At FastenMaster, Everything We Do Is PRO Driven

FastenMaster is committed to supporting our professional contractors' businesses by developing innovative products and services. Our wide range of products, including those for residential decking, structural fastening, remodeling, and wood framing, offer unique benefits to remodelers, professional deck builders, residential framers, and home builders. In addition, our nationwide sales team regularly collaborates on the jobsite with PROs to gain a comprehensive understanding of their business practices and product needs. This hands-on approach enables us to develop products that save time, reduce installation cost, and build to a high level of craftsmanship.

Improving PROs' Businesses Through Craftsmanship

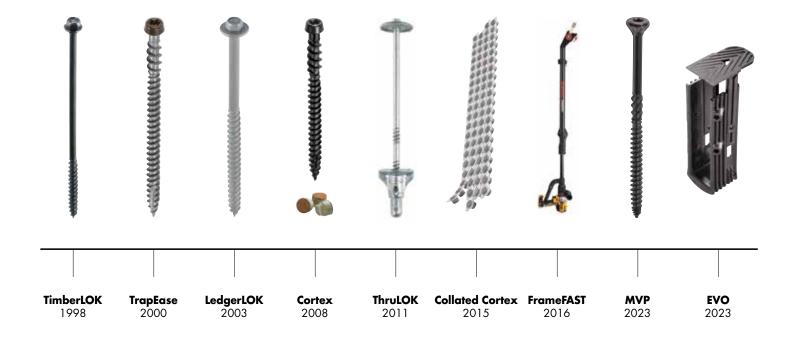

At FastenMaster we know that having the strongest and most secure connections isn't enough. What separates the best PRO contractors is their attention to detail and creative solutions to complex problems. Throughout our history we have brought game changing technologies to our PROs that have given them more flexibility to be creative and deliver premium solutions to their customers. Whether it's designing a dynamic outdoor living space with Cortex hidden plugs and Tiger Claw hidden clips or framing an architectural showpiece with FrameFAST, FastenMaster will always be working alongside our PROs on their most difficult and unique projects.

Improving PROs' Businesses Through Innovation

For the last 25 years FastenMaster, a division of OMG Inc., has worked side-by-side with top PRO contractors as we've developed the most innovative structural, decking and framing fastening solutions in the industry. Our American-based engineering and manufacturing teams have enabled us to develop cutting-edge fastening solutions that reduce installed cost, increase structural integrity and reflect a pride in craftsmanship. That's why thousands of top builders have made FastenMaster their preferred product, providing them with the confidence they need to take on any project.

Improving PROs' Businesses Through American Manufacturing

Between our manufacturing facilities in Agawam, MA and Addison, IL, our logistics centers in Charlotte, NC and Glendale Heights, IL, and our nationwide sales organization, the entire team at FastenMaster is driven to improve our professional contractors' businesses. With over 650 team members specializing in everything from manufacturing and new product development to customer support and logistics, we have the knowledge and experience to deliver a uniquely American level of service and support. Whether you have a question for our technical team, are placing an order with our inside sales team, or training with your local sales representative, we are ready to provide the best experiences in the industry.

Deck & Trim Fastening

From strong substructures to a stunning finish, decking solutions that save time and deliver long-term results.

- 2004: We developed GuardDog, the first exterior wood screw designed specifically to address the newer, more aggressive chemicals in pressure treated wood.
- 2006: The Tiger Claw TC-G Hidden Deck Clip launched as the industry's first stainless steel hidden decking clip for grooved boards, bringing long-lasting quality and a nearly invisible finish.
- 2008: We created the first "through board" hidden fastening system with the introduction of Cortex plugs and screws, a game-changing innovation that gives PROs the ability to hide screws on a variety of applications including composite decking and PVC Trim. When combined with Tiger Claw TC-G, PROs could for the first time hide all the screws on the surface of a decking project.

Elevate Your Decking Craftsmanship

FastenMaster has spent decades listening to top PRO contractors as we've developed the most comprehensive deck and trim fastening solutions in the industry. We understand that craftsmanship requires the need to deliver superior quality with a flawless finished look. That's why thousands of premiere deck builders have made FastenMaster their preferred choice for delivering strong substructures with a stunning finish.

| EVO™ Deck Framing Connector Tabs align joist to ledger in seconds, eliminating the need to tack joist in place Made from a reinforced engineered polymer which is stronger than steel, as well as rust, temperature & UV resistant Guaranteed to last for the life of the project |

Cortex®

Hidden Fastening System For Decking

Features:

- Collated on strips with pre-aligned grain for faster and more precise installation
- Plugs made from specific deck boards for a perfect match
- Approved for treated wood framing
- Strip-out resistant #20 TORX® ttap® drive system

Packaging Quantities (Collated):

100 LF (224 screws, 240 plugs, 2 set. tools) 300 SF (1050 screws, 1200 plugs, 6 set. tools)

Length: 2-1/2"

Description:

The Cortex Hidden Fastening System is the fastest, easiest way to hide the heads of your deck screws across the entire deck,

first and last board, perimeter, and stairs. Cortex plugs are made from the same material as market-leading deck boards.

Complete Hidden Fastening System:

Combine the versatility of Cortex for first board, last board, perimeter boards and stairs with the speed and ease of the Tiger Claw TC-G Clip for the field of the deck to get a beautiful fastener-free surface.

ProjectLife™ Coating:

The performance and corrosion protection of Cortex is guaranteed for the life of the project.

FastenMaster offers perfectly matched Cortex Plugs for AZEK®, Fiberon®, Trex®, TimberTech® and other major board manufacturers. Plugs are made directly from the deck boards to ensure a perfect match every time! To view a complete list of board and color offerings, visit page 54 or scan the code above.

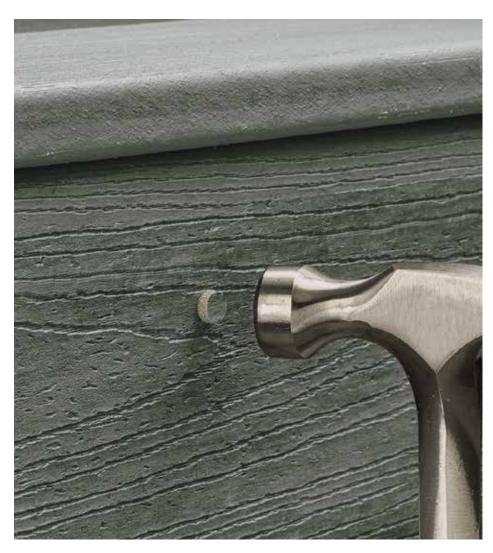

316 Marine Grade Stainless Steel Screws

Cortex Deck Collated Plugs are also available with 316 Marine Grade Stainless Steel screws for certain brands and boards for coastal and waterfront applications.

