

Easy Assembly — CPU Caddy

Relax. Assembly is a breeze.

Tools Required

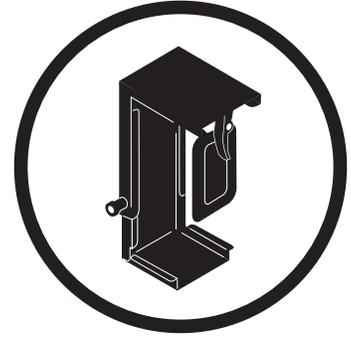

Phillips-head
screwdriver

Time Required

Your average
coffee break,
give or take

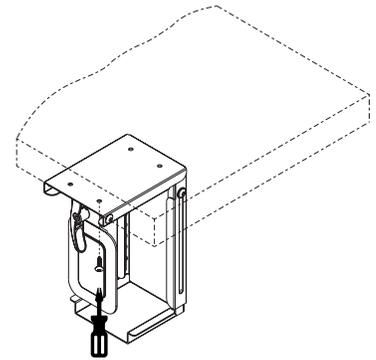

Note: Your CPU might look different than the one pictured. Don't sweat it. This caddy accommodates CPUs of various weights and dimensions.

Please review this page before assembling your CPU Caddy to ensure you have in your possession all the necessary parts, tools, confidence and cool.

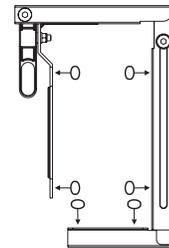

- CPU Weight: Up to 22 lbs.
- CPU Width: 2" - 4"
- CPU Height: 8" - 14"

No worries. This will be a piece of cake.

- 1 Fasten the CPU Caddy to the desktop using the screws provided. There are four factory-drilled holes in the desktop to help guide installation.

- 2 Remove foam pads from their backing and place them on the CPU Caddy as the illustration indicates.

- 3 Carefully position your CPU in the CPU Caddy, extending the arm and base as needed. Secure the CPU in place by tightening the lever.

- 4 Celebrate your handiwork with a second cup of coffee and another piece of cake. You earned it.
