## Price & Specification Guide 2022

Prices effective May 13, 2022

PDF updated November 10, 2022

All content marked in red signifies an update to the last major version of this price guide, published on May 13, 2022.

# Limited Lifetime Warranty

Our unwavering commitment to our customers compels us to care, and our dedication to quality is just one of the ways we show our customers how much they mean to us.

We recognize that keeping up with the pace of change requires having products that work as hard as the people who use them. That's why each of our products is rigorously tested and certified to meet the highest industry standards.

In the unlikely event that any Allsteel product or component covered by the Allsteel Warranty should fail under normal workplace use because of defective material or workmanship, Allsteel promises to fix it. Because taking care of *people* is how Allsteel takes care of business.

For information on Allsteel's warranty coverage, visit [AllsteelOffice.com](http://AllsteelOffice.com).

## DISCONTINUED PRODUCTS

- Z-Series Monitor Arms discontinued 6/30/2020, recommended replacement is Pivot Monitor Arms
- Altitude A3 height-adjustable tables discontinued 12/31/2020, recommended replacement is Altitude A6 height-adjustable tables

### COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at [allsteelcomteam@allsteeloffice.com](mailto:allsteelcomteam@allsteeloffice.com).

### Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: [Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search](#) or [COM Search quick link](#). You will need to have the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code.  

If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

### Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy at: [Allsteelsynergy/Design Resources/Textiles & Finishes/COM Search](#) or [COM Search quick link](#). Or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.  

You will need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Your name, company name and email will be prepopulated fields. The secondary email, project name, and bid/contract number are optional information. The supplier, pattern, and color will show a list by clicking in the box and entering the first letter of the name and these are free form text boxes. Once that information is entered click add. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.) Then click submit.
3. An email will be sent to the to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: Testing materials requested, in testing, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.
4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll. Estimate the yardage required by using the yardage requirements listed in the price list by model. For questions please contact Allsteel Customer Support.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

#### HNI Textile Distribution Center

#### COM Production Yardage — PO Number

Docks 20-22  
301 Mulberry Avenue  
Muscatine, IA 52761

Information that **MUST** be included in the packing slip attached to the DTS fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling or fabric yardage that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 4 weeks. After 4 weeks Allsteel will dispose of the fabric. There are no exceptions to this policy.

Specific to DTS orders - The customer should send only the amount needed for the order. Excess yardage, or yardage not attached to an order will be disposed of at Allsteel's discretion.

Any canceled orders are subject to cancellation charges up to the full value of the Allsteel product canceled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

### Additional Policy Information:

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation when the issue is found.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier.

All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then canceled prior to shipment are subject to cancellation costs up to the full value of the product canceled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).

### Fire Retardant

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

*For more information, please contact Allsteel Customer Support.*

### YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS

Fabric Width	Plain Fabric	2"– 14" Repeat	15"– 19" Repeat	20"– 27" Repeat	28"– 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

### Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a \$500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no \$500 matching fee, however, there is a sample chip fee of \$175 net for stains and \$100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

#### Allsteel Inc.

Attn: Tailored Products Group  
2210 Second Avenue  
Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

### Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

### Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilsonart, Formica, Nevamar and Pionite laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

# Everyday Advantage®

## New terms and conditions for EDA:

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
  - Everyday Advantage Std-0125, Everyday Advantage Canada-0127
2. Everyday Advantage orders are not eligible for bid pricing.
3. Program discounting includes the complete Optimize, Further, **and** Terrace systems lines, private office solution, Approach and Involve storage. This program also includes Acuity, Access, Evo, Inspire, Lyric, Mimeo, Nimble, Quip, Relate, Seek, and Svelte, seating. Altitude, Aware, and Structure tables are also available, along with Align pedestals, lockers and metal storage and Essentials pedestals, and Radii storage lines. In addition, Extensions ergonomic accessories and lighting are part of the standard offering. All other product not called out is available for order on the contract but will receive standard discounting of 55%–65%.
4. All textiles and finishes except for veneer and some wood finishes are available, depending on quantity and selection, and may have extended lead times.
5. Everyday Advantage orders are not limited to a minimum or maximum.
6. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
7. Standard freight terms apply.
8. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

*Allsteel Inc. reserves the right to amend or terminate this program at anytime with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).*

### ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, [allsteeloffice.com](http://allsteeloffice.com).

**For memo samples, please contact our partners:**

#### The intent of the Partnership Program

is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

NOTE: Refer to individual product pages for upcharges.

## ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, [allsteeloffice.com](http://allsteeloffice.com).

**For memo samples, please contact our partners:**

- Camira, [memos@camirafabrics.com](mailto:memos@camirafabrics.com)  
1.616.288.0655
- CF Stinson, [cfstinson.com](http://cfstinson.com)  
1.800.841.6279
- HBF Textiles, [hbftextiles.com](http://hbftextiles.com)  
1.877.494.5727
- Maharam, [maharam.com](http://maharam.com)  
1.800.645.3943
- Ultrafabrics, [ultrafabricsllc.com](http://ultrafabricsllc.com)

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.

### Building Horizontally with Fit Panels

Method 1—Opposing Returns

Method 2—Single-Sided Returns

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

#### Method 1 — Opposing returns

- A parent run must be a minimum of 60" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.
- Dual-sided return panels must be a minimum of 60" combined width.
- Return panels must not be any more than 30" lower than the height of the parent panel run.
- Panel height measurement includes integrated glass, if used.

#### Method 2 — Single-sided returns

- A parent run must be a minimum of 60" and a maximum of 144" between return panels.
- A parent run less than or equal to 84"W must have a minimum of two return panels totaling 60" in combined width. For every 7½" drop in panel height, 6" must be added to the minimum combined return length.
- A parent run greater than 84"W must have a minimum of two return panels totaling 84" in combined width.
- Return panels must not be any more than 30" lower than the maximum height of the parent panel run.
- Panel height measurement includes integrated glass, if used.