Cortex® FASCIA

Hidden Fastening System

Features:

- Engineered for fascia expansion/contraction
- Plugs made from fascia board
- Strip-out resistant #20 TORX® ttap® drive system
- Perfect color match

Packaging Quantities:

50 LF (100 screws, 105 plugs, 1 counterbore tool and 1 setting tool)

Length: 1-3/4"

Description:

The Cortex for Fascia Hidden Fastening System is the fastest, easiest way to hide the heads of your screws when installing fascia or stair risers. Cortex for Fascia is engineered for fascia expansion/contraction and the plugs are made from Trex fascia boards making for a perfect color match. The unique stepped counterbore tool creates a hole for movement of the fascia and a second hole for the perfect plug fit.

ProjectLife™ Coating:

The performance and corrosion protection of Cortex Fascia is guaranteed for the life of the project. Cortex Fascia is not recommended for use in saltwater applications.

FastenMaster offers perfectly matched Cortex Plugs for the leading Trim Manufacturers including: AZEK®, CertainTeed®, KLEER®, Modern·Mill, Royal®, Versatex®, Wolf®. Plugs are made directly from the trim boards to ensure a perfect match every time!

TC-G® and Installation Tools

Hidden Fastening Systems for Grooved Decking

Features:

- Automatically gaps decking
- Quick and easy installation
- Clean, fastener-free appearance
- Stainless steel for superior durability and ultimate corrosion resistance
- Strong connection between decking and joists

Packaging Quantities:

50 SF bag with hand driven screws (90 clips per bag) plus screws

500 SF bucket for use with pneumatic gun (900 clips per bucket)

Description:

This stainless steel hidden fastening system is designed to be universally compatible with all grooved decking boards. Delivers fast and easy installation, resulting in smooth, fastener-free outdoor living spaces.

Complete Hidden Fastening:

Combine the versatility of Cortex for first/last board, perimeter boards and stairs with Tiger Claw TC-G® for the field of the deck to get a beautiful fastener-free surface.

ProjectLife™ Guaranteed:

The performance and corrosion protection of TC-G is guaranteed for the life of the project. TC-G is not recommended for use in saltwater applications.

TrapEase® 3

Ultimate Deck Screw for PVC, Capstock & Composites

Features:

- For PVC, capstock and composite decking
- Strip-out resistant #20 TORX® ttap® drive system
- Head painted to match board
- Corrosion and fade resistant
- Spotter[™] Installation Guide creates consistent board gapping and fastener placement (available only on 350pc bucket)

Lengths: 2-1/2", 3"

Packaging Quantities:

75pc box, 350pc bucket, 1,050pc bucket

Description:

TrapEase® 3 is the only fastener guaranteed to deliver an ultimate finished look in PVC, Capstock, and Composite decking. The TORX® ttap® drive system offers stick-fit and wobble-free installation, virtually eliminating fastener stripping during installation or removal. TrapEase 3 features a UV resistant head paint that will not fade for the life of the project – guaranteed.

ProjectLife™ Coating:

The performance and corrosion protection of TrapEase 3 is guaranteed for the life of the project. TrapEase 3 is not recommended for use in saltwater applications.

TrapEase® FASCIA

Color Matched Fascia Fastener

Features:

- Engineered for fascia expansion and contraction
- Head painted to color match fascia board
- Strip-out resistant #20 TORX® ttap® drive system
- Corrosion and fade resistant

Length: 1-3/4"

Packaging Quantity:

Complete with 200 screws, 1 counterbore tool, and 1 driver bit

Description:

The strongest, fastest way to attach composite fascia. Designed to allow for Fascia board expansion and contraction, delivering beautiful finished look.

When ordering, combine SKU column with board mfg. color key. Example: Trex Transcend, Rope Swing = FMTRF-1LFRS

GuardDog[®] Exterior Wood Screw

Features:

- TORX® ttap® Drive System delivers stick fit, wobble free installation
- Sharp Type 17 Point for quick installation
- UV Resistant to fading or chalking
- Guaranteed Corrosion resistance for the life of the project
- Nibs under the head deliver a clean finished look

Lengths: 1-5/8", 2", 2-1/2", 3", 3-1/2"

Packaging Quantities:

75pc box, 350pc box, 1,750pc bucket, 1,350pc bucket (3-1/2" only)

Description:

GuardDog® is a versatile exterior wood screw used for a variety of applications including pressure treated decking, railings, deck framing and more.

TORX® ttap® Drive System

The TORX® trap® drive system offers unmatched stick-fit and wobble-free installation, eliminating fastener stripping during installation or removal.

EVO° Joist to Ledger

Deck Framing Connector

Time Saving Design

Tabs align joist to ledger in seconds. Eliminates the need to tack joist in place.

Professional Exterior Grade

Won't rust. Temperature and UV Resistant.

Reinforced Engineered Polymer

Stronger than traditional steel connectors. Guaranteed for life of project.

Code-Compliant

Meets IRC requirements for deck joist hangers. Supported by ICC-ES Evaluation Report (ESR-4711).

| EVO Selection Guide | | | | | | |
|---------------------|---|------------------|--|--|--|--|
| Packaging | Contents | SKU | | | | |
| Bulk Box | (16) Connectors, (64) 5" Screws, (34) Set Screws and (1) Hex Driver Bit | FMEVODJH810-16 | | | | |
| Single Unit | (1) Connector, (4) 5" Screws and (2) Set Screws | FMEVODJH810-INDY | | | | |

The Evolution of Deck Framing:

The FastenMaster EVO Joist to Ledger Deck Framing Connector is a faster, easier, code-compliant method for attaching 2x8 or 2x10 pressure treated deck joists to a ledger board.

