

Request for Contract Update

Pursuant to the terms of contract number R191802 for Allsteel Inc. Contractor must notify and receive approval from Region 4 ESC when there is an update in the contract. No request will be officially approved without the prior authorization of Region 4 ESC. Region 4 ESC reserves the right to accept or reject any request.

Allsteel Inc. (Contractor) hereby provides notice of the following update on this date 8/25/2020.

Instructions: Contractor must check all that may apply and shall provide supporting documentation. Requests received without supporting documentation will be returned. This form is not intended for use if there is a material change in operations, such as assignment, bankruptcy, change of ownership, merger, etc. Material changes must be submitted on a "Notice of Material Change to Vendor Contract" form.

RE: Allsteel Inc. request for price adjustment for Region 4 Furniture, Installation and Related Services
Contract R191802

Dear Mr. Zingelmann:

Allsteel Inc. would like to add the following new products to our current Contract R191802 effective immediately upon approval:

- Gallery Panels – falls under the Systems product category already awarded on contract
- A6 Altitude Tables (expansion of the Altitude Tables currently on contract) – falls under the Systems product category already awarded on contract
- COVID Accessory products
 - Metal Table Screens – falls under the Systems product category already awarded on contract
 - Acrylic Table Screens – falls under the Systems product category already awarded on contract
 - Universal Panel Stacker – falls under the Systems product category already awarded on contract
 - Height-Adjustable Table Foot Control – falls under the Systems product category already awarded on contract
 - Hands Free Pulls – falls under the Accessories (Wand & Link Lights, Ergonomic Tools) product category already awarded on contract
 - Hand Sanitizer Solutions – falls under the Accessories (Wand & Link Lights, Ergonomic Tools) product category already awarded on contract
 - Wall Mounted Sanitizer Holder – falls under the Accessories (Wand & Link Lights, Ergonomic Tools) product category already awarded on contract
 - Acrylic Freestanding Screens – falls under the Accessories (Wand & Link Lights) Ergonomic Tools) product category already awarded on contract
- Recharge (expansion) – this product line is currently on contract and falls under the Gather Collection (nka Social Collaborative Seating/Tables/Conferencing) product category already awarded on contract
- Two-Thirds – falls under the Gather Collection (nka Social Collaborative Seating/Tables/Conferencing)

The price lists or pricer pages are included with the attached Request for Contract Update along with an updated Discount Matrix.

If you have any questions, please do not hesitate to contact me at 563-316-9655 or email at allsteelgovcontracts@allsteeloffice.com.

Sincerely,

A handwritten signature in black ink that reads "Cindy Hermann". The signature is written in a cursive, flowing style.

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

NOTE: Refer to individual product pages for upcharges.

Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit AllsteelOffice.com.

Everyday Advantage[®]

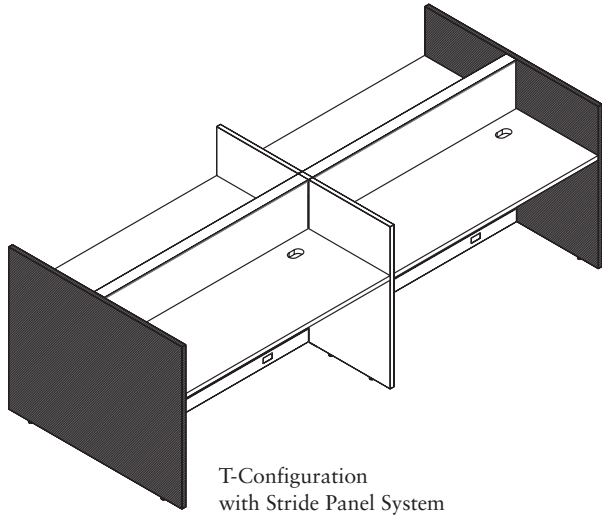

Program Terms for Everyday Advantage

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
 - Everyday Concensys[®] Std-0131, Everyday Concensys Canada-0133
 - Everyday Optimize[™]/Terrace[®]/Further[™] Std-0125, Everyday Optimize/Terrace/Further Canada-0127
 - Everyday Concensys Gov-0132
2. Choose the correct contract in your electronic ordering system by selecting the panel system, (Concensys or Optimize/Terrace) then add other desired products. If no systems product is being ordered, either contract can be selected.
3. Everyday Advantage orders are not eligible for bid pricing.
4. The complete Concensys, Optimize, Further, and Terrace systems lines; and a private office solution, Approach[™]. This program also includes Access[™], Evo[™], Inspire[®], Lyric[™], Mimeo[™], Nimble[®], Quip[™], Relate[®], Scout[®], Seek[®], Tolleson, and Trooper[®] seating. Altitude[®], Aware[®], and Merge[®] tables are available, along with Align[™] Lockers and metal storage, and the complete Essentials[™] storage line. In addition, Extensions[™] ergonomic accessories and lighting are part of the offering.
5. All textiles and finishes are available, but some may have extended lead times.
6. Everyday Advantage orders are not limited to a minimum or maximum.
7. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
8. Standard freight terms apply.
9. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

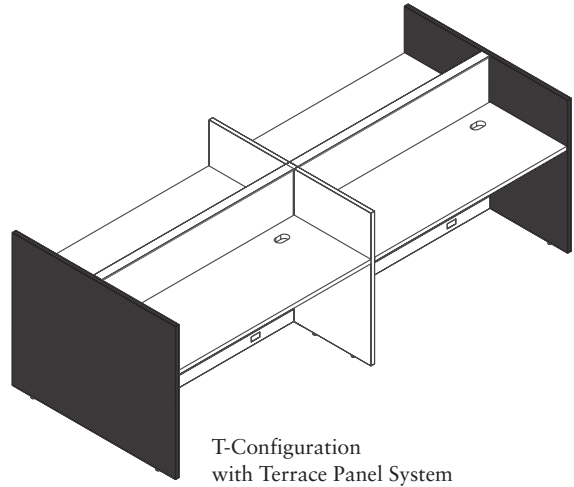

Allsteel Inc. reserves the right to amend or terminate this program at any time with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).

Gallery Panels

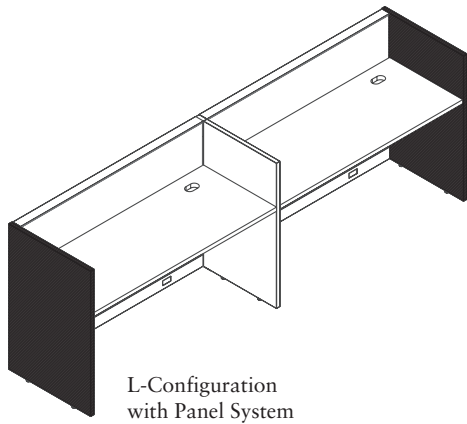

Gallery Panels are ideal for bringing natural wood elements to workstations and providing privacy. Allsteel Gallery Panels are designed to work universally across 4 product platforms. Please follow the product guidelines for proper specification.

