Unique grains tell unique stories

Walnut is one of the most valued and versatile wood species available. Deeply rooted in Europe's cultural history, this elegant wood species is treasured for its close ties to art and craftsmanship.

Today, walnut is known for its intense colours ranging from light brown to dark chocolate brown, often with a subtle purplish hue. These coveted tones and complex grain patterns seamlessly fit into an organic, warm interior design.

NUXE: YOUR CANVAS FOR ANY DREAM INTERIOR

This collection includes matched panels, sheets, and edge banding. Regardless of a project's technical requirements, any design is possible.

Nuxe is an unfinished collection, allowing you to finish it according to your preference. Would you rather use oil for a natural flair, varnish for its protective properties, or change the undertone through staining? The choice is yours. Nuxe is your canvas.

GET INSPIRED

You're the visionary, and we'll inspire you. Discover a realm of possibilities and experience the timeless beauty of walnut as an elegant and contemporary alternative to the classic oak.

The advantages of Nuxe

WALNUT MADE EASY

Walnut has a rich colour palette and complex grain pattern. This hand-selected collection presents easy and consistent looks within the endless variety of walnut. Through our mixmatch jointing technique, we achieve a uniform look across a large number of panels.

Every look is available as panels, sheets and edge banding to cater to all applications for your project.

UNRIVALLED DIVERSITY

Nuxe brings walnut into uncharted territory. Your standard book and slip-matched walnut veneer are a thing of the past. The entire tree, from core to sap, is showcased in all its splendor through mixmatch techniques. There are no monotonous colours here; instead, a full range of possibilities offers itself, from natural variations to new, dyed undertones.

Travel with us and discover local walnuts. Get to know the West African dibétou with its warm, golden glow or the dark, earthy tones of a Brazilian ipé. Nuxe will surprise you in every possible way.

SUSTAINABILITY FROM WITHIN

Placing other wood species in the spotlight relieves the pressure on highly coveted wood species, such as oak.

We aim to utilize every part of the trunk and therefore reduces waste to a minimum.

The wood for the Nuxe collection is sourced from responsibly-managed forests. After all, proper sustainability starts in the forest.

Naturals

The Naturals: for those who want to be their true selves.
Quiet or extravagant, a creative or an old soul... Whatever you
choose, the Naturals allow you to be yourself.

Product overview

Nuxe combines the beauty of walnut with the look of solid wood. Available in 9 looks, with focus on consistency in every sheet. Choose the finish of the panels, flex and edge banding yourself.

Top-notch top layer

The top layer of the Nuxe panels consists of an expertly crafted sheet of wood veneer. Every sheet is composed using our mixmatch technique, yielding unrivaled perfection and uniqueness.

What is mixmatch?

Mastered over decades, this signature technique provides an uniform surface. Various slicing techniques are applied to select timber cuts from different trees, which are then joined together into a sheet. Each panel is characteristically unique to solid wood without visual inconsistencies or structural compromises.

Which version should you choose?

Nuxe panels are available in 2 versions: A/A and A/B.

Both sheets in the A/A version have the same look and high-grade quality. This version is your best choice when both sides of the panel are visible.

In the A/B version, the front has the selected look and high-grade quality. The back is made of the same wood species as the front, without a specific cutting pattern, but assembled using the mixmatch technique.

This mutes the veneer's distinct characteristics, making this version perfectly suitable for wall and furniture applications where the back is less visible. On the next page, you'll find an overview of all available versions.

How to finish the Nuxe panels?

Nuxe is a collection of pre-sanded panels, flexes, and edge banding that allow for further finishing. It is important to sand the panels again before finishing to achieve the desired roughness and facilitate the finishing process.

The collection can be finished with varnish or oil. The wood can also be stained prior to finishing. We recommend following the instructions of the varnish/oil supplier for further finishing.

You will find further finishing instructions on our Nuxe website.

Nuxe panels

HIGH QUALITY PANELS, FROM CORE TO SURFACE

Nuxe panels consist of a veneered front and back, as well as an 18 mm thick MDF board. A veneered panel should always have a counter layer to achieve proper stability. The possibilities are listed in the table below.

Other boards and dimensions are available upon request.

(10' x 4' x 1/32")

Nuxe flex

WALNUT WITH UNPARALLELED FLEXIBILITY

Nuxe Flex is an easy-to-process jointed sheet of veneer. The veneer sheet is first pressed onto a paper backing in the shade of the chosen look, upon which the wood fibers are broken. This results in a highly flexible veneer sheet with a 50 mm bending radius.

The top layer is bonded to the paper using a formaldehyde-free glue. There is no patching for Nuxe flex (Heritage).

Applications: curved surfaces, doors, pressing onto other substrates...

Veneer 24 or 48 mm x 100 m
(15/16" or 1-7/8" x 328 ft)

Nuxe edge banding

THE PERFECT EDGE FINISH

Nuxe edge banding is available in 2 widths, for all looks, assuring a refined finish to your interior.
