

MAJOR PROJECT

# OAKBANK BOULEVARD TIMBER PARK

# TOWN&PARK

As part of a \$440k upgrade of the Oakbank Boulevard park and playspace, designed by CDA design group for the City of Whittlesea, Stoddart were engaged to supply a centrally located picnic shelter and picnic settings to the project. Stoddart designed, engineered, and fabricated the custom timber wave shelter to suit a 6x6m covered area, as well as providing two Town & Park Metro table settings.

Featuring hardwood timber construction with galvanised steel framing and a timber shade screen, the shelter outcome and associated furniture will stand the test of time in what is already a popular park and playspace.
