We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

COM Policy

COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at **allsteelcomteam@allsteeloffice.com**.

Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.

   If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

   In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search or COM Search quick link. Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.

   You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

   HNI Textile Distribution Center
   COM Production Yardage — PO Number
   Docks 20-22
   301 Mulberry Avenue
   Muscatine, IA 52761

Information that MUST be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

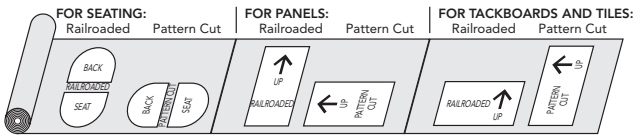
All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).



Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

For more information, please contact Allsteel Customer Support.

YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a $500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no $500 matching fee, however, there is a sample chip fee of $175 net for stains and $100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

  Allsteel Inc.
  Attn: Tailored Products Group
  2210 Second Avenue
  Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

Veneer Care Instructions

Veneer worksurfaces feature the Gunlocke® finishing system. The finishing system is a process that begins with the application of stains, which promote exceptional depth and clarity. Next the worksurface receives a specialized coating that provides exceptional durability and chemical resistance. The remaining surfaces receive a top coat. These finishing processes ensure depth, clarity, color consistency and durability throughout the product.

Veneer worksurfaces have exceptional resistance to:

- Heat and moisture (hot beverages, pizza boxes)
- Chemicals (liquid paper, nail polish)
- Stains (permanent markers)
- Scratches and impact (everyday wear and tear)

Caring for your veneer finish:

- General maintenance procedures entail wiping clean the entire surface with a clean, water dampened soft cloth once per week (be sure to wipe with the grain)
- Murphy's® Oil Soap may be used as a general purpose type cleaner with warm water to clean tops.
- The finish may also be polished with Guardsman® Furniture Polish (contains no waxes or silicones) to provide renewed luster.
- Be sure to wipe up all spills immediately. Do not allow spills to dry.

Wood owes its inherent beauty to variations in color, grain and texture, and therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. Allsteel does not guarantee the exact matching of grain, pattern and color.

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's Partnership Program consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- **Camira, memos@camirafabrics.com 1.616.288.0655**
- **CF Stinson, cfstinson.com 1.800.841.6279**
- **HBF Textiles, hbftextiles.com 1.877.494.5727**
- **Maharam, maharam.com 1.800.645.3943**
- **Ultrafabrics, ultrafabricsinc.com 1.877.309.6648**

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

Storage

Storage is an essential part of the productive workplace.

Make storage a matter of personal choice as well as necessity. Choose from metal, laminate, or veneer with features like multiple pull styles, drawer sizes, finishes, and more. It's your workspace. Shouldn't it look like it?

1. **Pedestal.**
   Support, mobile, or suspended, with three drawer sizes.

2. **Personal file.**
   Combines pedestal and lateral storage to create a personal filing solution for letter and legal size documents.

3. **Personal tower.**
   Versatile storage with a small footprint. It's storage that goes up, not out. Combine drawers, personal storage, and wardrobe options for the right solution.

4. **Low credenza.**
   Active storage that creates a layered look in any workspace.

LATERALS AND SHARED STORAGE

5. **Lateral file.**
   The storage workhorse, in multiple heights and widths. Works with systems furniture or by itself.

6. **Combination file.**
   The perfect combination of file storage and shelf storage, with concealed or open shelves.

7. **Storage cabinet.**
   Equipped with hinged, locking doors and adjustable shelves to conceal and secure supplies.

8. **Bookcases.**
   Quick access to information, in depths to match laterals or narrower profiles to stand on their own.

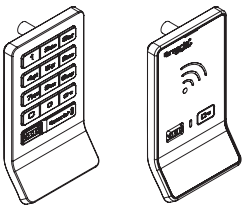
Digital Keypad & RFID Locks

Available on Align Lockers and Wardrobes (pages 70-79)



Keypad lock, left
RFID lock, right

The digital keypad & RFID lock options support applications where workstations or storage banks are shared by multiple users. This is an alternative to a standard key lock. This feature facilitates the use of storage by multiple users through eliminating the need to keep and hand-off physical keys. These locks ship in "shared mode" by default; shared mode indicates that the lock will "forget" the paired 4-digit code or RFID badge after the lock is opened, allowing the unit to be used by multiple users.

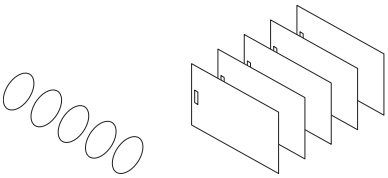
Digital keypad & RFID locks:

- Offered on Align™ lockers and wardrobes
- Ship factory installed
- Offered in a polished silver finish
- Digital keypad lock requires input of a user-selected 4-digit code
- RFID lock requires a compatible RFID card or sticker
- Digital keypad and RFID locks are powered using 4 premium AA batteries.
- Battery life is dependent on the frequency of operation but can last up to 5-7 years
- To order Align wardrobes or lockers with a digital lock option, add "E" suffix to base model number. The digital lock has an integrated pull, so no pull will be specified.

RFID locks require user to present a compatible RFID card or sticker to the lock in order to gain access. This is the same technology as "badge" systems that allows employers to grant employee with cards that can be scanned to gain access to entrances and buildings. Allsteel locks *may or may not be* compatible with these existing badge systems.

- For existing RFID badge system compatibility, badges must operate on a 13.56 MHz frequency with both iClass (ISO 15693) and Mifare (ISO 14443).
- If existing badge system is not compatible with 13.56 MHz frequency, compatible RFID badges or RFID stickers are sold separately as an accessory model.

Additional information about setup and common troubleshooting problems can be found here: Digital Lock Overview.



Digital Lock Accessory Models (page 79)

- RFID-compatible cards and stickers are sold as accessory models in increments of 5, 25, or 100.
- RFID cards are plain white and have a lanyard cut in them.
- RFID stickers are plain white, approximately 1" in diameter, and may be added to the back of an existing badge or employee identification card.
- **Every digital keypad or RFID installation site will require *one* Programming Key and *at least one* Manager Key, sold separately.**

Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Once a programming key is used with a unit, it is tied to that lock. Another programming key can not be used.
- Add-on digital lock orders should be programmed with the original programming key.

Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the "master" key and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

****These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.*

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

GROMMETS ON VENEER WORKSURFACES

Wire management grommets come standard on most veneer worksurfaces. Choose between metal or plastic grommet option. Note: Plastic grommet color is predetermined based on finish selection.

Align™ Metal Storage

Working with Pedestals & Credenzas

GSA Reference Page

"O" Frame Construction
Heavy duty outer shell and front and rear perimeter frames provides significant strength; helps keep the cabinet true to square.

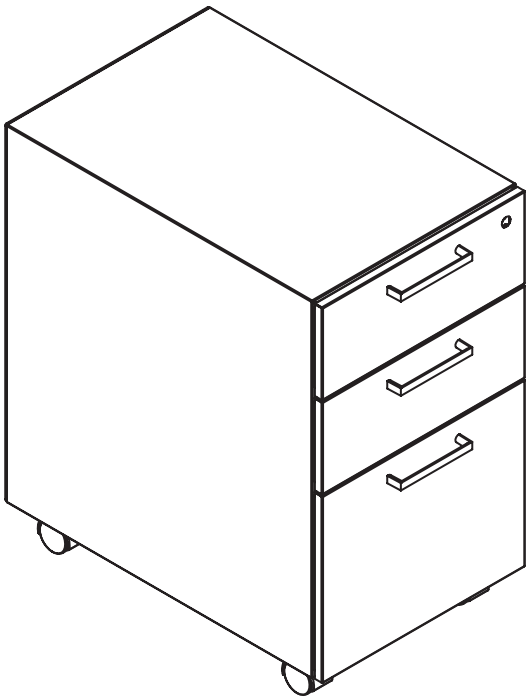
File and Box Drawers
Full extension file and box drawers glide easily on steel ball-bearing suspensions; allows complete access to drawer contents with a quiet drawer motion.

Filing
File drawers can accommodate front-to-back and side-to-side filing. Order hanging frames separately.

Full Front Drawer Design
Drawer front is square and extends fully across the case.

Counterweight
Counterweights (standard on mobile pedestal units) inhibit tipping when drawers are opened. Optional counterweight kits.

Aesthetic Alignment
Drawer alignment matches across Align storage offering. Base height matches Stride® and Terrace® panel base.



Locking System
Robust lock system for security and reliability.

Core Removable Locks
Master-keyed core removable lock feature allows key numbers to be easily changed in the field and facilitates one-key access.

Omit Lock Core
Units can be shipped with lock cores removed; cores can then be installed after units are placed. Different storage components can be keyed alike within a workstation.

Mobile Pedestals
Mobile pedestals provide flexible storage and can be nested under worksurfaces. (Take into consideration when planning offices which may have uneven floors.)

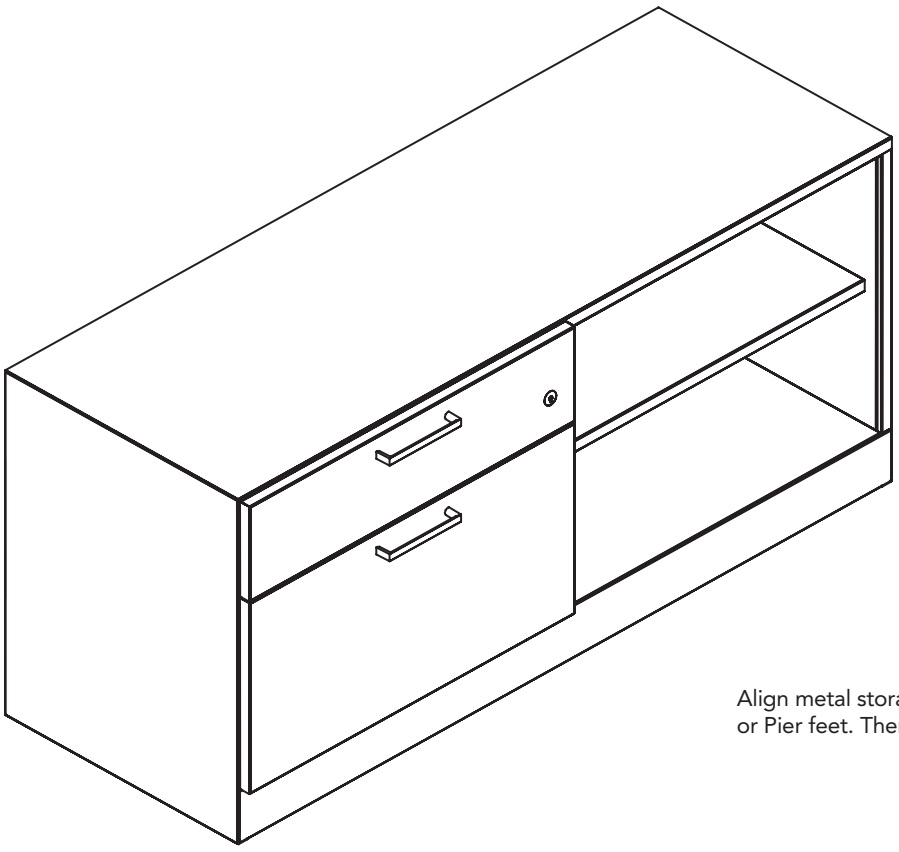
Support Pedestals
Support pedestals can support one end of a panel-attached worksurface, in lieu of other worksurface supports, and can be used to support worksurfaces in desking applications. Drawers align with laterals.

