# Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

**COM Program**

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at [allsteelcomteam@allsteeloffice.com](mailto:allsteelcomteam@allsteeloffice.com).

**Allsteel to Supply (ATS):**

1. Select the fabric you wish to use and check the COM Search on Synergy at: [Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search](#) or [COM Search quick link](#). You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.  
If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

**Dealer to Supply (DTS):**

1. Select the fabric you wish to use and check the COM Search on Synergy at: [Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search](#) or [COM Search quick link](#). Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.  
You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

**HNI Textile Distribution Center****COM Production Yardage — PO Number**

Docks 20-22  
301 Mulberry Avenue  
Muscatine, IA 52761

Information that **MUST** be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

#### Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).

#### Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

*For more information, please contact Allsteel Customer Support.*

#### YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

### Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a \$500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no \$500 matching fee, however, there is a sample chip fee of \$175 net for stains and \$100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

#### Allsteel Inc.

Attn: COM Team  
200 Oak St.  
Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

#### Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

### Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

### Veneer Care Instructions

Veneer worksurfaces feature the Gunlocke® finishing system. The finishing system is a process that begins with the application of stains, which promote exceptional depth and clarity. Next the worksurface receives a specialized coating that provides exceptional durability and chemical resistance. The remaining surfaces receive a top coat. These finishing processes ensure depth, clarity, color consistency and durability throughout the product.

Veneer worksurfaces have exceptional resistance to:

- Heat and moisture (hot beverages, pizza boxes)
- Chemicals (liquid paper, nail polish)
- Stains (permanent markers)
- Scratches and impact (everyday wear and tear)

#### Caring for your veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week (be sure to wipe with the grain)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately. Do not allow spills to dry.

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Allsteel does not guarantee the exact matching of grain, pattern and color.

### Allsteel Open Line Laminate Program

The Open Line Laminate (OLL) program makes it even easier for a customer to tailor their Allsteel product for a custom look. Select Allsteel furniture products accommodate hundreds of graded-in high-pressure laminates (HPL) from the leading laminate manufacturers' open lines.

Laminates that are currently available in the program can be viewed in specification tools.

Requests to add laminates to the standard specials program can be submitted through the CET Specials Integration tool as well as Community.

Matching edge options are not available offered for laminates in the OLL program. When selecting a laminate please select an edge option from the Allsteel standard offering. If a matching edge is required a modification request can be submitted through the CET Specials Integration tool as well as Community.

Due to manufacturing techniques, materials, quality issues of varying laminates, and minimum order quantities some product exclusions will apply, and some requests may be declined.

Extended lead times may apply on orders containing special laminates.

Contact the Tailored Products Group for questions or additional information regarding pre-approved laminates and pricing.

### ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's Partnership Program consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, [allsteeloffice.com](http://allsteeloffice.com).

For memo samples, please contact our partners:

- Camira, [memos@camirafabrics.com](mailto:memos@camirafabrics.com) 1.616.288.0655
- CF Stinson, [cfstinson.com](http://cfstinson.com) 1.800.841.6279
- HBF Textiles, [hbftextiles.com](http://hbftextiles.com) 1.877.494.5727
- Maharam, [maharam.com](http://maharam.com) 1.800.645.3943
- Ultrafabrics, [ultrafabricsinc.com](http://ultrafabricsinc.com) 1.877.309.6648

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

Available on Align Lockers and Wardrobes (pages 69-78)

Keypad lock, left  
RFID lock, right

The digital keypad & RFID lock options support applications where workstations or storage banks are shared by multiple users. This is an alternative to a standard key lock. This feature facilitates the use of storage by multiple users through eliminating the need to keep and hand-off physical keys. These locks ship in “shared mode” by default; shared mode indicates that the lock will “forget” the paired 4-digit code or RFID badge after the lock is opened, allowing the unit to be used by multiple users.

### Digital keypad & RFID locks:

- Offered on Align™ lockers and wardrobes
- Ship factory installed
- Offered in a polished silver finish
- Digital keypad lock requires input of a user-selected 4-digit code
- RFID lock requires a compatible RFID card or sticker
- Digital keypad and RFID locks are powered using 4 premium AA batteries.
- Battery life is dependent on the frequency of operation but can last up to 5-7 years
- To order Align wardrobes or lockers with a digital lock option, add "E" suffix to base model number. The digital lock has an integrated pull, so no pull will be specified.

RFID locks require user to present a compatible RFID card or sticker to the lock in order to gain access. This is the same technology as “badge” systems that allows employers to grant employee with cards that can be scanned to gain access to entrances and buildings. Allsteel locks *may or may not be* compatible with these existing badge systems.

- For existing RFID badge system compatibility, badges must operate on a 13.56 MHz frequency with both iClass (ISO 15693) and Mifare (ISO 14443).
- If existing badge system is not compatible with 13.56 MHz frequency, compatible RFID badges or RFID stickers are sold separately as an accessory model.

Additional information about setup and common troubleshooting problems can be found here: [Digital Lock Overview](#).

### Digital Lock Accessory Models (page 78)

- RFID-compatible cards and stickers are sold as accessory models in increments of 5, 25, or 100.
- RFID cards are plain white and have a lanyard cut in them.
- RFID stickers are plain white, approximately 1" in diameter, and may be added to the back of an existing badge or employee identification card.
- Every digital keypad or RFID installation site will require *one* Programming Key and *at least one* Manager Key, sold separately.

### Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Once a programming key is used with a unit, it is tied to that lock. Another programming key can not be used.
- Add-on digital lock orders should be programmed with the original programming key.

### Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the “master” key and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

\*\*\*These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

*The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.*

### "O" Frame Construction

Heavy duty outer shell and front and rear perimeter frames provides significant strength; helps keep the cabinet true to square.

### File and Box Drawers

Full extension file and box drawers glide easily on steel ball-bearing suspensions; allows complete access to drawer contents with a quiet drawer motion.

### Filing

File drawers can accommodate front-to-back and side-to-side filing. Order hanging frames separately.

### Full Front Drawer Design

Drawer front is square and extends fully across the case.

### Counterweight

Counterweights (standard on mobile pedestal units) inhibit tipping when drawers are opened. Optional counterweight kits.

### Aesthetic Alignment

Drawer alignment matches across Align storage offering. Base height matches Stride® and Terrace® panel base.

### Locking System

Robust lock system for security and reliability.

### Core Removable Locks

Master-keyed core removable lock feature allows key numbers to be easily changed in the field and facilitates one-key access.

### Omit Lock Core

Units can be shipped with lock cores removed; cores can then be installed after units are placed. Different storage components can be keyed alike within a workstation.

### Mobile Pedestals

Mobile pedestals provide flexible storage and can be nested under worksurfaces. (Take into consideration when planning offices which may have uneven floors.)

### Support Pedestals

Support pedestals can support one end of a panel-attached worksurface, in lieu of other worksurface supports, and can be used to support worksurfaces in desking applications. Drawers align with laterals.

### Freestanding Pedestals

Freestanding pedestal drawers align with credenzas.

### Depth

Pedestals are 18", 23¼", and 29¼"D, and credenzas are 18" and 24"D, both can be used with systems worksurfaces. Placement may affect access to receptacles in base pathway and worksurface grommets.

### Pull Styles

Choice of pull styles, available on pedestals, credenzas, towers, and laterals, allows for total design coordination on projects.

### Veneer and Landscape Fronts

Contact Allsteel Tailored Products Group for availability.

Align metal storage models are available with Terrace, Stride, or Pier feet. There is also a laminate front option.

### Seven-formation

#### Front Post Design

Steel front posts are formed with seven formations to provide unparalleled stability and strength. This unique design allows unmatched longevity for Allsteel files.

### Dual-side Locking

Drawers and doors lock on both sides to prevent being pried open. The locking system is enclosed within the case to hide mechanisms which can snag and scratch. This feature is not found on most other manufacturers' files.

### Dual Interlock

This mechanism inhibits roll out of more than one drawer, either sequentially or simultaneously.

### Adjustable Drawer Backs

Backs are adjustable to three depths to accommodate letter, A4, and legal documents side to side without the need for extra components.

### Infinitely Adjustable Divider

This Allsteel exclusive design allows the divider to also function as a compressor in that it can be located where it is needed versus being limited to pre-set positions.

### Offset Construction

As a result of the back and the top of the case sides being offset, the file case has a finished appearance with smooth seams and no overlaps.

### Fully Enclosed Bottom

Unlike many files, the Allsteel file features a fully enclosed steel bottom to help prevent moisture and dust from affecting the filed documents. Double bottoms are welded into all files for added rigidity.

### Side Knockouts

Files have two knockouts on each side to allow easy ganging of freestanding units to inhibit tipping.

### Four Hex-head Leveling Glides

Leveling glides can be adjusted from outside or inside the case. Because of the hex-head design of the stem, leveling can be done even when the file is fully loaded. Range is 1½".

### Suspension

Extra heavy-duty, telescoping, ball-bearing slides.

### Hanging Frames

Front-to-back and side-to-side are both standard. For front-to-back filing, backs should be set on rear position for maximum storage capacity.

### Core Removable Lock

Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.

### Omit Lock Core

Files can be shipped with lock cores removed; cores can then be installed after files are placed. Laterals can be keyed alike with pedestals, laterals, credenzas, towers, and overhead cabinets.

### Full Front Drawer Style

Features core removable lock located in top drawer on the right.

### Front Drawer Options

Optional veneer and Landscape™ fronts available on laterals, contact Allsteel Tailored Products Group.

### Pull Styles

Choice of pull styles, available on pedestals, credenzas, towers, lockers, wardrobes and laterals, allows for total design coordination on projects.

### Double-wall Drawer Front Construction

Drawer fronts are fully lined to reduce noise and to prevent damage from drawer contents.

### Counterweight Kit

The unique design of the counterweight allows easy installation because, unlike some files, the drawers and shelves in Allsteel files do not have to be removed to install the required counterweights.

### Drawer Interiors

Painted same color as case.

### Paint Finish

Durable baked enamel finish is applied over rust-inhibiting phosphate pre-treatment.

#### Four Hex-head Leveling Glides

Hex-head design of the stem allows leveling to be done even when the cabinet is fully loaded (plinth units only). Plinth units include leveling glides that can be adjusted 1½" from outside or inside the case. Footed units include leveling glides that can be adjusted 2¼" from outside the case only.

#### Aesthetic Alignment

Drawer alignment matches other Align storage.

#### Full Front Design

Drawer and door fronts extend fully across the case.

#### Pull Styles

Choice of pull styles, available on pedestals, credenzas, towers, lockers, wardrobes and laterals, allows for total design coordination on projects.

#### Suspension

Heavy-duty, telescoping ball-bearing slides.

#### Omit Lock Core

Units can be shipped with lock cores removed; cores can then be installed after storage units are placed. Laterals can be keyed alike with pedestals, towers, and overhead cabinets.

#### Core Removable Locks

Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.

#### Locking

All door & drawer locks are controlled by one lock core located on the top drawer. Standard core removable locks, see page 54.

#### European Hinges

Wardrobe and cabinet door both contain European-style hinged door.

#### Filing

File drawers in 24"W towers accommodate front-to-back and side-to-side filing. Order file rails for side-to-side separately. File drawers in 18"W slim towers accommodate side-to-side filing only, hang rails are included.

#### Counterweight

Towers are factory-installed with counterweights to allow them to be freestanding.

Storage Islands are a new application for Align and Essentials Storage Lines.

**\*Essentials 3H Storage and Align 42½"H Lockers and Wardrobes**

**Top:** (pages 83-86)

- Available in 18"D and 36"D.
- Tops made of 1¼" particle board with 2mm edgeband, High Pressure laminate on one side and paper back on the other. Grain direction on all tops runs horizontal.
- Tops specified specific to the application.  
*Example:* Storage island tops with end panels will have proper pilot holes in the top to accept attachment hardware.
- External Support Channel should be used in applications where +48"W tops are unsupported.

**End Panel:** (page 87)

- Panels made of 1¼" particle board with 2mm edgeband and High-Pressure Laminate on both sides.
- Grain direction on all End Panels runs vertical.
- End Panels are shipped with mounting hardware.
- All 36"D End Panels and Tops accept a septum, however, it is not necessary to put one in for all applications.

**Back/Septum:** (page 87)

- Model is considered a back when used in 18"D configurations to encase back of storage units.
- Model is considered septum when used in 36"D configurations to create division down the center of 36"D top.
- Backs/septums are made of ¾" particle board with 0.5mm edgeband and High-Pressure Laminate on both sides.
- Grain direction on all backs/septums runs horizontal.
- Ship with mounting hardware.
- The width and number of units spanned on the septum must match the width and number of units spanned on the top.

**End of Run Supports:** (pages 88-89)

- O-legs installed in peninsula application are centered front to back on the worksurface. The O-leg will be ½" inset from the edge of the worksurface.
- When specifying a peninsula application, at least one side of the open worksurface span must be supported with undersurface storage. Island tops cannot be specified with only O-leg, Stride Post Legs, or Laminate Return Panel supports.
- Stride Legs are height-adjustable and able to be used with Align or Essentials platforming.
- End of Run laminate supports can be specified as a "waterfall" return on peninsula applications.

### Working with Storage Islands

#### Top Sizes: (pages 83-86)

Top models are decided by what is needed in the application. If a storage island is specifying end panels, a different top model is needed than when a non-paneled island is configured. Storage Island Tops for use with End Panels are dimensionally larger to accommodate the needed attachment. The below chart highlights how the depth changes when panels and backs are specified.

<div style="display: flex; align-items: center; justify-content: center;"> <div style="border: 1px solid black; width: 150px; height: 100px; margin-right: 10px;"></div> <div style="text-align: center;"> <p>Width</p> <p>Depth</p> </div> </div>	Depths	
	18"D No Back, No End panels	18.190
	18"D No Back, With End panels	18.440
	18"D Back and End Panels	19.455
	36"D No Back, No End Panels	36.690
	36"D End Panels	

#### End Panel sizes: (pages 87-89)

Storage islands can be designed using Essentials and Align. These storage platforms have a 2" variance making storage island dimensions different depending on storage platform used. See the chart to the right for dimensions of end panels.

\*Recommend usage of panels when top is specified and storage sides are exposed. Storage will have gap between back-to-back units if top is flush with storage units.

	Depths	Height
18"D No Back, Align	18.190	40.8
18"D No Back, Essentials		38.8
18"D With Back, Align	19.204	40.8
18"D With Back, Essentials		38.8
36"D End Panels, Align	36.440	40.8
36"D End Panels, Essentials		38.8

As the storage island configuration grows, the top width also increases. The below chart outlines how to calculate these dimensions when considering how many units are spanned and if end panels are specified. When specifying your model for the storage island top, the model will end with the correlating span. These spanning guidelines assume all storage units are the same model and does not take into account mixing and matching of units. When mixing and matching of storage units, use the below chart to find required top dimensions and pick top model with this information. Spanning indicated on model may not be indicative of configuration when mixing and matching.

	Width Sizes						
	Span 1	Span 2	Span 3	Span 4	Span 5	Span 6	Span 7
No End Panels	Listed Model Dimensions	Span 1 + 0.125	Span 1 + 0.25	Span 1 + 0.375	Span 1 + 0.5	Span 1 + 0.625	Span 1 + 0.75
1 End Panel	Listed Model Dimensions + 1.372						
2 End Panels	Listed Model Dimensions + 2.744						

Span 1 tops indicate it will only cover a single storage unit. Start with the span 1 number displayed in the table above. Depending on your Islands configuration, the top width increases accordingly based on the 2 factors below.

- 1). The number of end panels you attach to the worksurface. As you add end panels, 1.372" is also added to the top dimensions per end panel specified.
- 2). The number of side-to-side storage units the surface spans. The spanning from one unit to another takes into account .125" gap between each storage unit.

\*Be sure to use the width of the worksurface you select. Models correspond to the correct surface width.

\*Span represents the total number of side-to-side units. Front-to-back units do not factor into number of units spanned.

**Example:** Two 24" W laterals are specified side-to-side. The top will span across two units making it a "S2." The configuration will also include two end panels, so the overall width of the configuration is 48" + 2.744" + .125" = 50.869" W.

### Working with Storage Islands

#### Application Overview

#### Simple Storage Island:

Simple Storage Islands only consist of adding a top to Align or Essentials storage configurations. Simple Storage Islands allow users to flex storage spaces into usable spaces.

#### Fully Shrouded Storage Island:

Fully Shrouded Storage Islands consist of adding a top, back/septum, and end panels. Single- (18"D top) or double-sided (36"D top) applications can be specified as fully shrouded. By adding these additional parts and pieces to Essentials or Align Storage platforms users can create more permanent and visually appealing storage spaces.

- When specifying like applications, both end panels must be specified with the back. The back piece cannot connect to another back.
- In a counter top application, the unsupported 18"D surface will require an external stiffener based on the unsupported width.

#### Collaborative Storage Peninsula:

Collaborative Storage Peninsulas consist of tops, septum, end panels, and end of run supports. Peninsulas create usable storage spaces and collaborative work areas all in one configuration.

- Peninsula applications can only be completed with 36"D worksurfaces and end panels.
- Back to back storage specified without an end panel will result in a  $\sim\frac{3}{8}$ " gap between storage units.
- In a peninsula application, one end of the worksurface must be supported by undersurface storage. The opposing end can be supported with an O-leg, Stride Post Legs, or laminate return panel.

For specification information see pages 80-82.

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when LJA/B values are exactly the same. (LJA/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

\*\*\*These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

### Essentials Pedestals

- File drawers can accommodate front-to-back filing on all models, and side-to-side filing on 22 $\frac{1}{2}$ "D and 28 $\frac{1}{2}$ "D models.
- Support pedestals of a maximum depth, relative to the worksurface depth, result in one panel receptacle position being inaccessible.
- 22 $\frac{1}{2}$ "D units cannot be used with 24"D Concensys® Freestanding.
- 28 $\frac{1}{2}$ "D units cannot be used with any 30"D Concensys Freestanding or any 24"D panel-hung worksurface.
- For locking specifications, see pages [328-330](#).
- Leveling capacity is 2" on 28"H pedestals.

**Support pedestals** can support one end of a panel-attached worksurface, in lieu of other worksurface supports by using a 28"H support pedestal but cannot be used to support freestanding desking without an end panel.

**Suspended pedestals** mount to the underside of the worksurface using keyhole slots in top of pedestals. Do not mount suspended pedestals on bridges or peninsulas. Always mount suspended pedestals at end of worksurfaces.

When using suspended units on systems, a return panel should extend 18" minimum beyond leading edge of worksurface on which unit(s) is mounted.

**Mobile Pedestals** can be used to provide flexible storage. The nominal height of a mobile pedestal is equal to that of a freestanding pedestal of equivalent design. There is no need to add extra height for the casters.

Both 26 $\frac{1}{2}$ "H and 28"H mobile pedestals can be nested under worksurfaces mounted at 29 $\frac{1}{2}$ "H. If using 28"H Essentials mobile pedestals underneath a panel mounted worksurface on Stride®, Terrace®, or Optimize™ the panel glides will need to be extended a minimum of  $\frac{3}{4}$ " to allow for the mobile pedestals to slide underneath the worksurface.

Mobile pedestals cannot be leveled. Take this into consideration when planning offices which may have uneven floors.

### Pedestal Compatibility with Cadence® Desking and Systems Worksurfaces

Pedestal Depth	Freestanding		Systems Panel-hung Worksurfaces	
	24" Deep	30" Deep	24" Deep	30" Deep
18"	Yes	Yes	Yes	Yes
19 $\frac{1}{2}$ "	Yes*	Yes	Yes*	Yes
22 $\frac{1}{2}$ "		Yes	Yes*	Yes
28 $\frac{1}{2}$ "				Yes*

\*Wire management grommet is blocked in these applications.

**Note:** Pedestal placement may affect access to receptacles in base pathway.

### Essentials storage pedestals are available in 5 styles:

Worksurface height mobile and worksurface supporting pedestals have a taller base plate, resulting in a taller overall cabinet height. Consideration must be made to ensure that units align visually with each other and with selected Essentials lateral files. The accompanying chart will help you select the correct pedestal for your application.

Essentials Pedestal Model begins with	Style	Overall Height	Base Height	Spacer required below worksurface	Units align with these Essentials Lateral Models begin with
xx11	Seat height	22 $\frac{1}{2}$ "	2"	N/A	N/A
xx14	Suspended	19 $\frac{1}{2}$ "	N/A	N/A	N/A

xx19, xx39	Worksurface supporting*	28"	3 $\frac{1}{4}$ "	No	ELF8 (2-high only)

\*Units will support conventional 29 $\frac{1}{2}$ " high worksurfaces.

\*\*When using 28"H Essentials mobile pedestals underneath a panel mounted worksurface on Stride or Terrace, the panel glides need to be extended a minimum of  $\frac{3}{4}$ " to allow for the mobile pedestals to slide underneath the worksurface.

Choice of four pull styles, also available on Essentials pedestals, allows for total design coordination on projects.

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.

### Specification Guidelines

- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.
- Overhead storage cabinets and open storage shelves can be mounted on Terrace structural and stacking panels to a maximum height of 80"H.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket.
- For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected.
- Base panel frames with stacking frames that have an overall height of 57½" also use the YZ bracket.

**When overhead storage units are suspended from stacking frames,** the following guidelines should be adhered to:

- Stacking frames should be added to all the parent run panels, and to, at least the first panel of each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.
- With Terrace, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.

- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

- **Storage shelf, receding door overhead, RTA overhead, and RTA shelf width** must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

- **Terrace assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets. Overhead cabinets can also be mounted on panels wider than the overhead cabinet when using off-module kit Z2MN. One side of overhead must be held on-module.

### Available on Align (Pedestals, Credenzas, Towers) and Radii Products

The digital keypad lock options support applications where workstations or storage banks are shared by multiple users. This is an alternative to a standard key lock. This feature facilitates the use of storage by multiple users through eliminating the need to keep and hand-off physical keys. These locks ship in “shared mode” by default; shared mode indicates that the lock will “forget” the paired 4-digit code, allowing the unit to be used by multiple users.

#### Digital keypad locks:

- Ship factory installed
- Offered in a polished silver finish
- Digital keypad lock requires input of a user-selected 4-digit code
- Digital keypad powered using 2 premium lithium CR2450 batteries
- Battery life is dependent on the frequency of operation but can last up to 5-7 years
- Digital keypad locks are installed horizontally on Align pedestals, credenzas, and towers

Additional information about setup and common troubleshooting problems can be found here: [Digital Lock Overview](#).

#### Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Once a programming key is used with a unit, it is tied to that lock. Another programming key can not be used.
- Add-on digital lock orders should be programmed with the original programming key.

#### Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the “master” key and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

Description	Model	List Price
<b>Digital Lock Keys and Accessories</b>		
Programming Key	YPLDIGPRG	\$ 330
Manager Key	YPLDIGMGR	\$ 255

\*Digital Lock users must purchase a programming key to operate. Programming keys and manager keys are purchased separately from locks.

Radii is a new generation of metal storage pedestals, undermounts, and Work Tools designed to accommodate more personal items and less paper. In the evolving digital age, the need to store paper files dwindles, people archive fewer documents, while the need to stow personal belongings grows. Conventional storage options that were designed for lateral paper filing don't adequately accommodate items employees stow, such as a backpack, purse, gym shoes, office supplies, or other everyday essentials workers want to keep within reach.

The desire for products to do more with less is quickly becoming a necessity. Radii delivers efficiency that is obvious in a solution that succinctly stows today's objects in a user-customizable way.

**Pedestals**

- Available with casters or glides
- Casters allow clearance for pedestal to straddle Altitude foot.
- Rear casters swivel, front casters are fixed, casters do not lock.
- Freestanding pedestals are not meant to support worksurfaces.
- Drawer slides are not full extension.
- Counterweight installed when required. No additional counterweight is required.
- Case wrapper creates a utility lip at top of case from which Work Tools can hang.
- 15"W pedestals can fit a Hot File Bin sideways in drawer to serve as a space divider.
- Hot File and Side Saddle can hang on inside file drawer lip.
- Alcove unit has a single drawer with open enclosure at top to stow backpack or other personal items.
- Drawers are labeled as "Box"/"Box +" and "File"/"File +"; see dimension table below.
- Drawers labeled as "+" have a taller drawer front and added space above the drawer body that can either accept the hidden Radii accessory tray or allow for the drawer to stow larger items, such as a backpack.
- All pedestals with a drawer marked "+" ship with one accessory tray, additional trays may be purchased separately (20<sup>3</sup>/<sub>8</sub>"H unit does not ship with or accept hidden tray).
- Radii pedestals offered with a digital locking option
- Slim peds (10"W) with digital locking only accept Square Pull.
- Manager and programming key purchased separately, see page 22.

### A new way to optimize the private office.

Many executives spend more time outside their offices than in them. When they do touch down for focused work, they want to feel like they've reached home base. An office for the way they work. Confidential files stored securely, coffee mug in its rightful place.

Offices may be getting smaller, but they can't be less functional. Approach provides a portfolio of modular options that inspires you to rethink how the private office can be designed to address today's needs, change over time, and even serve more than one purpose.

### Approach complements Allsteel's open-plan solutions for a cohesive aesthetic throughout the space.

#### Adaptability

Two planning dimensions – 18" and 24" deep worksurfaces – allow you to design Approach to fit the space. Unique configurability options, like the ability to expand a simple "L" setup or change an "L" to a "U" setup, make it easy to efficiently use a single set of components throughout the workspace.

#### Clean Wire and Cable Management

Wires run and plug in behind worksurfaces and out of the way in an integrated trough designed into storage units, eliminating the need for worksurface grommets. A removable access panel cleanly hides cords plugging into the wall beneath the worksurface.

Approach Pre-configured Desks & Tables — height-adjustable 27¼"-47½"H, fixed height 29½"H, left and right configurations

Approach Credenzas — 28"H (shown) x 18"D or 24"D, 24"H x 18"D; most available to-the-floor base or feet with or without troughs.

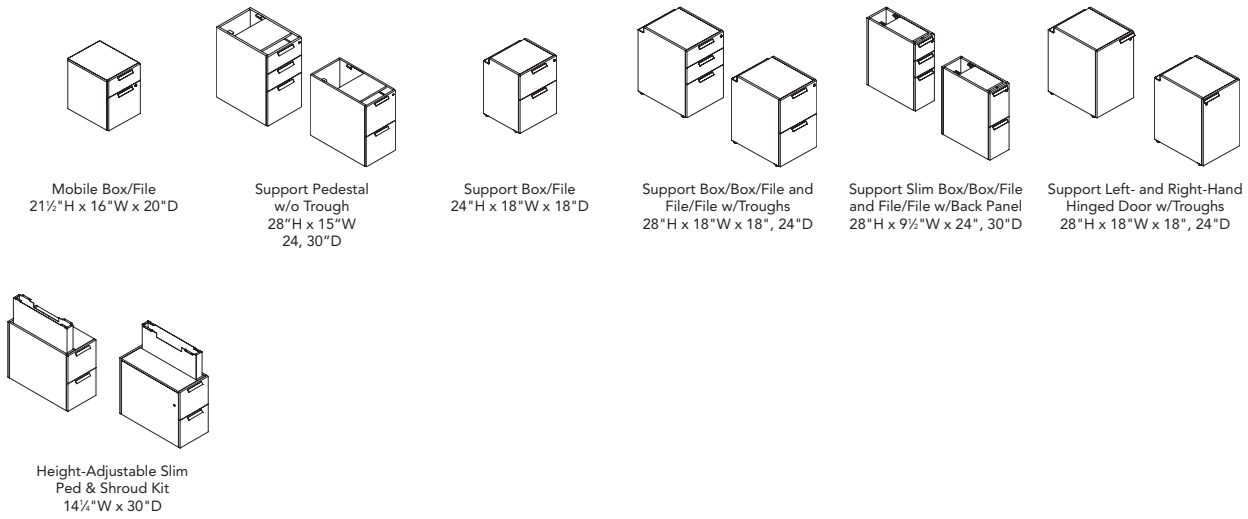

Approach 28"H Double Credenzas — 18" or 24"D, left and right configurations, available to-the-floor base or feet with or without troughs.

Approach 24"H Double Credenzas — 24"H x 18"D; left and right configurations, most available to-the-floor base or feet with or without troughs.

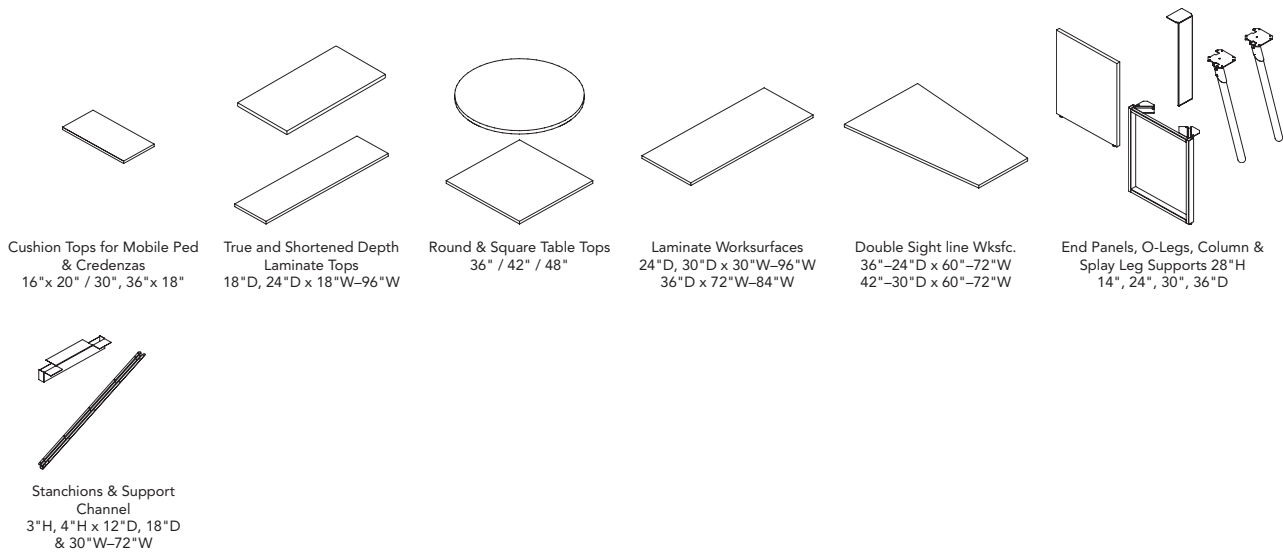

**Approach Pedestals** — Mobile models have recessed casters

**Approach False Peds, Wall Access Panels, Bridges, and Back Panels**

**Approach Tops, Worksurfaces, and Supports** — End Panels left- and right-handed

**Functional Design**

Sit-to-stand worksurfaces enable users to vary their posture throughout the day, while promoting wellness in the workplace. Height-adjustable legs are concealed within a shroud or pedestal storage. Smart storage, like a side-access tower, credenzas in multiple configurations at two heights, stack-ons and wall-mounted overheads with marker board fronts, and a slim pedestal, provide options for any storage need.

**Aesthetic Choices**

Approach offers a to-the-floor base or a lighter-scale footed design. Choose from eight solid and woodgrain laminate colors, numerous fabrics for tackboards and pedestal seat cushions, and five storage pull styles. Approach offers a mix of materials to support the design vision.

\*\*\* These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

Panel frame maximum height is 65".

**Note:** Storage with unfinished metal backs require storage-to-panel bracket kit in order to mount to a panel. Left- or right-handed storage-to-panel bracket is determined by slots on panel — left-handed bracket required when attaching to left panel slots and right-handed bracket required when attaching to right panel slots.

Involve storage with unfinished backs require storage-to-panel bracket kit in order to mount to a panel.

Optional laminate back is available (ordered separately) for use when the back of the unit will be exposed.

Plinth base units require a different laminate back model than leg base units.

An example of a 2D CAD symbol for Involve is shown at left. Note the dashed line that represents the unfinished metal back. The pound sign indicates that counterweight kits may need to be added depending on the application. See page 256 for counterweight specification rules.

- Box and file drawers are miter fold, ½" thick particle board.
- All Drawers lock
  - Lock is located in the top right corner of upper drawer on credenzas, desks, and skinny peds. Drawer locks all drawers in the vertical stack.
  - Mobile ped lock is in upper right corner of bottom drawer.
  - Omit core and keyed alike options. Omit core option ships with standard lock cores installed, customer is credited to order keyed alike cores to be replaced at installation.
  - Lock core color is Matte Silver.
- For door-locking, see product categories for details.
- All drawer units have holes drilled for pulls
  - User selects pull choice of beam, halo, square, arch, or bar. Beam and Halo available in Designer White, Silver, Pyrite, and Solar Black. Square pull available in Designer White, Flint, Loft, Matte Silver, Pyrite, and Solar Black. Bar pull available in Designer White, Silver, or Black.
  - Pulls are 1" to hole center from top of drawer.
  - Drawer bodies are light woodgrain finish with Black hangrails.
- Adjustable shelves are ¾" laminate and have 3 hole adjustable positions with 1¼" (32mm) hole spacing. One above and one below location specified in internal dimensioning table.
- Left-hand (LH) hinged units have hinges located on the left of the unit, right-hand (RH) hinged units have hinges on the right.
- Case end panels are the same depth regardless if fronts are assembled.
- Some models require counterweight — see specification table on pages [168-169](#).

### Counterweights

Counterweight(s) may need to be added to Approach credenzas and storage depending on configuration and usage. Models that may require counterweights are flagged with a number sign # following the model number in the pricing section. Reference model and intended usage column in chart below. Some models require two counterweights. Open shelf and hinged door models do not require counterweights and are not listed.

APPROACH

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 234)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side). Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Any open span 60" and greater requires an external support channel. Altitude 66"-72"W rectangular worksurfaces include an external support channel.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- C-Leg load capacity is 300 pounds for 2-leg model including weight of worksurface. A3-T load capacity is 250 pounds for 2-leg model including weight of worksurface.

Height-Adjustable Bases (page 235)

- Electric height-adjustable base units are available in two styles for Approach: A6 with T-Leg or A6 with C-Leg.
- A6 models are available in Black, Brownstone, Cinder, Designer White, Flint, Fossil, Loft, Muslin, Nickel, Parchment, Pebble, Pewter, Salt, Titanium, Champagne Metallic, Gunmetal Metallic, Night Bronze, Platinum Metallic, and Silver.
- A6 models travel at 1.2" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is <0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lower position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 151.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Altitude A6 tables feature anti-collision, a feature designed to stop table travel when the table detects an obstacle.
- Altitude A6 bases specified with a worksurface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude worksurface models 60"W and greater. If a non-Altitude worksurface is being used, an external stiffener may need to be specified separately.
- A6 2-stage models (2-leg and 3-leg) can be used with shrouds.

Shrouds (page 235)

- A6 2-stage models (2-leg and 3-leg) can be used with shrouds.
- A6 3-stage standard and Max bases cannot be used with shrouds. The shrouds interfere with the reset of the base as it is not able to reach its lowest setting.

Cable & Wire Management

Cable Management Tray (page 234)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, paint option is black only.
- Zip tie attachment points located in base of tray. Zip ties not included.

Wire Management Channel (page 234)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 234)

- Works with Approach and Altitude A3 and A5-Series product.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

Under Worksurface Trough (page 234)

- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

Where, how, and even what defines work is changing constantly. It's obvious that businesses are trying to understand what it means to successfully change with the culture and trends.

With Involve, we set out to discover how furniture can be used today as an impetus to an organizations change and yet perform well into the future as the organization continues to evolve.

**Involve... one solution for all your needs.**

Share work  
as it happens.

Involve is as comfortable in a corner  
or shared office as in an open plan.

INVOLVE

**A Fresh Approach**

Furniture needs to work today with a fresh approach and innovative features. But support of tomorrow's needs is vitally important.

- Expand functionality of systems furniture, energize existing installs, and support changing work styles with Involve. Take existing investment and add functionality and relevance by changing out a few key pieces.
- The soft seating can be used within panel walls or pulled into freestanding or huddle room applications. The same casegoods work in private office or open plan configurations.
- Modularity of components allows for flexing of product application into the future. Involve lets you design for collaboration now while building in opportunity for future head count growth.

**Changing Work Styles**

From editing to brainstorming, number crunching to researching, today's work doesn't just happen in a task chair pulled up to a desk surface.

- Tired of the stodgy cubicle, users should be inspired by a fresh approach with innovative features that feel like furniture and less like a system.
- A task chair works for one job function and lounge seating works better for another. Involve supports the preferred posture for these activities while maintaining the desired home base for individuals.
- Untethered from the primary workstation, sharing of information can happen spontaneously around a screen or face to face. Involve components can be used across the floorplan offering the user multiple places to go as they work.

**Get inspired by Involve.**

**Involve's modular design accommodates all the different ways work gets done.**

**Involve moves out of dedicated user spaces to create comfortable, functional meeting areas.**

Terrace

Stride

### Two Tone Combo Credenzas

- Chassis, top, and plinth base will match. See illustration at left.
- Door/drawer fronts will match.

### Two Tone Credenza (non-combo unit)

- Chassis and top will match. See illustration at left.
- Drawer fronts and plinth base will match.
- For best aesthetics avoid placing aside of a two-tone combo unit.

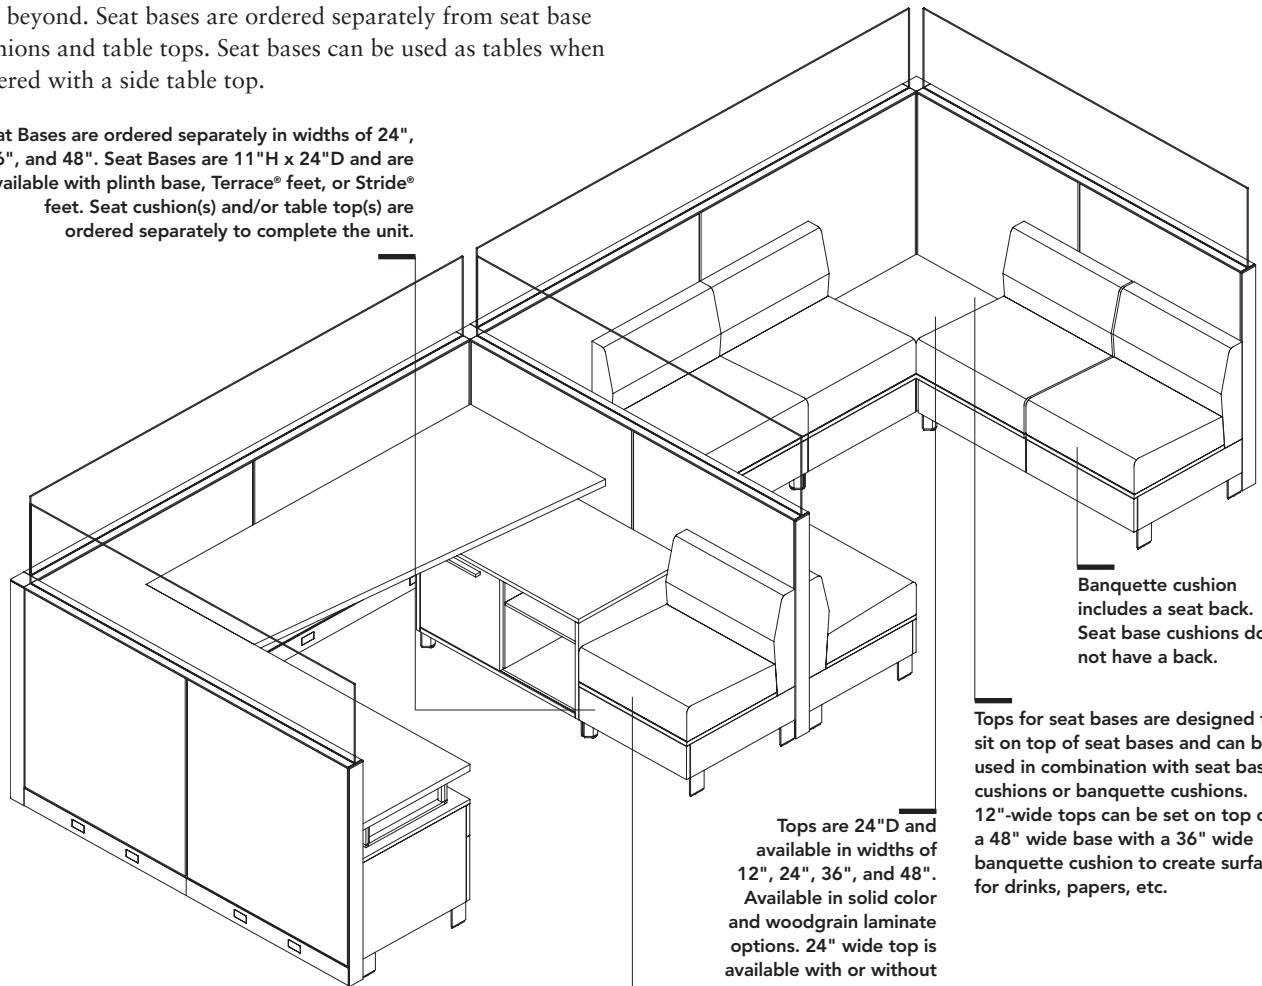

### Two Tone Tower and Wardrobe Plinth

- Units have matched front and kickplate as shown here.

**Note:** Plinth base follows front laminate on non-combo units, and chassis & top on combo units. For best aesthetics avoid placing a two-tone combo along side of a two-tone non-combo unit.

A seat cushion can be placed on the credenza or pedestal top for additional seating. **Soft seating units** are also available for use within the private office, open plan, reception areas, and beyond. Seat bases are ordered separately from seat base cushions and table tops. Seat bases can be used as tables when ordered with a side table top.

Seat Bases are ordered separately in widths of 24", 36", and 48". Seat Bases are 11"H x 24"D and are available with plinth base, Terrace® feet, or Stride® feet. Seat cushion(s) and/or table top(s) are ordered separately to complete the unit.

Seat cushions are designed to attach to the top of the seat bases. Offering includes: 24"W or 36"W banquette cushions or 24"W seat base cushions.

Tops are 24"D and available in widths of 12", 24", 36", and 48". Available in solid color and woodgrain laminate options. 24" wide top is available with or without power cutout. A power module is ordered separately.

Banquette cushion includes a seat back. Seat base cushions do not have a back.

Tops for seat bases are designed to sit on top of seat bases and can be used in combination with seat base cushions or banquette cushions. 12"-wide tops can be set on top of a 48" wide base with a 36" wide banquette cushion to create surface for drinks, papers, etc.

Seat base offering includes: with drawer or open. 48"W seat base with drawer has two drawers; design allows access to outbound drawers in corner applications. See illustration below showing four 48"W seat bases with 24"W cushions and tops in a U-shape configuration.

Seat bases are available in solid or woodgrain laminate options. Seat base with drawer can have a different laminate color on the drawer front than the case.

Corner table is used in a soft seating application. Corner table is 17½" high, 24" wide, and 24" deep. Illustration below is shown using plinth base units.

Open table is 11" high and is open at the front and back. Available in widths of 36" or 48" and depths of 18" and 24". Tables can be used to support electronics with back open for cord passage or can be used as a coffee table. 48" wide unit has a septum in the middle of the unit.

### Aesthetic Alignment

Tower heights align with Stride® and Terrace® panel segmentation.

### Construction and Options

See page 250 for Involve storage construction details; and base, pull, and finish options.

### Shelves

Internal shelves are painted metal and adjustable to three levels.

### Filing

File drawers can accommodate front-to-back letter filing.

### Wardrobe Door

All 24"W towers have full-height wardrobe doors with a coat hook.

### Core Removable Locks

Towers can be shipped with lock cores removed; cores can then be installed after towers are placed. Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.

### Quantity of Lock Cores

Wardrobes with shelves, 18"W towers, and 12"W towers have one lock to secure door. All other towers have two locks — one secures the wardrobe door and the other secures all drawers.

### Configurations

Towers are available in five heights: 42½", 50", 57½", 65" and 72½"H. Drawer configurations include box/box/file and file/file with portion above drawers being a hinged door; 50"H and 57½"H units offer a side access option in place of front facing hinged door. All 24"W units with drawers have a full-height 6"W wardrobe; 18"W units do not. Full wardrobes with 2 adjustable shelves and a coat hook are available in 65"H and 72½"H. 12"W units include 2 coat hooks and must be panel mounted or attached to a credenza or worksurface. Left- and right-handed units available for all configurations. Units ship assembled except for feet and pulls.

### Worksurface Support

An "L" tower bracket can be ordered separately and fitted to any tower to support worksurfaces at 29½"H.

A tower rail can be ordered separately and fitted to any tower to support worksurfaces at a height range of 27½"H to 30½"H.

See page 281 for visuals of a "L" tower bracket and a tower rail.

**Support Guidelines**

- Unsupported panel runs greater than 72" need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A panel run without a return needs a floor support.

Worksurface offering includes linear taper and sweep shaped worksurfaces to support the integration of Involve soft seating and 18"D storage into the workplace.

Worksurface stanchion supports worksurface by attaching to an adjacent panel and 24"H Involve storage below.

Involve open end-panel supports are used at the end of a run for a light-scale look when no return panel is present. A closed end-panel option is also available in 18"D, 24"D and 30"D for either Flat or rabbet edge worksurfaces. Not for use with T-mold worksurfaces.

Open end-panel supports cannot be used as in-line support leg, or used to connect two worksurfaces.

**Primary worksurfaces** are available in 18", 24", and 30" depths. Nominal worksurface width is equal to nominal panel width. Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for spans 48"W-59"W. See pages 260 and 291. Support hardware is ordered separately.

**Corner worksurfaces** with woodgrain laminate and veneer have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

**Secondary worksurfaces** are available in 12", 18", and 24" depths. Support hardware is ordered separately.

Credenza and pedestal tops are specified separately for 28"H and 42"H units to allow the spanning of multiple peds or credenzas.

Threaded-metal inserts are standard for ease of installation and a positive fit. Worksurfaces can be panel hung or used in freestanding applications.

Worksurface stanchions are used to support worksurface when mounted atop a 24" high Involve credenza. Worksurface stanchions are 5/4"H and made of aluminum. They are available in depths of 12" and 18" and used to support surfaces 18", 24", and 30" deep.

**Flat Edge trim** is available on laminate tops in eleven standard colors (customer specified) to match solid laminates and to complement patterned or in fourteen woodgrain edges color matched to the woodgrain laminates. Veneer worksurfaces have veneer edge.

**Rabbet Edge trim** is available on select laminate and veneer tops. These worksurfaces and credenza tops have rabbet edge detail on all sides.

**Wire management grommets** are standard in most worksurfaces and are specified in plastic or metal. **Metal grommets** are available in oval or square (shown above).

### Primary and EZ View Worksurfaces (page 289)

- Wire management grommets standard, one for widths up to 42", two on widths 48"W and greater. Add "N" suffix for no grommets.
- Worksurfaces 66" and over require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 24"D, and 24" cantilever on 30"D worksurfaces.
- Desking worksurfaces should be specified for spans 60" and over when worksurfaces are not panel-attached with additional support along the width. For desking applications and widths greater than 72", additional to-the-floor support is recommended.
- Laminate flat edge worksurfaces can be specified with scallop wire management detail with no upcharge by adding suffix "S" to the model number.

### Primary Desking Worksurfaces (page 289)

- Ships with an external worksurface support channel which extends 1½" below the worksurface and is inset 6" from each end. Support channel is field installed to allow for larger worksurface spans and ships separately.

### External Worksurface Support Channel (page 291)

- Extends 1½" below the worksurface. Installs 7" from user's edge.
- Is required on a systems worksurface for additional support for spans greater than 60"; or if a full depth horizontal storage unit is installed under the worksurface.
- Required when mounting a Stride® modesty panel.
- When using Involve supports, specify a standard worksurface and an external support channel of a smaller size. The size of the external support channel will depend on the distance between supports.

Light-scale screens provide space division. There are four options available: surface mounted modesties, privacy panels, divider panels, and taskpanels.

**Surface mounted modesties** are mounted to the underside of the desking worksurface or worksurface with external support channel. They are 11"H and available in laminate or frosted glass. Single or shared (laminate only) mounting models are available. Laminate models include a wire tray on one side of single units and on both sides of shared models. There is an optional wire tray available for glass units.

**Privacy panels** extend above and below the desking worksurface acting as both a screen and a modesty panel. They are 25"H and available in laminate or glass (frosted or writable). Single or shared (laminate only) mounting models are available. Laminate models include a wire tray on one side of single units and on both sides of shared models. There is an optional wire tray available for glass units.

**Divider panels** attach to laminate back of credenza to provide space division between workstations. They are available in laminate in a 50" height.

**Taskpanels** mount between stanchions under overhead storage cabinets. They are available as tackable, marker board, or laminate in 12", 18", 19", 26", or 27" heights.

### Specification Rules for Modesties and Privacy Panels

When mounting a modesty panel or a privacy panel use a desking worksurface or worksurface with an external support channel added. When mounting a modesty flush to the edge of a worksurface supported by O-Legs the modesty is to be 7" in from the front edge, the modesty must be 14" narrower than worksurface width.

When using a power/data module between a privacy panel and a worksurface, the privacy panel must be mounted 1" away from edge of the worksurface. Privacy panel can be mounted flush to the edge of the worksurface if power/data module is not used.

When using a power/data module with a surface

mounted modesty panel, the modesty panel must be inset a minimum of 2" in from the edge of the worksurface.

Privacy panel width can be same width as worksurface. *Example:* 60"W privacy panel can be used on a 30"D x 60"W worksurface. Width of panel is undersized by 1/4" providing a 1/8" gap when centered. Placement or use of a modesty must be 12" narrower than worksurface width when using Involve open and closed gable ends.

When using modesty with a Stride post leg, the width of the modesty can be the same as the worksurface, but must be mounted 8" or more in from the front edge of the worksurface.

### Freestanding Table

#### Applications:

Privacy panels require a minimum worksurface depth of 30" for freestanding applications. Surface mounted modesties can be used with any depth freestanding application.

#### Panel Applications:

When using a privacy panel in a back-to-back application the adjacent panel run requires an extended straight connector to compensate for depth of shared privacy panel.

**Full-Height Modesty Panels** (page 292)

- Full height modesty panels are designed to create a desk. A desk can be created with a modesty panel, worksurface, and storage or gable ends on each side — see chart on page 292.
- Available in solid and woodgrain laminate color options. Modesties 61" wide or larger are limited to solid laminate colors only.
- It is recommended to recess the modesty in from the edge of the worksurface. When using with a 24"D surface, recess modesty 6". When using a 30"D surface, recess modesty 6" or 12".
- If attaching desk to a panel on one side, use a storage-to-panel bracket kit.

**Divider Panels** (page 294)

- Divider panels can be attached to the back of 24"H credenzas to provide space division between workstations.
- Offered in laminate in widths to attach to 30"W, 36"W, 48"W, and 60"W credenzas; and height to align with 50"H modules.
- Mounting brackets provide a 1" cord drop space between edge of worksurface and the ¼" thick divider panel.
- A cableway is provided on the inside of the divider panel to facilitate the passage of wires.
- Mounting brackets and cableway are available in black only.
- The mounting of the divider panel is designed to center the ¼" thick panel within the lateral space created by adding an extended straight connector in a panel spine.
- When specifying a divider panel to be attached to a credenza with an unfinished back, a laminate credenza back must also be specified for attachment of the divider panel brackets.
- Divider panel cannot span two credenzas side-to-side.
- Divider panels are designed to be used in single-sided application.
- Divider panel lines up with bottom of credenza case.
- Counterweight kits are still required in credenzas as rules state on page 256.

**Taskpanels** (page 295)

- Taskpanels are available in tackable material and attach between stanchions supporting and overhead storage cabinet.
- Taskpanels are available in 30"W, 36"W, 42"W, 48"W, 60"W, 72"W, 84"W, and 96"W. 72"W and wider consist of two panels. Nominal width of taskpanel should match width of overhead storage cabinet.
- Taskpanels are available 18"H or 26"H for use with 24"H credenzas; and 12"H, 19"H, or 27"H for use with 28"H credenzas. Nominal height of taskpanel should match stanchion height.
- Laminate and tackable taskpanels are encapsulated in a painted metal pan on sides and bottom.
- Back of unit has exposed fasteners. Aesthetic should be considered in applications where back is visible.

Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and Splitty Light.

**Recessed Undercabinet LED Light**

Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

**Undercabinet LED Light**

The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek 1/2" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PIR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

**CONNECTION SEQUENCE\***

\*Cannot deviate from this sequence

**Recessed Task Lights (page 320)**

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.

  - CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.

**Undercabinet LED Lights (page 320)**

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).

24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31

N series lock cores were used in all Persona pedestals produced between January 1996 and August 2009 as well as Receding Door Overheads produced between January 1996 and August 2010. N series lock cores are NOT used in current product and should not be ordered for product produced after these dates. E series lock cores are used in current product, see above.

\*On existing Premium and Asset lateral, use N-Series locks.

### EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except receding door overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — random, specified or sequential.

#### Random Keying

The random keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

*Example: There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

#### Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

*Example: There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

#### Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

*Example: A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

*The first 40 offices have 4 silver locks each that need to be keyed-alike.*

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

*The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.*

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

#### HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

 2 pedestals with 1 lock-core each = 2  
**Total silver lock-cores per station = 4**

**Step 2** — Count the total number of workstations needing 4 lock-cores.

**4 total workstations**

**Step 3** — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.

**LKFE4SLV.X.4**
