Decorative Surfaces & Architectural Decor Panels

DECORATIVE SURFACES ARE USED EVERYWHERE!

Today, residential and commercial interior designers have available to them a broader range than ever before of decorative surfaces and use them to create innovative, emotive and functional interiors.

Decorative surfaces are used on virtually every type of exposed surface be it kitchen, bath and storage cabinets, office or residential furniture, and increasingly on feature walls, all of which combine to create the desired living or work environment. Our surfaces are available in natural wood, reclaimed wood, and composite or synthetic. Synthetics may be deeply embossed to provide textures that mimic mother nature or satiny smooth or high gloss to reflect light and enhance color.

Our **decorative surfaces** address a broad range of criteria important to designers and end-users: design, color, surface texture, quality, functionality, and durability. Material cost and life cycle costs are also a factor in determining which material is best suited for an application. A final and very important consideration is the very reliable suppliers standing behind our products ensuring the timely supply of top quality and consistent materials.

We invite you to review our **decorative surfaces** collection and encourage you to meet with our very knowledgeable staff to discuss all supply options.

Timber Products sets the standard for product quality, innovation, and environmental stewardship in the wood products industry. We're one of the largest material suppliers in the domestic kitchen cabinet industry, as well as one of the largest manufacturers of hardwood plywood in America. In addition, we offer a comprehensive array of other wood products, from hardwood lumber and veneer to softwood products, laminates, and particleboard. Furthermore, Timber Products is a fully integrated manufacturer. We control every step of production to ensure our products have high levels of quality, craftsmanship, and sustainability.

HARDWOOD PLYWOOD

Timber Products' comprehensive selection of versatile, high-quality panels includes architectural plywood and softwood plywood varieties, as well as our award-winning FalconPly Hardwood Plywood. Manufactured from high-quality, real wood veneers, Timber Products plywood meets your panel needs in an environmentally friendly way. Our panels are available as FSC certified.

Weyerhaeuser medium density fiberboard (MDF) is prized by woodworkers and construction professionals for its exceptional qualities, including a smooth unblemished surface optimized for painting and laminating. A homogenous fine fibre core with light consistent color allows fewer finishing steps to achieve superior results. Glacier Green and Glacier Clear formulated products also meet a wide range of green and sustainable product standards and can be specially requested.

Advantages of Weyerhaeuser MDF:

- Easy of machining lends to longer tool life
- Coverage with laminating and coating is especially easy
- Deep profiling capable
- Light, consistent color made from fibers of western softwoods
- TSCA Title VI Certified

West Fraser medium density fibreboard (MDF) panels are composed of 100% western white softwoods that have a consistent light sandy color. The purity and long fibres associated with this material allow for deep, detailed profiling and smooth machining for easier and better finishing. An added benefit of our panels is the light color of our MDF reduces color show-through when painting. The result is a significantly longer tool life and a beautiful finish.

Advantages of Ranger Premium MDF Composite Panels:

- Easily machinable
- Ideal for painting
- TSCA Title VI Compliant

DRAGON PLY®
PREMIUM HARDWOOD PLYWOOD

DRAGON PLY PANELS NOW FEATURE ANTIMICROBIAL UV FINISH

Dragon Ply UV prefinished panels now feature Antimicrobial protection in addition to its many other value-added attributes that make it the best in the industry.

S **SUPERIOR** surface quality. 100% of Dragon Ply SMART production utilizes a multi-step calibration lamination.

M **MATERIALS** are the first step in ensuring consistent top quality plywood. Face veneers are individually inspected by our Quality Control staff.

A **ANTIMICROBIAL UV** technology uses a nano silver ion antibacterial agent to provide users with additional peace of mind. This laboratory tested UV options kills 99.9% of bacteria.

R **RELIABLE** performance in every panel. Quality Control staff rigorously inspects products from around the globe to ensuring Dragon Ply SMART delivers the most reliable performance.

T **THICKNESS** tolerance. Dragon Ply SMART thickness tolerance is +/- 0.3mm. This is two times more stringent than ANSI/HPVA standards.

CABINET GRADE BIRCH HARDWOOD PLYWOOD

- Directly sourced and imported
- Inspected by our staff which ensures consistent performance and value
- Acacia/Eucalyptus veneer core provides flat and stable panels
- Thickness tolerance +/-0.5mm
- Moisture content under 14%
- TSCA tested and certified