Freestanding Pedestals
Freestanding pedestal drawers align with credenzas.

Depth
Pedestals are 18", 23¼", and 29¼"D, and credenzas are 18" and 24"D, both can be used with systems worksurfaces. Placement may affect access to receptacles in base pathway and worksurface grommets.

Pull Styles
Choice of pull styles, available on pedestals, credenzas, towers, and laterals, allows for total design coordination on projects.

Veneer and Landscape Fronts
Contact Allsteel Tailored Products Group for availability.



Align metal storage models are available with Terrace, Stride, or Pier feet. There is also a laminate front option.

Align™ Metal Storage

Working with Metal Lateral and Personal Files

GSA Reference Page

Seven-formation Front Post Design
Steel front posts are formed with seven formations to provide unparalleled stability and strength. This unique design allows unmatched longevity for Allsteel files.

Dual-side Locking
Drawers and doors lock on both sides to prevent being pried open. The locking system is enclosed within the case to hide mechanisms which can snag and scratch. This feature is not found on most other manufacturers' files.

Dual Interlock
This mechanism inhibits roll out of more than one drawer, either sequentially or simultaneously.

Adjustable Drawer Backs
Backs are adjustable to three depths to accommodate letter, A4, and legal documents side to side without the need for extra components.

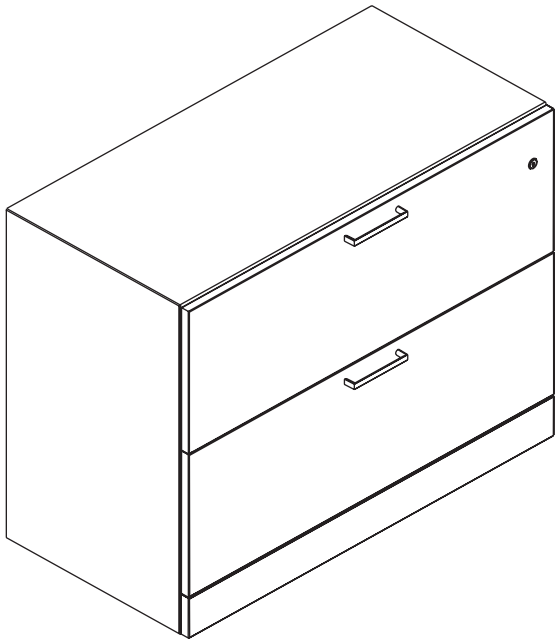
Infinitely Adjustable Divider
This Allsteel exclusive design allows the divider to also function as a compressor in that it can be located where it is needed versus being limited to pre-set positions.

Offset Construction
As a result of the back and the top of the case sides being offset, the file case has a finished appearance with smooth seams and no overlaps.

Fully Enclosed Bottom
Unlike many files, the Allsteel file features a fully enclosed steel bottom to help prevent moisture and dust from affecting the filed documents. Double bottoms are welded into all files for added rigidity.

Side Knockouts
Files have two knockouts on each side to allow easy ganging of freestanding units to inhibit tipping.

Four Hex-head Leveling Glides
Leveling glides can be adjusted from outside or inside the case. Because of the hex-head design of the stem, leveling can be done even when the file is fully loaded. Range is 1½".



Suspension
Extra heavy-duty, telescoping, ball-bearing slides.

Hanging Frames
Front-to-back and side-to-side are both standard. For front-to-back filing, backs should be set on rear position for maximum storage capacity.

Core Removable Lock
Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.

Omit Lock Core
Files can be shipped with lock cores removed; cores can then be installed after files are placed. Laterals can be keyed alike with pedestals, laterals, credenzas, towers, and overhead cabinets.

Full Front Drawer Style
Features core removable lock located in top drawer on the right.

Front Drawer Options
Optional veneer and Landscape™ fronts available on laterals, contact Allsteel Tailored Products Group.

Pull Styles
Choice of pull styles, available on pedestals, credenzas, towers, lockers, wardrobes and laterals, allows for total design coordination on projects.

Double-wall Drawer Front Construction
Drawer fronts are fully lined to reduce noise and to prevent damage from drawer contents.

Counterweight Kit
The unique design of the counterweight allows easy installation because, unlike some files, the drawers and shelves in Allsteel files do not have to be removed to install the required counterweights.

Drawer Interiors
Painted same color as case.

Paint Finish
Durable baked enamel finish is applied over rust-inhibiting phosphate pre-treatment.

Align™ Metal Storage

Four Hex-head Leveling Glides
Hex-head design of the stem allows leveling to be done even when the cabinet is fully loaded (plinth units only). Plinth units include leveling glides that can be adjusted 1½" from outside or inside the case. Footed units include leveling glides that can be adjusted 2⁹⁄₁₀" from outside the case only.

Aesthetic Alignment
Drawer alignment matches other Align storage.

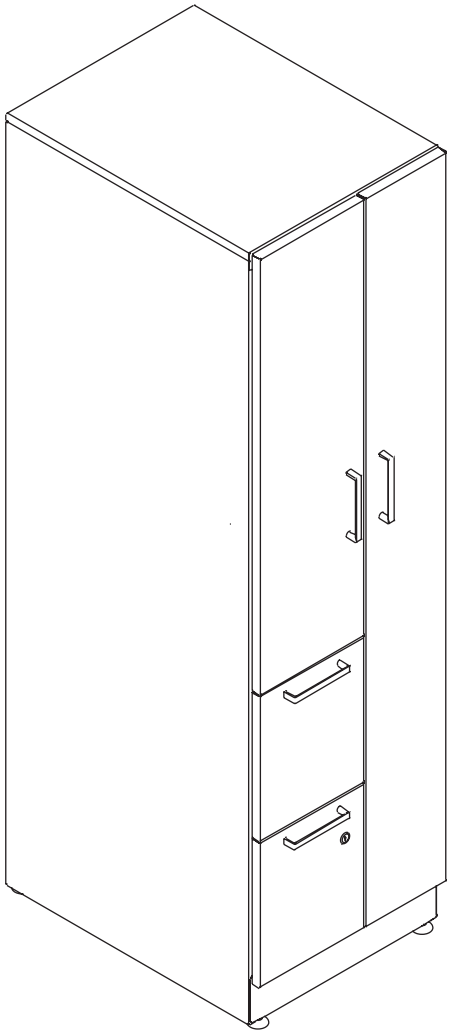
Full Front Design
Drawer and door fronts extend fully across the case.

Pull Styles
Choice of pull styles, available on pedestals, credenzas, towers, lockers, wardrobes and laterals, allows for total design coordination on projects.

Suspension
Heavy-duty, telescoping ball-bearing slides.

Omit Lock Core
Units can be shipped with lock cores removed; cores can then be installed after storage units are placed. Laterals can be keyed alike with pedestals, towers, and overhead cabinets.

Core Removable Locks
Core removable lock feature allows key numbers to be easily changed in the field. It also facilitates installation.



Locking
All door & drawer locks are controlled by one lock core located on the top drawer. Standard core removable locks, see page 54.

European Hinges
Wardrobe and cabinet door both contain European-style hinged door.

Filing
File drawers in 24"W towers accommodate front-to-back and side-to-side filing. Order file rails for side-to-side separately. File drawers in 18"W slim towers accommodate side-to-side filing only, hang rails are included.

Counterweight
Towers are factory-installed with counterweights to allow them to be freestanding.

Align™ Metal Storage

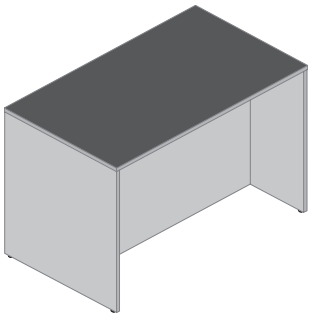
Storage Islands Specification Guidelines

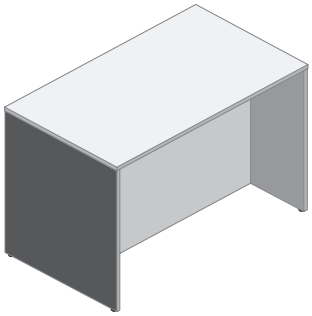
GSA Reference Page

Storage Islands are a new application for Align and Essentials Storage Lines.

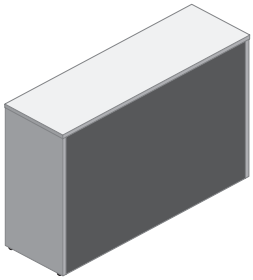
***Essentials 3H Storage and Align 42½"H Lockers and Wardrobes**



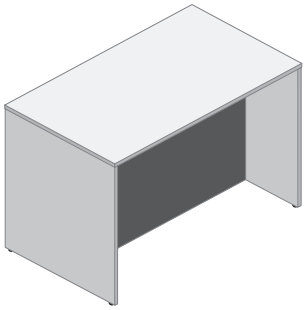
Top: (pages 84-87)
- Available in 18"D and 36"D.
- Tops made of 1¼" particle board with 2mm edgeband, High Pressure laminate on one side and paper back on the other. Grain direction on all tops runs horizontal.
- Tops specified specific to the application.
  Example: Storage island tops with end panels will have proper pilot holes in the top to accept attachment hardware.
- External Support Channel should be used in applications where +48"W tops are unsupported.

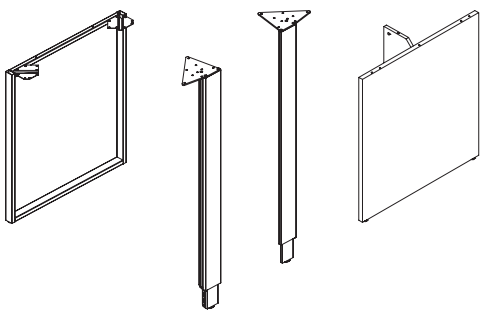


End Panel: (page 88)
- Panels made of 1¼" particle board with 2mm edgeband and High-Pressure Laminate on both sides.
- Grain direction on all End Panels runs vertical.
- End Panels are shipped with mounting hardware.
- All 36"D End Panels and Tops accept a septum, however, it is not necessary to put one in for all applications.



Back/Septum: (page 88)
- Model is considered a back when used in 18"D configurations to encase back of storage units.
- Model is considered septum when used in 36"D configurations to create division down the center of 36"D top.
- Backs/septums are made of ¾" particle board with 0.5mm edgeband and High-Pressure Laminate on both sides.
- Grain direction on all backs/septums runs horizontal.
- Ship with mounting hardware.
- The width and number of units spanned on the septum must match the width and number of units spanned on the top.





