Jetty:Mod™

An Answer for the Fluid Workspace

With work patterns changing and evolving, furniture needs to adapt with business needs. Jetty:Mod is a modular collection of sofa seating, interconnecting tables, screens, and accessories that supports individual and group activities. Whether the goal is a change of scenery, collaboration with team members, or focused individual work and privacy, Jetty:Mod optimizes user posture and comfort.

1 A welcoming lounge area features space-dividing elements like fabric bolsters and pivoting tablet arms.

3 A serpentine setup allows seating on both sides, providing social interaction or separation for user privacy.

5 Focus pods enclose users with a level of privacy and the convenience of tables during concentrated work.

2 Support multiple activities with a banquette, including heads-down work, exchanging ideas, or dining.

4 A small private office too tight for guest chairs can easily accommodate a Jetty:Mod booth.

6 Overflow bench seating for unexpected guests efficiently utilizes the perimeter of the conference room.

A Seating Solution Plus

Settings designed to support specific activities have changed the workplace floorplan. This Jetty:Mod active hub adjacent to individual workspaces provides a pause during the day, a place to collaborate with co-workers, or a respite from regular desk duty. The configuration has the added benefit of directing circulation patterns to control distractions for workers. A Jetty:Mod setup can be private with elements for separating and distancing or open with elements for sharing and huddling.

The Geometry of Seating

The key to comfortable seating is the correct correlation between seat dimensions and activity. That's why Jetty:Mod was designed to accommodate both work and lounge modes. The work option, with a higher and shallower seat, positions the user for active work mode. The lounge option, with a lower but deeper seat, offers a more relaxed posture. You'll call it seating designed for the way you work, relax, and interact. We call it Work Geometry.™
