

CavitySlider® Pocket Frame

The **CS Cavity Slider®** is a practical solution for those areas where there is not enough space for a swinging door. Unlike other pocket systems, the CS Cavity Slider® is structurally robust due to its construction from aluminum extrusions.

This product is supplied as a kitset and is easy to assemble and install. The pocket frame accommodates 1-3/8" and 1-3/4" doors (35mm and 44.5mm) up to 4'0" x 8'0" (1220 x 2438mm) and can be cut down to size on site.

The CS Cavity Slider® is suitable for residential and commercial projects as it meets Type 1 construction code without any combustible materials. In addition to its space saving attributes in restrooms, hallways and laundries, it can be used with confidence for architectural feature openings around your project.

CavitySlider® Ultimate Pocket Frame

The **CS Cavity Slider® Ultimate** is the gold standard for pocket frames. It is the largest and most robust manufactured pocket frame on the market. It is constructed from aluminum extrusions to ensure structural integrity.

This product is supplied as a kitset and is easy to assemble and install. The pocket frame can accommodate 1 3/8" to 2 1/4" thick doors up to 5'0" x 10'0" (1524 x 3048mm) in size and can be cut down on site.

The CS Cavity Slider® Ultimate is made to suit a 5-1/2" stud size but can be furred out to suit wider wall conditions. The CS Ultimate is suitable for residential and commercial projects as it meets Type 1 construction code without any combustible materials.

CavitySlider™ Pocket Frame

CavitySlider™ Ultimate Pocket Frame

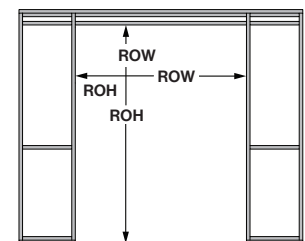

Standard CS Track Features

Our engineers focus on constantly developing new products and refining existing ones. That's why our products come with a number of unique features:

- 1 Heavy duty one-piece extruded aluminum track.
- 2 Minimal clearance means the carriages/wheels cannot jump off the track or jam.
- 3 Large diameter wheels with precision ground bearings make for smooth running.
- 4 Radiused track reduces friction and allows dust to be pushed into the gutters so the door always slides smoothly.
- 5 M8 body made from cast stainless steel for strength and reliability. 4-wheel carriages are standard on all doors over 200lb.
- 6 CarriSnap™ quick release system allows the door to be removed easily from the track; no need to unscrew anything and lose door height adjustment.

Rough Opening

DH = Door Height
DW = Door Width

Dimension	Calculation
RO height	DH + 4 1/4"
RO width - Single	(DW x 2) + 2"
RO width - Bi-Parting	(DW x 4) + 2"

1. **Choose Size:** Frames can be cut down on site. Maximum size for each model shown below:
