Promoting a Healthy Workplace Environment

Table of Contents

HON is here to help!

Planning Your Space?

Cost Conscious?

Need an Audit?

We guarantee our work so you can focus on the moments that matter!

Contact your local HON Business Development Manager to learn more about our design capabilities and how you can engage with our team. We're all in this together and HON is here to make things simple.

All your design needs are free of charge!

Inspire
Different Spaces

Elevate your workstations with HON Abound, Accelerate, or Verse panels. Panels are available in cleanable vinyl or laminate options to stop and prevent the spread of germs within your workstation. Glass stack ons can be added to many installations to increase the panel height, while still allowing natural light in.

Traditional teaming stations are changing, now including higher panels and privacy screens with cleanable fabrics, allowing your users to feel safe and comfortable within their workspace.

Mobile and freestanding screens provide a sense of safety and privacy to all users while still fostering collaboration.

Create a productive environment while practicing social distancing. HONs soft seating can be upholstered in cleanable fabrics and easily reconfigured, allowing teams to feel together while staying apart.

- Empower® Metal Side Screen
- Empower® Double End-of-Run Laminate Screen
+ Motivate® Mobile Markerboard

Additional List Price Per Seat
$1,125.67

Product Care Guide

COVID-19 Disinfection: For disinfecting hard surfaces against the COVID-19 virus the CDC recommends using diluted household bleach solutions (minimum 1/3 cup of bleach for every gallon of water, or a 2% bleach solution) or isopropyl alcohol solution (minimum 70% isopropyl. Concentrations for bleach disinfecting solutions for mesh are noted below and for specific textiles, on page 2 of this document.

Cleaning Instructions for Hard Surfaces and Textiles: Leave cleaning solution on for at least 30 seconds but no longer than 2 minutes.

Thoroughly remove the solution from the surface with a clean cloth and warm water.

May cause discoloration if left on the surface longer than suggested time or not removed after sanitizing.

The following surface materials can be cleaned in this manner:

Powder Coated Metal
Painted MDF
HPL
TFL
Edgeband
T-mold
Glass
Plastics
Poly Shell Seating

COVID-19 Mesh Disinfection: Clean with warm water and mild soap using a clean white cloth or soft bristle brush. Do not oversaturate fabric or allow excess soap buildup. Pat fully dry with a microfiber cloth.

HON's 4-Way Stretch mesh can be cleaned with up to 10% bleach solution

Textile Comparison				
Attribute	Coated Fabric – Vinyl/PVC	Coated Fabric – Polyurethane	Coated Fabric - Silicone	Crypton®
Cleanability	Vinyls designed for healthcare applications allow for excellent cleanability. Test results show resistance to degradation and deterioration against a wide variety of commercial cleaning solutions, including accelerated hydrogen peroxide, quaternary ammonia solutions, bleach -solutions, alcohol- based cleaners, etc.	Specific polyurethanes may be cleaned with commercial cleaning solutions.	Multi-layer silicones are highly chemical resistant and have inherent graffiti and denim dye resistance.	Crypton®, when used in conjunction with Crypton Disinfectant and Deodorizer create an EPA approved disinfectable system that prohibits the growth of MRSA, HIV, E Coli, Hepatitis, and many more bacteria and viruses. Using improper cleaning solutions may compromise the integrity of the stain protection, as well as the moisture barrier. It is important to clarify what cleaning and disinfectant products are being used before specifying these fabrics.
Fluid Barrier Protection	Inherent to the product	Inherent to the product	Inherent to the product	Inherent to the product
Antimicrobial Protection	Vinyl patterns that include antimicrobial protection provide resistance to microbial growth, which helps to maintain the integrity of the product.	Polyurethane patterns that include antimicrobial protection provide resistance to microbial growth, which helps to maintain the integrity of the product.	Inherently antimicrobial	Performance fabrics that include antimicrobial protection provide resistance to microbial growth, which helps to maintain the integrity of the product.
Stain resistance	Highly stain resistant	Stain resistant	Highly stain resistant.	Each fiber of Crypton fabric is encapsulated to resist stains, odors, bacteria and mildew to help protect the surface of the textile.
