

PARKSHELTER
 The shelter originally specified didn't allow space around the furniture and barbeque for wheelchair users. We designed a new shelter, removing the three centre posts to create circulation space and chose a stronger species of timber to accommodate the increased spans of the new design. Problem solved!

DBFS FOUNTAIN

Developed by Town & Park over a twelve month period, the DBFS is the best drinking fountain on the market. Every aspect of the DBFS has been designed from scratch to address accessibility issues. Custom finishes are available and all working parts are stocked in our warehouse making maintenance a breeze.

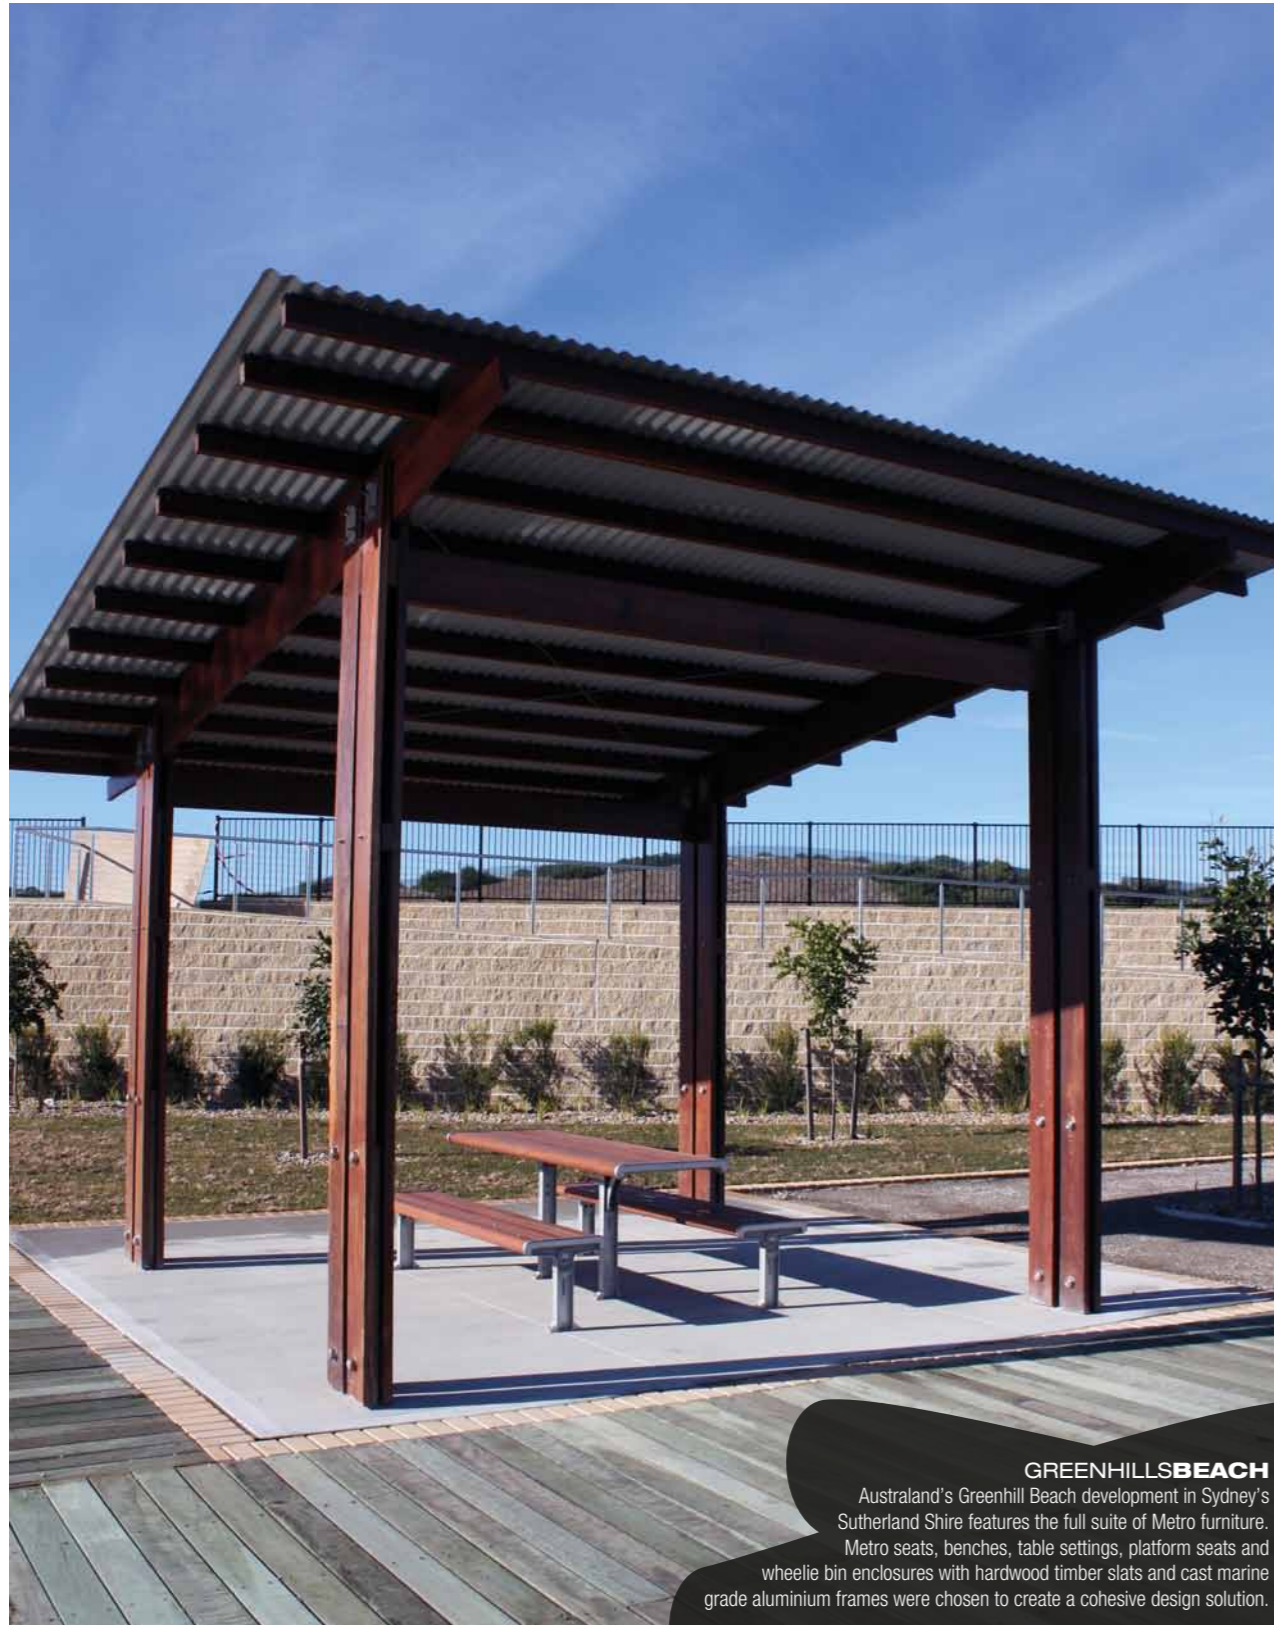

PARK PERGOLA

Town & Park's successful redesign of the park shelter resulted in a request to also supply the pergola structure. We chose FSC Certified Durability 1 hardwood for both the shelter and pergola, meaning streamlined manufacture for us and the provision of vastly superior structures for stakeholders and park users alike.

PARK BBQ

As with the shelter, the BBQ originally specified wasn't suitable for wheelchair users; Town & Park were asked to provide a solution. We designed and fabricated a cantilevered benchtop with safety guards on the side and rear elevations; allowing wheelchair users to get up close and personal with the kingsize hotplate.

GREENHILLS BEACH
 Australand's Greenhill Beach development in Sydney's Sutherland Shire features the full suite of Metro furniture. Metro seats, benches, table settings, platform seats and wheelie bin enclosures with hardwood timber slats and cast marine grade aluminium frames were chosen to create a cohesive design solution.

METRO SETTING
 The Metro Table Setting features marine grade aluminium frames with aluminium or timber slats. The modular design allows up to 4.0m in continuous timber slats and up to 6.0m with aluminium slats. Options include edge guards for deterring skateboard damage and umbrella sleeves for the tables.

CITY SETTING
 The City Table Setting features marine grade aluminium frames with aluminium or timber slats. The modular design allows up to 3.0m in continuous timber slats and up to 6.0m with aluminium slats. Options include edge guards for deterring skateboard damage and umbrella sleeves for the tables.
