

BASINS

Wash Basin Knee Operated - Type 2

Stoddart designed and introduced the Knee Operated Wash Basin with the full front knee operated panel to provide easy access to hygienic hand washing. A simple nudge with either your left or right knee or thigh activates the timed water flow.

The standard unit comes with a shroud, designed to allow disabled access as defined in AS 1428.1-2001.

With the optional Tempering valve, this basin meets AS 4674 for the design, construction & fit out of food premises.

Models:

SPPL.WB.KO2.xx

Code explanation:

SPPL = Standard Product Plumbing
WB = Wash basin
KO2 = Knee operated, with lower plumbing shroud
300 = 300mm splashback
xx = TV - tempering valve
eg.: for specification and ordering
SPPL.WB.KO2.300.TV

Mixing Valves:

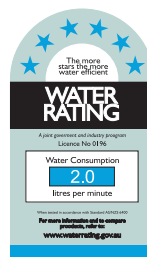

TV
Tempering
Valve

Features and Benefits:

- Full front panel Easy Push button can easily be activated with either left or right knee for hygienic hands free use.
- Timed flow valve provides effective hand washing and saves water.
- Security bubbler has WELS 6 star rating and is preferred by councils for use in public areas due to its extra vandal resistance.
- Sturdy stainless steel construction ensures lifelong service.
- A 300mm splashback can be ordered with the unit for easy installation and to comply with plumbing requirements of most authorities and removes the need for tiling.
- Optional tempering valve can be supplied, loose
- Easy mount single piece stainless steel bracket has multiple fixing holes for a quick installation by plumber.
- Stainless steel shroud fully encloses plumbing for additional hygiene and security and prevents unauthorised tampering with plumbing fittings.
- Complies with AS 1428.1-2001 for disabled access.

Suitable for use where disabled access is required
