LEARNING WITHOUT LIMITS

Designing dynamic environments that support autonomy, inspire engagement, and unlock potential. Learning Without Limits is built on a simple idea: education spaces should adapt to the people within them—not the other way around. When choice, movement, and well-being are built into the learning experience, students, educators, and administrators can engage more fully in their daily activities.

As you explore spaces and product solutions, keep an eye out for the Choose, Move, and Thrive icons. These markers will guide you to relevant insights and product highlights.

CHOOSE WITH CONFIDENCE

Promote comfort, posture, and focus so students gain ownership over how they learn—and educators have more freedom in how they teach.

MOVE WITH PURPOSE

Create settings that shift with the school day, encouraging individual focus, collaboration, and reflection with less disruption.

THRIVE WITH POSSIBILITY

Cultivate well-being, belonging, and connection so students feel supported and school communities can succeed.

SEE WHAT'S NEW

Discover fresh additions to HON's education portfolio that help schools create adaptable learning spaces built around choice, movement, and well-being.

NEW STUDENT DESK SHAPES

Build™—Learning Without Boundaries

Teachers work with irregular rooms, shifting group sizes, and students who need space to collaborate, focus, and move. Build meets that reality with desk shapes engineered to group without gaps, making it easier to reconfigure classrooms and support seamless transitions between learning activities.

NEW STUDENT SEATING

Scribble™—Comfort That Connects Students to Learning

Students move, shift, lean, and fidget throughout the day. Scribble supports that reality with a contoured form that adapts to different sitting styles, subtle sensory texture that helps students refocus, and durable materials designed to support active, engaged learning.

NEW MODULAR SOFT SEATING

Mosaic™—Pieced with Purpose

Mosaic creates comfortable settings for focus, collaboration, and connection. Modular pieces, varied back heights, and cleanable material options support everyday learning and in-between moments. Mosaic's curved angles coordinate with HON's Storyline storage collection for cohesive layouts across learning spaces.

NEW MULTIPURPOSE SEATING

Brim™—Form That Functions

Brim brings a clean, versatile look to the spaces educators use every day. Its one-piece shell, roomy bucket shape, and broad range of base and color options offer a welcoming sit for meeting rooms, cafés, breakrooms, private offices, and administrative spaces.

NEW MAXPROTECT EDGE

Build™—Learning Without Boundaries

The Build MaxProtect Edge expansion adds enduring strength where classrooms need it most, resisting chips, cracks, peeling, and daily wear so worksurfaces look better, longer.

CLASSROOMS

No two lessons, learners, or school days look exactly the same. Flexible, durable furniture helps classrooms shift from focused instruction to group work and back again, giving students more choice in how they learn and educators more freedom in how they teach.

CHOOSE

Classrooms that offer choice and flexibility empower students to take a more active role in their learning. By providing a variety of seating options, learning settings, and ways to engage, educators can support greater focus, participation, and confidence.

MOVE

Adaptable classroom environments empower educators to move easily between different teaching methods, giving students the opportunity to work independently, collaborate with peers, present ideas, and reflect on their learning.

THRIVE

Classrooms that prioritize inclusion and well-being create environments where every student feels comfortable, supported, and ready to learn. By considering different needs, preferences, and ways of participating, educators can encourage greater collaboration, confidence, and connection.

CLASSROOMS

EARLY ELEMENTARY

CLASSROOMS

ELEMENTARY

The NLM found that 64% of studies reported positive effects on student performance and/or physical responses when furniture dimensions and design were appropriately matched to students.

CLASSROOMS

MIDDLE SCHOOL

Field Trip's flip top mechanism allows for quick transitions between uses while the nesting design enables full room resets and efficient storage.

CLASSROOMS

HIGH SCHOOL

Flexibility and a student's "sense of ownership" account for just over a quarter of the academic improvements attributed to classroom design.

WELLNESS ZONES

Neurodiverse design prioritizes empathy and inclusion by creating learning environments that support a wide range of cognitive, sensory, and social needs through principles like psychological safety, attention restoration, and flexible community engagement.

STEAM

STEAM spaces are made for big questions, bright ideas, and hands-on discovery. Adaptable furniture gives students room to test, build, move, and collaborate as curiosity turns into real learning.

CHOOSE

STEAM based learning thrives on exploration and discovery. Giving students access to hands-on learning settings, specialized tools, and multiple ways to engage encourages creativity, experimentation, and ownership of the learning process.

MOVE

These spaces should support movement between making, testing, presenting, and problem-solving, allowing students and educators to adapt quickly as projects evolve.

THRIVE

When students feel supported and included, they are more willing to take risks, test ideas, and engage in hands-on learning. Purposeful environments foster curiosity, confidence, and a sense of belonging that fuels innovation.

