

Data Center

OMAHA - BELLEVUE

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility, located in Nebraska, is part of a nationwide network of data centers that share our commitment to:

1. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance including the establishment of a national office to define and deploy information security best practices.

3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and have the technical expertise to help clients achieve their business goals.

DATA CENTER HIGHLIGHTS

- Located outside a 500-year flood plain, the facility's external perimeter is reinforced with 18-inch-thick poured concrete
- 21,700 sq. ft. of total raised floor space
- Support for high-density power requirements
- Data center suite compartmentalization
- Low electrical rates
- Redundant power and cooling features, including a catcher bus design to prevent disruptions, N+1 DX CRAC units in every suite and a static transfer switching system to help facility run for several days, independent of public power
- Strong support relationships with local Eaton and Emerson/Liebert staff
- Interconnected with TierPoint's Midlands facility
- 24/7 on-site security personnel and help desk services
- Two (2) diversely routed utility feeds from independent substations

TierPoint's Omaha - Bellevue data center is a safe, secure facility that is independently audited annually under HIPAA, PCI-DSS*, SSAE-18 SOC 2 Type II standards.

* PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.