Stronger, More Durable Connection:

The toe-nailed structual screws and robust design combine to create a tight bond between the deck and house frame, allowing the EVO Connector to meet the highest loads and longest spans shown in the IRC for exterior decks. An ICC-ES Evaluation Report (ESR-4711) showing these loads can be found at FastenMaster.com.

The performance and corrosion resistance of EVO Deck Joist Connectors are guaranteed for the life of the project when used in accordance with the installation instructions and supporting technical literature.

Installation Process:

- 1. Cinch the connector to the 2x8 or 2x10 joist until the connector is snug around the joist.
- 2. Install the provided (2) 3/4" Set Screws into the left and right holes.
- 3. Place the joist into position on the deck ledger. EVO automatically aligns the top of the joist to the ledger.
- 4. Install provided (4) Structural Screws into the four holes.

Be sure to follow all instructions and warnings when installing EVO Joist to Ledger Connectors.

Structural Fasteners

The industry-leading LOK Line replaces traditional lag screws while meeting code and lowering cost.

- 1998: FastenMaster created the category of structural wood-to-wood screws with the introduction of TimberLOK.
- 2003: FastenMaster launched LedgerLOK, the first fastener specifically designed to replace 1/2" lag screws, without predrilling, when attaching a ledger board to a rim joist of a house. It was also the very first structural screw to gain code compliance under the newly adopted ICC-ES criteria.
- 2004: We launched TrussLOK (later replaced by FlatLOK in 2015) the first fastener to connect multiple beams of LVL single sided up to 4-ply.
- 2007: Taking the most loved elements of the best-selling TimberLOK, we created the industry's first flat headed structural fastener to meet code: HeadLOK.
- 2011: ThruLOK was the first fastener to replace carriage and through-bolts without predrilling.

 ThruLOK makes the connection 5X faster and eliminates multiple tools on the job to install.

We Invented The Structural Wood Screw. We Didn't Stop There.

In the two decades since FastenMaster created the structural wood screw category with TimberLOK, we have continued to lead the industry by providing innovative, application-specific fasteners that meet building code and help PROs finish jobs faster. It is our mission to improve our PRO contractors' businesses with code-compliant products by actively participating at their jobsites, understanding their problems, and developing products that deliver job-specific results.

TimberLOK®Structural Wood Screw

Features:

- No predrilling
- Faster and easier than 3/8" lag screws
- Countersinking head style
- ProjectLife Guaranteed
- Approved in treated wood
- Code-Compliant Evaluation Report ICC-ES ESR-1078

Lengths: 2-1/2", 4", 6", 8", 10"

Packaging Quantities:

Single fastener, 12pc clamshell, 50pc box, 250pc bucket, 500pc bucket (2-1/2" only)

Description:

TimberLOK is a heavy duty wood screw suitable for a wide variety of structural wood-to-wood applications such as headers, stair stringers, fences and more. TimberLOK requires no predrilling and is faster and easier than traditional lag screws.

Meet Code. Lower Cost.

TimberLOK is used by professional contractors nationwide to meet code and lower costs. *Meet Code*: Tested and proven to meet the most recent IRC/IBC requirements. *Lower Cost*: Requires no predrilling, saving time and labor.

| 10 | | 50pc box | FMTLOK 10-50A | |
| | | 250pc box | FMTLOK 10-250 | |

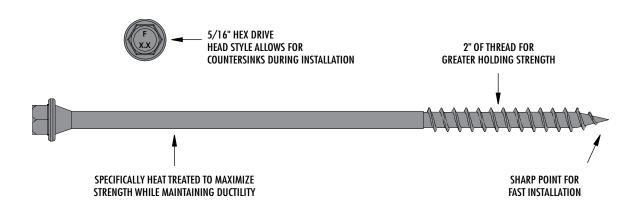

Installation Procedure:

TimberLOK should be installed using an impact driver or quality grade cordless drill (18V or greater). Choose the proper length so that threads fully engage the second piece. Bring washer head flush to wood surface or countersink head flush.

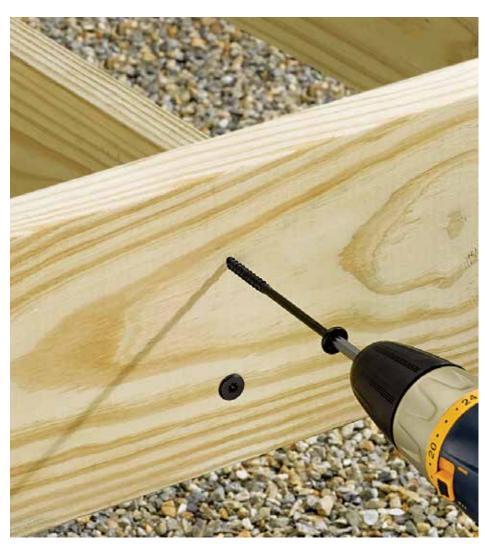

ProjectLife™ Guaranteed:

The performance and corrosion protection of TimberLOK is guaranteed for the life of the project. TimberLOK is not recommended for use in saltwater applications.

HeadLOK® Structural Wood Screw

Features

- No predrilling
- Faster, easier than 3/8" lag screws
- Non-countersinking head style
- ProjectLife Coating
- Approved for treated wood
- Code-Compliant Evaluation Report ICC-ES ESR-1078

Lengths: 2-7/8", 4-1/2", 6", 8", 10" additional sizes also available

Packaging Quantities:

Single fastener, 12pc clamshell, 50pc box, 250pc bucket, 500pc bucket (2-7/8" only)

Description

HeadLOK is a heavy duty wood screw that does it all with an internal drive and flat head. HeadLOK offers higher design shear than 3/8" lag screws and no predrilling is needed! HeadLOK zips right in and is ideal for many wood-to-wood applications including decks, fences, SIPs, kitchen cabinets and more. The patented SpiderDrive® eliminates cam-out and improves installation speed.

Meet Code. Lower Cost.

HeadLOK is used by professional contractors nationwide to meet code and lower costs. *Meet Code:* Tested and proven to meet the most recent IRC/IBC requirements. *Lower Cost:* Requires no predrilling, saving time and labor.

