Nucleus[®]

Seating

Comfort from the inside out.

Science, Meet Sophistication

Beauty and brains? Nucleus—task seating driven by exceptional engineering and smart support—checks all the boxes. Combining a modern aesthetic with meticulously researched ergonomic capabilities, this powerhouse performer puts science into seating. With a suspended contoured seat, responsive 4-way stretch mesh back, and thoughtful pressure mapping, Nucleus has done its research when it comes to all-day comfort and agility.

Shown with Empower® workstations.

Shown with 10500 Series™ desks, Workwall, and Build™ Makerspace table.

Intelligent by Design

Nucleus isn't your average, run-of-the-mill task chair. With a seat intentionally designed to operate like a hammock, you won't find yourself bottoming out unexpectedly throughout the day. The seat foam is molded over a mesh-covered frame, ensuring a responsive sit with comprehensive weight distribution. And with a contemporary back and arm design—plus adjustable lumbar available in variety of vibrant Colorwav™ hues—Nucleus is an aesthetic genius, too.

SEAT CONSTRUCTION

Inside the Nucleus seat, suspended knit fibers are stretched over a contoured metal wire frame with a light foam molded over top. Once upholstered, this ultra-slim seat provides lasting, supportive comfort.

PRESSURE MAPPING

When you sit in a Nucleus chair, the seat distributes your weight evenly, minimizing pressure points (red zones) for improved circulation and reduced muscle fatigue.

Nucleus Seat

Standard Seat with Pad

Shown with Voi® desk and credenzas.

Better Solutions, Better Work

Get focused with the task chair. Stay flexible with pivot-back guest chairs. Reach new heights of collaboration with task stools. Whatever you need, Nucleus has you covered. Making work life a little better, every day.