#### Panels for Use with Glass

- Panels match construction of non-glass panels but have a routed top edge.
- Glass mounts directly into the panel route via a gasket.
- Single end panel routing is inset by ½" from each end of the panel and requires glass to be the same as the panel width.
- Spine, Mid, and Split End panel routing is inset around 1½" from each end of the panel, exact distance will vary with panel type. These panel types require glass to be 3" shorter than the panel width.
- Glass is available in 3 colors: Clear, Frosted, and Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H.
- Glass is available on all panel widths.
- Specify glass models separately from panel models.
- Glass Panels at 30"W and under are not UL listed.

#### Panel Construction

- Made of 1⅛" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS.
- Available in woodgrain or solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Grain matching is not available.
- Fit Panels offer 2½" leveling capability.
- Available with and without the integrated glass option. Panels for use with glass offer a routed top edge.
- Glass is specified separately.
- Fit Panels for use with glass have separate model numbers.

#### Panel Dimensions

- Depth: 1⅛"
- Nominal widths: 18", 24", 30", 36", 42", 48", 54", 60", 66", 72", 78"\*\*, and 84"\*\*. (actual width dimension will vary based on panel type, see Panel Specification page for details)
- Heights\*: 30", 35", 42½", 50", 57½"
- Glass Heights: 7½", 13", 15"
- Leveling Glides: 2½" Range  
\*with levelers fully retracted  
\*\*Panels 78"W and wider require the use of a stiffener shelf or tube

### Specifying Fit Panels

- Panels under 60"W are not available with power.
- Panels 60"W and greater are available with single- or dual-sided power.
- Spine panels are only available 60"W or greater and must be specified with power.
- Specify L- or T- Gallery-to-Gallery Panels when power is not needed in a single-piece end panel.
- Split End panels may be specified with or without single-sided power.
- When power is not needed in Mid Wing Panels, they must be specified with No Power AND the spine power height in order to allow electrical components to pass through the panel. Power can be specified at the Below Worksurface or Below HAT heights.
- A dual-sided powered spine must have an end panel that extends both directions:

- When using a mid wing on the EXTERIOR face of a single-sided powered spine, use a standard Gallery Panel. Connectors must be field-measured.

- Single spines can be used in a run in applications without mid panels to maintain standard widths inside each.

- When submitting a request to TPG, the full dot option logic must be provided.

### Specifying Fit Panels

- When specifying Fit Panels, the base model indicates the height and modular width needed. Model logic is ‘GSYS’ then ‘height’ then ‘width.’ (e.g., a 50”H by 72”W panel would be GSYS5072)
- The first dot option indicates the panel type (where the panel is located within the typical) and power options. (e.g., GSYS5072.MSPDW (Mid Spine, Power Below Worksurface, Wall))
- When a Single-sided End panel is ordered, a separate connector must be specified (GPLTBK) with any Allsteel standard paint color.
- When Split End panels are ordered, a separate connector must be specified (GSYSCONSE) with any Allsteel standard paint color.
- Due to the lack of connectors spacing out the panels, the true width of Fit panels must accommodate panel overlap. To allow for modular interior worksurface dimensions, the option codes must indicate how much overlap is needed, which is done by specifying ‘panel type’ explained below.

Panel Type Options are below:	True Panel Widths (ex: 72"W)
Mid Wing = "MDW"	Exact width (72")
Left Hand Split End = "LPE"	1/2 panel width overlap (72.56" W)
Right Hand Split End = "RPE"	1/2 panel width overlap (72.56" W)
Left Hand Single-Sided End = "LSE"	1 panel width overlap (73.125" W)
Right Hand Single-Sided End = "RSE"	1 panel width overlap (73.125" W)
Right Hand End Spine = "RES"	1/2 panel width overlap (72.56" W)
Left Hand End Spine = "LES"	1/2 panel width overlap (72.56" W)
Mid Spine = "MSP"	1 panel width overlap (73.125" W)
Single Spine = "SGS"	Exact width (72")

### Specifying Fit Panels

Following the 'Panel Type', the option code includes a power specification.

Power options for Spine Panels are below:

- Single-Sided Power Below Worksurface = "SW"
- Single-Sided Power Below HAT = "SH"
- Dual-Sided Power Below Worksurface = "DW"
- Dual-Sided Power Below HAT = "DH"

Power options for End Panels are below:

- No Power = "PN"
- Single-Sided Power Below Worksurface = "SW"
- Single-Sided Power Below HAT = "SH"

Power options for Mid-Wing Panels are below:

- No Power Below Worksurface = "PW"
- No Power Below HAT = "PH"
- Left-Handed Single-Sided Power Below Worksurface = "LW"
- Left-Handed Single-Sided Power Below HAT = "LH"
- Right-Handed Single-Sided Power Below Worksurface = "RW"
- Right-Handed Single-Sided Power Below HAT = "RH"
- Dual-Sided Power Below Worksurface = "DW"
- Dual-Sided Power Below HAT = "DH"

### Electrical Rail (page 48)

- Panels 60" W and larger can be specified with integrated power.
- Rail offers 2 receptacle locations and an optional knock-out location for data.
- Includes attachment hardware for mounting onto the panel.
- Rail protrudes 1" from the face of the panel, with receptacles protruding an additional ¼". Note any potential interference with workstation components. (See Casegoods & Storage Pricer.)
- Rails must be specified to cover electrical components when using a powered panel.
- Spine panels require the rail to be specified at the same width as the panel.
- Powered Wing or End panels require a return rail since power is only integrated within the first 36" past the spine.
- Rails can be specified as single- or dual-sided.
- Can be painted any Allsteel Standard Paint color.
- Electrical can be placed at two different heights on the panel face, Below Worksurface and Below HAT, see dimensions below. Rail models are the same regardless of height.
- Below Worksurface is intended for use below fixed worksurfaces or above low storage.
- Below HAT is intended for use below a Height-Adjustable table.
- Ordering two single-sided rail models is not a substitute for one dual-sided model, and vice-versa.