LedgerLOK® Structural Wood Screw

Features:

- No predrilling
- Replaces traditional 1/2" lag screws
- Hex washer head style on LedgerLOK
- TORX® ttap® Drive System on Flat Head style
- ProjectLife Coating
- Approved for treated wood
- Code-Compliant Evaluation Report ICC-ES ESR-1078

Lengths: 3-5/8", 5"

Packaging Quantities:

Single fastener, 12pc clamshell, 50pc box, 250pc bucket

Description:

LedgerLOKs are the first wood screws engineered to fasten a deck ledger board to the rim joist of a house with no predrilling. The hex-head version allows for greater bit engagement, reducing cam-out. The flat head version, with TORX® ttap® drive system, provides flush to ledger installation saving time and money.

Meet Code. Lower Cost.

LedgerLOKs are used by professional contractors nationwide to meet code and lower costs for making deck ledger connections. *Meet Code:* Tested and proven to meet the most recent IRC/IBC requirements for deck ledger to rim joist connection. *Lower Cost:* Requires no predrilling, saving time and labor.

| LedgerLOK Selection Guide | | | | |
|---------------------------|------------------|------------------|------------------|--|
| Length | Packaging Qty | Hex Style SKU | Flat Head SKU | |
| 3-5/8" | Single Fastener | FMLL358-INDY | FMLLF358-INDY | |
| | 12pc clamshell | FMLL358-12 | FMLLF358-12 | |
| | 50рс box | FMLL358-50 | FMLLF358-50 | |
| | 250pc bucket | FMLL358B-250 | FMLLF358B-250 | |
| 5" | Single Fastener | FMLL005-INDY | FMLLF005-INDY | |
| | 12pc clamshell | FMLL005-12 | FMLLF005-12 | |
| | 50рс Ьох | FMLL005-50 | FMLLF005-50 | |
| | 250pc bucket | FMLL005B-250 | FMLLF005B-250 | |

Installation Procedure:

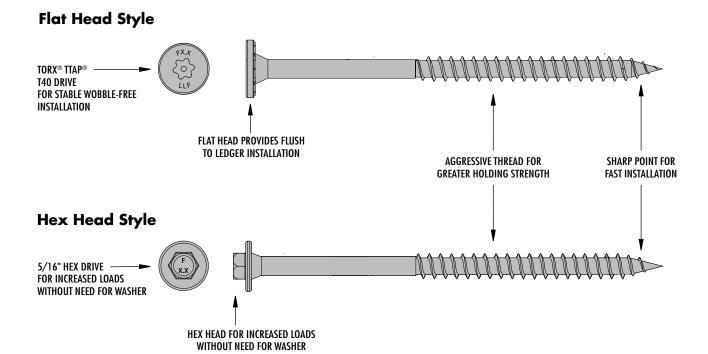

LedgerLOKs should be installed using an Impact driver or a high torque 1/2" variable speed drill. Choose the proper length so that threads fully engage the main member (i.e., rim joist). Bring washer flush to side member with hex head style, do not countersink. Bring head flush with ledger using the flat head style. Not for use in masonry or concrete.

For detailed installation instructions, including fastening requirements, please refer to our *Deck Ledger to Rim Joist technical bulletin*. These instructions are included in all box and bucket packaging as well as being available for download from our website. When using in non-ledger applications, a design professional should be consulted for all critical connections, which include the number and location of all fasteners to meet national and local code requirements.

ProjectLife™ Coating:

The performance and corrosion protection of LedgerLOK is guaranteed for the life of the project. LedgerLOK is not recommended for use in saltwater applications.

FastenMaster VersaLOK™

Structural Wood Screw

Features:

- No Predrilling
- Faster and easier than 1/2" Lags
- Attractive flush mount flat head
- ProjectLife Coating
- Approved for treated lumber
- IBC/IRC Code-Compliant ESR-1078
- TORX® ttap® drive system

Lengths: 6", 8", 10"

Packaging Quantities:

Single fastener, 50pc box

Description:

FastenMaster VersaLOK™ is a heavy-duty wood screw that can be used in a wide variety of structural applications. The performance and corrosion resistance of the VersaLOK fastener is guaranteed for the life of the project when used in accordance with the installation instructions and supporting technical literature.

Meet Code. Lower Cost.

Meet Code: VersaLOK has been tested and proven to meet the most recent IBC/IRC requirements.

Lower Cost: Requires no predrilling, saving time and labor.

| VersaLOK Screw SKU Selection Guide | | | | |
|------------------------------------|-----------------|--------------|--|--|
| Length | Pkg Qty | SKU | | |
| 6" | Single Fastener | FMVL006-INDY | | |
| | 50pc box | FMVL006-50 | | |
| 8" | Single Fastener | FMVL008-INDY | | |
| 8 | 50pc box | FMVL008-50 | | |
| 10" | Single Fastener | FMVL010-INDY | | |
| 10 | 50pc box | FMVL010-50 | | |

Installation Procedure:

VersaLOK should be installed using an impact driver or high torque 1/2" variable speed drill (minimum 18V if cordless). Choose the proper length fastener so that the threads fully engage the innermost member being attached. Bring the washer head flush to the surface. Not for use in concrete or masonry.

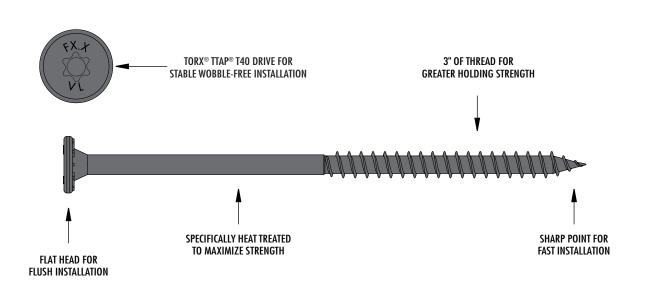

ProjectLife™ Coating:

The performance and corrosion protection of VersaLOK is guaranteed for the life of the project. VersaLOK is not recommended for use in saltwater applications.

