

# CESAR RAMIREZ

New Jersey | 862.201.9999 | [c.ramirez@programmer.net](mailto:c.ramirez@programmer.net) | [LinkedIn](#)

Dev lead with strong technical skills and foundation in agile development. Passion for computer science, emerging technologies and mentoring future programmers. Effective communicator, strong analytical and problem-solving abilities. Experience managing offshore teams and presenting to non-technical audiences. Stints include technology, finance and education.

## EXPERIENCE

### Front-end Developer — ProSight Speciality Insurance

*May 2018 - Present*

Partnered with product team to prioritize and deliver user-facing products and application features. Provided management with estimates and timelines on build-out of future products.

Developed efficient and reusable front-end systems that drive complex web applications.

Identified and resolved performance and scalability issues. Recommended alternate solutions for optimization and improved user experience.

Established client-side coding guidelines, prioritized product backlog to meet sprint goals and led design and requirements planning sessions.

### Technical Lead & Web Developer — Verizon

*June 2014 - May 2018*

Drove adoption of process automation, agile application development and shorter development cycles across corporate technology portfolio.

Managed migration from Drupal 7 to Drupal 8: educating technical teams on new tools and re-building custom modules to create a better user experience.

Developed an exclusive wayfinding application for NJ/NY offices with planned rollout across U.S. offices (winning hackathon project).

Developed responsive enterprise web applications and APIs using HTML5, CSS3, jQuery, AngularJS, NodeJS.

Built a custom Drupal module to lead enterprise-wide migration of 100K articles from legacy systems to create efficiencies and a better user experience.

Trained offshore teams on OWASP secure coding standards and top web application security risks.

### IT Specialist — New Jersey Institute of Technology

*September 2012 - February 2015*

Provided software support for 12K+ students and faculty members. Managed website software availability and functionality.

Created and improved webpages for NJIT division using PHP, JS, HTML, CSS and Drupal.

Responsible for accurate and smooth system integration from Sitestudio to Drupal. Ensured that pages and PHP scripts functioned properly.

Created and tested software packages on native devices and virtual machines.
