

How it works

Help at the touch of a button

To call for help, simply press your pendant or your base unit's help button at any time. Blueassist's 24-hour monitoring centre will contact your support network, including carers, family members and ambulance.

Don't worry, even if you are outside or we can't hear you, we will follow your pre-agreed alarm response plan to ensure you receive the help you need.

Seamless connectivity

Blueassist operates on the mobile network, meaning no fixed line or nbn™ connection is required!

Our packages are compatible with a range of life safety devices, such as smoke detectors and seizure mats.

Durable, reliable, flexible

Whether you're at home, out and about, or working alone, there's a Blueassist package to suit your needs.

Lightweight, hot waterproof and impact resistant, our pendants are designed to be worn at all times, including in the shower and in the rain.

Choose a package and payment option that best suits your requirements and lifestyle!

you're in safe hands

	Personal emergency response system for use in and around the home, suited to those living alone, the elderly, and those with disabilities or chronic disease.	Sophisticated falls technology, designed for those prone to falls, including the elderly, those in post-operative care, and those with conditions such as epilepsy.	GPS mobile alarm solution, ideal for lone workers, isolated activities, and elderly or impaired users who want to venture beyond home with confidence.	Combines all the features of our Home and GO packages, suiting active users wanting protection at home and on the go, such as those living solo or in rural areas.

Notes

*Emergency help coverage and GPS location detection are subject to the availability of appropriate cellular coverage from a compatible network provider. For more information, please read our full terms of use available online at blueassist.com.au/terms-and-conditions or by contacting us on 1300 468 899.

How it works

Key Safe

Providing a strong, secure and convenient lockbox to keep spare keys outside, the key safe allows quick and easy access for emergency services.

Smoke Detector

Secure yourself and your home with a professionally monitored smoke detector. Twist-on base for simple self-installation, a generous 10-year lithium battery life, and linked to Blueassist's 24-hour monitoring centre via your base unit.

Fixed Call Point

Increase your safety at home with an additional wall-mounted emergency call button linked wirelessly to your base unit. Fixed call points are ideally suited to high risk areas where falls most often occur, such as bathrooms.

Extra Pendants

Protect everyone in your home by connecting extra pendants to your base unit. Add a standard Home pendant, available in either necklace or watch style. Alternatively, choose our advanced Falls pendant for frail users prone to falls.