Flat Head With TORX® ttap® Drive:

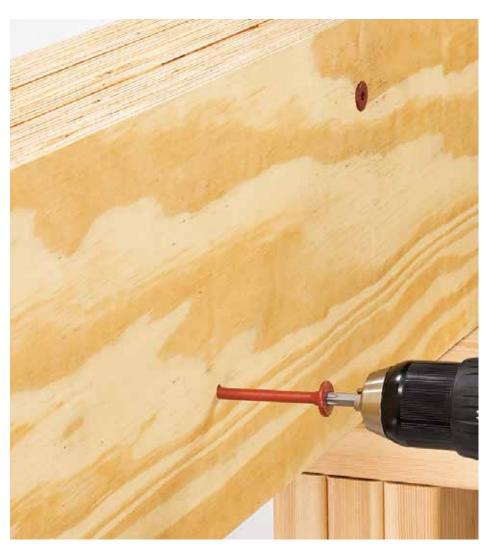

The flat head installs flush, saving additional time and money. Plus, gain stronger bit engagement with the TORX ttap drive system.

FlatLOK® Structural Wood Screw

Features

- No predrilling
- #40 TORX® ttap® drive system
- ProjectLife Coating
- Approved for single-sided installation
- Code-Compliant Evaluation Report ICC-ES AC233

Lengths: 2-7/8", 3-1/2", 4", 4-1/2", 5", 6", 6-3/4"

Packaging Quantities:

Single fastener, 50pc box, 250pc bucket, 500pc bucket (2-7/8" only), 200pc bucket (6-3/4" only)

Description

FlatLOK is designed for various multi-ply dimensional and engineered wood connections. FlatLOK is approved for single-sided installation. Not intended for use on exterior deck ledgers; FastenMaster LedgerLOK is designed specifically for that application.

Meet Code. Lower Cost.

FlatLOK delivers strong, code-compliant connection for multi-ply LVL, girder trusses and multi-ply lumber beams. *Meet Code*: Tested to meet manufacturers, requirements for single-sided installation of multi-ply LVL, LSL and PSL. *Lower Cost*: Requires no predrilling, saving time and labor.

| 5" | 3-Ply LVL Beams | Single fastener | FMFL005-INDY |
| | | 50pc box | FMFL005-50 |
| | | 250pc bucket | FMFL005B-250 |
| 6" | 4-Ply Roof Girder Trusses | 50рс вох | FMFL006-50 |
| 0 | | 250pc bucket | FMFL006B-250 |
| | 4-Ply LVL Beams | Single fastener | FMFL634-INDY |
| 6-3/4" | | 50рс вох | FMFL634-50 |
| | | 200pc bucket | FMFL634B-200 |

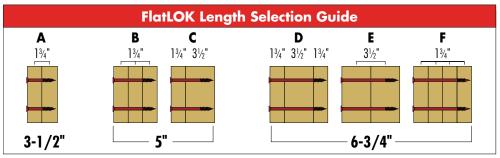

Installation Procedure:

FlatLOK should be installed using an impact driver or high torque 1/2" variable speed drill (minimum 18V if cordless). No predrilling is required when properly installed. Bring fastener flush with wood surface, do not overdrive.

ProjectLife™ Guaranteed:

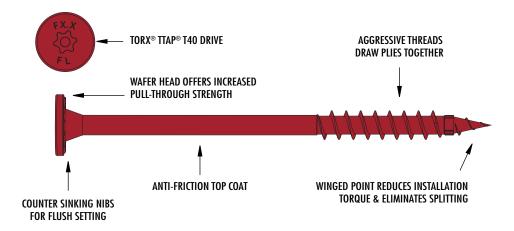

The performance and corrosion protection of FlatLOK is guaranteed for the life of the project. FlatLOK is not recommended for use in saltwater applications.

Footnotes

 Fasteners should be installed in a staggered pattern at least 1-3/4" from top or bottom edge and 3-3/4" from either end of the beam

ThruLOK°

Through-Bolt Replacement

Features:

- No predrilling
- Faster, easier than 1/2" through-bolts
- No drill bits or wrenches required
- Galvanized coating meets code requirements for treated wood
- Code-Compliant Evaluation Report ICC-ES ESR-1078

Lengths: 6-1/4", 7", 8", 9-1/2"

Packaging Quantities:

Single fastener, 24pc box

The ThruLOK System combines the strength of a through-bolted connection with the speed of a FastenMaster LOK fastener.

- 6-1/4": engineered to connect 4x4 posts to 2x joists
- 7": engineered to connect two 2x beams to a notched 6x6 post
- 8": engineered to connect 4x4 posts to a double rim joist or single rim joist and 2x blocking.
- 9-1/2": engineered to attach a 6x6 post two 2x beams

Meet Code. Lower Cost.

Meet Code: ThruLOK has been tested to meet the most recent IBC/IRC requirements for guard post to rim joist connections. Lower Cost: Requires no predrilling, saving time and labor.

| ThruLOK Screw Selection Guide | | | |
|-------------------------------|------------------|-----------------|---------------|
| Length | Wood Dim Range | Pkg Qty | SKU |
| 6-1/4" 4-1/2" to 5 | 41/0" +- 51/4" | Single Fastener | FMTHR614-INDY |
| | 4-1/2 10 3-1/4 | 24pc box | FMTHR614-24 |
| 711 | 7" 5-1/4" to 6" | Single Fastener | FMTHROO7-INDY |
| / | | 24pc box | FMTHROO7-24 |
| 8" | 6-1/4" to 7" | Single Fastener | FMTHROO8-INDY |
| | | 24pc box | FMTHROO8-24 |
| 9-1/2" | 7-3/4" to 8-1/2" | Single Fastener | FMTHR912-INDY |

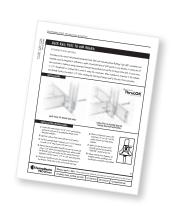

Installation Procedure:

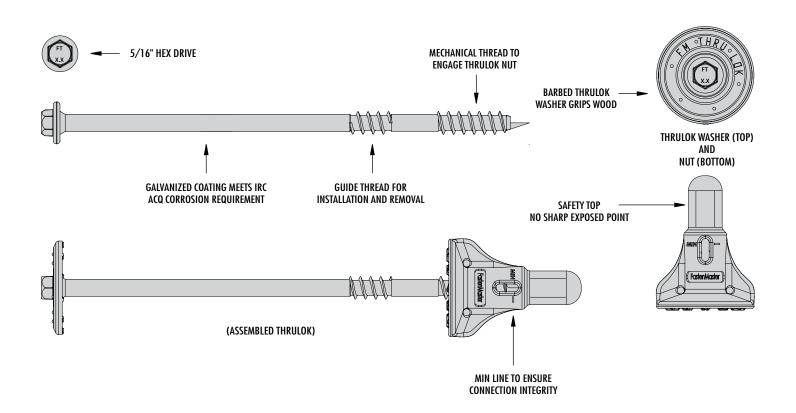

No predrilling required when properly installed. Put the ThruLOK washer on the screw with the teeth of the washer facing away from the head of the fastener. Using a 1/2" high torque variable speed drill (18V if cordless), drive the ThruLOK until washer and hex-head are just above the wood surface (approx 1/4") and point of screw protrudes out other side of connection. Thread the nut onto point of fastener. Tighten nut until flush with wood. Tighten screw with drill. NOTE: Point of fastener must engage in nut to "MIN" line or beyond.

