THE NATURAL BEAUTY OF AMERICANA™ THERMALLY MODIFIED WOOD

Americana Thermally Modified Wood is domestically sourced, responsibly harvested, and manufactured in Pennsylvania. Our Pennsylvania thermally modified hardwood undergoes a natural, non-toxic process that slowly cooks the wood causing changes on a molecular level by removing all the moisture. The process produces naturally durable wood that is permanently resistant to water, insects, and decay.

REAL WOOD FOR THE REAL WORLD

ECO FRIENDLY

100% pure, natural hardwood, sustainably harvested from Pennsylvania's beautiful, vast forestland.

LOW MAINTENANCE

It's up to you! Apply a UV protectant to maintain the exotic color, or let it naturally silver.

NO CHEMICALS

Heat and steam... that's it. No plastic, oil, resin, wax, or additives. Americana is completely chemical-free and safe.

PREMIUM HARDWOOD

This isn't your grandfather's pressure-treated pine, or your parents' plastic. It's the real deal: Ash, Oak, Poplar.

EXOTIC APPEARANCE

Deep, luxurious brown maintained with UV protectant or wood silvered naturally.

LONG LIFE

Class 1 durability. First class stability. This wood isn't going anywhere.
