

PERSONAL STATEMENT

I'm a 30 year old designer currently based in the San Francisco Bay Area. I love everything about the design process, from finding inspiration, breaking down the problem, targeting the user, to creating the proper visuals and testing the product. Career-wise, I've cut my teeth all over the design process, and these days am focusing on rapid prototyping with tools like Flinto and Framer.

Currently on the hunt for my next opportunity, be it involved with product design or UI/UX. I'm a bit of a jack of all trades willing to pick up the tools of the trade. I'm also open to design challenges to show skills.