End of Run Supports: (pages 89-90)
- O-legs installed in peninsula application are centered front to back on the worksurface. The O-leg will be ½" inset from the edge of the worksurface.
- When specifying a peninsula application, at least one side of the open worksurface span must be supported with undersurface storage. Island tops cannot be specified with only O-leg, Stride Post Legs, or Laminate Return Panel supports.
- Stride Legs are height-adjustable and able to be used with Align or Essentials platforming.
- End of Run laminate supports can be specified as a "waterfall" return on peninsula applications.

Working with Storage Islands

Top Sizes: (pages 84-87)
Top models are decided by what is needed in the application. If a storage island is specifying end panels, a different top model is needed than when a non-paneled island is configured. Storage Island Tops for use with End Panels are dimensionally larger to accommodate the needed attachment. The below chart highlights how the depth changes when panels and backs are specified.

	Depths
18"D No Back, No End panels	18.190
18"D No Back, With End panels	18.440
18"D Back and End Panels	19.455
36"D No Back, No End Panels	36.690
36"D End Panels	

End Panel sizes: (pages 88-90)
Storage islands can be designed using Essentials and Align. These storage platforms have a 2" variance making storage island dimensions different depending on storage platform used. See the chart to the right for dimensions of end panels.

*Recommend usage of panels when top is specified and storage sides are exposed. Storage will have gap between back-to-back units if top is flush with storage units.

	Depths	Height
18"D No Back, Align	18.190	40.8
18"D No Back, Essentials		38.8
18"D With Back, Align	19.204	40.8
18"D With Back, Essentials		38.8
36"D End Panels, Align	36.440	40.8
36"D End Panels, Essentials		38.8

As the storage island configuration grows, the top width also increases. The below chart outlines how to calculate these dimensions when considering how many units are spanned and if end panels are specified. When specifying your model for the storage island top, the model will end with the correlating span. These spanning guidelines assume all storage units are the same model and does not take into account mixing and matching of units. When mixing and matching of storage units, use the below chart to find required top dimensions and pick top model with this information. Spanning indicated on model may not be indicative of configuration when mixing and matching.

	Width Sizes						
	Span 1	Span 2	Span 3	Span 4	Span 5	Span 6	Span 7
No End Panels	Listed Model Dimensions	Span 1 + 0.125	Span 1 + 0.25	Span 1 + 0.375	Span 1 + 0.5	Span 1 + 0.625	Span 1 + 0.75
1 End Panel	Listed Model Dimensions + 1.372						
2 End Panels	Listed Model Dimensions + 2.744						

Span 1 tops indicate it will only cover a single storage unit. Start with the span 1 number displayed in the table above. Depending on your Islands configuration, the top width increases accordingly based on the 2 factors below.

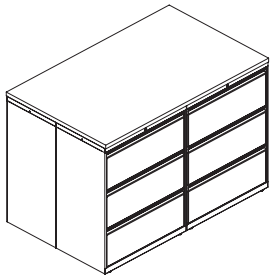
1). The number of end panels you attach to the worksurface. As you add end panels, 1.372" is also added to the top dimensions per end panel specified.
2). The number of side-to-side storage units the surface spans. The spanning from one unit to another takes into account .125" gap between each storage unit.

**Be sure to use the width of the worksurface you select. Models correspond to the correct surface width.*
**Span represents the total number of side-to-side units. Front-to-back units do not factor into number of units spanned.*

Example: *Two 24"W laterals are specified side-to-side. The top will span across two units making it a "S2." The configuration will also include two end panels, so the overall width of the configuration is 48" + 2.744" + .125" = 50.869"W.*

Working with Storage Islands

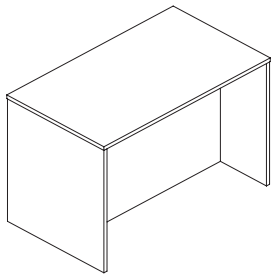
Application Overview

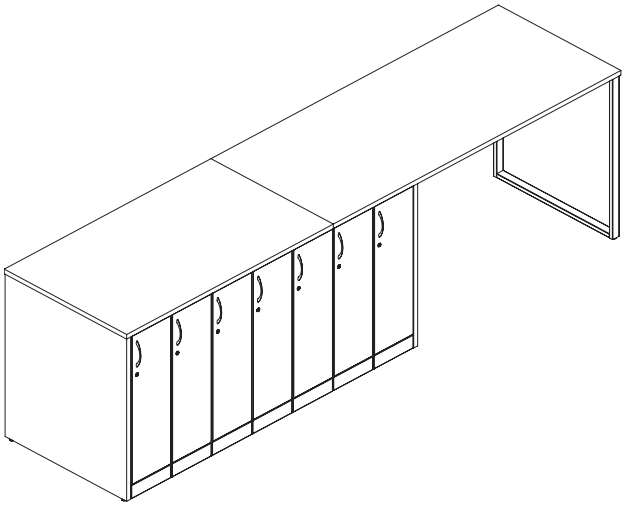


Simple Storage Island:
Simple Storage Islands only consist of adding a top to Align or Essentials storage configurations. Simple Storage Islands allow users to flex storage spaces into usable spaces.

Fully Shrouded Storage Island:
Fully Shrouded Storage Islands consist of adding a top, back/septum, and end panels. Single- (18"D top) or double-sided (36"D top) applications can be specified as fully shrouded. By adding these additional parts and pieces to Essentials or Align Storage platforms users can create more permanent and visually appealing storage spaces.

- When specifying like applications, both end panels must be specified with the back. The back piece cannot connect to another back.
- In a counter top application, the unsupported 18"D surface will require an external stiffener based on the unsupported width.





Collaborative Storage Peninsula:
Collaborative Storage Peninsulas consist of tops, septum, end panels, and end of run supports. Peninsulas create usable storage spaces and collaborative work areas all in one configuration.

- Peninsula applications can only be completed with 36"D worksurfaces and end panels.
- Back to back storage specified without an end panel will result in a ~⅜"gap between storage units.
- In a peninsula application, one end of the worksurface must be supported by undersurface storage. The opposing end can be supported with an O-leg, Stride Post Legs, or laminate return panel.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

****These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.*

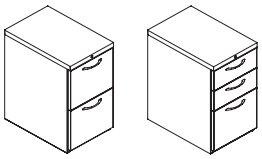
Essentials™ Metal Storage

Working with Pedestals

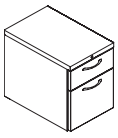
GSA Reference Page

Essentials Pedestals

- File drawers can accommodate front-to-back filing on all models, and side-to-side filing on 22⅞"D and 28⅞"D models.
- Support pedestals of a maximum depth, relative to the worksurface depth, result in one panel receptacle position being inaccessible.
- 22⅞"D units cannot be used with 24"D Concensys® Freestanding.
- 28⅞"D units cannot be used with any 30"D Concensys Freestanding or any 24"D panel-hung worksurface.
- For locking specifications, see pages 330-332.
- Leveling capacity is 2" on 28"H pedestals.

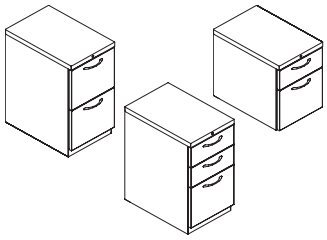


Support pedestals can support one end of a panel-attached worksurface, in lieu of other worksurface supports by using a 28"H support pedestal but cannot be used to support freestanding desking without an end panel.



Suspended pedestals mount to the underside of the worksurface using keyhole slots in top of pedestals. Do not mount suspended pedestals on bridges or peninsulas. Always mount suspended pedestals at end of worksurfaces.

When using suspended units on systems, a return panel should extend 18" minimum beyond leading edge of worksurface on which unit(s) is mounted.



Mobile Pedestals can be used to provide flexible storage. The nominal height of a mobile pedestal is equal to that of a freestanding pedestal of equivalent design. There is no need to add extra height for the casters.

Both 26⅞"H and 28"H mobile pedestals can be nested under worksurfaces mounted at 29½"H. If using 28"H Essentials mobile pedestals underneath a panel mounted worksurface on Stride®, Terrace®, or Optimize™ the panel glides will need to be extended a minimum of ¾" to allow for the mobile pedestals to slide underneath the worksurface.

Mobile pedestals cannot be leveled. Take this into consideration when planning offices which may have uneven floors.

Pedestal Compatibility with Cadence® Desking and Systems Worksurfaces

	Freestanding		Systems Panel-hung Worksurfaces	
Pedestal Depth	24" Deep	30" Deep	24" Deep	30" Deep

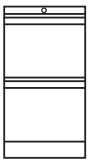
19⅞"	Yes*	Yes	Yes*	Yes
22⅞"		Yes	Yes*	Yes
28⅞"				Yes*

*Wire management grommet is blocked in these applications.

Note: Pedestal placement may affect access to receptacles in base pathway.

Essentials storage pedestals are available in 5 styles:

28"H



Worksurface height mobile and worksurface supporting pedestals have a taller base plate, resulting in a taller overall cabinet height. Consideration must be made to ensure that units align visually with each other and with selected Essentials lateral files. The accompanying chart will help you select the correct pedestal for your application.

Essentials Pedestal Model begins with	Style	Overall Height	Base Height	Spacer required below worksurface	Units align with these Essentials Lateral Models begin with

Dual-side Locking
Drawers and doors lock on both sides to prevent being pried open.

Interlock System
This mechanism inhibits roll-out of more than one drawer or shelf, either sequentially or simultaneously.

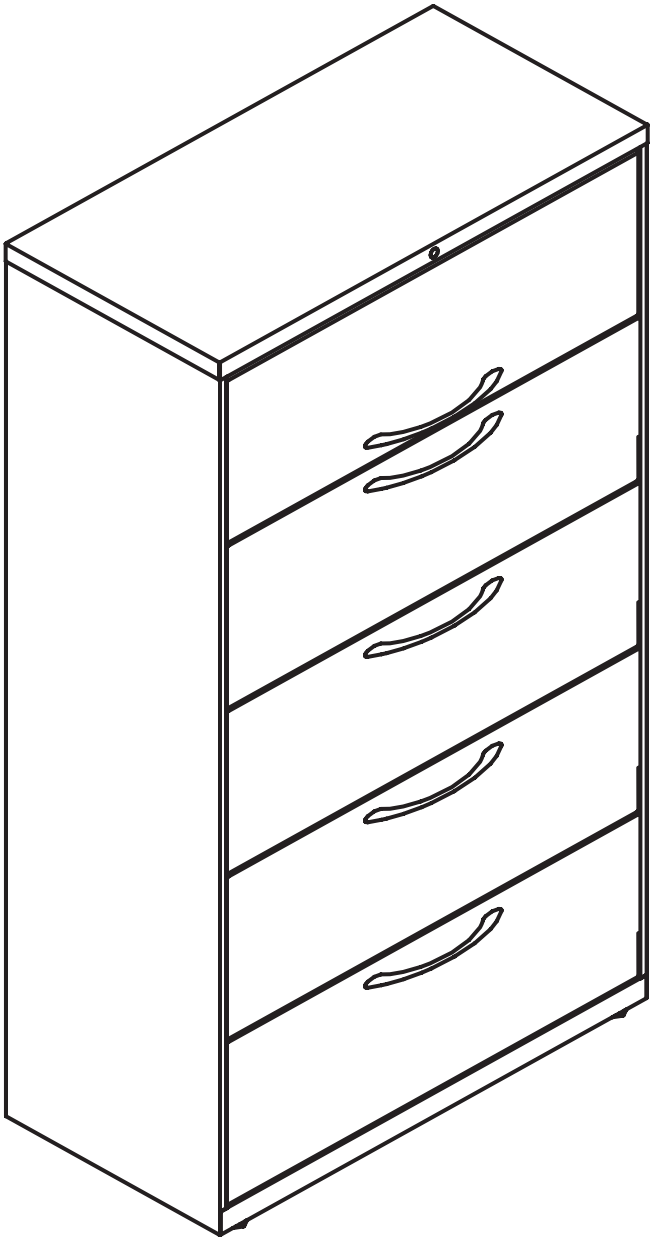
Fully Enclosed Bottom
Double bottoms are welded into all files for added rigidity.

