

MAJOR PROJECT ONE THE WATERFRONT

Stoddart Town & Park worked closely with Urbis Landscape Architects and Piety THP to design and manufacture a series of shelters for a new waterfront residential development – One The Waterfront, in Sydney's Wentworth Point.

The custom double sided shelter's design is inspired by butterflies, with curved wings raised either side of a central post structure. The shelters form part of a large open space playground which also includes Town & Park seating and picnic settings to enhance the community recreational space.
