

SILEA^{EH} IS SHOWN WITH GENEVA & CALIA SEATING

SILEA^{EH} SNAPSHOT

SILEA^{EH} expands the possibilities across the workplace by providing furniture applications in enclosed, team, and community spaces. It offers a broad choice of materials with an enhanced aesthetic, while incorporating height adjustability into the beauty of the product.

SILEA^{EH}

Design by MITCH BAKKER

SILEA^{EH} SNAPSHOT

For versatility, freedom, and an array of materials options, SILEA^{EH} is your choice.

APPLICATION VERSATILITY

SILEA^{EH} is beautifully imagined and responds to today's ever-evolving work environments. A wide range of applications addresses small enclosures, used for private calls and touchdown work, multiuse office configurations with collaborative extensions, small meeting tables, writable surfaces, and media-enabled tack zones to transition a private office space into a teaming space.

FREEDOM OF SPACE

The SILEA^{EH} WorkWall, in both freestanding and wall mounted versions, and the Lounge Level Media are a perfect complement to the causal meeting space, as well as the ideal spot for the worker on the move.

MATERIAL OPTIONS

Material options start with quarter cut natural veneer, flat cut, as well as Stratawood, fourteen laminate options; and four paint options for the chassis and main components. Other materials provide choices for environments seeking a mixed-material look, including six back painted glass options, three solid surfaces, and four metal finishes.
