

Cliq™ Instructions

Congratulations on your new HON Cliq chair! From big ideas to everyday tasks, we know great things will come from your new workspace.

Now that you have your materials, let's get started so you can start sitting!

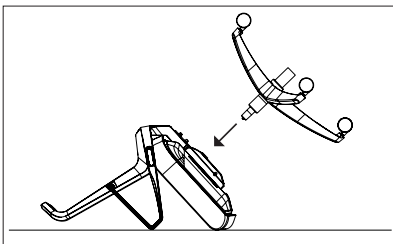

We must tell you that it's important to read all the way through the instructions and carefully review all illustrations prior to installing your new piece of furniture. By not reading these instructions, it may result in property damage or serious bodily harm.

Pro-Tip:

- Illustrations display Cliq with the arm option. The assembly is the same with or without arms.

Steps to Assemble Base:

- 1** Place the chair on the floor, on carpet or another protective surface, with the bottom facing up.
- 2** Insert the cylinder into the hole on the underside of the seat.

- 3** Flip the chair over and now you are ready to take a seat!

Make your space work.
