

Uniboard®'s **MDF** Meets Every Need!

MDF Product Portfolio

Eco-Friendly.

Produced from recycled wood fibers.

Produced from 100% recycled and recovered wood fibers, Uniboard®'s MDF panels are eco-friendly. They are carbon neutral because the fiber particles encapsulate CO₂ that would otherwise remain in the atmosphere.

Uniboard® also manufactures its own resin, resulting in a **superior MDF product.**

Nothing Compares to our Fiber in North America!

Uniboard® was one of the first in North America to introduce Super Refined MDF, setting a new benchmark for precision and quality.

Our advanced MDF panels are engineered to meet the highest standards, offering unparalleled smoothness and consistency for a flawless finish.

Our secret component: Black Spruce Fiber.

Black spruce is a wood species known for its strength and homogeneous texture, which contributes to the quality of MDF panels.

Black spruce fibers provide uniformity in panel density and texture, beneficial for manufacturing high-quality finished products.

In addition to its strength, black spruce is also prized for its lightness, which facilitates handling during production and transport. This unique combination of lightness and strength allows for the creation of durable yet versatile MDF boards, ideal for a wide range of applications in construction and design.

The First North American MDF Mill to install a continuous press.

- **1987**
First North American MDF mill
to install a continuous press.

- **1988**
Construction of the Unires factory to
produce our own resin.

- **1996**
Uniboard® maintains its leadership position
in MDF in North America with production of
150 million sq ft per year.

- **2019**
Uniboard® adds a wood fiber dryer with
innovative technological expertise in clean air
and greenhouse gas reduction, thereby
reducing the company’s CO₂ emissions and
increasing production capacity.

- **2020-2025**
Uniboard® develops five new
specialty grades of MDF to become
the North American leader.

We have a strong history **since 1989** of producing high quality MDF to support our clients’ growth.

Uniboard® is the only North American owned manufacturer to offer thermally-fused laminated MDF in more than 160 colors and 15 textures.

We offer one of the most
Comprehensive Lines of MDF.

Over the past several decade, we have added to our portfolio of **specialty MDF products**. Our Excel+® and now Excel+® MAX are benchmarks in the industry against which high routing boards are judged. Our excptionally broad range of matrix sizes across all grades allows for complete truck or railcar loads with an assortment of MDF products.