Below Worksurface Height

Below HAT Height

### Specifying Fit Panels – Full Model Logic

Panels 18", 24", 30", and 36"W are available in the following configurations:

- Mid Wing, No Power Below Worksurface – ‘MDWPPW’
- Mid Wing, No Power Below HAT – ‘MDWPH’

Panels 42", 48", 50", and 54"W are available in the following configurations:

- Mid Wing, No Power Below Worksurface – ‘MDWPPW’
- Mid Wing, No Power Below HAT – ‘MDWPH’
- Left-Hand Split End, No Power – ‘LPEPN’
- Right-Hand Split End, No Power – ‘RPEPN’

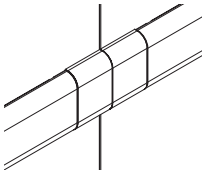

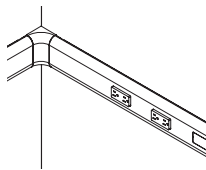

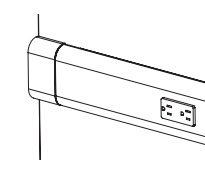

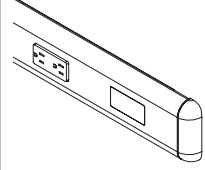

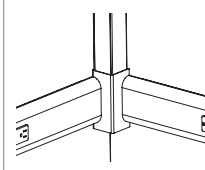

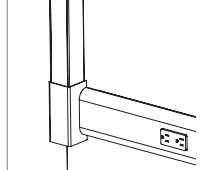

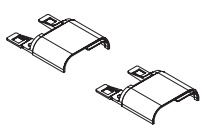

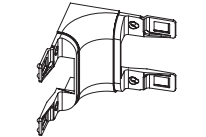

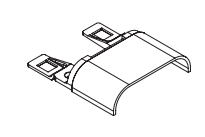

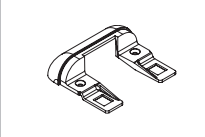

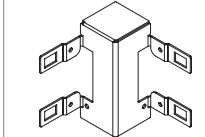

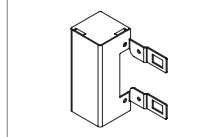

Panels 60"W, 66"W, 72"W, 78"W, 84"W are available in the following configurations:

- Left-Hand Single-Sided End, Single-Side Power Below WS – ‘LSESW’
- Left-Hand Single-Sided End, Single-Side Power Below HAT – ‘LSESH’
- Right-Hand Single-Sided End, Single-Side Power Below WS – ‘RSESW’
- Right-Hand Single-Sided End, Single-Side Power Below HAT – ‘RSESH’
- Left-Hand Split End, Single-Side Power Below WS – ‘LPESW’
- Left-Hand Split End, Single-Side Power Below HAT – ‘LPESH’
- Left-Hand Split End, No Power – ‘LPEPN’
- Right-Hand Split End, Single-Side Power Below WS – ‘RPESW’
- Right-Hand Split End, Single-Side Power Below HAT – ‘RPESH’
- Right-Hand Split End, No Power – ‘RPEPN’
- Left-Hand End Spine, Single-Sided Power Below WS – ‘LESSW’
- Left-Hand End Spine, Single-Sided Power Below HAT – ‘LESSH’
- Left-Hand End Spine, Dual-Sided Power Below WS – ‘LESDW’
- Left-Hand End Spine, Dual-Sided Power Below HAT – ‘LES DH’
- Right-Hand End Spine, Single-Sided Power Below WS – ‘RESSW’
- Right-Hand End Spine, Single-Sided Power Below HAT – ‘RESSH’
- Right-Hand End Spine, Dual-Sided Power Below WS – ‘RES DW’
- Right-Hand End Spine, Dual-Sided Power Below HAT – ‘RES DH’
- Mid Spine, Single-Sided Power Below WS – ‘MSPSW’
- Mid Spine, Single-Sided Power Below HAT – ‘MSPSH’
- Mid Spine, Dual-Sided Power Below WS – ‘MSPDW’
- Mid Spine, Dual-Sided Power Below HAT – ‘MSPDH’
- Single Spine, Single-Sided Power Below WS – ‘SGSSW’
- Single Spine, Single-Sided Power Below HAT – ‘SGSSH’
- Single Spine, Dual-Sided Power Below WS – ‘SGSDW’
- Single Spine, Dual-Sided Power Below HAT – ‘SGSDH’
- Mid Wing, Right-Hand Single-Sided Power Below WS – ‘MDWRW’
- Mid Wing, Right-Hand Single-Sided Power Below HAT – ‘MDWRH’
- Mid Wing, Left-Hand Single-Sided Power Below WS – ‘MDWLW’
- Mid Wing, Left-Hand Single-Sided Power Below HAT – ‘MDWLH’
- Mid Wing, Dual-Sided Power Below WS – ‘MDWDW’
- Mid Wing, Dual-Sided Power Below HAT – ‘MDWDH’
- Mid Wing, No Power Below WS – ‘MDWPPW’
- Mid Wing, No Power Below HAT – ‘MDWPH’

## Rail Connectors (page 48)

- Rail connectors must be used at BOTH ends of each rail to create the proper transition.
- Rail connectors are painted metal and can be painted to match the rail color.

					
					
<b>GSYSRSL</b> Straight In-Line Connection (No Mid Panel between Spine Panels)	<b>GSYSRL</b> L-Connection (Between Powered Spine and Powered Wing)	<b>GSYSRSC</b> Straight Corner Connection (Between Powered Spine and Non-Powered Wing)	<b>GSYSREC</b> End Cap (At the end of any Return Rail)	<b>GSYSRPL*</b> L- Infeed Connection (Infeed between Powered Spine and Powered Wing)	<b>GSYSRPS*</b> Straight Corner Infeed (Infeed between Powered Spine and Non-Powered Wing)

\*Models replace GSYSRL

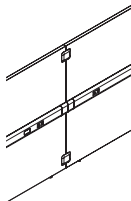

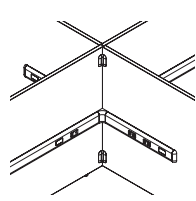

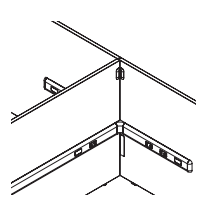

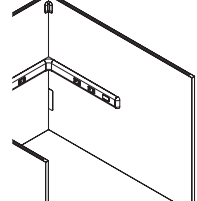

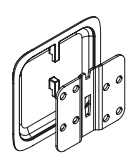

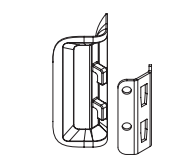

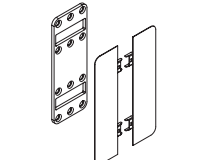

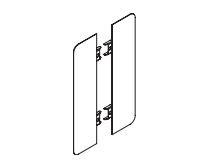

## Rail Hardwire Infeed Connectors (page 47)

- Rail Hardwire infeed connectors are for use where a hardwired infeed comes into the rail.

