New Hospitality for Work

HBF has created a sequence of experiential vignettes that reveal unique planning scenarios and a compelling vision for the post-pandemic workplace. The great 'RTO,' or return to office, continues to confound organizations that seek to bolster company culture 'IRL' with a pre-pandemic playbook. Team members, having experienced firsthand the benefits of 'WFH' and hybrid work Modes, now expect even more from their work environments to justify lengthy commutes.

To empower designers to deliver high-quality, commute-worthy work landscapes, HBF advocates a design strategy rooted in the concept of 'New Hospitality for Work' that layers vibrant, amenities-driven product applications onto today's fluid workplaces. With renewed priorities of social interaction, experiential delight, psychological well-being, and comfort, HBF's inspiring portfolio of products offers healthful ergonomics, flexibility, and choice at their core. Leveraging the design vocabulary of the 'business club' and utilizing the planning tactics of 'Work Geometry,' HBF furniture and textiles span total contract environments to foster purposeful encounters and communication exchanges among colleagues. We hope you have a chance to explore HBF's vibrant 'magnet spaces' during NeoCon to experience how purposeful 'RTO' interactions can be engineered through inspiring design.
