San Francisco, CA

Projects

Full-Stack Developer [Ruby on Rails, ReactJS]

www.runnr.site | [Live](#) • [GitHub](#)

Web application for users to create and complete running routes in San Francisco.

- Leveraged Google Maps API to generate waypoints and polyline paths, and save generated routes as custom URL links.
- Utilized ActiveRecord calculations and relations modules in queries to eliminate storage of excess tables and columns in database.
- Architected React lifecycle methods to maintain single-page web application using AJAX requests to RESTful API.

Sole Developer [Node, JavaScript]

Audio Bot | [GitHub](#)

A Slack bot that responds to messages with audio clips, including custom voice recordings

- Used Node.js to communicate with Slack API and play a designated audio clip if a message's text satisfies certain parameters.
- Made use of Slack's internal remind command to set daily audio greetings.
- Allowed users to import or record their own custom sounds to use on their own bots.

Sole Developer [Javascript, jQuery]

NBA Player Lookup | [Store](#) • [GitHub](#)

A Google Chrome Extension that fetches an NBA player's current season stats and displays them on any webpage.

- Web-scraped data from a public basketball statistics webpage using jQuery.
- Implemented logic to display errors for inactive players and duplicate names.
- Extension creates new div element on current web page and updates with user input.