Further Gallery Bench

Stride Gallery Bench

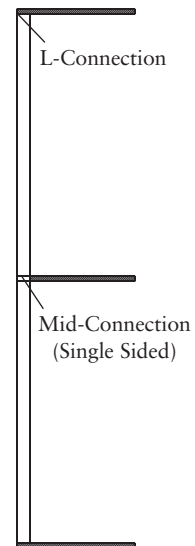

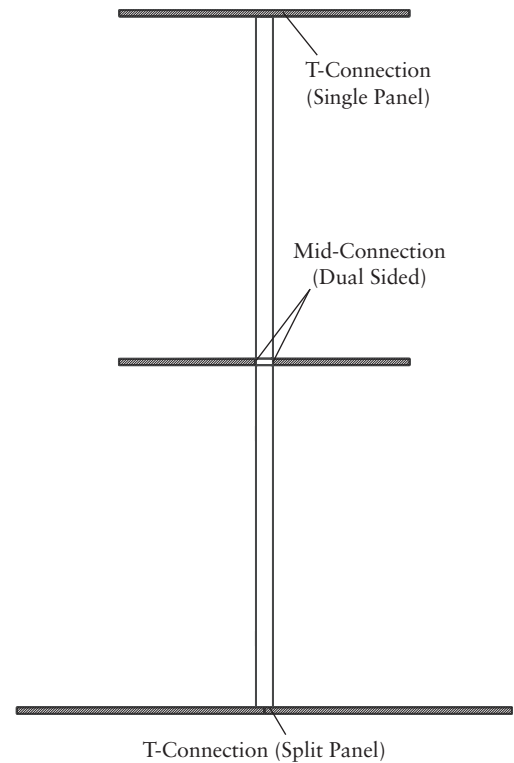

Gallery Panels with Further Adaptive

Gallery Panels

Basic Characteristics

GSA PENDING

- Available in L-, T- and Mid-configurations.
- Made of 1 1/8" board with HPL laminate.
- Use 1 1/8" thickness for space planning.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS.
- Available in woodgrain and solid laminates.
- Horizontal laminate available on all sizes. Vertical laminate is available on widths 18"W to 60"W, and 87"W to 117"W.
- Widths are available in 3" increments from 18"W to 87"W, in 6" increments from 87"W to 147"W.
- Sizes up to 84"W come as a single piece. Sizes 87"W though 147"W are split panels and come in two-pieces.
- Split panels can only be used in T-configurations with Stride panel systems.
- Grain matching is not available on split panels.
- Cannot be connected to another Gallery Panel.
- Gallery Panels offer 2 1/2" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Gallery Panel widths are true to size.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- Can be used with Single Sided Further adaptive for privacy and stability along the beam.
- All configurations are non-handed and secured using hidden fasteners.
- Please adhere to all standard systems specification guidelines.

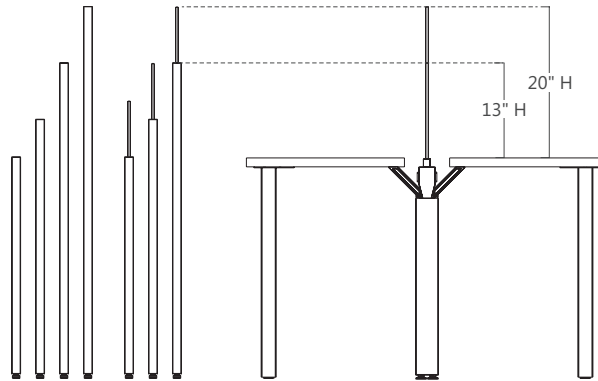

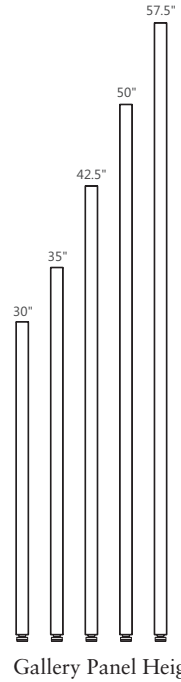

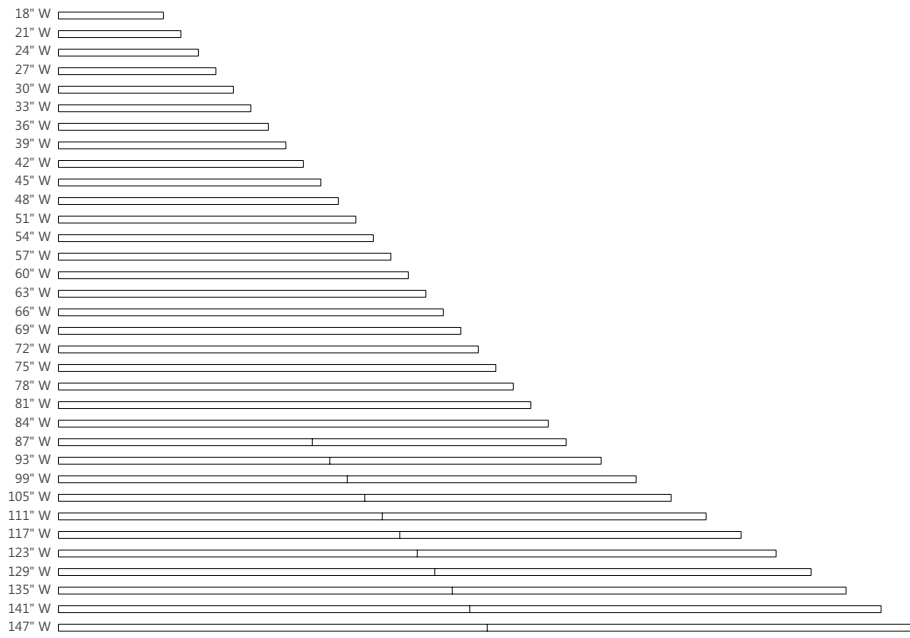

Gallery Panels

Dimensions

GSA PENDING

Gallery Panel Widths

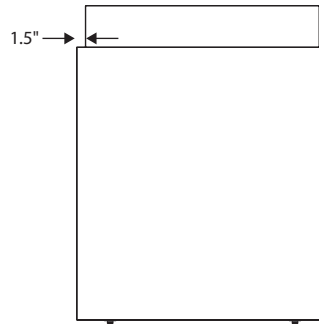

Gallery Panels

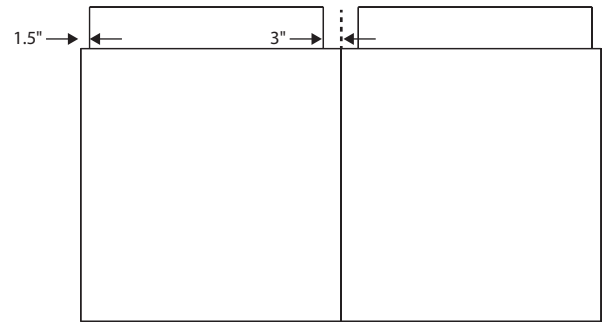

Working with Integrated Glass

GSA PENDING

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset 1½" from each end of the panel.
- Single-piece Gallery Panels for use with integrated glass require glass 3" shorter than the panel width.
- For split Gallery Panels, specify glass for each piece separately.
- Split Gallery Panels for use with integrated glass require glass that is 4½" shorter than panel width (individual piece).
- Glass is available in 3 colors: Clear, Frosted, Smoked (Available for order September 2019).
- Glass height is available in 7½"H.
- Glass is available on all Gallery Panel widths.
- For benching systems, maximum allowable benching height cannot exceed 50"H with or without glass. Overall Gallery Panel height includes the glass.
- Specify glass models separate from Gallery Panel models.