STEAM

MAKERSPACE

Research from the University of Salford found that classroom design can account for up to 16% of the variation in student learning progress over a school year. Furniture plays a critical role in that equation by influencing comfort, posture, movement, collaboration, and students' ability to engage with different modes of learning.

STEAM

CAREER & TECHNICAL EDUCATION

STEAM

ART & MUSIC

Class-ifi's modular storage options from cubbies and lockers to tote bins, make it easy to support different learning materials, teaching styles, and classroom needs with one cohesive solution.

SOCIAL

Learning doesn't stop when students leave the classroom. Social spaces give them room to connect, recharge, and build the sense of belonging that strengthens school communities.

CHOOSE

By offering a range of collaborative, social, and independent settings, social spaces help students take ownership of their learning by choosing the spaces that best fit the task at hand.

MOVE

Purposeful movement helps social hubs support the changing rhythms of learning. Flexible commons, media centers, cafés, and gathering spaces support natural transitions while accommodating a wide range of activities and group sizes.

THRIVE

Meaningful connections help students feel engaged and supported. Offering students a range of environments where they can connect with peers, access resources, and feel a sense of belonging.

SOCIAL

MEDIA CENTERS

Across the United States, K-12 students spend roughly 1,200 hours each year in school, making the learning environment one of the most influential settings in their daily lives.

