Delivering Meaningful Change

Wallaby needed a larger space to accommodate their growing business and to help attract and retain top talent. They chose user-adjustable furniture to accommodate employees' needs for flexibility and mobility within the space, improving productivity. A modern, vibrant color palette reflects their brand and encourages fresh thinking.

Fostering New Behavior

The new environment promotes movement with sit-to-stand capabilities in both workstations and private offices, while a spacious layout and mobile seating solutions support teamwork and collaboration.