For detailed installation instructions, including fastening requirements, please refer to our *ThruLOK Deck Post and Carrying Beam technical bulletins*. These instructions are included in all packaging as well as being available for download from our website. A design professional should be consulted for all other critical connections, to include the number and location of all fasteners to meet national and local code requirements.

ProjectLife™ Guaranteed:

The performance and corrosion protection of ThruLOK is guaranteed for the life of the project. ThruLOK is not recommended for use in saltwater applications.

FastenMaster MVP™

Multipurpose Wood Screw

Features:

- TORX® ttap® drive system wobble-free drive
- \bullet SureStart $^{\!\scriptscriptstyle\mathsf{TM}}$ Point for fast starts
- ProjectLife[™] Coating with superior corrosion protection
- SureSink[™] Head prevents spin-out
- For Framing, Cabinetry & More

Lengths: 1-1/2", 2", 2-1/2", 3", 3-1/2", 4"

Packaging Quantities:

100pc box, 250pc bucket, 500pc bucket, 1250pc bucket, 1600pc bucket, 2000pc bucket

Description:

The FastenMaster MVP™ Multipurpose Wood Screw has been designed for increased connection strength, durability, and corrosion resistance. The MVP fastener is IRC/IBC code-compliant and supported by an ICC-ES Evaluation Report ICC-ES ESR-5265 that can be found at FastenMaster.com.

The FastenMaster MVP delivers a best in category drive system coupled with superior corrosion protection. ProjectLife Guaranteed.

FastenMaster MVP Features:

Lateral Tension System[™] Code Compliant Lateral Deck Attachment

Compliance audited by

Features:

- Meets IRC lateral load requirements for decks
- Guaranteed galvanized
- No pre-drilling required
- No interior access needed to install
- Free bits in every package

Packaging Quantities:

Each kit contains:

- (4) Lateral Tension Brackets
- (4) Transfer Screws
- (32) Bracket Mounting Screws
- (2) Driver Bits

Description:

Lateral Tension SystemTM (LTS) is a complete kit designed to meet the newest code for transferring lateral deck loads. The International Residential Code (IRC) requires that decks be designed to withstand 750 pounds of lateral load in four locations along the ledger. LTS allows for attachment from the deck joist then directly to an interior sill plate, wall plate or stud – all from the outside.

| Lateral Tension System Selection Guide | | | |
|---|---------|--|--|
| Contents | SKU | | |
| (4) Lateral Tension Brackets, (4) Transfer Screws, (32) Bracket Mounting Screws, (2) Driver Bits | FMLTS-4 | | |

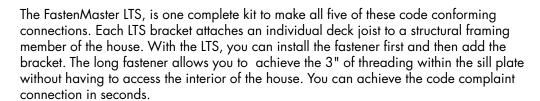

Installation Procedure:

The LTS is approved for the five most common installation conditions:

Condition A: Sill Plate or Wall Plate Behind Ledger

Condition B: Sill Plate or Wall Plate Directly Below Ledger **Condition C:** Sill Plate or Wall Plate 2" – 5" below Ledger

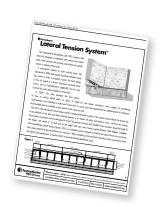

Condition D: Wall Stud in line with Deck Joist **Condition E:** Wall Stud between Deck Joists

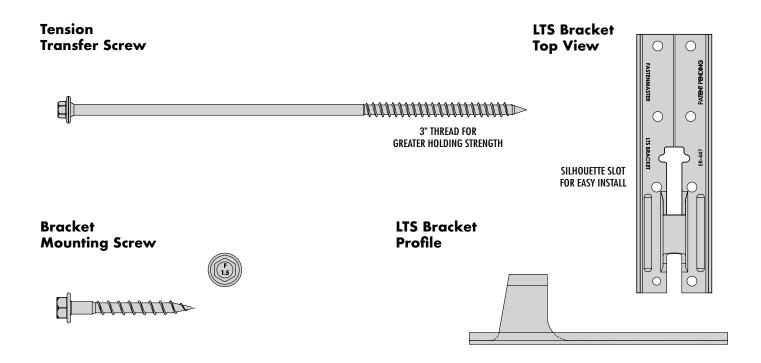

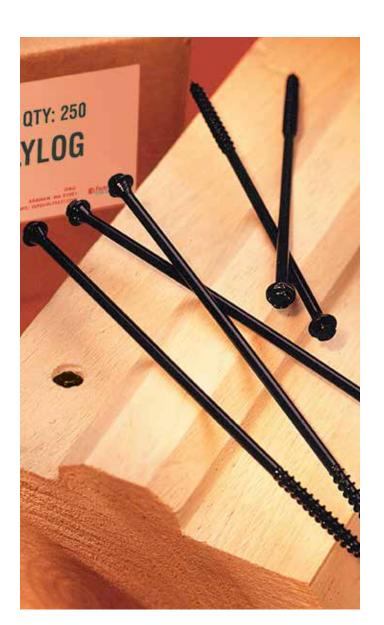

ProjectLife™ Guaranteed:

The performance and corrosion protection of LTS is guaranteed for the life of the project. LTS is not recommended for use in saltwater applications.

OlyLog® Log Home Fastener

Features:

- Installs faster and easier than lags and spikes
- No predrilling
- Draws warped logs down
- Removable and reusable
- Eliminates jarring and damage caused by a sledgehammer
- ProjectLife guaranteed

Description:

OlyLog is the original threaded log home fastener that requires no predrilling.