## Panel Connectors (page 47)

- Panel connectors must be used at each panel connection

			
			
<b>GSYSCONS</b> Straight In-Line Connection (No Mid Panel between Spine Panels) No In-line panel connector is needed if 1 or more wing panels are connected to the spine at the panel intersection	<b>GSYSCONL</b> L-Connection (Between Spine and Mid Wing) Each Mid Panel requires 2 kits – unless storage is ganged at the base, then 1 kit is needed	<b>GSYSCONSE</b> Split Panel connection at the End of the Run (Split panels also require 1 L-Bracket kit GSYSCONL to be specified)	<b>GPLTBK</b> Single Powered Panel connection at the End of the Run (Single Powered panels also require 1 L-Bracket kit GSYSCONL to be specified)

- For Non-Powered End Panels (Single or Dual-Sided), Gallery-to-Gallery 'L' or 'T' Models should be used. Gray panels indicate Gallery-to-Gallery.

- Gallery-to-Gallery Panels can also be connected to Fit Wing or End panels as an additional return. Gray panels indicate Gallery-to-Gallery.

### Gallery-to-Gallery Panels (page 139)

- Gallery-to-Gallery Panels connect to Fit panels and are available in L-, T-, and Nonsymmetrical T- configurations.
- When specifying Gallery-to-Gallery Panels, the installation template (GTEMP) is required. The recommendation is 1 template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery Panels cap over Fit panels and are oversized by 1/8" to maintain true interior dimensions.
- Gallery-to-Gallery Panels must be of equal or lower height than the Fit panel attached. The Gallery-to-Gallery Panel cannot be taller than the adjacent panel. If this is required, please reach out to TPG for a custom solution.
- Panel construction is the same as Fit panels.
- Can be specified with matching or contrasting edge.
- Woodgrain laminates can be specified with vertical grain up to 54" W. Horizontal grain is available on all sizes.
- Gallery-to-Gallery Panel widths are available in 3" increments from 18"W to 30"W and in 6" increments from 30"W to 78"W.
- Gallery-to-Gallery Panels offer 2 1/2" leveling capability.
- Overall heights line up with adjacent panel.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery-to-Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery Panels are secured with an inset flat bracket under a painted metal cover at the base and a hidden top connection.
- If Fit Panel L- connectors are preferred at Gallery-to-Gallery attachments for aesthetic reasons, they may be added.
- L- and Nonsymmetrical T- panels are handed.
- Additional support is required after every 60" in panel width (i.e., return panel, storage or worksurface tie-in, panel bracket, or foot).
- Nonsymmetrical T- panels are specified in the format GTyyxxzz. Substitute yy as panel height, xx and LH nominal length, and zz and RH nominal length.

Note: Gallery-to-Gallery Panels cap over standard Gallery Panels and are oversized by 1/8" to maintain modular interior dimensions. (ex: 18" panel is actually 19 1/8"W)

### Power Pole (page 62)

- Ceiling power pole for use with ceiling in-feeds.
- Ceiling power poles connect to the rail inside of workstation, in this instance a mounted worksurface or HAT may need to be field-cut to accommodate. (See image at right.)
- Below HAT Power Pole is used to shroud a base or wall in-feed as it connects into a Below HAT Rail Height.
- Below Worksurface Power Pole is used to shroud a base or wall in-feed as it connects into a Below Worksurface Rail Height.
- Power Pole height is 13 feet.

### Rail Port Cover (page 62)

- Offered in a 2- or 12-pack.
- Used to cover a port location in a rail when a receptacle is not needed.
- Can be painted any Allsteel Standard Paint color.

### Installation Template (page 47)

- At least one required at installation, recommended that at least one is ordered per project.

### Wall Start (page 47)

- Wall Starts are 1 1/8" by 1 1/8" rectangular mounting posts that are meant to affix a Fit panel to a permanent building wall.
- Wall starts add 1 1/8" to panel run.
- Attachment hardware not included.
- Must be specified at the same height as the connecting panel.

### Countertop Brackets (page 50)

- Includes attachment hardware.
- Countertops are flush with the top of the panel and can be flush with the ends of the panel or shorter than the panel width.
- For straight countertops, two countertop brackets must be ordered.
- For corner countertops, three countertop brackets must be ordered.
- Will deface the panel.

### Worksurface Mounting Bracket (page 47)

- Used to mount a fixed-height worksurface to a Fit panel.
- Can be painted any Allsteel Standard Paint color.
- A worksurface stiffener is required for surfaces 60" W or greater.
- One bracket kit (GWSBK) is required for each worksurface **corner** attached to Fit panels.
- Sized to fit above a Below Worksurface power rail location and locate the top of a fixed worksurface at 29¼" above the floor. Or can be installed at any available height.
- When using a 30"H spine with a below worksurface rail, a worksurface or storage must be mounted at any panel-to-panel connection.

### Storage Ganging Kits (page 47)

- The laminate storage ganging kit (GSGKL) is used to connect a Fit panel to a laminate storage unit.
- The metal storage ganging kit (GSGKM) is used to connect a Fit panel to a metal storage unit.

### Credenzas & Towers

- Approach low credenzas w/ trough and Align low credenzas sit below rail. (Below Worksurface height only.)
- Rail will offset taller storage, like towers, from panel by 1".

NOTE: A topper used on an Approach credenza may interfere with the ability to plug into the rail. Credenza will need to be offset from the panel.

