Yukari
LEADER IN HARDWOOD LUMBER

Offering high quality lumber by maximizing economic, societal, and environmental sustainability makes Yukari a leader in North American hardwood lumber.

Plantation grown, it is inherently less prone to knots and other defects. Yukari's medium texture and straight grain make it an ideal substitute for more expensive options such as Western Red Cedar. High Performance that won't break the project budget.

- ➔ Yukari produced with 100% Red Grandis Fiber
- ➔ 30 years expected lifespan without treatment
Janka Hardness 881 lbs.
- ➔ Class B Fire rated and CAL Fire WUI approved for Decking and Cladding (1x6 & wider profiles)
- ➔ FSC® Certified
- ➔ Kiln Dried – enhances stability
- ➔ Available sizes include: 1x4 and 1x6 profiles
- ➔ Custom Profiles available

NATURAL WOOD MADE TO LAST

Kebony's decking and cladding products are sustainable and durable. It requires minimal maintenance beyond normal cleaning.

Kebony's technology is an environmentally friendly patented process, which enhances sustainable Radiata pine with a bio-based polymer. The "Dually Modified" process strengthens the cellular structure, replicating premium tropical hardwood characteristics and giving Kebony a rich brown color. The richness can be maintained with a clear coat or be allowed to patina naturally over time into a beautiful silver-grey color.

- ➔ Multiple profiles available
- ➔ Up to a 35 year warranty against rot and decay
- ➔ 50-75 years expected product lifespan
- ➔ Janka hardness rating of 1618 lbs
- ➔ Class B fire rated and Cal Fire WUI Approved (Decking)
- ➔ Minimal maintenance required
- ➔ FSC[®] certified available
- ➔ Has no harmful effects on the environment
- ➔ Resistant against wood destroying pests
- ➔ ICC-ES Report available for commercial decking projects
- ➔ Health Product Declaration (HPD) available

* Multiple fastening options available: Fastenator hidden fastener, Pro Plug system and face fastening.

5/4x6 Clear Kebony Deck Inner Board (#2637)
Lengths: 10,12,14,16

2x6 Square S4S E2E (#2522)

1x6 Clear Cladding Board (#2682)

Red Grandis is known as the hardwood of the future – it is a versatile wood and 100% FSC® certified.

Grown in Uruguay in former pasture lands, the first Red Grandis trees were planted decades ago, bringing added value to the ecosystem and the local economy. Similar to Genuine Mahogany in weight, strength, density and grain structure, it is lighter in color, and easy to cut and finish which makes it an eco-friendly alternative to Beech, Mahogany, Western Red Cedar and even Walnut for indoor and outdoor furniture.

In addition to its eco-friendly attributes, it offers extremely high performance to cost features, making Red Grandis the perfect choice for any project. patina naturally over time into a beautiful silver-grey color.

- ➔ (WDMA) Rot resistance test = Exhibits excellent decay resistance
- ➔ Red Grandis = Class 2 durability, up to 30 years without treatment
- ➔ Very stable and great workability
- ➔ Sustainable alternative to Mahogany, Teak and many tropical species
- ➔ Trouble-free lumber for millwork operation
- ➔ Plantation Grown lumber is inherently more defect free
- ➔ Best consistency in color, quality, and grade
- ➔ Less prone to cupping, warping, and twisting
- ➔ Takes stains and paints very well

Sizes: Multiple lengths, thicknesses and widths available

At Maximo Wood, we take immense pride in offering top-quality Ipe wood products that are not only beautiful but also sustainable.

Wood Grade

All our Ipe wood is meticulously graded, hand-picked, and is S4S E4E (Surfaced on 4 Sides and Eased on 4 Edges) for a smooth, polished finish.

Board Lengths

We provide Ipe boards in a range of lengths, ensuring flexibility for your projects. Choose from boards as short as 6 feet or as long 22 feet, giving you the versatility to fit your unique requirements.

Custom Milled Profiles

We have the ability and extensive experience to supply specific profiles tailored for large-scale projects. Whether your requirements involve a unique design, specific dimensions, or intricate detailing, our skilled team can expertly craft the perfect profiles to bring your vision to life.

Sustainability

Our commitment to the environment is unwavering. All our Ipe wood is certified as sustainable by reputable third-party verification organizations. When you choose Maximo Wood, you're not only getting exceptional wood products but also supporting responsible forestry practices.

Americana, from Forest to Finish

Americana is a new generation of Thermally Modified Pennsylvania Oak Decking, Siding and Porch Flooring, transformed by heat and steam, for long-lasting beauty in your outdoor living spaces. No injecting of toxic chemicals, stew of oils, plastics or resins, Americana is Real Wood for Real Life.

Americana™ Thermally Modified Wood Decking designs are easy to work with. We use standard symmetrical profiles which can be used with off-the-shelf hidden fasteners. You choose which side of the board you see, and with our structural end joint, the deck can be laid like flooring, with joints floating anywhere between joists. Less waste, less time.

Our Thermally Modified Wood Decking is offered in 6' to 12' long in 1' increments, with maximum 5% 3/4/5' long nested in the bundles. Optionally, they can be cut on 16" increments. While we do not produce Balusters or Posts, we recommend joining two 2x4 or 2x6 pieces together with bolts.

Armorite™ Exterior MDF Engineered for the Elements

Unlike standard MDF that is for dry locations only, Armorite™ Exterior MDF is engineered and designed for exterior applications including outdoor living spaces, signage, trim, cabinets, and for high-humidity environments such as bathrooms and mudrooms. Built to stand tough, Armorite™ is manufactured with a formaldehyde-free resin, resists water (MR50 rating) and uses zinc borate to prevent rot, decay, and termites.

- ➔ Faster project turnaround
- ➔ Superior machinability and less wear-and-tear on your equipment
- ➔ Better paint coverage
- ➔ Easier fastening
- ➔ Exceptional warranty coverage