Four Hex-head Leveling Glides
Leveling glides can be adjusted from outside or inside the case. Because of the hex-head design of the stem, leveling can be done even when the file is fully loaded. Range is 1".

Suspension
Telescoping, ball-bearing slides.

Core Removable Locks
Core removable lock feature allows key numbers to be easily changed in the field which facilitates installation.

Omit Lock Core
Files can be shipped with lock cores removed; cores can then be installed after files are placed. Laterals can be keyed alike with pedestals and overhead cabinets.



Four Pull Styles
Choice of four pull styles, also available on Essentials pedestals, allows for total design coordination on projects.

Side Knockouts
Files have knockouts on each side to allow easy ganging of freestanding units to inhibit tipping.

Inset Drawer Design
Drawers are inset inside the case. Base plate is flush with drawer fronts.

Paint Finish
Durable baked enamel finish is applied over rust-inhibiting phosphate pre-treatment.

Hanging Frames
Side-to-side come standard. Front-to-back filing option — hang rails are required.

Counterweights
Counterweights included and factory installed as required.

Drawer Interiors
Interiors and all accessories painted gray.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

****These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.*

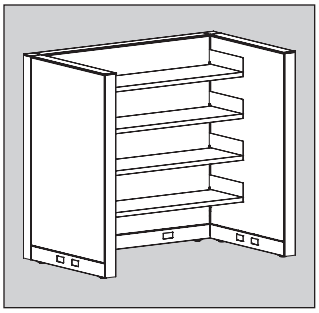
Specification Guidelines

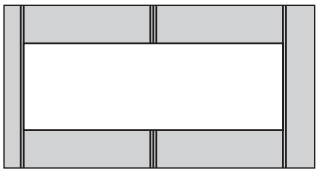
- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.
- Overhead storage cabinets and open storage shelves can be mounted on Terrace structural and stacking panels to a maximum height of 80"H.
- When mounting an overhead on a 57½"H base panel frame, select the option for Z57 bracket.
- For all other base panel frame and base panel frames with stacking frames the YZ bracket should be selected.
- Base panel frames with stacking frames that have an overall height of 57½" also use the YZ bracket.

When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:

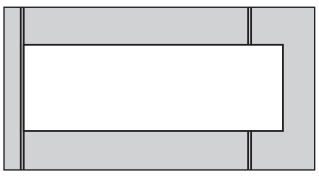
- Stacking frames should be added to all the parent run panels, and to, at least the first panel of each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.
- With Terrace, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.



- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.



- **Storage shelf, receding door overhead, RTA overhead, and RTA shelf width** must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.



- **Terrace assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets. Overhead cabinets can also be mounted on panels wider than the overhead cabinet when using off-module kit **Z2MN**. One side of overhead must be held on-module.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

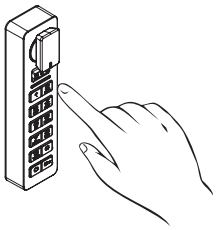
Digital Keypad Lock

Digital Lock Specifications

Available on Align (Pedestals, Credenzas, Towers) and Radii Products



The digital keypad lock options support applications where workstations or storage banks are shared by multiple users. This is an alternative to a standard key lock. This feature facilitates the use of storage by multiple users through eliminating the need to keep and hand-off physical keys. These locks ship in "shared mode" by default; shared mode indicates that the lock will "forget" the paired 4-digit code, allowing the unit to be used by multiple users.

Digital keypad locks:

- Ship factory installed
- Offered in a polished silver finish
- Digital keypad lock requires input of a user-selected 4-digit code
- Digital keypad powered using 2 premium lithium CR2450 batteries
- Battery life is dependent on the frequency of operation but can last up to 5-7 years
- Digital keypad locks are installed horizontally on Align pedestals, credenzas, and towers

Additional information about setup and common troubleshooting problems can be found here: Digital Lock Overview.

Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Once a programming key is used with a unit, it is tied to that lock. Another programming key can not be used.
- Add-on digital lock orders should be programmed with the original programming key.

Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the "master" key and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

Description	Model	List Price
Digital Lock Keys and Accessories		
Programming Key	**YPLDIGPRG**	**$ 314**
Manager Key	**YPLDIGMGR**	**$ 242**

*Digital Lock users must purchase a programming key to operate. Programming keys and manager keys are purchased separately from locks.

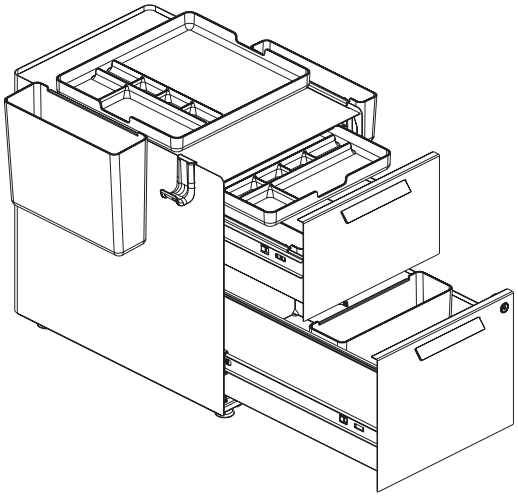
Radii™ — Storage

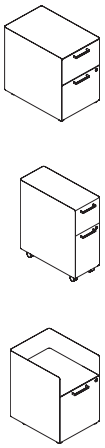
Pedestal Functionality with Work Tools

Effective May 13, 2022

Radii is a new generation of metal storage pedestals, undermounts, and Work Tools designed to accommodate more personal items and less paper. In the evolving digital age, the need to store paper files dwindles, people archive fewer documents, while the need to stow personal belongings grows. Conventional storage options that were designed for lateral paper filing don't adequately accommodate items employees stow, such as a backpack, purse, gym shoes, office supplies, or other everyday essentials workers want to keep within reach.

The desire for products to do more with less is quickly becoming a necessity. Radii delivers efficiency that is obvious in a solution that succinctly stows today's objects in a user-customizable way.





Pedestal Functionality Represented by
Freestanding Pedestal 21½"H
15"W x 23"D Box with Tray/File.
Additional Work Tools ordered separately.

Pedestals

- Available with casters or glides
- Casters allow clearance for pedestal to straddle Altitude foot.
- Rear casters swivel, front casters are fixed, casters do not lock.
- Freestanding pedestals are not meant to support worksurfaces.
- Drawer slides are not full extension.
- Counterweight installed when required. No additional counterweight is required.
- Case wrapper creates a utility lip at top of case from which Work Tools can hang.
- 15"W pedestals can fit a Hot File Bin sideways in drawer to serve as a space divider.
- Hot File and Side Saddle can hang on inside file drawer lip.
- Alcove unit has a single drawer with open enclosure at top to stow backpack or other personal items.
- Drawers are labeled as "Box"/"Box +" and "File"/"File +"; see dimension table below.
- Drawers labeled as "+" have a taller drawer front and added space above the drawer body that can either accept the hidden Radii accessory tray or allow for the drawer to stow larger items, such as a backpack.
- All pedestals with a drawer marked "+" ship with one accessory tray, additional trays may be purchased separately (20⅜"H unit does not ship with or accept hidden tray).
- Radii pedestals offered with a digital locking option
- Slim peds (10"W) with digital locking only accept Square Pull.
- Manager and programming key purchased separately, see page 22.

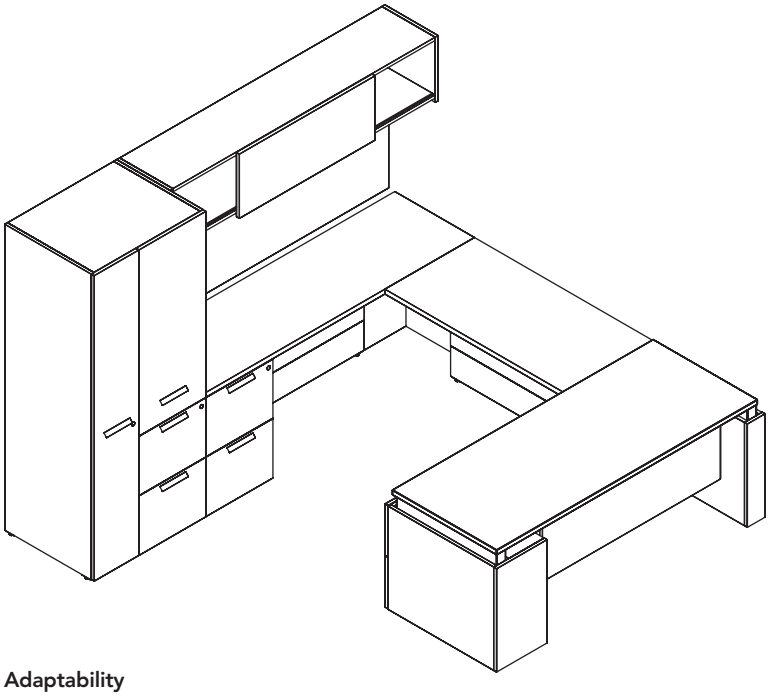
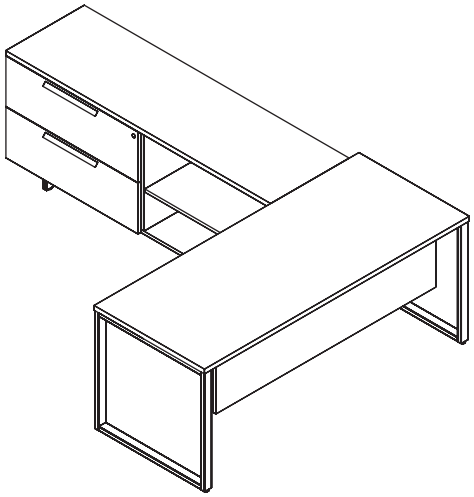
A new way to optimize the private office.

Many executives spend more time outside their offices than in them. When they do touch down for focused work, they want to feel like they've reached home base. An office for the way they work. Confidential files stored securely, coffee mug in its rightful place.

