

Stratawood & Natural Veneer

Stratawood & Natural Veneer

Natural veneer is subject to nature's quality control. Each specimen will exhibit differences in grain pattern and tone. This is to be expected and, in fact, contributes to the beauty and individuality of each product. Natural Maple, Cherry, and Walnut veneers emphasize the variations of wood by exhibiting cathedrals in the grain pattern. Natural Rift Cut Oak veneer is a premium cut that maintains variations in the grain but without cathedral patterns.

Stratawood is a natural, reconstituted veneer that is designed to exhibit a straight-grain pattern, absent of cathedrals or other significant grain and tone variations.

Stratawood and Natural Veneer are finished with a 30-sheen, conversion varnish finish, which offers excellent scratch, stain, and abrasion resistance, plus a high level of clarity. Both Stratawood and Natural Veneer are available as FSC®-certified wood.

All Stratawood and Natural Veneer finishes are classified in one of two price grades:

Price Grade V1: Stratawood and Flat Cut Natural Veneer

Price Grade V2: Rift Cut Natural Veneer

Price grades effective May 1, 2021.

Cleaning

Regular dusting and occasional cleaning are recommended to maintain your wood finish. To clean, dampen a soft cloth with clean, lukewarm water and gently wipe the wood in the direction of the grain. With another soft cloth, thoroughly wipe dry. Waxing or polishing is not necessary, but can be done with non-silicone products.

Ordering

For order accuracy, specify the Stratawood or Natural Veneer name and Allsteel finish code.

Examples: Stratawood Belair Maple SE934; Phantom Ecu Rift Cut Oak RF912

Also specify FSC-certified wood if desired.

Sampling

Although the Stratawood and Natural Veneer colors reproduced on this card were matched with care, they may vary from the actual finish. When color is critical, please obtain a physical sample.