### Support Pedestals

- Further, Involve, and Align support pedestals match height of worksurface brackets and can be recommended for worksurface support.
- Cannot use full-depth support storage that matches worksurface depth due to rail interference.

### Tackboards (page 49)

- Provides tackable surface.
- Comes with steel-painted trim.
- Available in the following heights: 15", 22½"
- Available in the following \*widths: 24", 30", 36", 42", 48", 54", 60"  
\*Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Fit Panel. Mounting hardware included. Will deface the panel.

### Magnet or Marker Boards (page 49)

- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Available in the following heights: 15", 22½"
- Available in the following \*widths: 24", 30", 36", 42", 48", 54", 60"  
\*Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Fit Panel. Mounting hardware included. Will deface the panel.

### Hanging Magnet or Marker Boards (page 49)

- Hangs over Fit panel or sits on top of worksurface.
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Cannot be installed back-to-back when hanging in the same location.
- Available in 30"W and in two heights: 20"H and 26"H.

### Fit Panel Foot (page 49)

- Single foot provides rigidity to large wing panel.
- Available in any textured Allsteel paint.
- Foot extends 9" from either side of the panel.

### Floating Laminate Shelves (page 50)

- 6" depth.
- ¾" thickness.
- Constructed of HPL laminate with 0.8mm ABS edgebanding.
- Available in solid or horizontal woodgrain laminate.
- Available with contrasting or matching edge.
- Widths available every 6" from 12" to 78"W.
- Widths from 54" to 78" satisfy a stiffener requirement and are meant to be mounted to a panel that is 6" wider than the shelf.  
(e.g., 84"W panel would accept a 78"W stiffener shelf.)
- Shelves narrower than 54"W do not act as a stiffener.
- Shelf stiffeners must be installed above the power rail to function as a stiffener.

### Accessory Rail and Paper Management (page 50)

- Accessory Rail provides mounting for paper management accessories, listed below.
- Rail is 2.6"H and is available in the following widths: 12", 18", 24", 30", 36".
- Rails can be installed in any location on the Fit panel and can be placed in-line to span panel length.
- **Rail height when installed cannot exceed the height of the panel.**
- Rail and accessories can be painted any standard Allsteel paint color.
- Mounts directly to the Fit panel, attachment hardware included.
- Extensions accessories are NOT compatible with the accessory rail.
- These accessories are compatible with tool tiles.
- Includes a rail cover to hide hardware and provide magnetic surface.
- Compatible Rail Accessories:
  - Coat Hook (Rail-based, a mounted version is also available to attach directly to the panel)
    - Rail Based dimensions: 4" x 3" x 1¼"
    - Mounted dimensions: 4" x 3" x 1½"
  - Angle File (Triple, Dual, and Single heights)
    - Depth of 2"
    - Heights: Triple = 15½", Dual = 12½", Single = 9½"
  - Paper Tray (Triple, Dual, and Single heights)
    - Depth of 10"
    - Heights: Triple = 9½", Dual = 6½", Single = 3½"
  - Personal Shelf
    - 9½" x 24" x 10½"
  - Binder Shelf
    - 12½" x 12" x 11½"

### Height-Adjustable Table Tie-In Brackets (page 50)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T-leg HAT.
- AGBKC to be specified for connection to a C-leg HAT.
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C-legs with a 30"D worksurface and a screen must be specified with T-leg brackets.
- NOTE: Wire chain cannot be installed on the same leg as the HAT tie-in bracket.

**Max Height (with Glass): 65"H**  
**Max Width: 84"W; No top size restrictions**

## Dual-Sided Panel Bench

- Can be created using HAT brackets or Fit Panel Feet. Cannot be single-sided. No maximum run length.

## Height-Adjustable Table Tie-In Brackets (page 50)

- Max height (with Glass): 65"H
- Max Width: 84"W

## Fit Panel Feet (page 49)

- Max height (with Glass): 65"H
- Max Width: 84"W

FIT

## Electrical Systems

### Fit Electrical Systems

Fit offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- See pages 54-55 for a detailed explanation of each electrical system.
- All 3 systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian)
- Fit panels and electrical components are UL listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes.

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through panels.**

### Hardwire Junction Box – New York Code (page 61)

- Hardwire (New York Code) junction box is used when local electrical codes require hardwire entry.
- Separate junction boxes must be specified for single- or dual-sided power.
- For use with hardwire power infeed shrouds, models GSYSHWBH & GSYSHWBW.
- Unit must connect to a power or pass-thru harness positioned in the rail of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any 90-degree panel connection with an adjacent rail.
- Must order housing model U8SBKCH for junction box.

### Hardwire Wiring Harness – Chicago Code (page 61)

- The junction box must connect into power harness within rail through a hardwire power infeed shroud at a 90-degree panel connection with an adjacent rail.
- Hardwire receptacles connect into standard mounting locations within rail.
- Power entry can be routed from the ceiling, via a Fit power pole, or from the floor into a junction box model.
- For single-sided applications use junction box A871500. For double-sided application use junction box 877600. Must order junction box housing model U8SBKCH separately in both cases.

## Electrical Infeeds

- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communication and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- When using sealtight infeeds, an additional H-clip is needed to connect the infeed to the power harness, ordered separately.

### Ceiling Power Infeed (page 61)

- Ceiling power infeed connects to a prewired electrical harness in the rail pathway, traverses through an adjacent panel, and terminates in the junction box at the top of the integrated power pole.
- Use power pole model GSYSPPP.
- Most codes allow flex cables to be exposed after installation. Verify code requirements before ordering for exposed application.

### Integrated Power/Communication Pole (page 62)

- Integrated power pole accommodates ceiling power infeed and communication/data lines.
- Provide capacity for routing power infeed and cables to the power rail.
- Conduit of the infeed cables serves as the division of electrical and communication cabling.
- Installs into Below Worksurface or Below HAT rail heights in a 90-degree panel connection.
- Single cavity with removable cover.
- Height: 13', Outside Dimension: 2" square.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness.
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable must be purchased separately.

