Approach™

# Use Your Space Wisely

The challenge of managing furniture in both the private office and open plan is minimized with a single product line that does both. Approach is a versatile offering of laminate storage, desking, and accessories that allows a consistent and dynamic aesthetic across the workspace. Approach uses space as efficiently as possible – when needs change, it can expand or condense based on company and user requirements. Approach is the perfect way to optimize your space, and space planning, throughout the floorplan.

The Approach portfolio of modular options can be configured to create the right private-office application whether the space is large, small, or unique. Be inspired to rethink how the private office can be utilized to address today's needs while serving more than one purpose.

## Functionality for the Way People Work

In the open plan, Approach works with any Allsteel panel system to provide the storage needed for a productive workstation. In the private office, the Approach portfolio of modular options can be configured to create the right application whether the space is large, small or unique. Approach inspires users to rethink how caseloads solutions can be utilized to address today's needs while serving more than one purpose.

### Change of Scenery

Utilizing the same components, Approach can seamlessly translate from open plan to private office to create harmonious spaces.

# Elevate with Ease

Worksurface height-adjustability allows a change in posture throughout the day, promoting comfort and a healthier workplace. Whether in an open plan setting or a traditional private office, Approach offers exciting height-adjustable solutions to appeal to every work environment.

A contemporary open plan setting features a height adjustable worksurface with an integrated credenza.

Integrated height adjustable storage pedestals are used in a modern private office setting.

A slim exposed height adjustable column adds style and functionality to the private office.

In a private office with a smaller floor plate, slim laminate shrouds allow for height adjustability without sacrificing space.

In a collaborative private office, a wall-mounted height adjustable work station creates a focus space.

For a space-efficient solution in an open plan setting, utilize Altitude height adjustable bases and Radii storage mounted to the worksurface.

# A Portfolio of Options
