Cladding and decking

Natural wood
Made to last

We deliver more than just wood.

Kebony, a Norwegian company, pioneers wood innovation with Dually Modified™ wood technology, offering a durable alternative to hardwood, trusted by architects for over two decades. Known for its hardness, stability, and a 35-year warranty Kebony wood evolves from rich brown to a natural silver-gray patina over time. Widely chosen for cladding and decking, Kebony products offer a sustainable solution for many outdoor applications worldwide, ensuring longevity for up to 35 years. Kebony, your first choice in innovative and sustainable wood.

Dually Modified™ wood

Kebony revolutionizes wood enhancement through a patented technique that significantly boosts strength and longevity. This innovative process involves the impregnation with a biobased liquid, triggering two pivotal actions within the wood cell simultaneously.

Active Modification The biobased liquid actively engages with OH-groups in the wood, reducing water sensitivity and enhancing **durability** against environmental factors.

Passive Modification Simultaneously, the biobased liquid creates a polymer that serves as reinforcement, directly contributing to increased **strength and hardness** while giving a distinctive brown color to the wood.

Dually Modified™ Process The combination of active and passive modification, known as the unique Dually Modified™ process, allows Kebony to go beyond tropical hardwood performance in a sustainable way.

At Kebony, trust is our foundation.
With Dually Modified™ wood, we turn nature's wonders into lasting masterpieces.

One technology, two architectural styles

Different projects call for different solutions.
Kebony offers two finishes that each tailor to a distinctive look.

Kebony Character

Kebony Character offers wooden boards with a rustic flair. It is made from FSC® certified Scots pine. The boards can be cut to length; the ends should be sealed.

Kebony Character evolution over time

Kebony Clear

The discreet knot-free grain of Kebony Clear produces an overall harmonious appearance. Made from FSC® certified Radiata pine, it is fully impregnated, making it as durable and strong as any hardwood.

Kebony Clear evolution over time

Kebony Clear Decking

Sourced from FSC®-Certified forests, our Kebony® Clear decking is engineered to handle the harshest of conditions. The rich brown color and clear grain are designed to impress, while hardwood-like durability and a 30-year rot & decay warranty provide supreme peace of mind. Whether you maintain the original color or let Kebony Clear naturally patina, your project will amaze for decades to come.
