

# BUILD™ MAXPROTECT EDGE

Build's MaxProtect Edge takes durability further. A polyurethane-based material coats the worksurface edge in a single seamless, bonded layer, eliminating the seams and weak points where damage starts. Flexible enough to absorb daily impact yet tough enough to resist picking, chipping, and cracking, MaxProtect Edge stands up to the realities of active learning environments.

## BENEFITS OF MAXPROTECT EDGE

### ELIMINATES WEAK EDGES

Creates a seamless bond around the edge to prevent peeling and picking, reducing long-term damage and maintenance.

### SEALS OUT MOISTURE

Protects from spills and humidity, preventing swelling and hidden breakdown.

### BUILT FOR DAILY IMPACT

Built for the classroom, resisting impacts, picking, and abrasion—absorbing hits from backpacks and chairs without cracking or chipping.