SOCIAL

CAFETERIA

SOCIAL

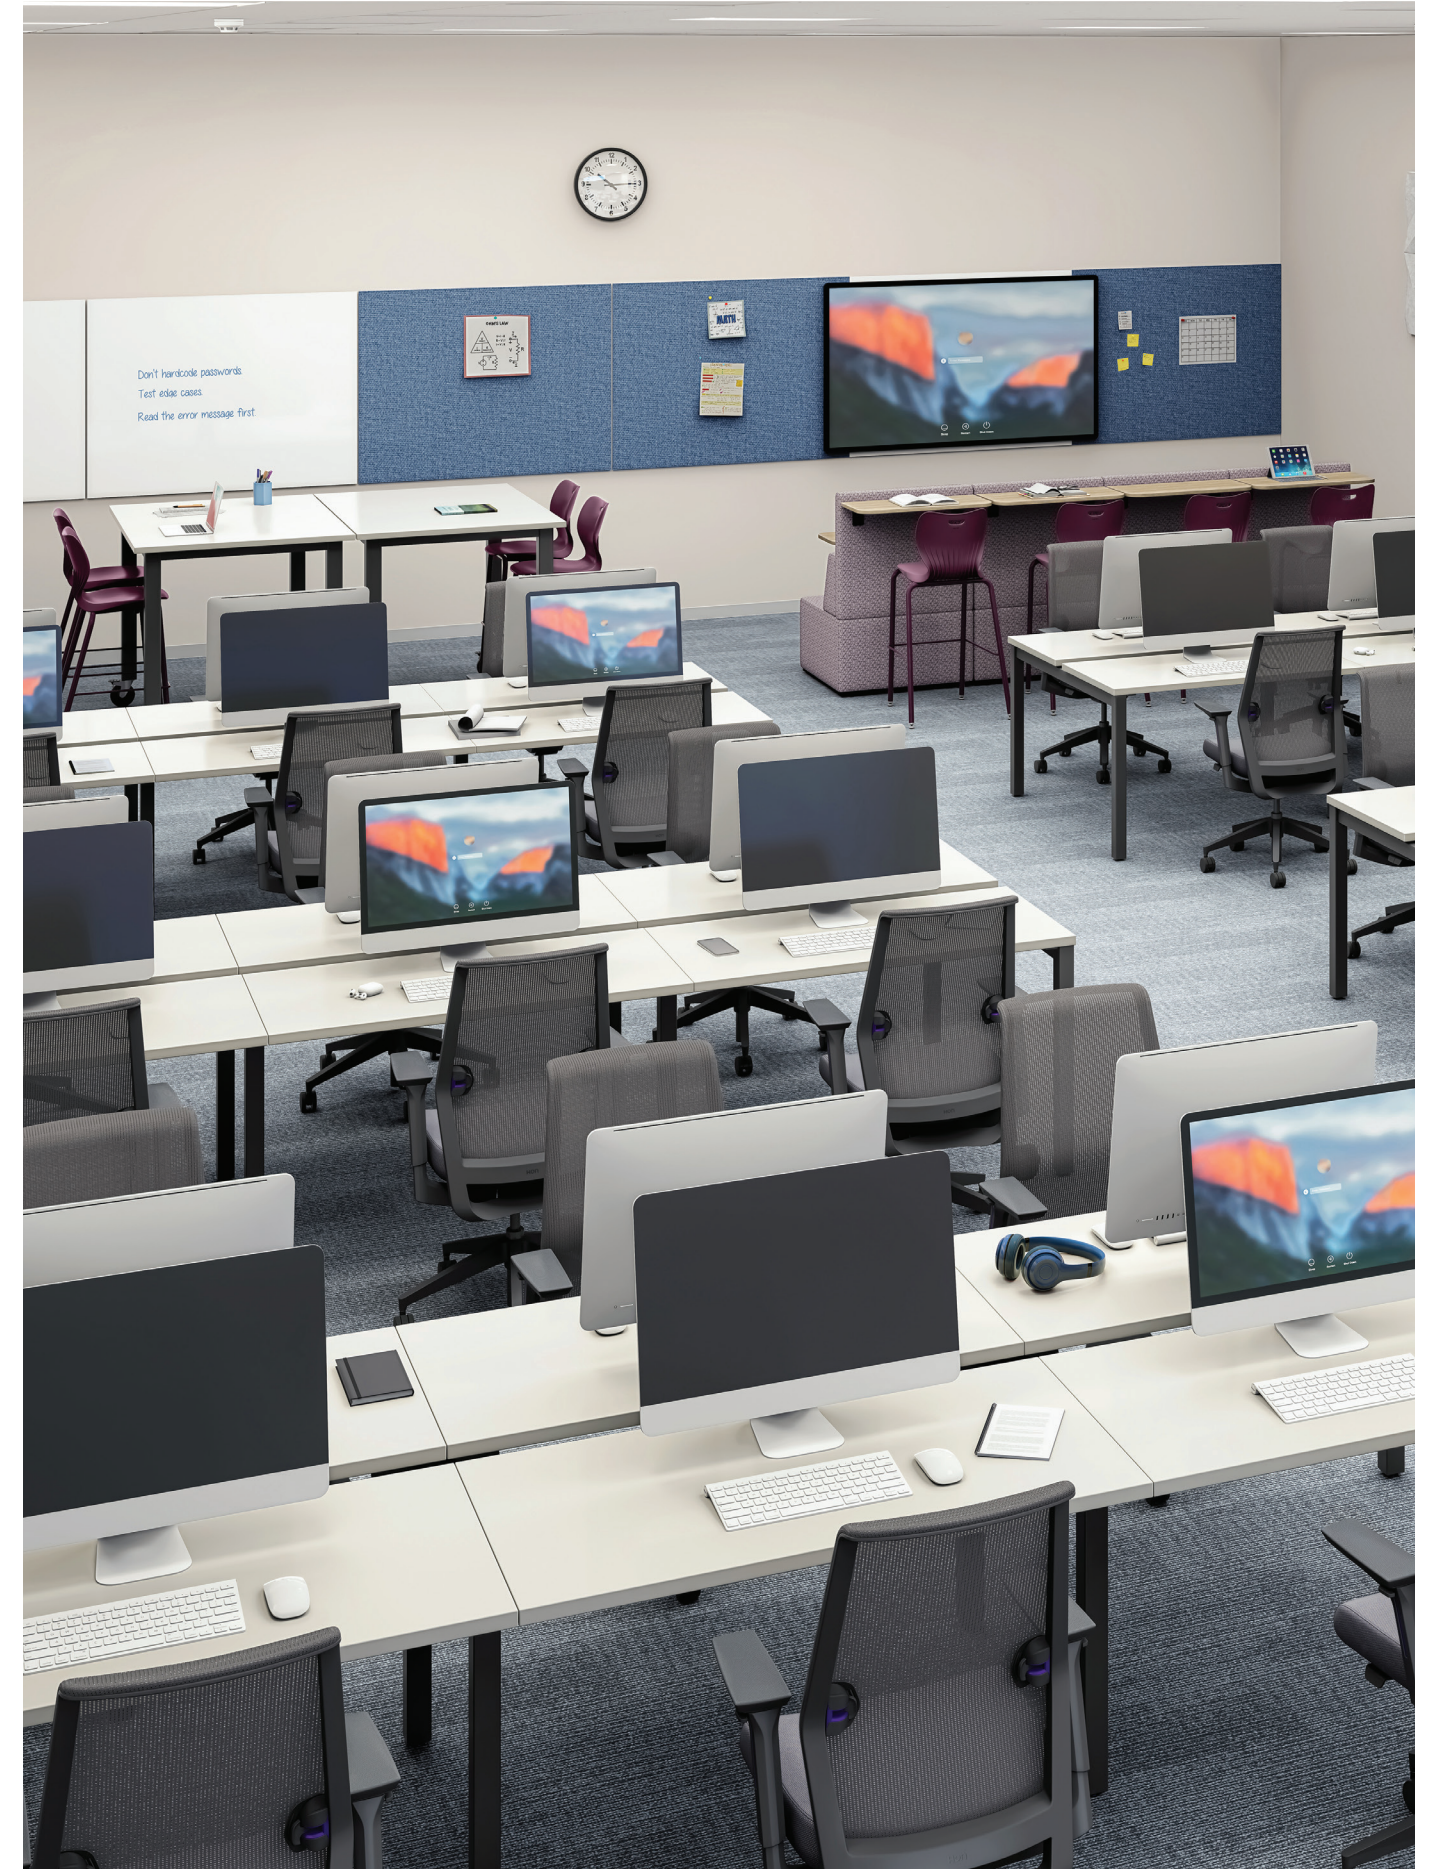

STUDY & COLLABORATION SPACES

Mosaic's curved configurations create a variety of nooks that support different postures and levels of collaboration, giving students options for learning and connecting.

SOCIAL

COMPUTER & ESPORTS LAB

ADMINISTRATION

Behind every strong school day is a team keeping things moving. Administrative spaces support the conversations, focus, and daily work that help students, families, educators, and staff feel welcomed and supported.

CHOOSE

Educators and staff need environments that support diverse workstyles and responsibilities. Flexible administrative spaces provide choice in how staff collaborate, focus, and connect with students, families, and colleagues

MOVE

Effective administration spaces create opportunities for collaboration, support efficient workflows, and help staff navigate the changing needs of students and staff.

THRIVE

A positive school culture starts with the people who support it every day. Administrative spaces that prioritize comfort, wellness, and connection help educators and staff feel supported, engaged, and equipped to make a greater impact.

WELCOME & OPEN SPACES

Lightweight furniture and rolling casters allow quick reconfiguration between activities and group sizes.

ADMINISTRATION

OFFICES

Scribble's built-in sensory support provides a more inclusive seating experience, helping students feel at ease during conversations, check-ins, and one-on-one support.

ADMINISTRATION

TEACHER'S LOUNGE

The average age of the main instructional building among U.S. public schools is 49 years, and 38% were built before 1970. As schools work within aging facilities, furniture must do more of the heavy lifting.

PRODUCT

The right furniture helps schools turn potential into progress. HON solutions support active learning, meaningful engagement, and the students, educators, and staff shaping each day with purpose.

STUDENT CHAIRS

SCRIBBLE™

Scribble’s shape and waterfall seat edge are designed to increase circulation and minimize pressure points to keep students comfortable and focused.

PRODUCT FEATURES

- Easy to move with a handle that fits many hand sizes
- Place cantilever chairs on top of the desk for easy cleaning, while rubber stoppers prevent scratches on the worksurface
- Chairs and stools stack 5-high allowing for more space
- Designed to wipe down quickly for easy facilities management
- The raised pattern underneath the chair allows for a grounding experience for all users

4-Leg Stacking Chair
Available in 6", 12", 14", 16", 18"H

Task Chair

Task Stool

SENSORY TEXTURE
Scribble was inspired by the small movements students naturally make. Its sensory texture reflects the tracing, looping, and fidgeting behaviors that help students stay engaged, providing a subtle outlet for movement that supports focus without disrupting learning.

FLEXIBLE BACK
With 11.5 degrees of flex, Scribble responds to natural movements and supports a variety of postures throughout the day.

STUDENT CHAIRS

SMARTLINK®

SmartLink seating progresses with learners as they grow, from kindergarten through high school.

PRODUCT FEATURES

- SmartLink's shape is designed to minimize pressure points so students can stay comfortable and focused longer
- Keep books and supplies neatly tucked under with an added wire storage basket*
- Casters are available for added mobility and ease of moving*
- Chairs and stools stack 5-high allowing for more space
- Powder-coated legs are scratch-resistant for durability where it matters most

*Available on select heights.

Holds pencils and pens to prevent from rolling while the open front allows for visibility of what kids are storing

STUDENT TABLES

FIELD TRIP™

Writable surfaces. Mobile frames. Flip tops that turn tables into brainstorm boards. Field Trip helps classrooms adapt, connect, and keep ideas flowing.

PRODUCT FEATURES

- Tables nest for efficient storage, while bumpers protect surfaces against scratches
- Easily mobile on four locking casters
- Accommodates multiple learning styles and room layouts with fixed, low, and high height options—all in one versatile frame
- Table top features round corners, no pinch points, and locks in both flat and stored positions
- 42" wide table doubles as a student desk

**Field Trip
Flip-Top Table, Configurable Height**