**To Order:**

- Determine which electrical system you will use after consulting your electrician and computer support personnel:
  - The four-circuit system (4-Hot/2-Neutral/2-Ground)
    - 3 + 1 option
    - 2 + 2 option
  - The three-circuit system (3-Hot/3-Neutral/2-Ground)
  - The eight-circuit system (back-to-back four-circuit systems)
- Determine location, quantity, and circuit of duplexes.
- Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
- Specify appropriate power harnesses\* and pass-thru cables.\*
- Determine the location, quantity, and type of power infeed needed.

\* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

**Flexconnect™ Electrical System Options**

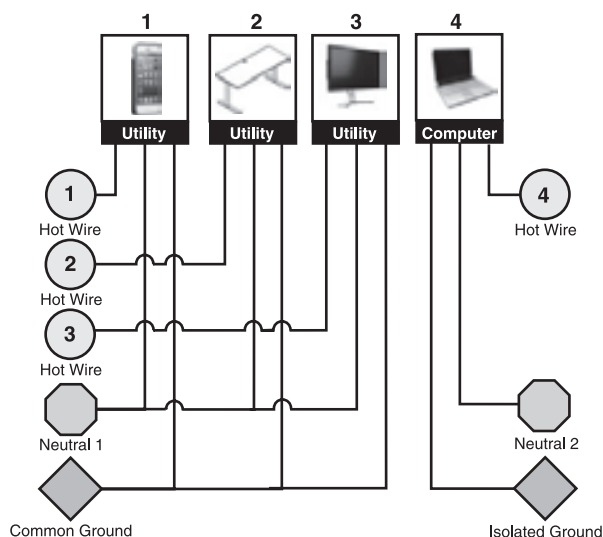

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this price.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Fit panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 59.

**Four-circuit, 3 + 1 Receptacle Option**

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

**Four-circuit, 2 + 2 Receptacle Option**

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

FIT

Fit System Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 <b>A871501</b> <b>A877501</b>	Common Circuit-2 <sup>(1)</sup> <b>A871502</b> <b>A877502</b>	Common Circuit-3 <b>A871503</b> <b>A877503</b>	Iso/Dedicated Circuit-4 <b>A871504</b> <b>A877504</b>
	2 + 2	Common Circuit-1 <b>A871501</b> <b>A877501</b>	Common Circuit-2 <b>A871502</b> <b>A877502</b>	Isolated Circuit-3 <b>A871506</b> <b>A877506</b>	Isolated Circuit-4 <b>A871504</b> <b>A877504</b>
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 <b>A871501A</b> <b>A877501A</b>	Common Circuit-2 <b>A871502A</b> <b>A877502A</b>	Iso/Dedicated Circuit-3 <b>A871503A</b> <b>A877503A</b>	N/A

**Notes:**

- Four-circuit components and three-circuit components (with suffix “A”) cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

**Duplex Receptacle**

15 amp Receptacle

## Power Harnesses and Pass-Thru Harnesses

Electrical power harnesses are used to distribute power in Fit panels. Harness power blocks snap directly onto brackets in base pathway. Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

### Electrical Power Harnesses (page 60)

- Electrical power harnesses are used to distribute power in panels.
- Fit electrical can only be located at one location.
- Specify harness length to match panel width.
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in the rail.

### Electrical Pass-thru Harness With Power Block (page 60)

- Electrical pass-thru harnesses with power block have capacity to handle one duplex receptacle on each side of the panel when exposed.
- Specify harness length to match panel width.
- Power harnesses accept one duplex receptacle per panel side.

### Electrical Pass-thru Harnesses Without Power Block (page 60)

- Specify harness length to match panel width.
- Electrical pass-thru cables distribute power through any panel(s) where receptacles are not required. Cable length cannot be stretched.

All electrical power harnesses and pass-thru harnesses will stretch 3/2", allowing them to span "T", "X", and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.

Requires minimum of one power harness.

Requires minimum of two power harnesses.

Use of a ceiling infeed at this location requires an additional power harness.

## Receptacles

Duplex Receptacle

### Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Designer White — PJW .....	Designer White — DW
Bungalow — P7C .....	Muslin — EU
Carob — P52.....	Black — E4
Champagne Metallic — PR5 .....	Muslin — EU
Cinder — P7Q .....	Brownstone — EY
Fossil — P28 .....	Flint — E9
Gunmetal Metallic — PR3 .....	Brownstone — EY
Parchment — P93 .....	Muslin — EU
Pebble — P8R.....	Loft — EV
Pewter — P8D .....	Flint — E9
Platinum Metallic — PR2.....	Loft — EV
Salt — P8C .....	Silver — ES
Titanium — P8T .....	Silver — ES

### Duplex Receptacles (page 61)

- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses with blocks.
- Duplexes are available in multiple colors. See page 64 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

### Single- vs Dual-Sided

- Different receptacles are required for single vs dual-sided power, see page 61 for models.

## Data Components

ATADF3

ATADF4

### Data Faceplates (page 62)

- Fit not only provides space for voice and data cables, it also offers several means of mounting commercially available voice and data components.
- Commercially available modular data faceplates can be mounted in vacant rail receptacle openings.
- Due to rail depth, back-to-back data modules should not be used. Rail knockouts must be located on opposite sides in dual-sided applications.

### Fit Rail Covers (page 48)

- Features additional knockout (offset) for improved utilization of power and data. Knockouts are 2.7"W and 1.344"H.
- Two power cutouts are available per powered panel for receptacle placement. Port covers are available (ordered separately) for unused receptacle locations.

### Rail Port Cover (page 62)

- Offered in a 2- or 12-pack.
- Used to cover a port location in a rail when a receptacle is not needed.

## Circuit Usage

### Strategy 1

#### Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
  - Circuit 1 — Calculators, fans, etc.
  - Circuit 2 — Task lights (could be wired to wall switch)
  - Circuit 3 — CRT or flat screen monitors
  - Circuit 4 — CPUs

### Strategy 2

#### Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

Rails are non-handed, so the data knockout may be installed on the left- or right-hand side of the panel. **NOTE:** Data may not be installed back-to-back in dual-sided applications.