Single Panel with Glass

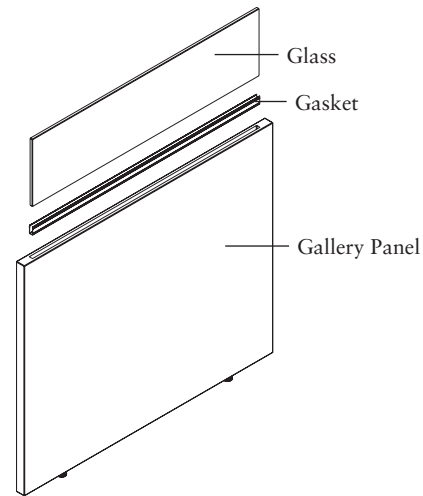

Split Panel with Glass

Find the Gallery Glass width appropriate for your Gallery Panel width.

Shaded example:
For the 18"W Gallery Panel, Gallery Glass should be ordered with width of 15".

Gallery Panels

Stride System - T-Configuration

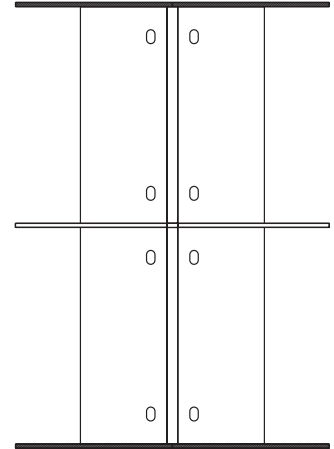

GSA PENDING

- Provides privacy to one or both ends of the system in a dual sided application.
- All T-configurations connect using GZCKP connector kit.
- Gallery Panel sizes 129"W or greater require storage or worksurface tie in on both sides of panel. Please reference storage and worksurface support sections for more details.
- When System panel is higher than the Gallery Panel, variable height System's trim must be specified to finish off exposed frame.
- 30"H Gallery Panel must only be used with 30"H panel frame.
- Stride 30"H panel frames can be ordered via the Standard Specials catalog until available as standard.
- Single piece T-configuration can be used for off-modular planning. GZCKP connector kit location must be field measured.
- Dual piece T-configuration panel seams must align with parent run.
- Dual piece T-configuration can be used for off-modular planning. Contact Allsteel Tailored Solutions Group for details.

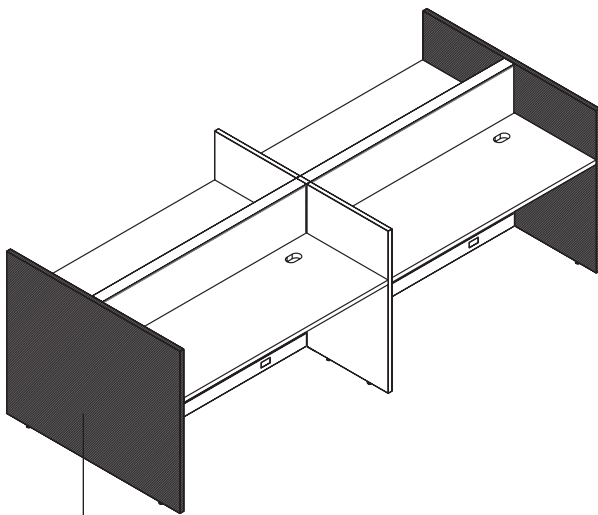

Front edge of Gallery Panel will sit flush with front edge of worksurface on Stride system.

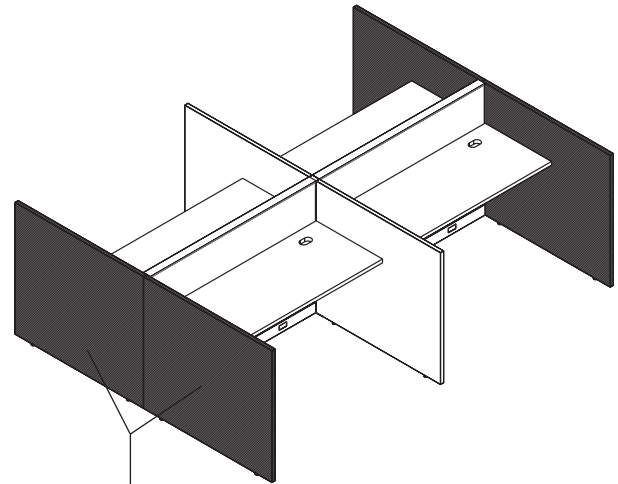

Single Panel Configuration

Split Panel Configuration

Single panel up to 84"W

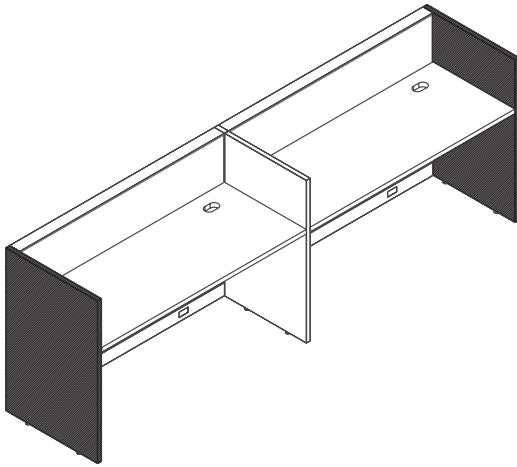

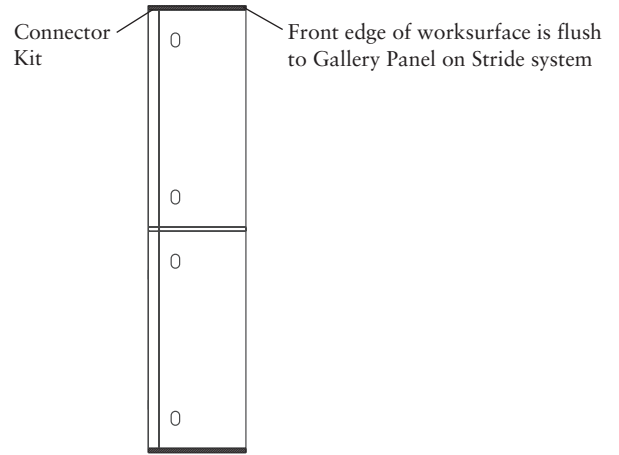

Split panel 87" W and greater

Gallery Panels

Stride System - L-Configuration

GSA PENDING

- Provides privacy to one or both ends of the system in a single sided application.
- L-configuration caps over the System panel. Accommodate for 3" frame thickness when planning with Stride panel system.
- All L-Configuration Gallery Panels require connector kit GZCKP to attach to parent run.
- Gallery Panel sizes 66"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- When System panel is higher than the Gallery Panel, variable height system's trim must be specified to finish off exposed frame.
- 30"H Gallery Panel must only be used with 30"H panel frame.
- Stride 30"H panel frames can be ordered via the Standard Specials catalog until available as standard.