Offices may be getting smaller, but they can't be less functional. Approach provides a portfolio of modular options that inspires you to rethink how the private office can be designed to address today's needs, change over time, and even serve more than one purpose.

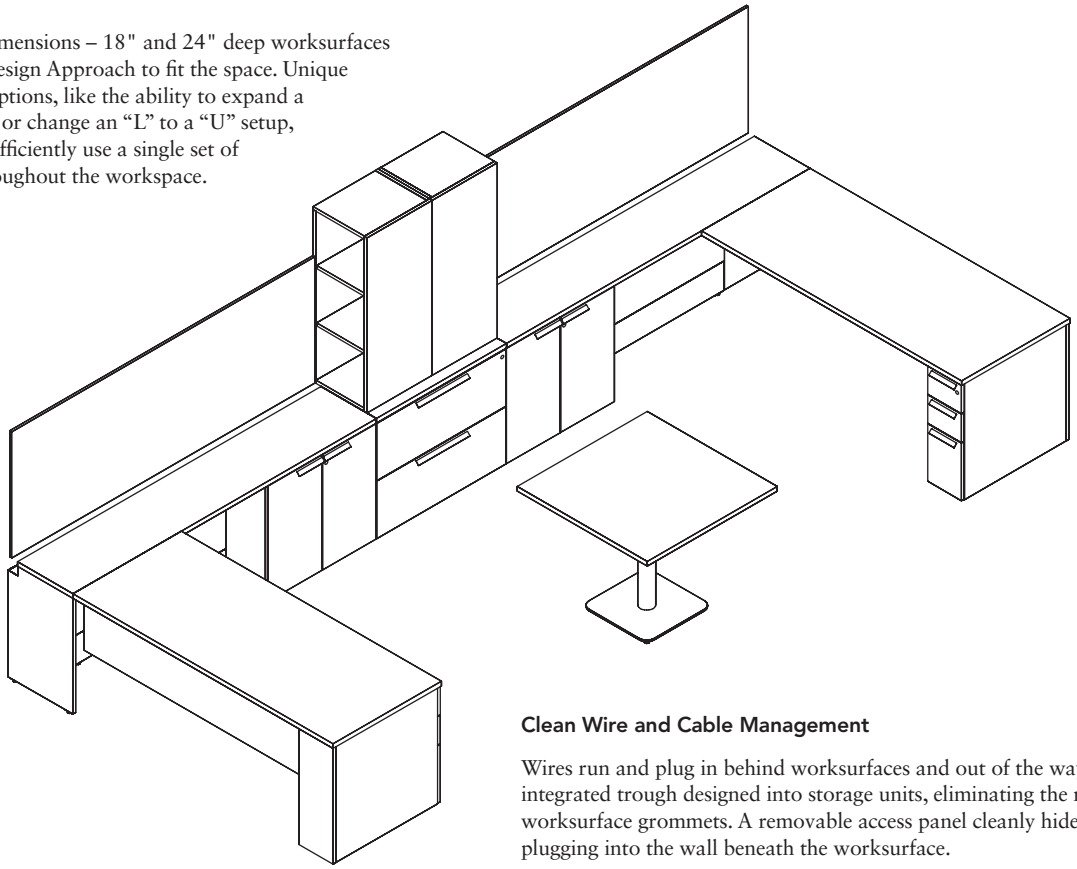
Approach complements Allsteel's open-plan solutions for a cohesive aesthetic throughout the space.





Adaptability

Two planning dimensions – 18" and 24" deep worksurfaces – allow you to design Approach to fit the space. Unique configurability options, like the ability to expand a simple "L" setup or change an "L" to a "U" setup, make it easy to efficiently use a single set of components throughout the workspace.



Clean Wire and Cable Management

Wires run and plug in behind worksurfaces and out of the way in an integrated trough designed into storage units, eliminating the need for worksurface grommets. A removable access panel cleanly hides cords plugging into the wall beneath the worksurface.

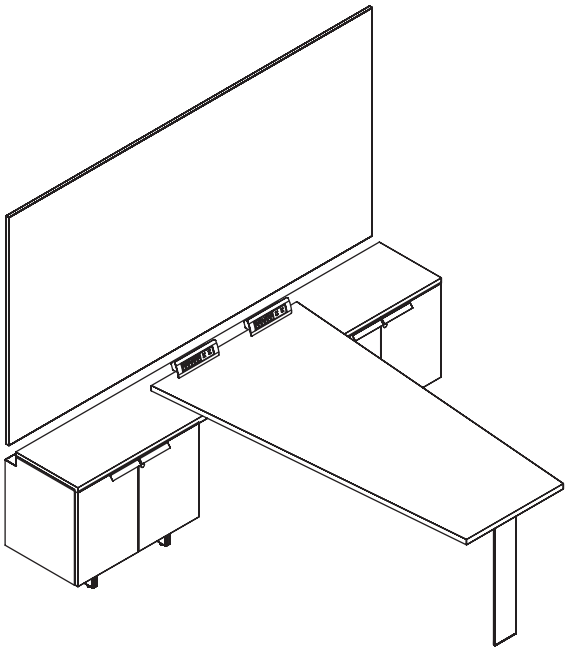
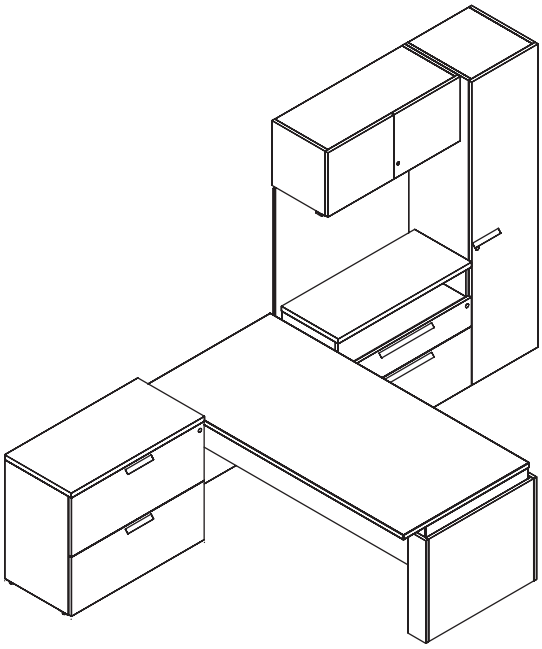
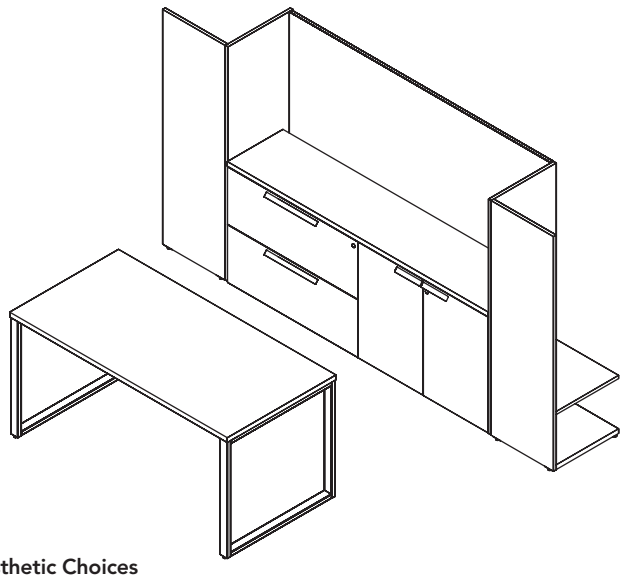
Functional Design

Sit-to-stand worksurfaces enable users to vary their posture throughout the day, while promoting wellness in the workplace. Height-adjustable legs are concealed within a shroud or pedestal storage. Smart storage, like a side-access tower, credenzas in multiple configurations at two heights, stack-ons and wall-mounted overheads with marker board fronts, and a slim pedestal, provide options for any storage need.







Aesthetic Choices

Approach offers a to-the-floor base or a lighter-scale footed design. Choose from eight solid and woodgrain laminate colors, numerous fabrics for tackboards and pedestal seat cushions, and five storage pull styles. Approach offers a mix of materials to support the design vision.

*** These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

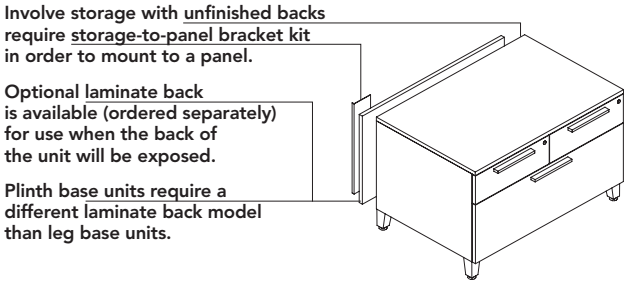
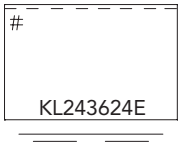
Left- or right-handed storage-to-panel bracket is determined by slots on panel — left-handed bracket required when attaching to left panel slots and right-handed bracket required when attaching to right panel slots.





An example of a 2D CAD symbol for Involve is shown at left. Note the dashed line that represents the unfinished metal back. The pound sign indicates that counterweight kits may need to be added depending on the application. *See page 258 for counterweight specification rules.*

The minimum size for panel return is 50"H x 36"W.
28"H side mounted credenzas must be mounted modular when using overheads and worksurfaces on panels.
With a mid-run floor support, the maximum panel run is 144"
Without a mid-run floor support, the maximum panel run is 72".
Overheads, shelves, and worksurfaces must be mounted on the same side of the parent run as the credenzas.
Maximum overhead height is 15".

