# K-12 Furniture

Expanding the Potential for Learning

# Expanding the Potential for *learning*

At HON, we believe every space throughout the school begins with the cohesive design of furniture and the tools students and educators use every day. From student seating for all grades, to collaborative soft-seating, desks from seated-to-standing heights, tables, and multi-purpose storage options—every solution we craft helps create flexible environments that support all levels of learning, engagement, and creativity.

# A New Chapter in *Education*

Education spaces have evolved. Although the traditional classroom components remain—think desks, seating, and storage—how those environments and tools support a wide variety of needs is changing every day.

Every school year, leadership must address a myriad of challenges. Recruiting and retaining talented teachers, supporting diverse learning capabilities, and maintaining student well-being are just a few of the concerns decision makers need to manage. From thoughtful organization to comprehensive comfort to creative classroom configuration, ensuring educators and students have the support they need to be successful and happy requires inclusive vision and steadfast commitment.

It's been proven that well-designed learning spaces—media centers, quiet rooms, classroom environments, and everything in between—play a vital role in supporting the efforts of schools determined to make a difference. Enhancing those spaces with furniture solutions designed to foster connection, creativity, and imagination is key.

At HON, we're not satisfied with the status quo. We're thinking outside the box with innovative environments that encourage big dreams and accomplishments at every learning level. And that starts with classroom furniture solutions that go beyond the basics. It's time to expand the potential for learning. HON will lead the way.

# Classrooms

Whether it's English 101 or Advanced Calculus, classroom design is vital to student success. The key? Flexibility. With a creative approach focused on emerging education trends, any learning space can offer inclusive support and ignite imaginations of all ages and aptitudes. That starts with easily configurable and remarkably durable classroom furniture that makes ongoing success accessible for everyone.

PERIODIC TABLE OF THE ELEMENTS

## Grades K-4

Kids thrive in classrooms that allow for movement, and those classrooms are powered by flexible furniture. Settings that can be easily rearranged foster collaboration and connection, while keeping active minds and bodies engaged.

Dynamic classrooms offer practical support for teachers by fostering well-designed learning spaces that can help reduce behavior issues. Flexible, collaborative environments also enhance student engagement, creating a more positive and productive atmosphere. These benefits lead to a better work experience for teachers, ultimately boosting their wellness and morale.<sup>1</sup>

## Grades 5-8

Whether students are working together or individually, their classroom needs furniture that quickly and easily supports both. That's why flexibility is an upgrade desired by 63% of teachers.

Research shows that students in flexible, active classrooms achieve greater academic success. Enhancing the physical design of learning spaces has been linked to a 16% improvement in reading, writing, and math performance, with classroom flexibility accounting for a quarter of that gain.<sup>2</sup>

## Grades 9-12

High school is a pivotal time for preparing students for the real world. The right furniture fosters both individual creativity and group collaboration, equipping students to thrive in a flexible and dynamic environment.

A flexible and welcoming learning environment helps students feel at home in the classroom, fostering psychological safety and empowerment. Relaxed students can focus better on instruction, and empowered students are more likely to stay engaged.<sup>3</sup>

# Neurodiverse Classroom

---

Learning isn't one size fits all. Recognizing and supporting emotional and cognitive differences is imperative to the growth and success of neurodiverse students. Sensory-friendly spaces designed around flexible, kinesthetic furniture and tools help create structure, psychological safety, and engagement for everyone.

Active learning classrooms should offer diverse seating options, such as tall bistro tables with stools, couches, bean bag chairs, traditional desks, and modular tables for group work. This variety allows students to select a space where they feel most comfortable and aligned with their learning style. The result? Greater student engagement and a reduced likelihood of off-task behavior.<sup>4</sup>

## Wellness Room

Everyone deserves time and space to decompress during the day. With inviting soft seating, power hubs, and easily accessible storage, wellness environments encourage busy students to relax and recharge so they can hit the books with renewed energy later.

In a recent survey of one school district's student wellness center, 96% of student respondents reported that the calming room improved their sense of safety and well-being.<sup>5</sup>

## Reading Room

For imaginations to take flight, students need spaces that allow them to go at their own pace. By creating subject-specific hubs designed to support personalized learning, valuable connection and engagement is within everyone's reach.

# STEAM

Spark their imaginations! Exploration stations invigorate the learning environment and let students participate in unique, creative and hands-on ways. Our multi-height Build Makerspace tables are fun, full of storage and collaboration-friendly. Because teamwork isn't just good for them today—it's a lifelong skill that future leaders need, too.

# STEAM

STEAM—an experiential learning approach that uses Science, Technology, Engineering, the Arts, and Mathematics to guide critical thinking—requires spaces that encourage problem-solving and collaboration. With smart storage for easy accessibility, mobile workstations to foster connection, and sturdy, easily cleanable seating and surfaces, any STEAM environment can put student success on the map.

Flexible classrooms with movable furniture can be arranged to facilitate diverse activities and groups of various sizes. Increased opportunities for students to work in groups engender more frequent, and higher-quality relationships with their peers.<sup>6</sup>

## Art

Self-expression through creativity is vital to a well-rounded curriculum. An art room is essential for confidence, connection, and individuality. Special attention to vibrant color, ample storage, and mobile seating helps open imaginations while encouraging movement and kinesthetic engagement.

Deck out your table or storage with optional Fuse™ accessories or SmartLink storage bins for all the accessory options!

Using creativity and hands-on activities, Exploration Stations reinforce lessons by appealing to students' natural curiosity. Students work on personal projects of their choice, which helps improve independent thinking skills, process-based problem-solving, and visual communication.

## Music

Music opens minds and hearts. A designated space that celebrates and encourages vocal and instrumental education is imperative to a comprehensive education. Equipped with supportive, mobile seating and ample, durable storage, music rooms give students of all abilities a unique opportunity to express themselves creatively during and after school.

A learning environment that is flexible and welcoming enables students to find their place within the classroom, promoting a sense of psychological safety and empowerment. Relaxed students are more able to focus on instruction, and empowered students are more inclined to stay engaged.<sup>7</sup>

Utilize the Stacking Cart for easy moving and storage!

# Social Spaces

Learning happens everywhere, sparking big ideas and bold dreams. Let's create spaces that bring them to life. Beyond teacher-led instruction, it's essential to provide diverse areas that foster discovery and collaboration.

## Knowledge Center

Flexible spaces that streamline student engagement help amplify a comprehensive school experience. Creating a safe and comfortable environment with solutions designed to connect people and places promotes meaningful communication, making the most of both scholastic and social interactions.

Flexible spaces empower educators to engage students in ways that align with their unique learning styles. Students who thrive through reading and writing might prefer seated tasks, while kinesthetic learners may stay active on their feet. Auditory learners could participate in group discussions, while visual learners might engage with videos related to the lesson.<sup>8</sup>

## Study Hall

Schools of all sizes have moved beyond traditional study hall rooms. Instead, educators are embracing spaces where students can not only hit the books but also collaborate on group projects, receive tutoring, and more. Equipped with dynamic seating, power hubs, and versatile work surfaces, these modern study areas foster growth, connection, and year-round academic success.

Include ample access to outlets and charging stations to support students' use of digital technology. Offering a variety of seating options, equipment, and dedicated spaces empowers students, promoting recovery and enhancing their scholastic excellence.<sup>9</sup>

## Media Center

Media centers are the heartbeat of both the school and the community—they encourage connection and creativity for people of all ages and experiences. Comfortable nooks and thoughtful, collaborative environments supported by dynamic, multifunctional furniture solutions help bridge the gap between people and places.

Recent research reveals that schools with a full-time, certified librarian see nearly 8% of students achieving Advanced scores on their reading assessments. Additionally, these schools have fewer students scoring below the Basic level compared to those without librarians—a trend that persists through high school.<sup>10</sup>

# Computer Lab

---

The purpose of a computer lab goes far beyond surfing the internet—it encourages students to learn vital digital skills that are imperative to today's evolving workforce. From experimenting with software applications to learning programming languages (and more), these innovative environments tap into future success and connect students beyond the classroom.

Connected Learning reflects the growing use of technology in the classroom via desktop and laptop, AR/VR activities, and “M-learning” using mobile devices. Through a mix of teacher-led instruction and self-directed learning, students learn the safe, appropriate use of technology.

## Esports

Although relatively new in concept, Esports environments have seen rapid growth in K-12 education. Designed to promote social and emotional skillsets, strategic thinking, technology awareness, and creative collaboration, a dedicated Esports space allows students to practice, problem solve, and play competitively in a fun, safely-monitored environment.

Collaborative learning is crucial for developing social interaction skills—a key factor often cited by parents choosing charter and private schools. Soft seating options, such as cushioned arrangements, create an inviting space for brainstorming sessions and group discussions, fostering teamwork and creativity.<sup>11</sup>

# Administration

What can thoughtful design do for you? The answer is...a lot! A carefully planned space creates a welcoming environment for students and parents—and it makes room for school staff to carry out the day-to-day business of helping each student be successful.

## Welcome Spaces

Whether you're a student, a staff member, or a guest, the first space you see in a school sets the stage for what comes next. A warm, cheerful, communal environment designed to put people at ease fosters comfort and trust when it matters the most.

Common spaces are ideal for promoting anytime, anywhere learning, made possible by the ubiquity and portability of mobile devices. Wall-mounted booths or benches provide convenient spots for students to set down their books and quickly search for information when inspiration strikes, enhancing their project work on the go.<sup>12</sup>

P R

# Administrative Office

One of the most high-traffic spaces in the school is an administrative office. Often a conduit for parents, teachers, and staff alike, these spaces require a lens on efficiency and trust without sacrificing soothing aesthetics and easy comfort. Soft seating, accessible surfaces, and a clean, seamless workflow are key to any smart administrative space—large, small, or in-between.

Building trust among students is essential, and the learning environment plays a pivotal role in fostering it. Clearly defined spaces for specific activities promote transparency and reliability. Consistency and organization ensure students know exactly where to go for different tasks, eliminating confusion and reducing stress.<sup>13</sup>

# Principal's Office

Every school principal deserves an efficient, well-organized sanctuary designated for both solo projects and private meetings with parents, teachers, and students. With dynamic task seating, tech-savvy desking solutions, and comprehensive storage, school leadership can be supported with substance and style.

Environments that offer choice and allow students' voices to be heard promote a sense of psychological safety, which in turn allows students to relax and focus on instruction. Since the start of the pandemic, 70% of public schools have reported a rise in students seeking mental health services on campus.<sup>14</sup>

## Guidance Counselor's Office

---

From navigating future academic goals to offering emotional and social support, guidance counselors are a beacon of trust for students within the school. An office environment designed to foster well-being, confidence, and comfort is key. With soft seating, sensory-sensitive fabrics and color—plus ample storage to help accommodate a wide variety of needs—any school can create a designated safe space that encourages ongoing academic and social success.

With student mental health concerns on the rise, increasing access to psychologists and counselors is one form of support. Another is incorporating social and emotional learning (SEL) into instruction, which helps students build healthy identities, manage emotions, foster empathy, and form supportive relationships.<sup>15</sup>

## Teacher's Lounge

Teachers deserve a dedicated space to relax, recharge, collaborate with peers, or simply connect with other adults. Lounges should be inviting, featuring couches, tables, and individual soft seating options – ensuring teachers can find a comfortable spot that suits their needs in the moment.

Nationally, teacher turnover in public school districts costs upwards of \$8.5 billion each year. Bearing this in mind, supporting educators' well-being is a key strategy for superintendents to improve teacher retention and reduce attrition.<sup>16</sup>

# Product Spotlight

Limitless potential is the hallmark of a great classroom. We believe in empowering the big thinkers and leaders of tomorrow, and it starts with furniture that makes your space the best it can be. With our comprehensive offering built for active and engaged learning (and crafted for quality and durability), there's nothing you and your students can't accomplish.

# Student Chairs

## SmartLink®

SmartLink Seating progresses with learners as they grow, from kindergarten through high school!

SmartLink  
4-Leg Stacking Chair  
Available in 6"H

SmartLink  
4-Leg Chair with Book Basket  
Available in 12", 14", 16", 18"H

SmartLink  
Cantilever Chair  
Available in 14", 16", 18"H

Contoured back shape keeps bag from sliding off and includes a built-in handle for ease of moving.

## Product Features

- Keep books and supplies neatly tucked under with an added wire storage basket\*
- Casters available for added mobility and ease of moving\*
- Place cantilever chairs on top of the desk for easy cleaning, while rubber stoppers prevent scratches on the worksurface
- Chairs and Stools stack 5-high allowing for more space
- Powder-coated legs are scratch-resistant for durability where it matters most
- Passes the pressured map test to ensure maximum comfort through the day

\*available on select heights

**SmartLink  
Counter-Height 4-Leg Stool**  
Available in 24"H to fit table  
heights around 36"H

**SmartLink  
Café-Height 4-Leg Stool**  
Available in 30"H to fit table  
heights around 42"H

Supports students sitting in multiple different positions for comfort - front, back, sideways

**SmartLink  
Task Chair**  
360-degree swivel  
and casters

**SmartLink  
Task Stool**  
360-degree swivel, casters  
and an adjustable footing

# Student Desks

## SmartLink®

Lightweight, easy-to-move desks enable on-the-spot collaborative learning, which helps students develop interpersonal skills as they work together to solve problems.

SmartLink  
Rectangle Desk

Adjusts from 23-33"H

SmartLink  
Triangle Desk

Adjusts from 23-33"H.  
Also available in a fixed-height option

SmartLink  
Sit to Stand

Converts from 30"  
seated-height to 43" standing-height

One desk to support left-or-right handed users

### Product Features

- Unique shapes that allow teachers to get creative with multiple layout options
- Glides allow for easy mobility and movement of desks
- Hard plastic tops include pencil grooves to keep writing utensils from rolling away

**Backpack Hook**  
Add this optional hook to keep backpacks off the floor

**Book Box**  
Optional storage space keeps the desk area neat and organized

SmartLink  
Rectangle Student Desk

# Build™ Desks

Attentive listening. Idea sharing. Learning comes in many forms, and your classroom needs the flexibility to support them all. Build Desks are designed with unique top shapes that allow students to adapt to changing needs throughout the day. With countless combinations, you can choose the right shape, size and finish to fit any space, aesthetic and budget.

Fin

- Add casters for mobility
- Optional whiteboard finish to let the ideas flow
- Backpack hook and Book Box Bracket + Bin to keep items and materials organized

# Build™ Makerspace

What does innovation look like? Well, it can be messy. And colorful. But most of all, it should be fun. Build Makerspace tables are ideal for constructing, crafting and letting the imagination run free. They're durable, configurable and made for inspiration.

**Build Makerspace Seated Height**  
42"x60" or 42"x72"

**Build Makerspace Counter Height**  
42"x60" or 42"x72"

**Build Makerspace Standing Height**  
42"x60" or 42"x72"

**Build Makerspace Seated Height Stool**

**Build Makerspace Standing Height Stool**

## Product Features

- Tested beyond standard requirements to meet the needs of any Exploration Station assignment
- 42"D top is designed for easy removal and reassembly for moving throughout doorways
- Rounded corners are gentle on arms and active bodies moving around to explore
- Stools are lightweight and easy to stack while it has a convenient handle for quick rearrangement
- Lightweight and easy to stack, stools feature a convenient carry handle
- Available in Laminate or Butcher Block

# Build Accessories

**Slotted Pegboard End Panels**  
Optional for seated-, counter- and standing-height tables

**Solid End Panels**  
Optional for seated-, counter- and standing-height tables

**Shelf and Dividers**  
Optional for standing-height tables

## SmartLink Storage Bins

3"H x 12"W    6"H x 12"W    12"H x 12"W  
Optional for standing- and counter-height tables

## Fuse™ Hanging Accessories

Side Saddle    Hot File    Hook  
Optional for seated-, counter- and standing-height tables with slotted pegboard end panels

## Product Features

- Slotted Pegboard End Panels to hang additional storage. Pair with Fuse hanging accessories to outfit your entire space
- Solid end panels provide added modesty and a magnetic space, with an optional whiteboard finish option for more space to brainstorm
- Shelf and Dividers provide spaces for SmartLink Storage Bins to keep materials stored for easy access

# Collaborative & Active Seating

## Tangram™

Learning without boundaries. Designing social spaces that encourage choice and curiosity helps students build essential soft skills as they connect with one another.

Tangram Pods

Tangram Zig-Zag with Bistro-Back

Tangram Story Steps

Tangram Half Round with Bistro Back

Tangram Island

Tangram Campfire

### Product Features

- Integrated power option that is easily accessible to students for a quick charge
- Plinth base that allows for easy floor cleaning along with vinyl fabric options that make Tangram the ideal school solution
- Bistro-Back adds an additional work surface to allow for collaboration or solo work
- Sturdy design allows students to sit how they feel most comfortable with different height and posture options
- Proportionality designed for K-12 students

Power Accessories

In-Line Table

Recessed Tops

# Confetti™

With soft foam support, integrated handles for easy portability, and vibrant fabric options, Confetti allows students to navigate the classroom on an individual basis to create a safe, stress-free learning environment. And with Confetti's handy floor cushion storage cart, they'll understand the importance of putting classroom materials away when it's time to go home.

Confetti Floor Lounge

Confetti Floor Cushion Storage Cart

Confetti Floor Cushion

## Product Features

- Soft foam support creates a comfortable, stress-free learning environment
- Integrated handle for easy portability
- Optional floor cushion storage cart keeps spaces organized
- Available in vibrant fabric options and easy-to-clean vinyl

# Skip™

## Product Features

- Built-in handle makes it easy to move around
- Textured finish is durable, easy to clean, UV resistant, and outdoor-friendly!

# Revel™

## Product Features

- Brings movement and mobility to the classroom for active learners
- Button located under the seat for easy, pneumatic adjustment to fit any age
- Slip resistant base for safety

# Flock®

## Product Features

- With both an Active Base option and a caster option, it's a great dynamic seating choice
- Support everything from one-on-one conversations to large group gatherings