## Lay-in Cable Capacity

- The Fit power rail allows continuous voice and data cables to run through and between panels without interruption.
- The rail accepts up to 12 voice/data cables (1/4" dia) at 60% fill when electrical system shares the rail.
- Cable capacity of the Fit power pole is 3.3 sq. in. for a total capacity of 34 cables of 1/4" diameter.
- Cables can enter/exit rail through the ceiling power pole or the base infeed power pole.

**Note:** Cable quantities listed are at 60% fill ratio.

### Office Equipment Typical Load Values

Item	*Amps
Desktop/2 Monitors	4
Laptop Computer	1
Laptop/2 Monitors/Docking Station	3
Paper Shredder	1.22
Radio	0.05
Scanner	3
Space Heater (1500 watts)	12
Task Light (equiv. 60-watt bulb)	
Fluorescent	0.12
LED	0.08
USB Charger	0.17
LCD Television (42")	1
LCD Monitor (21")	0.5
Bluetooth Speaker	0.1
Desktop Printer	
Inkjet	0.15
Laser	4 to 10
Multimedia Projector	1.7
Sit-to-Stand Height-Adjustable Desk	Idle 0.01 / Max 4
<b>Office Kitchen</b>	
Coffee Maker	10
Microwave	10
Toaster	12.5
Compact Refrigerator	1.5

\*Chart is recommended for planning purposes. Check device specifications for exact amperage. Consult with your electrician regarding the applicable configurations.

### Examples of Component Usage based on the *Office Equipment Typical Load Values Chart*

#### Power Option 3+1

Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2, 3: Height-adjustable tables and ancillary items

#### Power Option 2+2

Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

#### Power Option 3 (Circuit-separate neutrals)

Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

For specification information see pages 194-200.

**Workstations made easier.**

Whether you're outfitting a call center, creating teaming areas, replacing a reception desk, or adding new stations for managers, Allsteel can help you make the most of your office with Optimize. By bringing together panels, worksurfaces, and storage in one cohesive offering, we've made it easy for you to create efficient, well-designed spaces. All you have to do is configure these quality components to fit the needs of everyone in your office. Let us show you how.

**Optimize makes a good first impression.**

In areas open to the public, choose panels, worksurfaces, and storage to define space and keep projects organized. In this reception/shared workspace, a transaction countertop welcomes guests and worksurfaces below provide ample space for computers and paperwork.

**We help you put it all together.**

An open configuration with lower panels and a small footprint is perfect for people who perform the same function and need to share information throughout the day. Optimize benching can utilize tool rails and monitor arms to keep items off the desktop. An integrated D-shaped worksurface makes it easy for workers to come together to collaborate and then quickly return to their personal work areas.

**As work changes, Optimize changes with you.**

Optimize helps workers adjust workstyles throughout the day, from concentrated work to team brainstorming. In team areas, each person can have ample privacy, roomy storage with overhead bins, as well as a spacious worksurface for individual tasks. When it's time to collaborate, a table within the workspace and mobile pedestals that double as seating make it easy to come together.

**Make the most of your space.**

With Optimize panels, worksurfaces, and storage, you can create stations that feel like private offices. Higher panels promote privacy along the aisle while glass stackers near windows bring natural light into the space. Plenty of enclosed, lockable storage above and below the worksurface holds sensitive information. A U-shaped worksurface arrangement creates a natural conference area to accommodate conversations with team members or clients.

### Frame Dimensions (Actual)

**Depth:** 2⅝" (use 2¼" to calculate intersections in length of panel run)

**Widths:** 20", 24", 30", 36", 42", 48", 60", 72"

**Heights:** 34¼", 41¼", 49¼", 64¼" (with levelers fully retracted)

**Leveling Glides:** 2⅝" range

**Stacking Panels:** 15"H fabric and glass, 30"H glass

**Frameless Glass Screens:** 7½"H, 15"H

### Tackable Panels (pages 72-73)

- Specifications: 4-sided, welded tubular steel panel frame.
- Panel frames include and are shipped with base pathway covers installed. Top trim is specified separately for all panel frames.
- Hardware included with connector kits.
- Available in 4 heights and 8 widths — add ⅜" for each panel vertical end trim.
- Panel frames can be leveled up to 2⅝". Actual panel height varies depending on position of leveling glides.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.
- For adequate stability, one of two methods of stabilization shown on page 69 must be adhered to.
- Due to depth of panel, back-to-back data modules should not be used in the base. Optional 3-hole kickplates are available.
- Add 2¼" to panel run for each "L", "T", "X", or extended straight connector ("S").
- Acoustical panels meet BIFMA recommendations.
- Fabric selection for 72"W panels is limited. Fabrics that are unavailable on 72"W panels are flagged with a \* on page 9 of this price list.

## Building Vertically with Optimize Panels

## Building Horizontally with Optimize Panels

### Method 1—Opposing Returns

### Method 2—Single-Sided Returns

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

### Method 1 — Opposing returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two 24"W return panels running in opposing directions on each end of run.
- Return panels must not be any more than 30" shorter in height than parent run.
- When using 120° connectors, 12" must be added to length of return panels as determined by methods 1 and 2.

### Method 2 — Single-sided returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two return panels extending in one direction. Stack-ons may require additional length. See chart.
- Return panels must not be any more than 30" shorter in height than parent run.

## Stacking Tackable and Glazed Panels (pages 72 and 74)

- When adding stacking panels, remove the top trim from the structural panel, and install top trim on top of the stacking panel.
- Stacking connection provides a solid connection, allowing the stacking frame to accept hang-on components, per Optimize configuration guidelines at left.
- Includes attachment hardware. Specify connectors separately.
- Only one stacking glazed panel can be added to top position of any Optimize panel of same width from 20"W to 72"W up to a maximum combined height of 80".
- End trim is specified in full end height to include height of base panel + stacking panel.
- Guidelines for using overhead storage with stacking frames are given on page 120.
- Stacking glazed panels feature clear or frosted tempered safety glass inserts (specified). Glass frame is painted to match trim.
- Stacking frames can be added to the top of same width 35"H, 50"H, and 65"H base panels up to 80"H; added to 42½"H panels up to 72½"H.
- Slot modularity will be lost on stacker used with 42½"H panels. If panel mounting slots are not being used, this is not an issue.
- Do not combine differing frame widths in a single stack. No spanning multiple frames.
- Stacking frames cannot be used as base frames.
- Fabric selection for 72"W panels is limited. Panel fabrics that are not available on 72"W panels are flagged with a "\*" on page 9 of this price list.