Installation Procedure:

Use a 1/2", high torque, low RPM drill. Install OlyLog perpendicular to the log. Countersink minimum of 1/4".

Lengths: 2-1/2", 4", 6", 8", 9", 10", 12", 14", 16"

Packaging Quantities:

LogHog® Heavy Duty Log Home Fastener

Features:

- Installs much faster and easier than lags and spikes
- Countersinks into log allows log to settle naturally
- No predrilling
- Removable and reusable
- Eliminates jarring and damage caused by sledgehammers
- ProjectLife guaranteed

Description:

LogHog is an extra heavy-duty log home fastener, engineered for specific log home construction applications. The LogHog, with its oversized head, thicker diameter and additional thread, offers increased draw-down and holding power. This fastener is corrosion resistant guaranteed.

Installation Procedure:

Use a 1/2", high torque, low RPM drill. Install LogHog perpendicular to the log. Countersink minimum of 1/4".

Lengths: 7", 9", 10" 11", 12", 13", 15"

Framing Systems

Drive productivity with tools and fasteners that make new construction more safe and efficient.

rafter tail to top plate and other critical building connections.

2019: FastenMaster created the NLB (Non-Load Bearing) Connector which was the first faster approved to replace top mounted clips when attaching non load bearing walls to resist lateral movement. NLB is the only fastener that can be installed from underneath without predrilling and comes with a unique friction-free sleeve that allows for vertical movement.

2022: TrussBRACE is the first truss bracing solution that includes both lateral and diagonal support in one connection. Set, Space and Brace in one easy step!

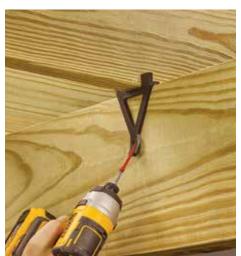

Frame Faster, Safer, and Easier with FastenMaster Framing Systems

For over twenty years, FastenMaster has delivered innovative structural wood-to-wood fastening solutions that increase installation speed and safety. We're driven by a relentless commitment to the professional builder. This PRO Driven focus is why FastenMaster is a trusted brand of framing contractors and structural design engineers. FastenMaster Framing Systems are designed to drive job site productivity by making new construction safer and more efficient.

| FrameFAST™ Structural Framing System |
|---|
| TrussBRACE™ Roof Truss Support. 45 • Set, space, and brace roof trusses in one easy step • Patented design provides both lateral and diagonal support • No need to remove prior to sheathing |
| NLB Connector™ for Non-Load Bearing Walls Installs 8x faster than channel brackets Accommodates up to 1-1/2" gap at the top of non-load bearing walls No predrilling |

FrameFAST™

Structural Framing System

Features:

- 5x Faster: Code approved connections are made in a fraction of the time verses installing a hurricane clip.
- Easy to Install: Featuring a TORX® ttap® drive and free alignment guide included in every package.
- ProjectLife[™] Guarantee: Performance and corrosion protection is guaranteed for the life of the project.
- Approved for use in exterior applications including pressure treated wood(ACQ). Not recommended for use in saltwater applications.

The FrameFAST Fastener:

FrameFast replaces common hurricane ties and is installed without the need for compressors, nailers, and hoses. The updated FrameFAST Fastener empowers PROs with the choice of using a standard impact driver or the award winning FrameFast Tool.

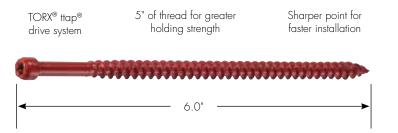

Lengths: 6"

FrameFAST Tools:

- Maximize safety and productivity with the FrameFAST installation tool.
- Make code compliant connections without the use of a ladder.
- 3 interchangeable heads ensure consistent installation of the fastener in a variety of continuous load path applications.
- Fully assembled tools complete with cordless drivers by Milwaukee and DEWALT
- Scan the QR code for more information and to see FrameFAST tool in action.

TrussBRACE

Roof Truss Support

Features:

- Set, Space, and Brace roof trusses in one easy step
- Patented design provides both lateral and diagonal support in one brace
- Enhance safety by remaining on the bottom chord of the truss during installation
- No more climbing up to the top of the truss to install bracing
- Easy to follow installation guide is provided in every box

Packaging Quantities:

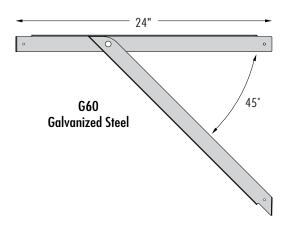

Box of (30) TrussBRACEs (24-in. O.C.)

Set, Space and Brace In One Easy Step:

TrussBRACE is a revolutionary roof truss support that's changing the way framers set trusses. The innovative design provides both diagonal and lateral stability in one application. Easy web member placement keeps workers standing safely on the bottom chord of the truss. Save time by skipping the prep work of cutting wood braces, and there's nothing to remove prior to sheathing. TrussBRACE saves time before, during, and after the truss set.

| | TrussBRACE Selection Guide | | | |
|------------|----------------------------|---------------|--|--|
| Quantity | Typical Applications SKU | | | |
| 30 per box | Roof Truss Installation | FMTBRACE24-30 | | |

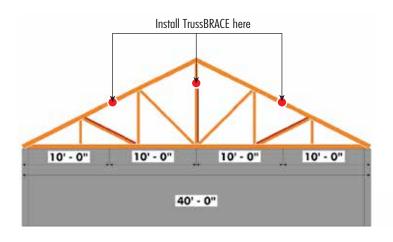

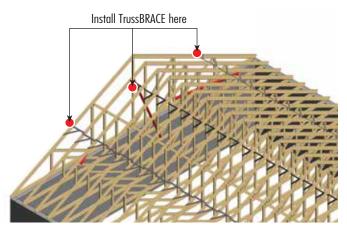

| TrussBRACE Spacing per Truss Span | | | |
|-----------------------------------|-------------------|--|--|
| Truss Span | Truss Spacing | | |
| Up to 30' | 12' on center max | | |
| 30' to 45' | 10' on center max | | |
| 45' to 60' | 8' on center max | | |

Simple Web Member Placement:

Refer to the TrussBRACE spacing chart above for general placement guidelines for temporary bracing. Remain standing on the bottom chord to maintain a safer center of gravity. When the top chord of the truss is too high to safely reach, install TrussBRACE on the web member at the desired spacing interval. Refer to the complete installation instructions by visiting FastenMaster.com.

