

#### **Data Center**

# **MILWAUKEE**

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility in the heart of Wisconsin is part of a nationwide network of data centers with a shared commitment to:

#### I. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

#### 2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance including the establishment of a national office to define and deploy best practices to serve client needs.

#### 3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and who have the technical expertise and desire to help clients achieve their business goals.

# DATA CENTER HIGHLIGHTS

- Diverse underground power feeds
- Fiber building entry—three conduit entry points and three different underground exterior conduit pathways beyond the property line
- Redundant, private IOG connectivity to multiple TierPoint data centers and a local carrier hotel
- More than 100 custom and pre-configured workspaces for clients to use during outage at their facilities
- Two separate data centers with separate equipment and power sourcing within the same campus
- Physical security features include mantraps, biometrics readers and video surveillance
- High-efficiency cooling systems to reduce carbon footprint
- Two additional TierPoint facilities located within 90 miles (Chicago-West and Polk Street in Chicago)—both on separate power grids and served by separate utility companies

The Milwaukee data center is a safe, secure facility audited under SSAE 18 SOC 2 Type II, PCI-DSS\*, GLBA, and HIPAA standards annually and is ITAR and EU-US Privacy Shield registered.

<sup>\*</sup> PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.

## **Milwaukee Data Center Specifications**

## **Facility**

- 26,500 total sq. ft. with 7,800 sq. ft. gross raised floor space
- Ideal regional location with low risk of natural disaster
- Located five miles from downtown and I0 miles from airport
- Building set back from the road with iron-fencing barrier
- Guest office, break room and conference room facilities available
- Dedicated spaces for electrical equipment, data halls, carriers/telecom, equipment storage, staging and loading docks
- 6kW per cabinet capacity

### **Security**

- Stringent pre-screening and education process for access requests
- Photo, fingerprint and ID validation required for physical access
- Badge readers, biometrics and mantraps throughout the facility
- Video surveillance in all critical areas and in each row of the data halls with 90-day retention
- 24/7 monitoring of access control and video surveillance systems
- All system and environmental alerts managed by TierPoint's 24/7 Operations Centers

#### **Power**

- · Diesel generator with over 24 hours of runtime
- N+I high-efficiency UPS with redundant battery strings
- Redundant (A+B) power distribution to each cabinet available
- Power metering and utilization reporting by circuit, cabinet and room

#### **Network**

- Wide array of carriers built into the facility and connection to local carrier hotel
- Diverse entrance pathways to carrier-neutral meet-me room
- Internet, MPLS, Ethernet, optical wave, point-to-point and dark fiber services available
- Redundant core routing and switching infrastructures
- Guest wireless available

#### **Connectivity**

On-net carriers

- AT&T
- CenturyLink
- Charter Spectrum
- Midwest Fiber Networks
- Spectrum Networks
- Wisconsin Independent Network
