VICTOR DEL TORO

General Manager | Paxton San Antonio

As the General Manager of Paxton San Antonio, I want to thank you for visiting our website and I would like to extend to you an invitation to tour our facility. You will experience firsthand, our company's commitment to excellence and what the Paxton Advantage is all about. You will see our production facilities and discover the broad selection of product that's immediately available to you and meet the people that fulfill the Paxton Advantage. I am confident that you will leave here feeling completely assured that you are dealing with the best vendor possible.

I would be glad to hear from you anytime!

Please call **210-653-9663**
or email me at **victord@paxtonwood.com**

DECORATIVE
SURFACES
ARE USED
EVERYWHERE!

Today, residential and commercial interior designers have available to them a broader range than ever before of decorative surfaces and use them to create innovative, emotive and functional interiors.

Decorative surfaces are used on virtually every type of exposed surface be it kitchen, bath and storage cabinets, office or residential furniture, and increasingly on feature walls, all of which combine to create the desired living or work environment. Our surfaces are available in natural wood, reclaimed wood, and composite or synthetic. Synthetics may be deeply embossed to provide textures that mimic mother nature or satiny smooth or high gloss to reflect light and enhance color.

Our **decorative surfaces** address a broad range of criteria important to designers and end-users: design, color, surface texture, quality, functionality, and durability. Material cost and life cycle costs are also a factor in determining which material is best suited for an application. A final and very important consideration is the very reliable suppliers standing behind our products ensuring the timely supply of top quality and consistent materials.

We invite you to review our **decorative surfaces** collection and encourage you to meet with our very knowledgeable staff to discuss all supply options.

EDGEBANDING AVAILABLE

kronospan

Formed by covering an MDF core with decorative paper, our Melamine Faced MDF | TFL is suitable for high-quality furniture and interior design projects. The core of the material is composed of wood fibers, giving a high density and stability, which makes it excellent for processing. It is available in various thicknesses, designs and decorative finishes on one or both sides.

Guararapes

Guararapes THIN MDF is characterized by the lower sheet thicknesses. Similar to Standard MDF, it has an excellent surface quality, homogeneous color, and accepts virtually any type of finish. The product widely used in drawers and furniture bottoms for both residential and commercial applications. It is also used in the manufacture of robust panels (semi-hollow) in the construction industry, as well as numerous applications including wall coverings and door skins.

CHEMETAL®

Chemetal is a great and relatively easy way for design professionals to use metal in their interior design projects. We have one of the world's largest collections of metal designs and laminates. They are sold in standard laminate sheet sizes. Our decorative materials are specified and installed in commercial interior projects in hospitality, retail, corporate, signage, furniture, restaurant, stadium and arena environments. Chemetal is ideal for vertical and light duty horizontal use.

We offer design professionals a massive collection of over 200 metal designs and laminates. We make many designs in-house; deeply brushing, aging and adding patinas by hand and machine. Our designs are unique works of art, created with a manufacturing consistency to ensure repeatability. We also source some of the best metal designs the world over. It adds up to what we consider the most expansive collection of metal designs for interiors that you'll find anywhere.

treefrog®

Treefrog is a complete collection of European quality prefinished real wood veneers. It's celebrating it's 20th year with new designers veneers, a lighter, more flexible color matched wood backer and FSC® certification for the entire collection.

Ideal for commercial and residential interiors, Treefrog's unique process ensures consistency, sheet after sheet, in design spaces of any size.

Made in Italy and stocked in the USA, Treefrog is available in standard sizes through Paxton San Antonio branch.

Finally, Treefrog is from the same place as Chemetal, a premium metal design material, and a second generation family-owned company that has been in business for over 50 years.

Paxton's modern equipment and experienced mill staff create beautifully crafted mouldings quickly and cost effectively.

**HARDWOOD
AND
SOFTWOOD
LUMBER
ITEMS**

ARCHITECTURAL MOULDINGS

Custom millwork is our specialty. From traditional baseboard and casing to custom architectural profiles, our experienced personnel are able to produce mouldings in almost any hardwood or softwood species.

INVENTORY

We stock millions of dollars of product that is immediately available. Let our warehouse be an extension of your business.

SANDING

Custom or Stock Mouldings
Profile Sanding
Flat Sanding

PLANING

Our planer combines two machines and operations: a Facing Planer and a Surface Planer. This allows Paxton to plane both sides of lumber, reducing it to a uniform thickness while removing the warps and twist in most boards 10' and shorter.

GANG RIPPING

Customers with moulding capabilities can benefit from our gang rip service. Blanks ripped to width tolerance, with square clean edges are also an economical substitute when short runs of S4S are needed.

BASE MOULDINGS

CROWN MOULDINGS
