRAVA™

The Sommet® Series adds a new texture that blends perfectly with the innovative and distinctive Tafisa® brand. Inspired by teak, a noble and timeless wood species, BRAVA™ creates a lasting impression with its rich cathedral motifs. The striking look and feel of these panels are designed to stay with you, like the lingering traces of a fond memory.

VIVA™

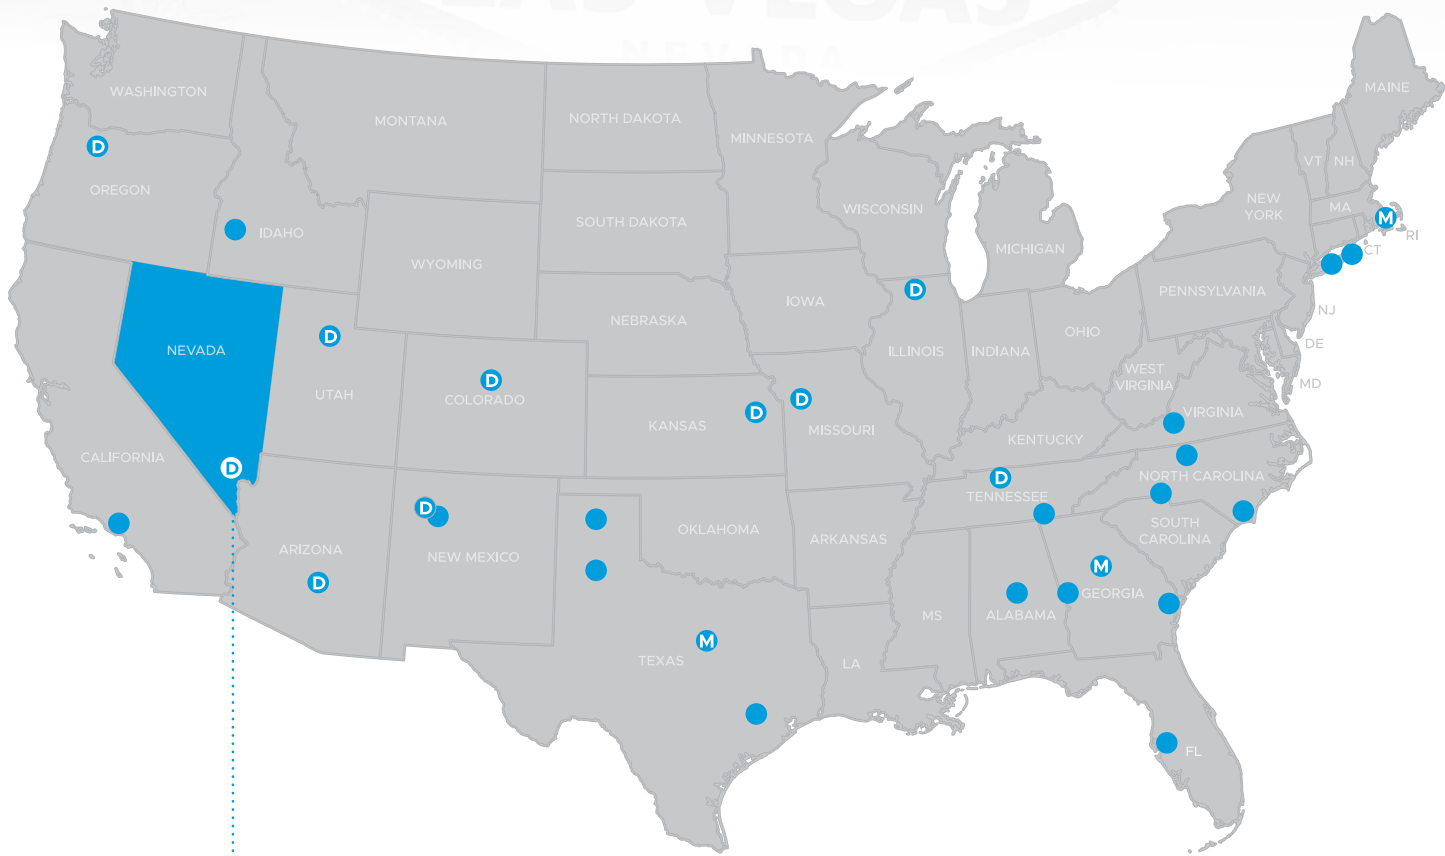

The first in the Sommet® Series and echoing the innovative vision that has been Tafisa®'s hallmark since day one, VIVA™'s unique butternut texture and woodgrain structure offer elegance and refinement. Designed from a rare wood species rich in character, this creation is the culmination of a meticulous research process led by a team of designers and experts who are passionate about what they do.
