ABOUT ME

My name is Igor Rinkovec and I am a backend engineer from Croatia with a passion for exploring new technologies and ideas. I am focused on creating modern and maintainable web solutions that will be of service to my clients for years to come.

With industry experience working on applications that serve several hundred million users monthly I know exactly how to avoid common mistakes which lead software projects to failure.

REFERENCES

"The project was done very quickly and he communicated very well during the entire process. He was able to think of a smart and efficient way to do the job."
Chris Finke

"Igor is an excellent developer! Very easy to work with and will take the time to get the exact look you're going for. Will definitley have an ongoing working relationship with Igor going forward."
Devon Burroughs
