# Mastering Multipurpose

## One Chair, Endless Applications

Etch is meant to leave a mark. Its sculpted shape and signature back detail bring a sense of polish to any environment. With options that stack, swivel, or perch, Etch has a solution for many different roles. It's agile enough for conference rooms, cafés or classrooms—and steady enough to unify them all. A curated color palette adds just the right expression—fresh tones that feel intentional, not institutional. Wherever it goes, Etch adds purpose to the plan and precision to the space.

## Minimalist Look, Maximum Impact

Whether it's stacking in a café, swiveling in a training room, or lining a conference table, Etch proves simple doesn't mean standard. With a clean silhouette and refined detailing, Etch brings clarity and cohesion to a wide range of environments—without adding complexity to the planning process. One streamlined family. Countless smart applications. A sharper way to make every space feel intentional.

Looks Sharp, Feels Easy

Etch's geometric back isn't just there to get noticed—it's doing real work. The pattern adds breathability and a little built-in flex, delivering comfort without bulk or padding. It's a design detail that makes the chair stand out from across the room—and makes sitting feel just as considered as the rest of the space.

"On-going developments in mobile and computer technology free us from our traditional workspace. We are no longer dependent on a fixed space within the office. Thus people are choosing to work in a more open environment."
