## WHY CHOOSE SAGIPER?

For over 30 years, SAGIPER has been dedicated to creating architectural building products that stand the test of time. Established in 1994, we set out to redefine modern materials through performance, durability, and design integrity. Today, we support architects and builders worldwide with systems engineered for lasting impact.

SAGIPER is the original pioneer of dual wall, heavy gauge, fire rated high performance polymer siding, soffit, and ceiling systems. Born in Europe, we set the standard by combining fire performance, durability, and refined woodgrain aesthetics. We didn't follow the category. We created it.