NLB Connector

For Non-Load Bearing Wall to Truss Connections

Features:

- No predrilling
- Installs 8x faster than channel brackets
- Allows up to 1-1/2" gap between the top of non-load bearing walls and trusses / joists above
- Free drive/set tool in every package

Lengths: 6"

Packaging Quantities:

50pc box

Description:

The NLB Connector is the fastest and easiest way to secure the top of non-load bearing walls to trusses and joists above. This code-compliant connection allows for vertical deflection of the bearing members above, without transferring load into the interior partition walls below.

The NLB connector accommodates up to a 1-1/2" gap between the top of the wall and the bearing member above. This enables framers to use the same precut stud lengths as the bearing walls, and because there is no need to predrill, it's twice as fast as other non-load bearing wall connectors on the market.

| NLB Selection Guide | | | |
|-------------------------|-------------|--|--|
| Description SKU | | | |
| NLB Connector (50 pack) | FMNLB006-50 | | |

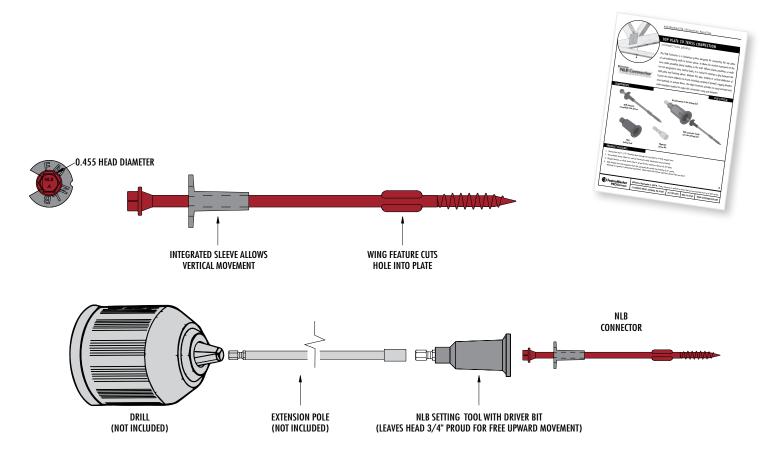

Installation Procedure

- 1. Attach the NLB Setting Tool w/Driver bit to an 18" driver bit extension pole (not included).
- 2. Insert the head of the NLB Connector into the magnetic driver bit.
- 3. Confirm connection locations based on plan drawings or refer to the Allowable Lateral Load Pounds per Connection table below.
- 4. Position the NLB Connector below the top plate of the wall such that it will drive through the wall plate and upward into the intersecting framing member above.
- 5. On the highest drill speed setting, drive directly upward through the wall plate and into the truss/joist above until the fastener automatically disengages from the driver bit.

| Allowable Lateral Load Pounds per Connection | | | | | | | |
|--|----------------------------------|------|------|------|--------|----------|--------|
| | Single Top Plate Double Top Plat | | | | | op Plate | |
| Мах. Сар | O" | 1/4" | 1/2" | 3/4" | 1-1/2" | 3/4" | 1-1/2" |
| Pounds | 290 | 250 | 220 | 190 | 140 | 210 | 130 |

- Loads determined through testing in accordance with ICC-ES AC13 and ASTM D-1761.
- Wood assumed to be SPF / Hem Fir or greater density.
- Applies to both F1 and F2 loading with a minimum 3-1/2" wide top plate and minimum 1-1/2" wide truss
- No increase allowed for short term load duration
- Assumes a minimum embedment of 1-1/4" into truss

PAMFast[™] Autofeed Fastening System

Features:

- 2-in-1 interchangeable length tool is a versatile whole home fastening system
- Smooth Advancement Technology delivers consistent fastening with no jams
- PAMMax fastener belt holds up to 40% more fasteners so workers spend more time driving screws and less time reloading
- Fasten subfloor and decking while standing comfortably or convert to a short tool for drywall, roof tiles, and more
- Fully assembled tools come complete with cordless screw guns by DEWALT and Makita

Description:

The smoothest, most versatile PRO grade screw delivery system is now available with cordless power. *PAMFast* tools come fully assembled with high power screw guns from DEWALT, Makita, or Milwaukee, or choose a kit that is specially engineered to fit your drill. All *PAMFast* tools include long/ short conversion pieces and are compatible with all genuine *PAMFast* collated screws.

| SKU | Compatible Motor | Power Type |

The Whole Home Fastening Solution!

PAMFast is a 2-in-1 interchangeable length tool. The removable extension pole enables easy long-to-short conversion for a variety of fastening needs. Fasten subfloor and decking while standing comfortably, or convert to a short tool to fasten drywall, roof tiles, and more.

AutoFeed Gun Features:

^{*}Batteries/charger sold separate **Kit only (no screw gun)

PAMFast[™] Autofeed Screws

Features:

- PAMFast Fasteners: Featuring PAMDrive 6-lobe recess for improved bit life and fewer cam-outs
- Drives productivity on the job site: faster installation and ergonomic, ease of use benefits
- PAMMax fastener belt holds up to 40% more fasteners so workers spend more time driving screws and less time reloading

Packaging Quantities:

50 screws per strip, 1,000 screws per box

Delivering PRO Driven Service Nationwide

Hands-on Jobsite Support for PROs

By offering hands-on product training, on-site technical support, and tailored solutions, we aim to establish a strong partnership with PRO contractors. We understand the unique challenges faced by contractors and aim to provide the necessary support and resources to help them succeed on their jobsites.

Dealer Training and Merchandising

We strive to establish valuable partnerships with our retail partners by offering comprehensive support via our dedicated field sales team such as on-site product training and dynamic merchandising setups. Our strong relationships with PRO contractors helps our dealers to maximize their sales potential and deliver a positive customer experience.

New Construction Engineering Team

Our engineering team is committed to providing unparalleled support to building designers and engineers, offering direct assistance and technical expertise. Plus, our Building Connections field team collaborates closely throughout the entire design and construction process to facilitate successful project execution.