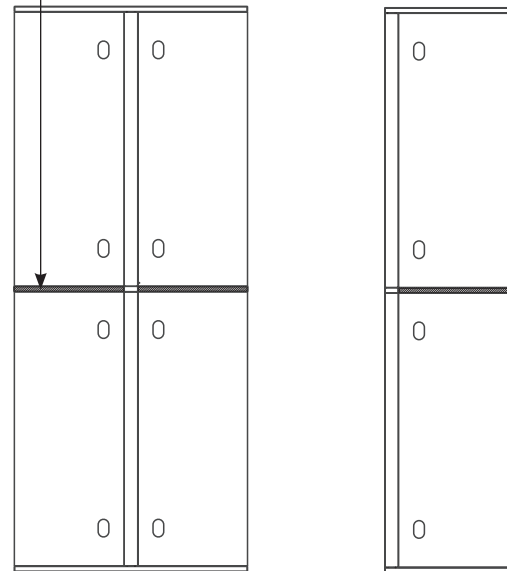

Gallery Panels

Stride System - Mid-Configuration

GSA PENDING

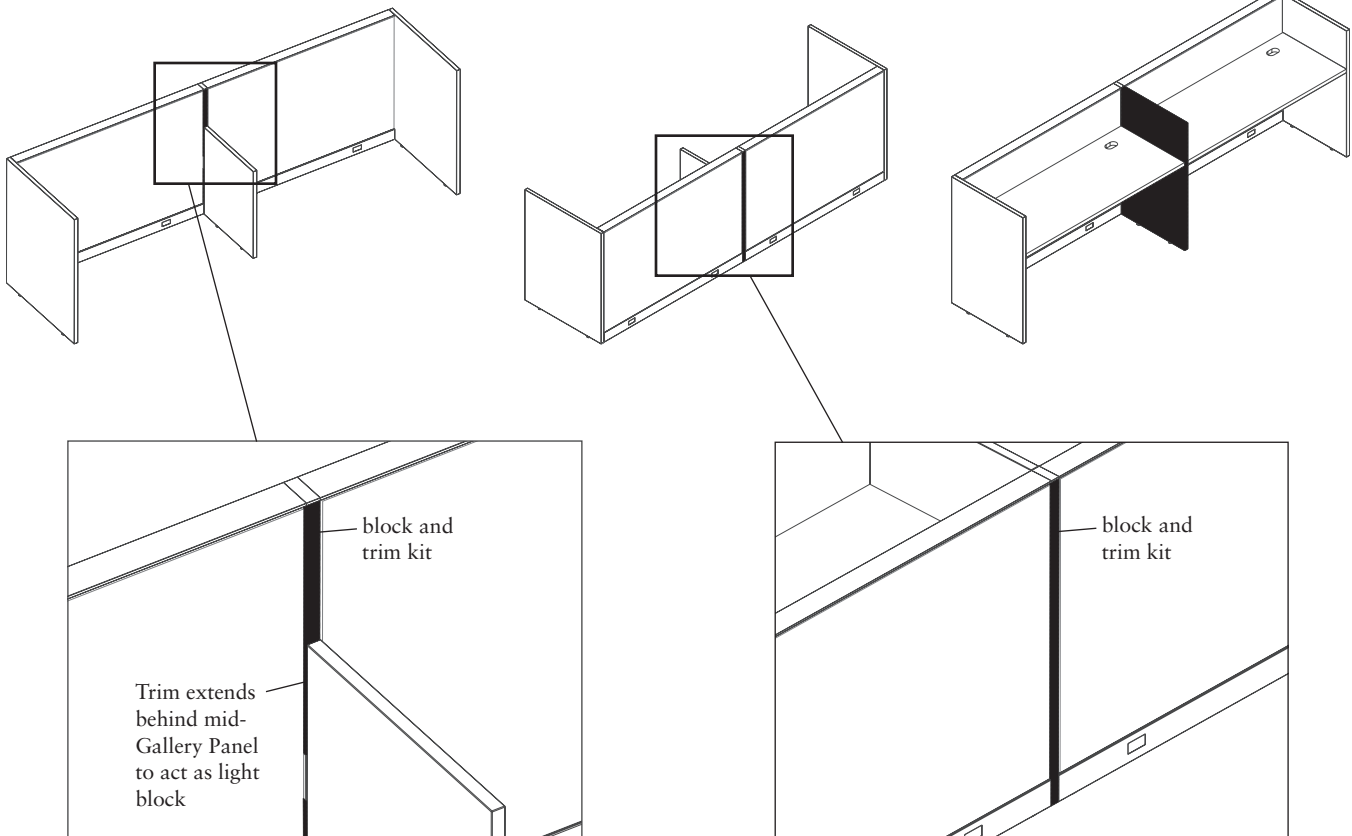

- Mid-configuration panel does not overlap parent system panel.
- When specifying mid-configuration panels, one gallery panel “block and trim” kit (GZ3CONxx) is required to space the System panels out 1 $\frac{1}{8}$ ". Kits include: Connector blocks, vertical trim and a top cap.
- “Block and trim” models must match the height of the parent run.
- Specify one mid-connector kit (GCKPM) per gallery panel to attach to parent run. Gallery panel and mid-connector kit attach over “block and trim” kit. Dual sided application requires two connector kit models.
- When using a mid-configuration Gallery Panel, both panel frames in spine must be of equal height.
- Mid-configuration Gallery Panel may not exceed height of parent run.
- Trims can be painted to match the System panel trims.
- Mid-configuration panels are available in 18"-84" widths in 3" increments.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Spanning top cap available through Allsteel Tailored Solution Group.

Mid-panel must be 3" shorter than end panel due to panel frame thickness

Dual-sided

Single-sided

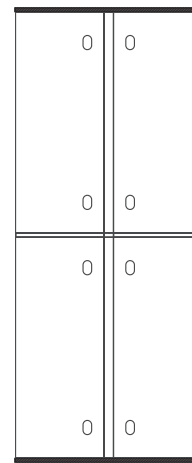

Gallery Panels

Terrace System - T-Configuration

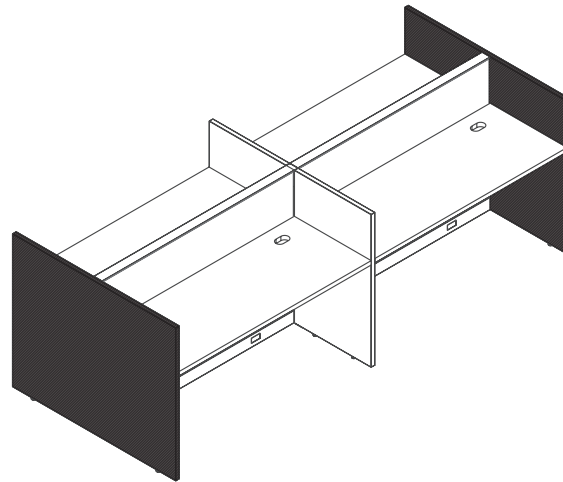

GSA PENDING

- Provides privacy to one or both ends of the system in a dual-sided application.
- All T-configurations connect using GTKCKP connector kit.
- Two-piece Gallery Panels are not allowed in Terrace T-Configurations. Contact Tailored Products Group for a custom solution.
- When System panel is higher than the Gallery Panel, variable height System's trim must be specified to finish off exposed frame.
- 30"H Gallery Panel must only be used with 30"H panel frame. GTKGK30 is required when a 30"H Terrace panel with frameless glass is attached to a Gallery Panel in an end-of-run T- or L-configuration.
- Single piece T-configuration can be used for off-modular planning. GTKCKP connector kit location must be field measured.
- Accommodate for 2⁵/₈" frame thickness when planning with Terrace panel system.

