Mural™

Reimagine Workplace Design

Create with Mural. It's workplace furniture that enables a new landscape for planning and working. By crafting boundaries that flex with the needs of individuals and groups, these settings serve the workforce with exceptional style and enlightened substance. Stop dividing space and instead start creating neighborhoods that welcome and energize.

Mural artistically enlivens space to adapt to the changing needs of people today and the possibilities of tomorrow.

Mural divides spaces with inviting, warm materials and biophilic-friendly components.

It Takes a Neighborhood

For workplaces that attract and power performance, both individuals as well as groups must find a home.

Mural creates those dynamic neighborhoods that blend spaces for concentration with collaboration next door.

Solo + Group = Mural Neighborhood.

Freestanding height-adjustable tables reside adjacent to more casual space with living-room comfort. Shown with Altitude® tables and Align™ storage

A streamlined bench with integrated height-adjustable work surfaces creates touch-down efficiency. Shown with Radii™ storage

Height-adjustable benching with boundary-establishing storage offers worker privacy. Shown with Altitude tables and Approach™ storage

A self-contained team area adds productivity horsepower to the workstations that surround the space. Shown with Align storage

This comfortable collaboration space complements the high-performance and flexible worksettings next door. Shown with Altitude tables and Radii storage

The clean lines of table desks with privacy screens are enhanced by the fence and screens that define the space. Shown with Align storage

Artfully Pleasing

Mural embodies the options you need to create organic settings that humanize every workplace. Select and blend textures, colors, materials, and configurations that welcome and enrich.

Mural offers fences, privacy screens, and height-adjustable worksurfaces, and then smoothly integrates storage, freestanding tables, and other product portfolios to create inviting spaces.

Mural flexes with changing needs,
from a workstation to a huddle
space for capturing new ideas.

Power That Empowers

Powering up some conventional systems furniture sometimes means restricting adaptability. Not Mural.

The Mural unencumbered power and data management system is direct, versatile, and facilitates easy furniture flexibility. Mural makes power powerful.

Power and data can be brought in from multiple access points — from the floor or from the ceiling through a power pole. Routing through the flex connector brings connectivity to all, no matter the configuration.

The fabric wire manager delivers clean cable management.

Mural neatly and conveniently provides desktop connectivity through the distinctive power bay.

Even when you don't need a worksurface, you still need access to power. The Mural fence plugs that need.

The flex connector that enables Mural to be contoured just the way you need it also allows the secure pass through of power and data lines.

Designed For Flexibility

New demands. New needs. New challenges. New opportunities. Mural manages the ever-changing workplace landscape with grace and efficiency, enabling you to capitalize on change, and using all the same components.

Day 1

From the start create a lively layout that welcomes dynamic performance.

Next Year

When those individuals now need some team collaborative space, adding new components easily makes it happen.

In the Future

And when over time the setting needs to be compressed, the Mural flex connector rises to the occasion.

Innovative Elements

From feet that disappear to screens that mold space to rails that frame and support, Mural unleashes your planning imagination. It comes together in a panorama of performance and simple beauty.

Privacy screen clamp
