

BUILD™ STUDENT DESKS

REFERENCE GUIDE

Build Student Desks consist of three components: a worksurface, upper legs, and lower legs. All desks share the same leg design, with worksurfaces available in a variety of shapes and sizes. Every desk adjusts from 22" to 34" in height.

WORKSURFACE

Made of 1-1/8" particleboard core with high-pressure laminate top and low-emission backer bottom. All tops available with a 3mm T-mold edge.

UPPER LEG

The upper leg is made of 2" 16-gauge tubular steel welded to an 11-gauge 9-1/4" x 7" triangular plate. On table- and youth-height legs, two 11-gauge V-shaped braces are welded to the leg and triangular plate. Available in black or platinum metallic finish.

LOWER LEG

Lower legs are 16-gauge tubular steel in nickel chrome. They receive hex mechanical locking bolts in 1" increments. Lower legs feature 1/2" leveling adjustment. The tray offers 12-3/4"W x 18"D x 3"H of total storage space.

BOOK BOXES

Available to use with Build Student Desks. Book box brackets (HEBBXRL) are made of 18 GA sheet metal and are painted on all surfaces. Overall dimensions for the book box bracket are 13.15" W x 14.63" D x 1.00" H. Tray kits (HFMBIN3) are made of copolymer polypropylene. Build also offers the option for a fully metal book box. The full metal book box is constructed of 18 gauge steel. Overall available storage space for the full metal book box is 12-5/8"W x 12"D x 3-1/8"H.

HON STUDENT CHAIRS

All HON student chairs are compatible with Build student desk shapes.