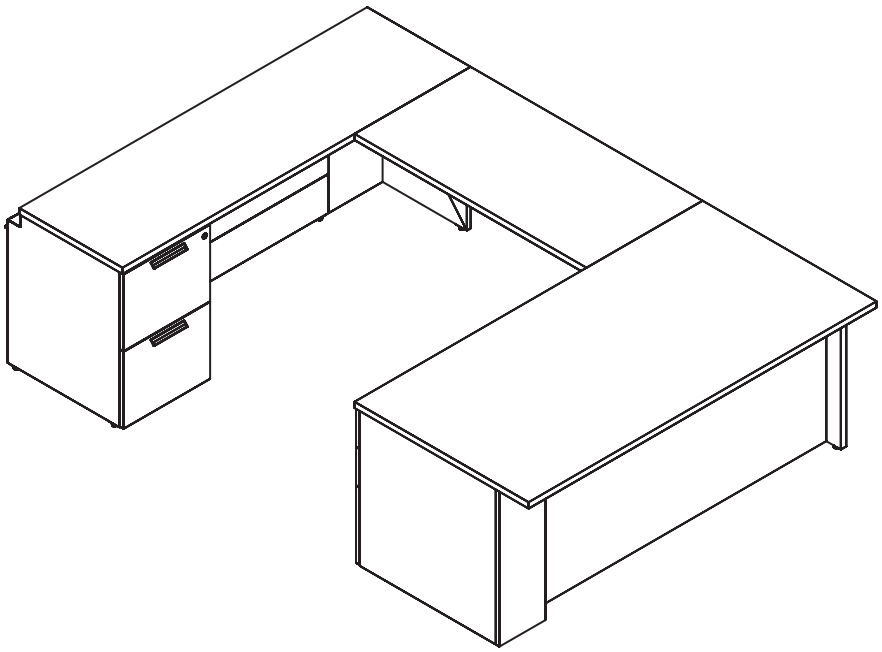
Approach General Construction

- Cases are made of ¾" particle board with 0.5mm edgeband. Worksurfaces and end supports are made of 1¼" particle board with 2mm edgeband and laminate on both sides of all surfaces.
- Matching laminate fronts — all vertically stacked sets have grain matched parts. Horizontally adjacent units do not match.
- Box and file drawers are miter fold, ½" thick particle board.
- All Drawers lock
  - Lock is located in the top right corner of upper drawer on credenzas, desks, and skinny peds. Drawer locks all drawers in the vertical stack.
  - Mobile ped lock is in upper right corner of bottom drawer.
  - Omit core and keyed alike options. Omit core option ships with standard lock cores installed, customer is credited to order keyed alike cores to be replaced at installation.
  - Lock core color is Matte Silver.
- For door-locking, see product categories for details.
- All drawer units have holes drilled for pulls
  - User selects pull choice of beam, halo, square, arch, or bar. Beam and Halo available in Designer White, Silver, Pyrite, and Solar Black. Square pull available in Designer White, Flint, Loft, Matte Silver, Pyrite, and Solar Black. Bar pull available in Designer White, Silver, or Black.
  - Pulls are 1" to hole center from top of drawer.
  - Drawer bodies are light woodgrain finish with Black hangrails.
- Adjustable shelves are ¾" laminate and have 3 hole adjustable positions with 1¼" (32mm) hole spacing. One above and one below location specified in internal dimensioning table.
- Left-hand (LH) hinged units have hinges located on the left of the unit, right-hand (RH) hinged units have hinges on the right.
- Case end panels are the same depth regardless if fronts are assembled.
- Some models require counterweight — see specification table on pages 170-171.



Counterweights

Counterweight(s) may need to be added to Approach credenzas and storage depending on configuration and usage. Models that may require counterweights are flagged with a number sign # following the model number in the pricing section. Reference model and intended usage column in chart below. Some models require two counterweights. Open shelf and hinged door models do not require counterweights and are not listed.

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 236)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side). Corner cove depth is nominal, actual is 1" less.
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Any open span 60" and greater requires an external support channel. Altitude 66"-72"W rectangular worksurfaces include an external support channel.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- C-Leg load capacity is 300 pounds for 2-leg model including weight of worksurface. A3-T load capacity is 250 pounds for 2-leg model including weight of worksurface.

Height-Adjustable Bases (page 237)

- Electric height-adjustable base units are available in two styles for Approach: A6 with T-Leg or A6 with C-Leg.
- A6 models are available in Black, Brownstone, Cinder, Designer White, Flint, Fossil, Loft, Muslin, Nickel, Parchment, Pebble, Pewter, Salt, Titanium, Champagne Metallic, Gunmetal Metallic, Night Bronze, Platinum Metallic, and Silver.
- A6 models travel at 1.2" per second. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is <0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lower position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 153.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Altitude A6 tables feature anti-collision, a feature designed to stop table travel when the table detects an obstacle.
- Altitude A6 bases specified with a worksurface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude worksurface models 60"W and greater. If a non-Altitude worksurface is being used, an external stiffener may need to be specified separately.
- A6 2-stage models (2-leg and 3-leg) can be used with shrouds.

Memory Controls (page 237)

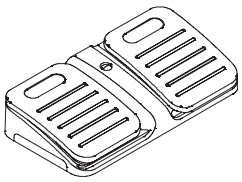
- Optional keypad allows for 4 memory set user heights with A6 models.

Shrouds (page 237)

- A6 2-stage models (2-leg and 3-leg) can be used with shrouds.
- A6 3-stage standard and Max bases cannot be used with shrouds. The shrouds interfere with the reset of the base as it is not able to reach its lowest setting.

Foot Controls

- Available as a .option on A6 and as model.
- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- Compatible with A6 tables.
- 2 AAA batteries needed. Batteries not included.



Cable & Wire Management

Cable Management Tray (page 236)

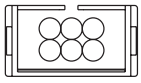
- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

Wire Management Channel (page 236)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

Cord Management Chain (page 236)

- Works with Approach and Altitude A3 and A5-Series product.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.



6 cables (.300" dia.)

Under Worksurface Trough (page 236)

- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

****These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.*

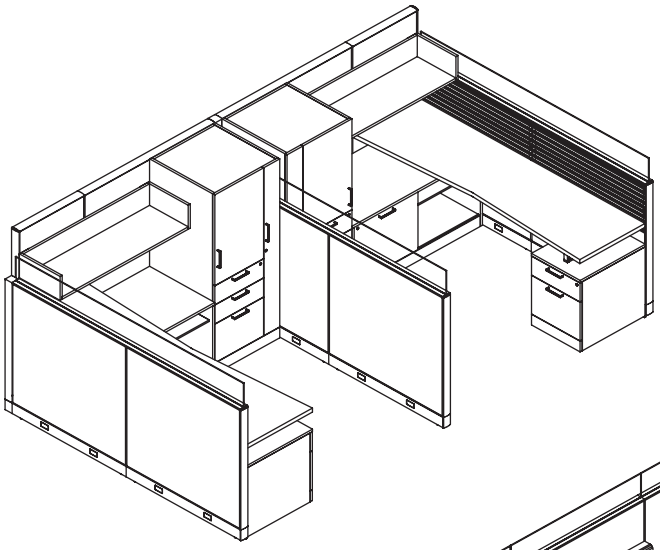
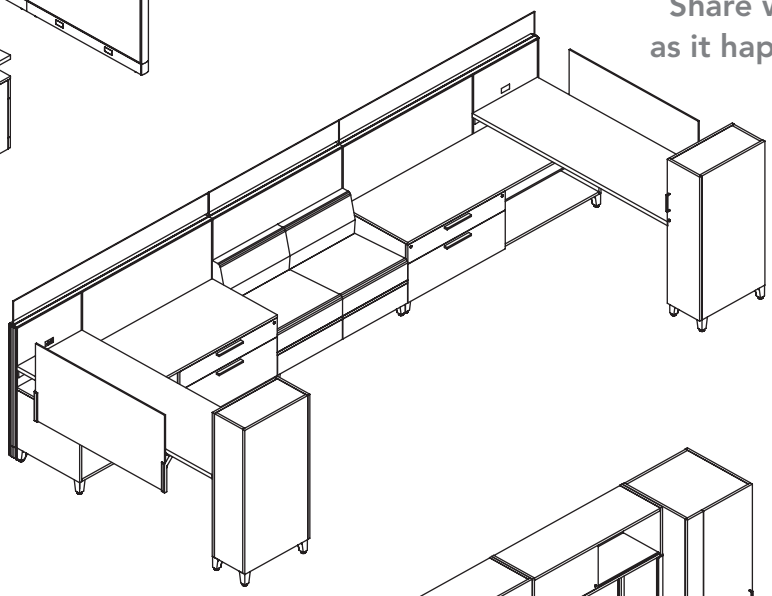
Where, how, and even what defines work is changing constantly. It's obvious that businesses are trying to understand what it means to successfully change with the culture and trends.

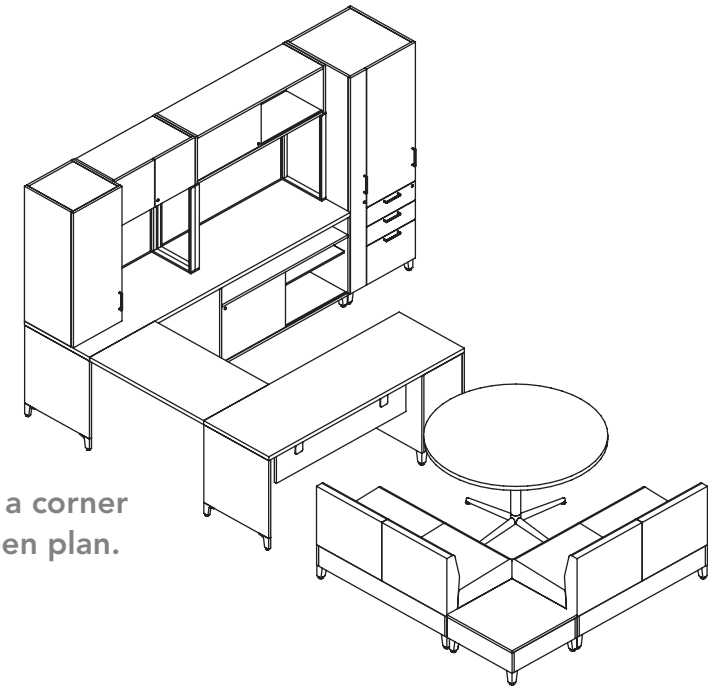
With Involve, we set out to discover how furniture can be used today as an impetus to an organizations change and yet perform well into the future as the organization continues to evolve.

Involve… one solution for all your needs.



Share work as it happens.





Involve is as comfortable in a corner or shared office as in an open plan.

A Fresh Approach

Furniture needs to work today with a fresh approach and innovative features. But support of tomorrow's needs is vitally important.

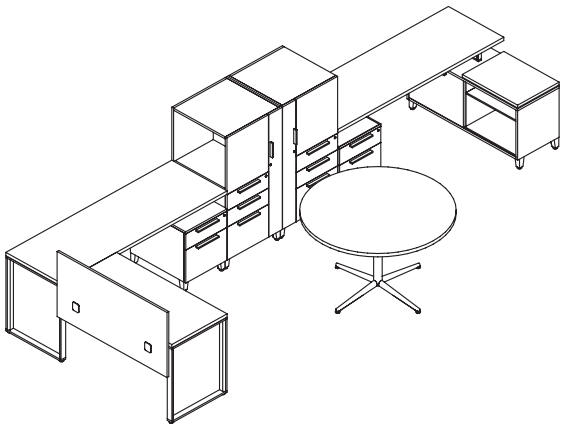
- Expand functionality of systems furniture, energize existing installs, and support changing work styles with Involve. Take existing investment and add functionality and relevance by changing out a few key pieces.
- The soft seating can be used within panel walls or pulled into freestanding or huddle room applications. The same casegoods work in private office or open plan configurations.
- Modularity of components allows for flexing of product application into the future. Involve lets you design for collaboration now while building in opportunity for future head count growth.

Changing Work Styles

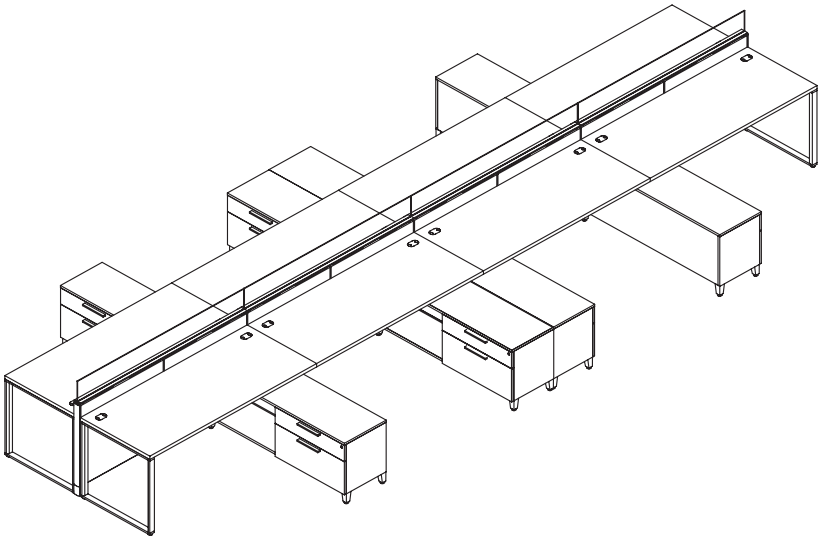
From editing to brainstorming, number crunching to researching, today's work doesn't just happen in a task chair pulled up to a desk surface.

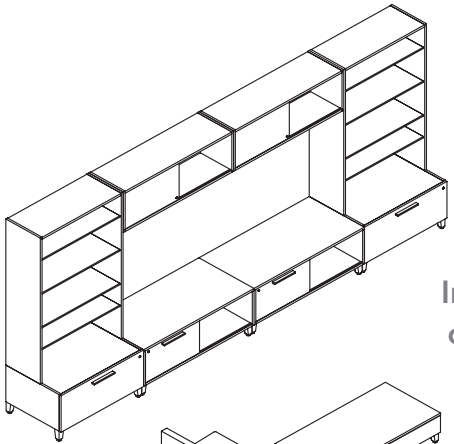
- Tired of the stodgy cubicle, users should be inspired by a fresh approach with innovative features that feel like furniture and less like a system.
- A task chair works for one job function and lounge seating works better for another. Involve supports the preferred posture for these activities while maintaining the desired home base for individuals.
- Untethered from the primary workstation, sharing of information can happen spontaneously around a screen or face to face. Involve components can be used across the floorplan offering the user multiple places to go as they work.

Get inspired by Involve.



Involve's modular design accommodates all the different ways work gets done.





Involve moves out of dedicated user spaces to create comfortable, functional meeting areas.

GSA Reference Page

Construction and Options
See page 252 for Involve storage construction details; and base, pull, and finish options.

Filing
File drawers can accommodate front-to-back letter filing.

Wardrobe Door
All 24"W towers have full-height wardrobe doors with a coat hook.

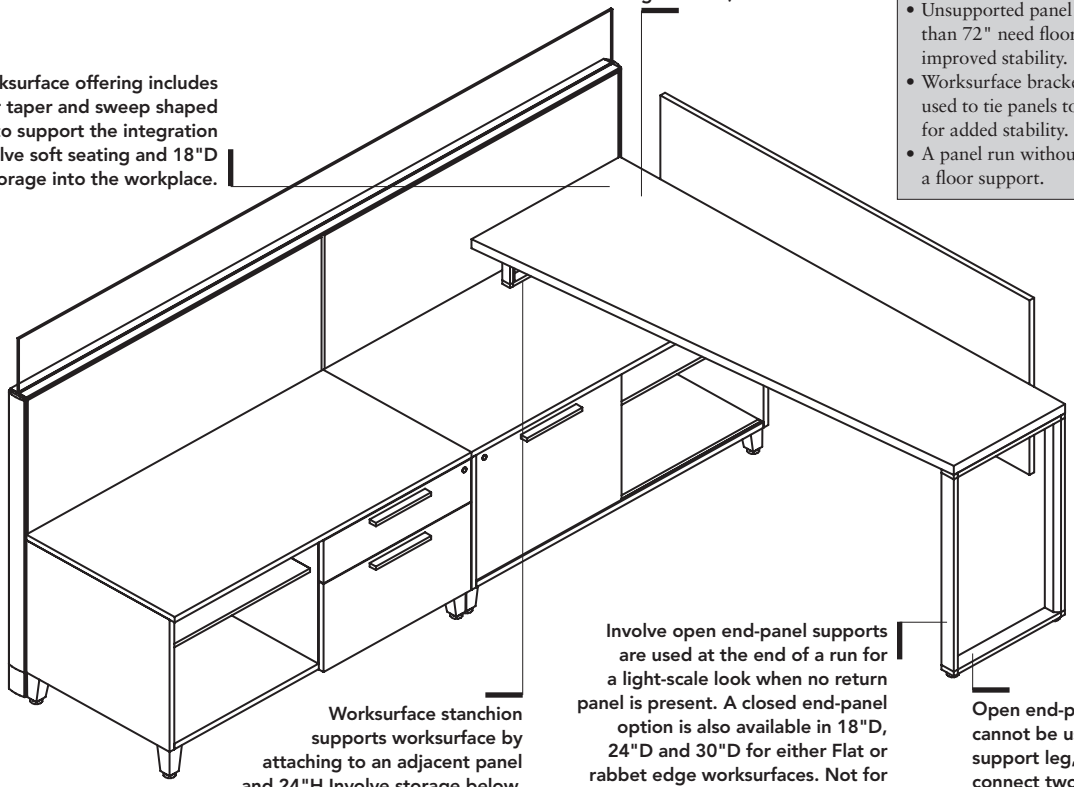
Support Guidelines
- Unsupported panel runs greater than 72" need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A panel run without a return needs a floor support.

Worksurface offering includes linear taper and sweep shaped worksurfaces to support the integration of Involve soft seating and 18"D storage into the workplace.



Worksurface stanchion supports worksurface by attaching to an adjacent panel and 24"H Involve storage below.

Involve open end-panel supports are used at the end of a run for a light-scale look when no return panel is present. A closed end-panel option is also available in 18"D, 24"D and 30"D for either Flat or rabbet edge worksurfaces. Not for use with T-mold worksurfaces.

Open end-panel supports cannot be used as in-line support leg, or used to connect two worksurfaces.

Primary worksurfaces are available in 18", 24", and 30" depths. Nominal worksurface width is equal to nominal panel width. Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for spans 48"W-59"W. See pages 262 and 293. Support hardware is ordered separately.

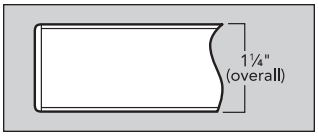
Corner worksurfaces with woodgrain laminate and veneer have grain direction diagonal to adjacent worksurfaces. One rear center support bracket is included. All other support hardware is ordered separately.

Secondary worksurfaces are available in 12", 18", and 24" depths. Support hardware is ordered separately.

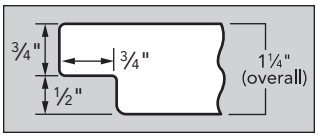
Credenza and pedestal tops are specified separately for 28"H and 42"H units to allow the spanning of multiple peds or credenzas.

Threaded-metal inserts are standard for ease of installation and a positive fit. Worksurfaces can be panel hung or used in freestanding applications.

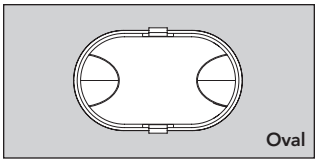
Worksurface stanchions are used to support worksurface when mounted atop a 24" high Involve credenza. Worksurface stanchions are 5¼"H and made of aluminum. They are available in depths of 12" and 18" and used to support surfaces 18", 24", and 30" deep.

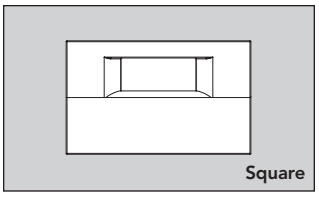


Flat Edge trim is available on laminate tops in eleven standard colors (customer specified) to match solid laminates and to complement patterned or in fourteen woodgrain edges color matched to the woodgrain laminates. Veneer worksurfaces have veneer edge.



Rabbet Edge trim is available on select laminate and veneer tops. These worksurfaces and credenza tops have rabbet edge detail on all sides.





Wire management grommets are standard in most worksurfaces and are specified in plastic or metal. **Metal grommets** are available in oval or square (shown above).

GSA Reference Page

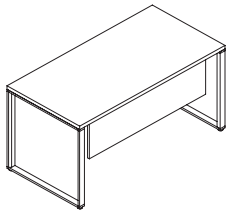
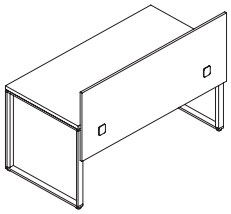
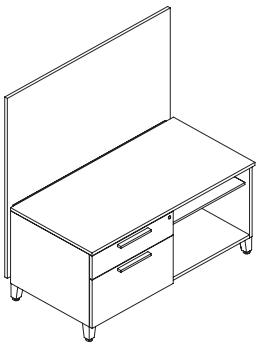
Light-scale screens provide space division. There are four options available: surface mounted modesties, privacy panels, divider panels, and taskpanels.



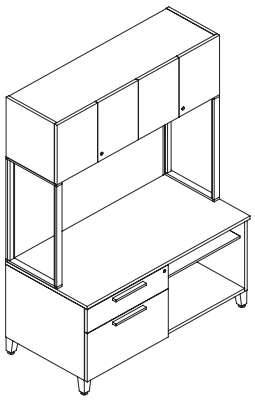
Surface mounted modesties are mounted to the underside of the desking worksurface or worksurface with external support channel. They are 11"H and available in laminate or frosted glass. Single or shared (laminate only) mounting models are available. Laminate models include a wire tray on one side of single units and on both sides of shared models. There is an optional wire tray available for glass units.



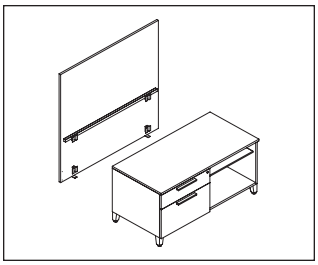
Privacy panels extend above and below the desking worksurface acting as both a screen and a modesty panel. They are 25"H and available in laminate or glass (frosted or writable). Single or shared (laminate only) mounting models are available. Laminate models include a wire tray on one side of single units and on both sides of shared models. There is an optional wire tray available for glass units.

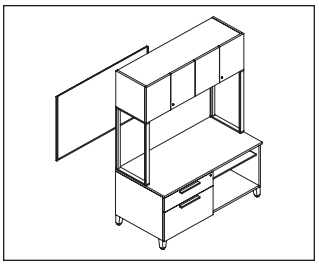


Divider panels attach to laminate back of credenza to provide space division between workstations. They are available in laminate in a 50" height.



Taskpanels mount between stanchions under overhead storage cabinets. They are available as tackable, marker board, or laminate in 12", 18", 19", 26", or 27" heights.





Specification Rules for Modesties and Privacy Panels

When mounting a modesty panel or a privacy panel use a desking worksurface or worksurface with an external support channel added. When mounting a modesty flush to the edge of a worksurface supported by O-Legs the modesty is to be 7" in from the front edge, the modesty must be 14" narrower than worksurface width.

When using a power/data module between a privacy panel and a worksurface, the privacy panel must be mounted 1" away from edge of the worksurface. Privacy panel can be mounted flush to the edge of the worksurface if power/data module is not used.

When using a power/data module with a surface mounted modesty panel, the modesty panel must be inset a minimum of 2" in from the edge of the worksurface.

Privacy panel width can be same width as worksurface. *Example:* 60"W privacy panel can be used on a 30"D x 60"W worksurface. Width of panel is undersized by ¼" providing a ⅛" gap when centered. Placement or use of a modesty must be 12" narrower than worksurface width when using Involve open and closed gable ends.

When using modesty with a Stride post leg, the width of the modesty can be the same as the worksurface, but must be mounted 8" or more in from the front edge of the worksurface.

Freestanding Table Applications:
Privacy panels require a minimum worksurface depth of 30" for freestanding applications. Surface mounted modesties can be used with any depth freestanding application.

Panel Applications:
When using a privacy panel in a back-to-back application the adjacent panel run requires an extended straight connector to compensate for depth of shared privacy panel.

Full-Height Modesty Panels (page 294)
- Full height modesty panels are designed to create a desk. A desk can be created with a modesty panel, worksurface, and storage or gable ends on each side — see chart on page 294.
- Available in solid and woodgrain laminate color options. Modesties 61" wide or larger are limited to solid laminate colors only.
- It is recommended to recess the modesty in from the edge of the worksurface. When using with a 24"D surface, recess modesty 6". When using a 30"D surface, recess modesty 6" or 12".
- If attaching desk to a panel on one side, use a storage-to-panel bracket kit.

Surface Mounted Modesties (page 295)
- Laminate and glass models available for single use only.
- Surface mounted modesties mount to underside of surface to provide privacy below worksurface height.
- Surface mounted modesties are 11" high and ¾" thick laminate or ⅜" thick frosted glass.
- Single modesties mount on a single worksurface with two brackets. Laminate models have a single wire tray.
- When a laminate surface mounted modesty is specified under a worksurface supported on one end with an open or closed gable end support, the width of the laminate modesty should be a minimum of 3" shorter than the worksurface.
- When a surface mounted modesty panel is installed under a table with gable end legs on both sides, the modesty must be 12" narrower than the table.
- Glass modesties must always be 12" narrower than worksurface. When mounting a glass modesty to a worksurface the modesty must be centered.
- When using a glass modesty underneath a worksurface with electrical grommet cutouts on both corners, the modesty must be inset at least 8 inches from the front edge of the worksurface.

Privacy Panels (page 296)
- Laminate and glass models available for single use only.
- Privacy panels mount to the back side of worksurface(s) and extend above and below the worksurface(s) acting as both a screen and a modesty panel.
- Privacy panels are 25"H and ¾" thick laminate or ⅜" thick glass (frosted or writable).
- Single privacy panels mount on a single worksurface with two brackets. Laminate models have a single wire tray.
- Inset mounting bracket design provides mounting room for legs or open end panel support allowing the width of laminate privacy panels to match width of worksurface.
- Glass screen do not ship with wire channel. If wire channel is needed, use Stride® desking wire channel.
- Glass privacy panels must always be 12" narrower than worksurface. When mounting a glass privacy panel to a worksurface the modesty must be centered.
- When using a worksurface with electrical grommet cutouts the corner of the mounting bracket will be slightly visible from opening of the grommet.

Divider Panels (page 296)
- Divider panels can be attached to the back of 24"H credenzas to provide space division between workstations.
- Offered in laminate in widths to attach to 30"W, 36"W, 48"W, and 60"W credenzas; and height to align with 50"H modules.
- Mounting brackets provide a 1" cord drop space between edge of worksurface and the ¾" thick divider panel.
- A cableway is provided on the inside of the divider panel to facilitate the passage of wires.
- Mounting brackets and cableway are available in black only.
- The mounting of the divider panel is designed to center the ¾" thick panel within the lateral space created by adding an extended straight connector in a panel spine.
- When specifying a divider panel to be attached to a credenza with an unfinished back, a laminate credenza back must also be specified for attachment of the divider panel brackets.
- Divider panel cannot span two credenzas side-to-side.
- Divider panels are designed to be used in single-sided application.
- Divider panel lines up with bottom of credenza case.
- Counterweight kits are still required in credenzas as rules state on page 258.

Taskpanels (page 297)
- Taskpanels are available in tackable material and attach between stanchions supporting and overhead storage cabinet.
- Taskpanels are available in 30"W, 36"W, 42"W, 48"W, 60"W, 72"W, 84"W, and 96"W. 72"W and wider consist of two panels. Nominal width of taskpanel should match width of overhead storage cabinet.
- Taskpanels are available 18"H or 26"H for use with 24"H credenzas; and 12"H, 19"H, or 27"H for use with 28"H credenzas. Nominal height of taskpanel should match stanchion height.
- Laminate and tackable taskpanels are encapsulated in a painted metal pan on sides and bottom.
- Back of unit has exposed fasteners. Aesthetic should be considered in applications where back is visible.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

All Storage

- All storage is made from ¾" thick with particleboard core with top and bottom surfaces finished in laminate. Horizontal storage sides and back are painted steel.
- Edge band is made of 1mm thick ABS plastic — flat edge trim only.
- Cam and pin construction. Storage is plinth base only unless unit is mobile.
- Available in solid and woodgrain laminates, models with doors or drawers are available with a two-tone option.
- Pull options: arch, square, linear, straight. All standard in PR6 Silver.
- Locks have a silver finish.

Horizontal Storage (page 306)

- Available in open and sliding door models, as single sided or dual sided.
- Top and bottom are laminate, sides and back are painted steel.
- Beam mounting top cap must be used, length must match length of beam.
- Horizontal storage cannot be panel or wall mounted.
- Units cannot be mounted directly on worksurface, requires stanchion kit ordered separately. Kit includes stanchions and installation hardware.
- Laterally mounted storage can overhang worksurface a maximum of 12". Worksurface stanchion is flush to edge of the worksurface when storage is overhanging worksurface, and is 8½" from edge of worksurface when storage is not overhanging worksurface.
- Beam mounted lateral stanchion kit (4-pack) U7HSK2 is used for single standard mounted storage or for dual laterally mounted storage. Kit includes ganging bracket for dual mounted storage units. See illustration and matrix at left.
- Beam mounted stanchion (2-pack) U7HSB2 is used for mounting a laminate shelf to beam. See illustrations and matrix on page 303.

Worksurface Storage Stanchion Kit — U7HSK1 (page 306)

- Allows for use with beam mounted screens in conjunction with horizontal storage.
- Works with single sided applications such as aisle ways or up against a wall.
- Back stanchions mount to underside of worksurface — no pilot holes on surface.
- Back stanchions are made of 10 gauge steel.
- Front stanchion rests on worksurface top.
- Front stanchion is aluminum extrusion.
- Storage unit can be mounted such that back of unit is flush with back edge of worksurface or such that back of unit is centered on beam.
- When locating flush to back edge of worksurface uses pilot holes on bottom of horizontal storage to locate stanchions for proper support; no pilot holes for when mounting on beam centerline.
- Extending storage unit beyond beam centerline is not recommended — should be using standard beam mounted stanchion kit U7HSK2.
- Can be used to mount horizontal storage either parallel with beam or perpendicular to beam.
- Can be used with 7½"H or 15"H storage
  - 7½"H aligns to 13½"H Further/Stride screens/42½"H towers
  - 15"H aligns to Further/Stride 20"H screens/50"H towers
- Recommended for use only on tethered set ups.

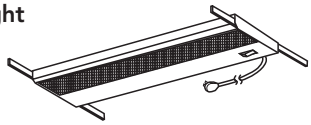
Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and Splitty Light.

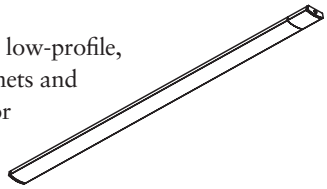
Recessed Undercabinet LED Light



Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

Undercabinet LED Light

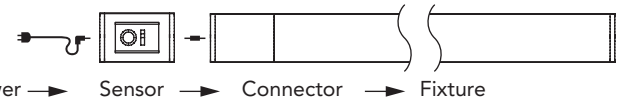


The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

CONNECTION SEQUENCE*



*Cannot deviate from this sequence

Recessed Task Lights (page 322)

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.
- LED strip comes installed within light.

  –CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.

- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.

LED Light Combinations Must Not Exceed 60W in Combination	Power Usage
6X 17"	60W
3X 31"	60W
1X 31" + 4X 17"	60W
2X 31" + 2X 17"	60W

- The combinations that could max out 60W are featured above. *Daisy chained units have a power limit of 60W from one power entry. 17W units use 10W and 31W units use 20W.*
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).
  Example: Daisy-chain 4–17" undercabinet LED lights:
  Specify: 1 ALED17U60
  Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).

- On 60 watt models, power drive brick is in center of cord.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Overhead Length	Suggested LED Sizes
24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31
Note: LED lights may need to be positioned along length properly to allow jumping to additional overheads. Suggested sizes above are recommendations for single overheads to provide as much light along length of overhead as possible.	

The suggested sizes factor in 4 inches of room for the power inlet and occupancy sensor (optional).

N series lock cores (ALKF23CN) are a replacement part for legacy Allsteel products. N series lock cores were used in all Persona pedestals produced between January 1996 and August 2009 as well as Receding Door Overheads produced between January 1996 and August 2010. N series lock cores are NOT used in current product and should not be ordered for product produced after these dates. E series lock cores are used in current product, see above.

***On existing Premium and Asset lateral, use N-Series locks.**

** Removable Lock Core Kits are intended for use with Allsteel systems furniture and are approved under GSA SIN PENDING. When purchased separately and used without Allsteel systems furniture, those Removable Lock Core Kits marked by (**) are considered Open Market.

EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except receding door overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — random, specified or sequential.

Random Keying

The random keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

Example: *There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

Example: *There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

Example: *A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

The first 40 offices have 4 silver locks each that need to be keyed-alike.

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

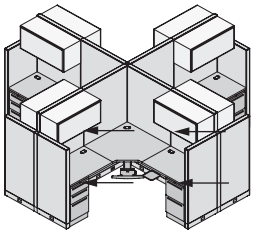
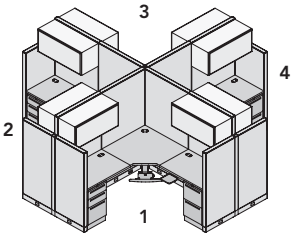
How to specify using Easy Lock Program:

Step 1 — Count the number of lock cores and color required in each workstation that need to be keyed alike.



2 overheads with 1 lock-core each = 2
2 pedestals with 1 lock-core each = 2
Total silver lock-cores per station = 4

Step 2 — Count the total number of workstations needing 4 lock-cores.



4 total workstations

Step 3 — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.
