INAP

ABOUT INAP
EMPOWERING PURPOSEFUL, PERFORMANCE-DRIVEN IT TRANSFORMATIONS AT GLOBAL SCALE

We are a leading global provider of high-performance data center and cloud solutions. Through our portfolio of high-density colocation, managed cloud hosting and powerful network services, we partner with customers worldwide to create secure and scalable IT infrastructure solutions designed for the results they need today and the growth they expect tomorrow.

PERFORMANCE FOR YOUR PURPOSE

APPLICATION-DRIVEN SOLUTIONS ENGINEERING

We don't offer a full spectrum of infrastructure solutions simply for the sake of it. Certain workloads require different environments to fulfill their purpose. That's why our engineers adopt a best-fit solution architecture philosophy, tailoring recommendations to the needs of your organization's unique IT strategy and entire application list.

AUTOMATION FOR SPEED, RESILIENCE AND SCALABILITY

We develop cutting-edge automation technologies to help you deploy faster, achieve 100% uptime and get the absolute most from your IT infrastructure.

ALWAYS OPTIMIZING

The enterprise IT team of the future needs high-performing infrastructure but can't afford to spend their precious time monitoring and maintaining it. Our expert support technicians are dedicated not just to keeping your infrastructure online and secure, but to making sure it is always operating at peak efficiency.

Cloud, Colocation and Network Solutions tailored to the present and future of your IT strategy.

COLOCATION

INAP high-density Colocation is your destination for a performance-driven, secure and interconnected data center solution.

CLOUD

Private Cloud
Secure, compliant, scalable—deploy a best-in-class alternative to multitenant IaaS solutions, complete with managed services as flexible as you need.

Bare Metal
Industry-leading price-performance value with on-demand, custom configuration options.

DRaaS
Protect your most critical systems by replicating your environment on a secure INAP Private Cloud.

Cloud Backup
Secure, enterprise-grade storage for ultimate data protection.

NETWORK

Performance IP ®
Our proprietary route optimization engine guarantees the high performance and low latency your applications require.

Connectivity Solutions
Whether you need to connect to one data center or many, one of our POPs or a cloud service provider, our network has got you covered.

Content Delivery Network
Speed the delivery of applications to distributed audiences to enable better customer engagement and a sturdier online presence with INAP CDN services.

Managed DNS
Say goodbye to DNS latency with Managed DNS, powered by the same intelligent automation that drives the performance of our entire network.

MANAGED SERVICES

Managed Server Hosting
From single dedicated server deployments to complex, custom environments, INAP technicians can monitor and maintain your hardware and operating system with diligence and expertise.

Managed Security
Lock down your environment and protect against malicious cyber attacks. INAP is your remote Security Operations Center.

Managed Storage
Streamline your storage architecture and offload management to INAP with our powerful enterprise SAN solutions.

Remote Hands for INAP Colocation
Service First Support for Colocation starts with migration assistance and comprehensive remote hands services, so you can be confident that every task, no matter how small, is taken care of.
