

Data Center

SPOKANE - DC2

TierPoint helps your organization manage risk, drive performance and improve agility. Our state-of-the-art facility, one of two in Washington State, is part of a nationwide network of data centers with a shared commitment to:

1. Carrier Neutrality and Redundancy

By having many on-net carriers and by supporting cross connects to other carriers, you get access to the Internet bandwidth and connectivity services of your choice.

2. Security and Compliance

Equally important is a company-wide emphasis on security and compliance including the establishment of a national office to define and deploy information security best practices.

3. Responsiveness and Expertise

All of our data centers are supported by people who are passionate about client success, responsive to unique client requirements and who have the technical expertise and desire to help clients achieve their business goals.

DATA CENTER HIGHLIGHTS

- Safe geographic location more than 250 miles from major cities between the Cascade and Rocky Mountains providing low risk to natural disasters
- World-class infrastructure, built to enable production, business continuity and disaster recovery capabilities for critical systems and applications
- Redundant geothermal cooling technology provides incredible zero water consumption
- Diverse and redundant connectivity designed for independence from the main regional telecom carrier hotel with routes west, south and east of Spokane and a carrier-neutral policy with access to most local, regional and national providers
- A private I0G diverse path and carrier ring to Seattle enabling robust and flexible business continuity and disaster recovery capabilities
- Technologies, processes and people to meet stringent physical security needs for any compliance or regulatory requirements

TierPoint's Spokane - DC2 facility is a safe, secure facility that is independently audited under SSAE 18 SOC 2 Type II, PCI-DSS*, GLBA and HIPAA standards annually and are ITAR and EU-US Privacy Shield registered.

* PCI-DSS – Certification on PCI-DSS Requirement 9 & 12 (Physical Security and Information Security Policies) on data center (colocation) services. Colocation provides secure space, power, and environmental controls for merchants and service providers, some of which fall under PCI compliance. No logical access to any customer systems that may contain cardholder data.