Front edge of Gallery Panel will sit 3/16" proud of front edge of worksurface on Terrace system

T-Configuration

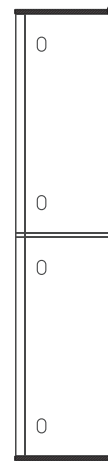

Gallery Panels

Terrace System - L-Configuration

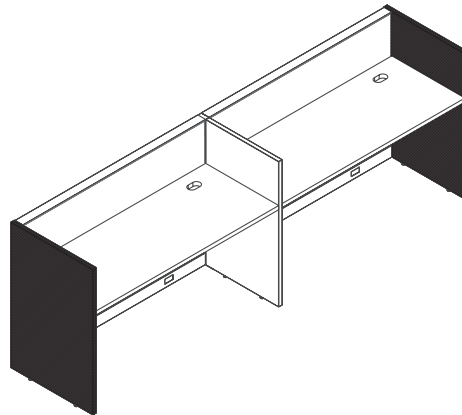

GSA PENDING

- Provides privacy to one or both ends of the system in a single-sided application.
- L-configuration caps over the System panel.
- Due to thickness of the Terrace panel L-configuration overhangs by approximately $\frac{3}{16}$ " on both sides.
- Accommodate for $2\frac{5}{8}$ " frame thickness planning when with Terrace panel system.
- All L-Configuration Gallery Panels require connector kit GTKCKP to attach to parent run.
- Gallery Panel sizes 66"W or greater require storage or worksurface tie in. Please reference storage and worksurface support sections for more details.
- When System panel is higher than the Gallery Panel, variable height system's trim must be specified to finish off exposed frame.
- 30"H Gallery Panel must only be used with 30"H panel frame. GTKGK30 is required when a 30"H Terrace panel with frameless glass is attached to a Gallery Panel in an end-of-run T- or L-configuration.

Front edge of Gallery Panel will sit $\frac{3}{16}$ " proud of front edge of worksurface on Terrace system

L-Configuration

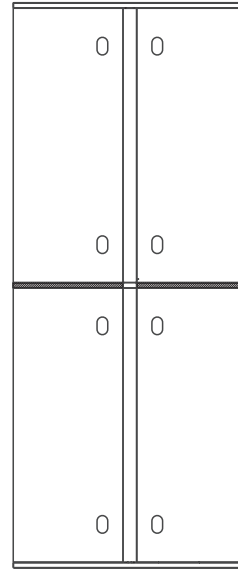

Gallery Panels

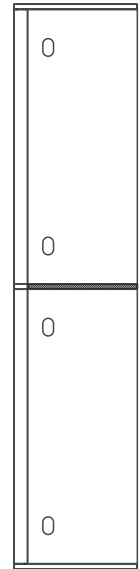

Terrace System - Mid-Configuration (Single-Sided or Dual-Sided)

GSA PENDING

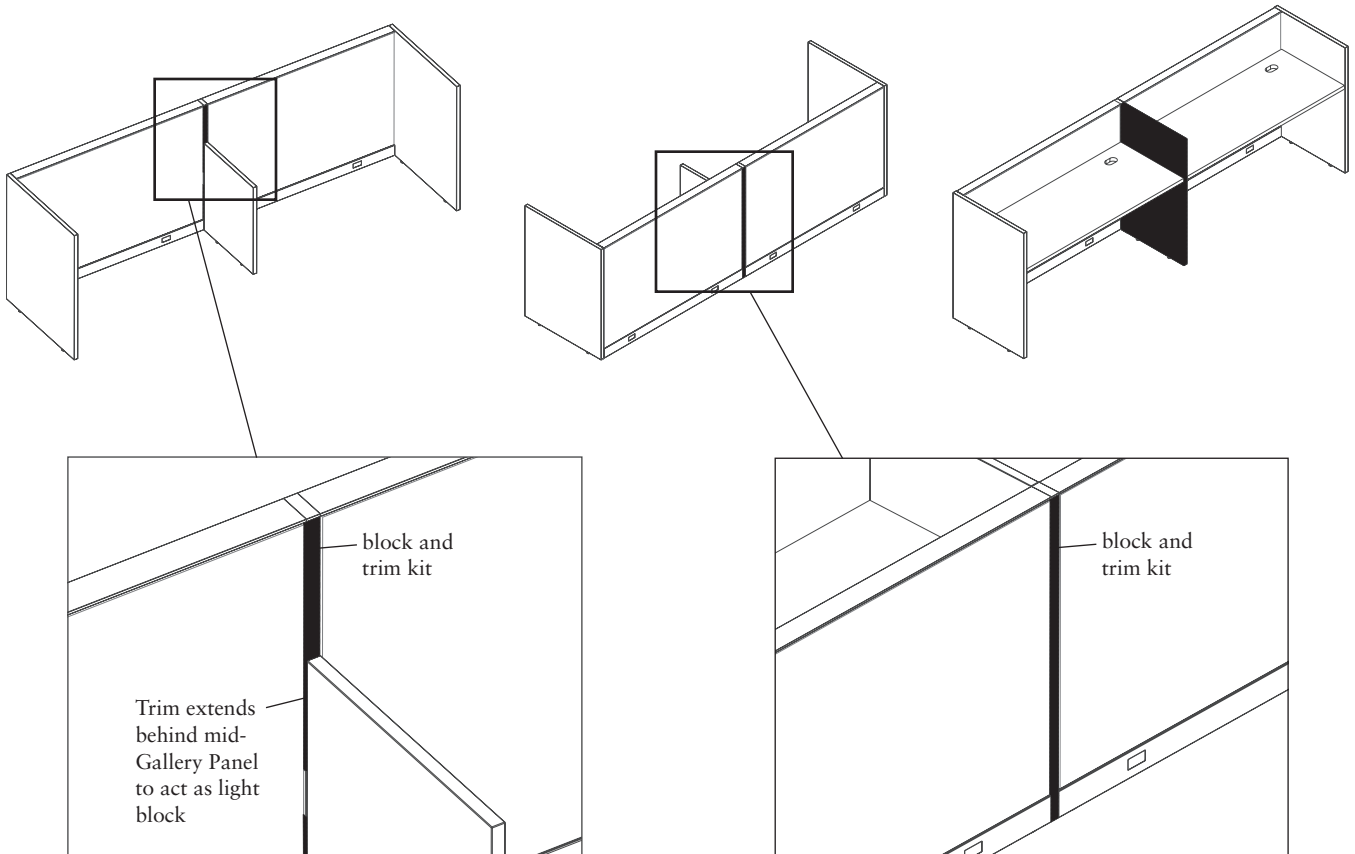

- Mid-configuration panel does not overlap parent system panel.
- When specifying mid-configuration panels, one gallery panel “block and trim” kit (GTK3CONxx) is required to space the System panels out 1 1/8". Kits include: Connector blocks, vertical trim and a top cap.
- “Block and trim” models must match the height of the parent run.
- Specify one mid-connector kit (GCKPM) per gallery panel to attach to parent run. Gallery panel and mid-connector kit attach over “block and trim” kit. Dual sided application requires two connector kit models.
- When using a mid-configuration Gallery Panel, both panel frames in spine must be of equal height.
- Mid-configuration Gallery Panel may not exceed height of parent run.
- Trims can be painted to match the System panel trims.
- Mid-configuration panels are available in 18"-84" widths in 3" increments.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Spanning top cap available through Allsteel Tailored Products Group.

Dual-Sided Configuration

Single-Sided Configuration

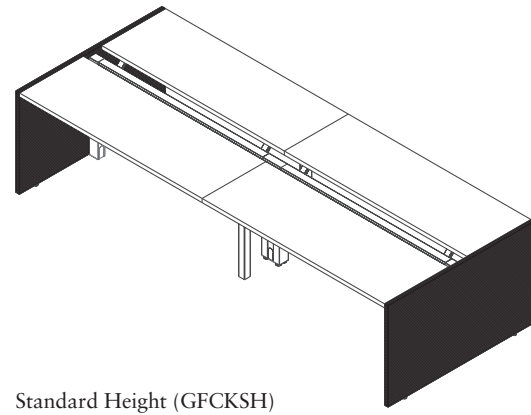

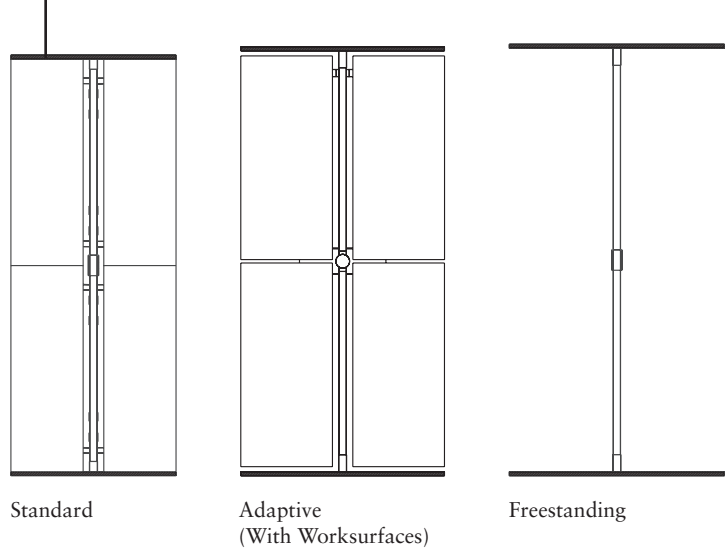

Gallery Panels

Further - T-Configuration

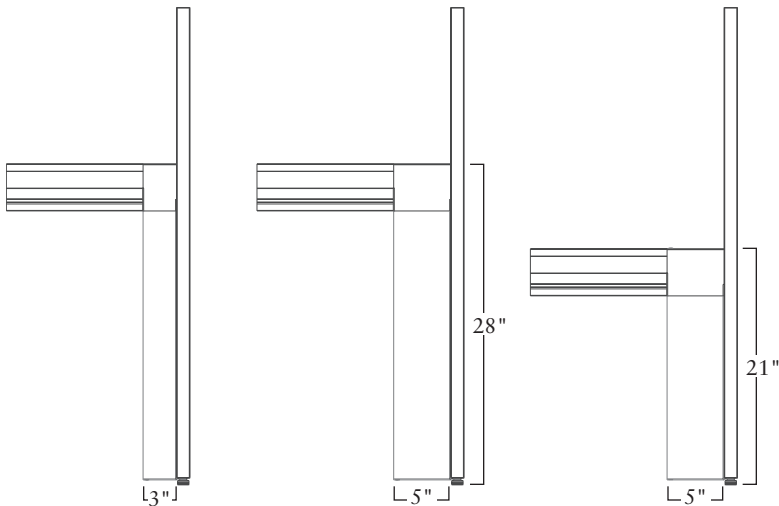

GSA PENDING

- Gallery Panels provide support for beam and worksurfaces.
- Provides privacy to one or both ends of the system in a dual-sided application.
- T-Configuration sizes are available from 48"W to 84"W.
- Maximum overall height is 50"H. Integrated glass is included in overall height.
- All T-configurations connect using one of the following connector kits:
 - GFCKSH - standard-height tethered applications
 - GFCKA - Adaptive or standard-height freestanding beam applications.
 - GFCKLH - low freestanding beam applications
- Connector kits are infed and data accessible.
- Connector kits do not accept power poles.
- T-configuration can be used for off-modular planning, connector kit location must be field-measured.
- In standard height tethered applications, use Z6LB bracket to tie worksurface to Gallery Panel.
- Gallery Panels line up with the edge of the worksurface.
- In tethered applications, the gallery panel must meet or exceed the depth of the worksurfaces.
- In a freestanding application, minimum beam run must total 98"W. This includes connector kit.

Front edge of worksurface is flush to Gallery Panel in T-configuration

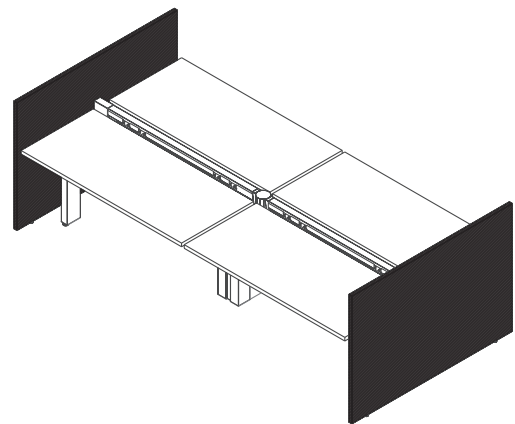

Standard Height (GFCKSH)

Standard Height (GFCKSH)

Adaptive and freestanding standard height (GFCKA)

Low Fence (GFCKLH)

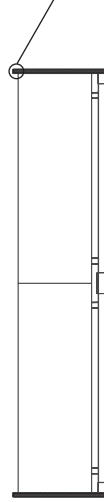

Gallery Panels

Further - L-Configuration

GSA PENDING

- Gallery Panels provide support for beam and worksurface.
- Provides privacy to one or both ends of the system in a single-sided application.
- L-Configuration sizes are available from 33"W to 84"W.
- Maximum overall height is 50"H. Integrated glass is included in overall height.
- All L-configurations connect using one of the following connector kits:
 - GFCKSH - standard-height tethered applications
 - GFCKA - Adaptive or standard-height freestanding beam applications.
 - GFCKLH - low freestanding beam applications
- Connector kits are infed and data accessible. Connector kits do not accept power poles.
- In standard height tethered applications, use Z6LB bracket to tie worksurface to Gallery Panel.
- Gallery Panels extend 1½" past front edge of the worksurface. Specify gallery panel 6" longer than the depth of worksurface.
- In tethered applications, the gallery panel must meet or exceed the depth of the workspaces.
- In a freestanding application, minimum beam run must total 98"W. This includes connector kit.
- L-configurations may not utilize a single beam between two gallery panels.
- Gallery Panel sizes 66"W or greater require storage or worksurface tie in. Please reference storage and worksurface support sections for more details.
- Single-sided Adaptive requires gallery panels along the beam run. Panel widths must match worksurface widths.
- One connector kit (U6GPSS) required for each gallery panel – ordered separately.
- Standard specification creates 1" gap between all gallery panels.
- End Gallery Panels may be specified to align with back panels.
- U3SSHAFa used to mount single-sided Adaptive supports to floor if Gallery panels are not desired.
- Kit includes brackets for 2 end supports and 2 mid-supports.
- Hardware for mounting to floor is not included.

