# datacate™

SJC1 – SANTA CLARA, CA DATA CENTER

INTERCONNECTION TO MULTIPLE ON-NET CARRIERS

SHARED AND PRIVATE CABINET SPACE

SPACIOUS LOBBY, ON-SITE AMENITIES

We at Datacate are pleased to offer enterprise-class services at our latest California bay area location: Internap on Mission College Blvd. The facility offers high power densities, room to grow, and redundancies designed to keep your Internet presence online 24x7.

Located in the heart of Silicon Valley, the Santa Clara location is fed by dual power grids, and can handle up 18kW per cabinet/rack. N+1 redundancies for backup generators, UPS and cooling serve to maximize environment uptime. The Santa Clara data center has been awarded LEED, ENERGY STAR and Green Globes certifications for energy-efficient design. Site amenities include office space, technical workspace, and a full-service lounge.
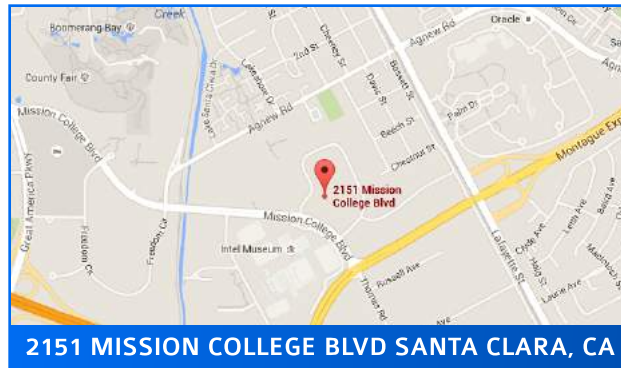

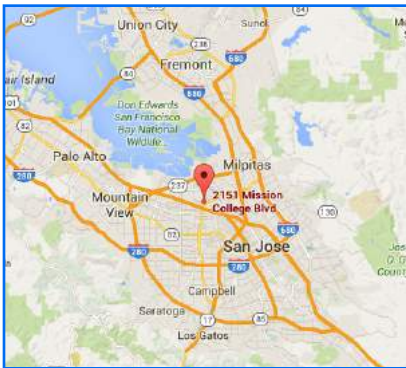

Datacate offers a multi-homed carrier blend at our Santa Clara location, featuring Level 3 and Cogent Communications. We'll provision your colo with multi-homed IPv4 and IPv6 address space from our own allocations, or you can bring in your own direct allocation(s), and we'll either advertise them for you or provide you with a BGP session so you can control your own announcements.

In addition to our standard bandwidth blend, the following carriers are available at the facility: Abovenet (Zayo), AT&T, Cogent, Global Crossing, Inteliquent (Tinet), NTT, Savvis, SVP Fiber, Telia, Level 3 and Verizon.

- **24x7 support staff and Remote Hands**
- **Power fed from dual substations, generator and UPS backup**
- **N+1 cooling redundancy**
- **Multiple carriers on-net for dedicated drops if desired**
- **Additional bandwidth available as needed**
- **24x7 manned security, digital video monitoring and recording**
- **Biometric and key card access control system**
- **24x7 physical access**
- **SOC 2 Type II and HIPAA compliant**

2151 MISSION COLLEGE BLVD SANTA CLARA, CA
