

Adobe Photoshop CS6 Syllabus

October 2015

Instructor Information

Instructor(s)	Email	Office Location & Hours
1. Mahira Hadzic	mahira@purplematrix.co.uk ,	Bosmal City Centre, 09:00-17:30h
2. Sanela Babic	sanela@purplematrix.co.uk	

Instructor's Biography

Mahira Hadzic is born in Tuzla in 1990. She graduated at International University of Sarajevo in Computer Science and Engineering. During her studies she worked as a part time retoucher in Purple Key. After the graduation, she became full time member In Purple Key. Today, she is Operation Manager in this creative agency, working with clients mostly from USA, UK, Australia and the region.

Sanela Babic is young and talented Photographer and Designer. She studied Design and Multimedia at IT Academy in Belgrade. She worked as a Freelance Photographer and part time retoucher. Today, she is a Team Leader of Photography department in Purple Key. Her master skills next to the Photography are also creating photo manipulations, designing and high end retouching.

General Information

Adobe Photoshop is the premiere image manipulation tool for print design, Web design, and photography. It's a must-know if you're planning to work with photos or design projects at any level. It's not just for digital artists any more, it's for anyone who creates web pages or presentations - or who has ever taken a picture. Everyone should know how to create, enhance or change an image, or create amazing effects. Photoshop was originally designed for editing print images and has since morphed into the industry standard for so much more. It's not just for digital artists any more, it's for anyone who creates web pages or presentations - or who has ever taken a picture. Everyone should know how to create, enhance or change an image, or create amazing effects.

Expectations and Goals

This course shows you how to use Adobe Photoshop to perform many different image processing techniques. In this course, you will learn how to use several tools for selecting parts of images, and will move, duplicate and resize images. You will learn to use layers, layer effects, filters, painting and blending, and color modification. Also, you will learn how to create images of different formats for different applications.

You will gain a great knowledge of Adobe Photoshop CS6 features such as the workspace, brightness, curves, transparencies, color, smart filtering masks and much more. It will enable you to edit pictures using different tools in Photoshop, such as move, lasso, pen, quick selection, crop, eraser, gradient, blur, sharpen and much more. This will give you a great knowledge of the significant changes that can be applied to a picture to make it more effective for the purpose intended. Additionally, this course will introduce you to more advanced features of Photoshop such as unlocking layers, creating banners, art work, curves, digital enhancements, brush dynamics, graphics and many more interesting features.

Course Materials

Required Materials

- Adobe Photoshop CS6

Course Duration

4 weeks, 16 hours

Exam Schedule

Date	Subject
17.10.2015. Hub387	Adobe Photoshop CS6

Additional Information and Resources

Common practice always has advantages over theory, which seems to have all the answers, and which, as a rule, fails facing obstacles caused by real tasks. Therefore if you have a desire to master your skills, broaden and enrich your experience as well as increase your potential you should refer to exercises.

There are plenty of tutorials you can follow to master your skills and here are only some of them:
