

# Healthcare Solutions

## Temperature Check Stations for Medical and Commercial Facilities

Our products support safety, privacy, mobility, and flexibility. We provide solutions that are cost effective and delivered quickly to get the job done and provide protection for everyone. We have multiple options to support your process and promote community mitigation activities through pre-screening.

### When creating your temperature check station:

1. Consider safety requirements
2. Use appropriate personal protective equipment
3. Evaluate your location - before or close to building entryway
4. Ensure privacy
5. Consider flexibility and mobility to maintain adaptability when choosing furniture for this space

Please follow all guidelines and regulations provided by the Center for Disease Control and your state and local government recommendations.

## A First Line of Defense

A safe environment begins at the front door; HON's temperature check station provides caregivers the flexibility and support needed to quickly assess patients as soon as they enter the building.

### HON temperature check station products are:

1. Easy to clean per HON Cleaning Guide suggestions
2. Require minimal to no assembly, perfect for pop-up stations intended for tempory or long-term solutions
3. Can be moved with ease to use throughout your healthcare space as needs change
