Deep-cushion comfort in a sleek design? Yes! Nucleus has taken tech to a new level with a slim, streamlined, stylish seating collection that keeps you relaxed, focused and productive. Combining a modern and organic aesthetic with meticulously researched ergonomic support, Nucleus puts the science into seating. Pressure mapped seat contours. Supportive 4-Way Stretch mesh backs. Adjustable lumbar support. Nucleus is where cool and comfortable come together.

Comfort from the inside out.

Science, Meet Sophistication.
You might notice that Nucleus doesn’t look like your typical office chair. That’s because it’s not made like an ordinary chair. Marcus Koepke actually designed the seat like a hammock — there’s no seat pan, so you don’t have to worry about bottoming out. The seat foam is molded overtop a mesh covered frame, so when you sit in a Nucleus chair your weight is evenly distributed, resulting in a more responsive sit and increased comfort. Plus with an all-new, contemporary back and arm style by Deisig Design, Nucleus really has it all.
Get focused with the task chair. Stay flexible with pivot-back guest chairs. Reach new heights of collaboration with task stools. Whatever you need, Nucleus has you covered. Making work life a little better, every day.