Front edge of Gallery Panel sits 1½" proud of front edge of worksurface in L-configuration

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 27)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¼". Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- A6 Load capacity is 250 lbs for 2-leg models, 375 lbs for 3-leg models, and 350 lbs for Max models. This includes weight of worksurface.

Height-Adjustable Bases (page 7-8)

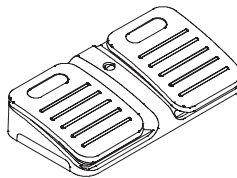

- Electronic height-adjustable base units are available in six styles: A6-T Base with 2 legs, A6-C Base with 2 legs, A6-T Base with 3 legs, A6-C Base with 3 legs, A6-T Max Base with 2 legs, and A6-C Max Base with 2 legs.
- A5 models travel at 1.5" per second, A6 2-stage 1.2"/sec, A6 3-stage 1.4"/sec, A6 Max .8"/sec. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 5.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- 3-Leg bases can accommodate worksurface configurations from 24"D x 48"W x 48"W to 30"D x 72"W x 72"W and 36"D x 48"W x 48"W to 36"D x 72"W x 72"W.

Memory Controls (page 30)

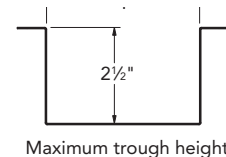

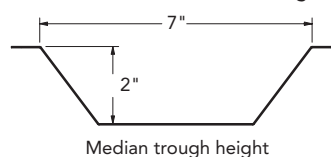

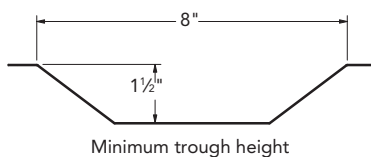

- Memory Controls are now a .option.
- Up/Down: Basic Up/Down control.
- Memory Control: 4 memory pre-set options allow the user to adjust their height to their preferred heights.
- Paddle: Simple, aesthetic control with 1 memory pre-set option and reminder mode.
- Rotating: 3 memory pre-set options and a rotating, dial-like control.
- Foot Control: Basic up/down wireless, hands free control. Can be paired with hand controls for multi-control option.

Foot Controls

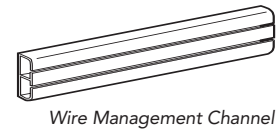

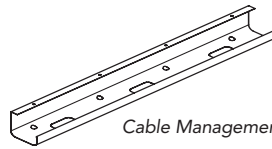

- Available as a .option on A6 and as model.
- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- Compatible with A6 and A3 tables.
- 2 AAA batteries needed. Batteries not included.

Cross-sectional Area Inside Under Worksurface Troughs

Cable & Wire Management

Cable Management Tray (page 28)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 28)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 28)

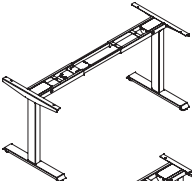

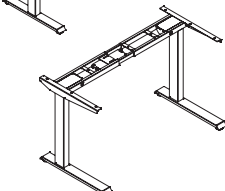

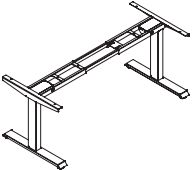

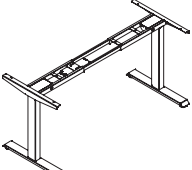

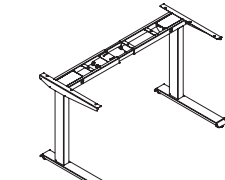

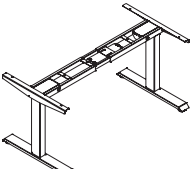

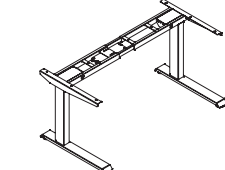

- Works with Approach and Altitude A5 and A3-T units.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 28)

- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

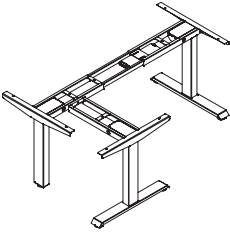

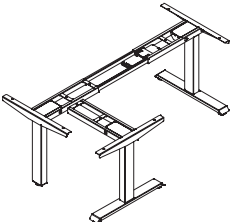

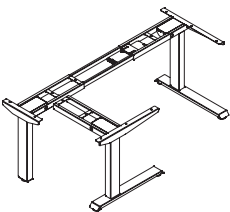

Quad Tap (page 28)

- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Metal Table Screens

Now Open for Orders
3-4 Week Lead Time

Allsteel universal metal table-mounted screens offer a cleanable, easily retrofitted solution to create boundaries within the workplace. Available in 20"H and 25"H, metal screens offer users a sense of privacy while also providing a magnetic surface for posting notes or an optional marker board finish as a writable surface. Extended lateral screens offer an additional 12" boundary between users.

- Screens are offered as extended lateral (for 24" or 30"D worksurfaces), lateral (for 24", 30", or 36"D surfaces), or table-mounted configurations (for 48" through 66"W worksurfaces).
- Screen depths are undersized to accommodate Further™ or Altitude® worksurface depths but can also be added to panel systems or tables products.
- Brackets attach to the top of the worksurface using an industrial grade adhesive. Installation does not require any drilling or defacing of the worksurface. Screens and brackets may be removed in the future, if desired.
- The front of the bracket has a beveled zinc cap, and the back of the bracket has exposed hardware. Brackets are non-handed so that the front and back can be oriented either direction, based on the application.
- Screens meet or exceed ANSI/BIFMA X5.5-2014 Sections 4.6 and 9.

Offered in 32 standard Allsteel powder-coat paint finishes, including a marker board finish. P2 is \$20 upcharge, P3 is \$40 upcharge, P6 (marker board) is a \$100 upcharge. Bracket will match the finish of the screen.

Acrylic Freestanding Screens

Now Open for Orders
3-4 Week Lead Time

Acrylic Freestanding Screens offer a cleanable, transparent solution to create a protective barrier between users. Models with a transaction cut-out are a solution for reception and other front-desk applications. Varying screen sizes provide solutions for different types of spaces. From a large reception desk to a smaller check-in space, this screen solution blocks germs without interrupting communication.

- Screens are supported by two black feet. Feet are only available in a black finish.
- Feet dimensions are 12"H x 10⁵/₈"W.
- Screens are offered as a freestanding solution and do not adhere or mount to a worksurface or tabletop.
- Transaction cut-out screens stand 36"H and are offered in 30", 36", and 48"W.
- Freestanding screen without a cut-out is available in 24" or 30"H and 30", 36", or 48"W.
- Screens are made of 0.220" thick high-impact clear acrylic.

Hands-Free Pulls

Now Open for Orders
3-4 Week Lead Time

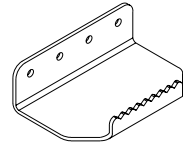

Allsteel foot and arm pulls allow for hands-free entry on any latch-less door. A hands-free operation helps to prevent cross-contamination in high traffic areas. The hands-free pulls are shipped with mounting hardware to accommodate either metal or solid wood doors and are offered in either a pack of 5 or 15.

- Hands-free pulls are ideal for high-traffic areas.
- Hands-free pulls can be installed in minutes using the included mounting hardware.
- Toothed edge on foot pull ensures a no-slip grip.
- Offered in Textured Titanium (P8V) and Textured Black (P6P).

Height-Adjustable Table Foot Control

Now Open for Orders
3-4 Week Lead Time

The Allsteel height-adjustable table foot control allows for hands-free adjustment at any Altitude® A6 or A3 table. Hands-free operation helps prevent the spread of germs, making this control a great solution for individual or shared workspaces.

- Compatible with the existing Altitude A3 and the new Altitude A6 height-adjustable tables.
- Available in grey only.
- Wireless design offers clean and functional solution.
- Can be paired with a standard control pad for dual control function.
- Easy to install instructions for retrofitting current workstations or adding on to new Altitude A6 workstations.
- Requires 2 AAA batteries. Batteries not included.

Hand Sanitizer Solutions

Now Open for Orders
3-4 Week Lead Time

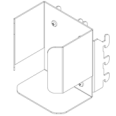

Allsteel offers an easy and accessible sanitizing solution, helping employees stay bacteria-free while moving throughout the office. Incorporating freestanding stations within the facility aids in preventing the transfer of germs between meetings and high-traffic areas. Bottle holders at individual workstations free up valuable workspace to allow for easy surface cleaning while promoting more frequent sanitizing.

- Ideal for high-traffic areas and workstations.
- Available freestanding on base and mounted to panel wall or tool rail and tile.
- Metal freestanding base for added stability. Drip tray prevents sanitizer spills.
- Holder is compatible with most standard hand sanitizer dispensers.
- Easy installation: holder for panel or tool rail and tile can be attached through the pre-drilled holes or via double-sided tape. Additional mounting holes can be drilled to fit a non-standard dispenser.
- Velcro attachment can be used to hold other disinfectants.
- Hand sanitizer dispenser sold separately.

Wall Mounted Sanitizer Holder

Now Open for Orders
3-4 Week Lead Time

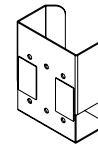

Having a place to hold hand sanitizers either on panels or architectural walls, keeps items in consistent locations and prevents cluttering a table or worksurface. The hand sanitizer holder can be inserted into Beyond's slotted standards between panels. The holder is designed to fit most 8 oz bottles of hand sanitizer.

This model contains the following parts: a left-hand and a right-hand bracket that fit into Beyond's $\frac{5}{8}$ " slotted standards, a metal holder that screws into the bracket, and a hardware pack with 4 screws. Only one bracket is needed for installation and the holder can be positioned in a right, left or centered location.

- The metal mount can be finished in any Beyond or Aspect standard painted metal finishes. It will be painted in an anodized-like silver powder coat if anodized clear is selected.
- To attach the mount to Aspect, no bracket is needed. Simply screw the bracket into Aspect between the door jamb and panel vertical.
- If mounting into a panel system, a different bracket is needed to work with furniture's $\frac{1}{2}$ " slotted standards (see Hand Sanitizer Solutions).
- The mount can also be screwed into drywall with no bracket needed.

Metal Holder

Beyond Bracket

Description	SPLA Model	List Price
Hand Sanitizer Holder – Clear Anodized*	SPLW-SANITIZER.M505403.AALCLR	\$75
Hand Sanitizer Holder – Painted	SPLW-SANITIZER.M505403.PNT_ _ _**	\$75

*Note: Holder will be painted in a light silver powder coat to match anodized.

**Choose from 30 Beyond and Aspect standard painted metal options. See Beyond and Aspect specification guides for full listing of finishes.

4-5 week lead time when ordered with Aspect finishes. 6-8 week lead time when ordered with Beyond finishes.

Altitude® A8 Screens Now Available in Contourett

A Durable & Easy-to-Clean Polyurethane
Now Open for Orders

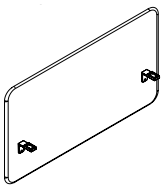

Altitude A8 screens create a natural privacy barrier above and below the worksurface. The A8 screen extends 21¾" above and 10" below the worksurface, creating a boundary around your personal workspace in a clean and attractive way. As workspace design evolves, creating a sense of physical privacy and personal space can help promote individual well-being. Adding a privacy screen, like an A8 screen, to compatible work surfaces offers the much-needed personal perimeter we now look for in our workspace.

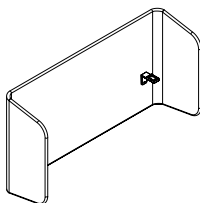

A8 screen kits (U, Rectangle) are now available in Contourett, a non-tackable 100% polyurethane, a durable and easy-to-clean surface that allows for the use of a variety of cleaning agents.

Specifying for Freestanding Worksurfaces

Altitude A8 screens are designed to fit on Altitude worksurfaces, which are undersized by 2" to allow for height-adjustable motion. This is a common design for height-adjustable worksurfaces, but there are a few steps to take to verify non-Altitude worksurfaces are compatible.

1. Understand measurements of worksurface
2. Match with correct A8 screen size
3. Consider clearance of modesty screen and mounting brackets

Example: 48" Altitude Worksurface (AF5RS4824) is actually 46". A 48" U-Screen kit would be the correct screen size to specify with this worksurface.

Allsteel Customer Support is available to verify when needed.

How to Clean

Contourett

- For wet spills, gently blot with dry cloth to remove spill.
- For dried spills, gently work the spill in a non-aggressive circular motion using a damp cloth, making sure to not oversaturate the fabric.
- For dried stains, use a mixture of Tide or Oxiclean and warm water (1 teaspoon of soap for every 16 ounces of water). Follow instructions for dried spills above. Make sure to wipe away any excess soap left behind and remove any moisture with a dry cloth.
- For non-liquid spills, always remove excess contaminant from surface before cleaning. The use of a soft brush or soft abrasive can be used to remove dried contaminants before performing liquid cleaning.
- For healthcare related stains, a water-to-bleach solution of 5:1 is recommended. Rinse cleaned area with water.
- For stains requiring the use of a solvent, spray the solvent directly onto the stain and allow it to sit for 2-3 minutes, avoiding over saturating the fabric. Follow directions for dried stains above.
- Always allow fabric to air dry.

Approved Cleaners for Contourett

It is important to remember that after use of any cleaning agent, the fabric should be rinsed with water and wiped dry to remove any remaining residue or moisture. Approved cleaning agents include Shockwave, Recon, Benefect, Microban, Greased Lightning Degreaser, Lysol Wipes, Diluted bleach solution (5:1 water to bleach), Dispatch Disinfectant Towels with bleach, PDI Sani-Hands Wipes, PDI Super Sani-Cloth Germicidal Disposable Wipes, Diversity Morning Mist Neutral Disinfectant Cleaner, Virex 256, Fantastik, Oxycide, Formula 409.