## Tackable Glazed Panels (page 74)

- Available 50"H and 65"H with 15"H clear or frosted tempered safety glass inserts (specified).
- Glass frame is painted to match trim.
- Top trim is specified separately.
- Cannot stack on glazed panels.
- Fabric selection for 72"W panels is limited. Available 72"W panel fabrics are flagged with a "W" on page 9 of this price list.

## Glass Panel Mounted Screens (page 75)

- Frameless insert integrated into the base panel frame top trim.
- Replaces top trim on structural or stacking tackable frame.
- It is possible to span multiple frames when the combined frame width is equal to the panel mounted screen width.
- Can do variable height, must be used with grooved VH trim.
- Panel mounted screens are non-structural. Do not hang or stack on top of panel mounted screens.
- Available in ⅜" thick clear or frosted glass.
- To be included in overall height of panel with a maximum combined height of 80".

## Door Panel Frame (page 75)

- The 80"H door panel frame includes 42"W frame, 36"W laminate door, hinges, and attaching hardware. Top trim is specified separately.
- See illustration at right.
- Lockset with knob or lever ordered separately.

## Optimize Sliding Doors and Mounting Kits (pages 71 and 75)

- Optimize sliding doors are available in 50"H, 65"H, and 80"H.
- See illustration and specification information on page 71.

## Method 2 – Single-sided Returns

Single-Sided Panel Run	Minimum Return Panels Total (X+Y)	Minimum Return Panels Total (X+Y) with Stack-ons
48"-108"	84"	84"
114"-144"	84"	96"

**Extended Straight "S" Connection**

**Example 3**  
Connectors required:  
1-65"H "L" Post  
1-"L" Strap

**Example 1**  
Connectors required:  
1-50"H "T" Post  
1-15"H "VH"  
1-"S" Strap

**Example 2**  
Connectors required:  
1-65"H "X" Post  
1-15"H "VH"  
1-22 1/2"H "VH"  
1-30"H "VH"  
1-Single Panel Strap

**Example 4**  
Example above represents Optimize variable height connection for 65"H to 50"H.

**High-Low "H"**

## Connectors and Trim

### In-line Connector Kit (page 76)

- In-line connections between panels in a continuous run are accomplished with an in-line connector kit. There is no incremental increase in dimension along the run.
- In-line connector kits include all parts required for connecting two panels of same height together.
- Kit includes in-line connector strap, hardware, and glide tower to glide tower screw.
- Order panel end trim kits to finish the end of every panel run (except when attaching panels to permanent walls).

### "L", "T", "X", "S", "V", and "Y" Connectors (page 76)

- "L", "T", "X", "V", and "Y" connectors kits are used when connecting panels at intersecting runs. For "L", "T", and "X" connections connector kits, add 2 1/4" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.
- Specify connectors based on number and placement of panels.
- Connector posts are specified separately from connector straps—specify post based on tallest panel height and type of panel connection, specify straps based on connection of tallest panels (see variable height examples left).
- Connectors are made of extruded aluminum.
- Connector posts where power pole will enter need to be specified with single connector straps, model P3CONS1.
- Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections.
- Add 2 1/4" to the length of the run for every extended straight connector used.

### Multiple-Height Connections (page 76)

- Multiple-height connections also utilize standard "L", "T", "X", and "S" connectors, in the height of the tallest panel. (See examples 1-4 at left.)

### Panel End Trim (page 78)

- End vertical trim cover (includes top cap — adds 3/8" to run).
- Order to finish the end of every panel run (except when attaching panels to permanent walls).

### Variable Height Connector Kits — Post Trim (page 78)

- Includes connectors, vertical cover, and attaching hardware.
- Order one per each panel height change in an "L", "T", "X", or "S".

### Grooved VH Finishing Kit (page 78)

- For use when the base panel frame of a panel mounted screen is shorter than the adjacent panel

### In-line Variable Height End Trim Finish Kits (page 78)

- End vertical cover (includes top cap).
- High-low "H" covers the exposed end of a panel when joining panels in-line of differing heights. Optimize profile adds 3/8" to length of panel run.
- Order one per each panel height change in an in-line connection.
- At the end of a panel run use panel end trim.

### Wall Mount Kits (page 78)

- Wall mount kits provide a means to affix a panel run to a permanent building wall.
- Includes top cap. (Color must be specified.)
- Connector adds 1" to length of panel run.
- Anchor devices are not supplied with the wall mount kit. Refer to Optimize Installation Instructions for appropriate hardware.

### 2-Way 120° Connector Kits (page 78)

- Includes top cap, connectors, vertical cover, and attaching hardware.

### 3-Way 120° Connector Kits (page 78)

- Includes top cap and connectors.

The sliding doors must be specified with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.

The sliding doors are available in 50", 65", and 80" H models and can mount to 30", 36", 42", and 48" W panels. They accommodate a 36" W opening and are 42" W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.

### General Guidelines for Use of Sliding Door (page 75)

- The system requires the ordering of both a door and a mounting bracket kit.
- All doors are 42" wide to accommodate a 36" W opening and are non-handed.
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48" W). Kits available in P1 and P2 paint.

### General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 69). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening (A) where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42" W. If the panel is at a corner (B), the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels (C) that are less than 42" W they will interfere with each other if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear (D) and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall (E) or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

For specification information see pages 67-71.

P 3 | | | | | | | | | | . | | | | |

Examples: P3CONVH15.P02 P335W.P02

Optimize features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. The frame allows voice and data cables to be routed horizontally in the base pathway.

OPTIMIZE

### Electrical Systems

#### Optimize Electrical Systems

Optimize offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.
- See pages 81-82 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian).
- Optimize panels and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes.

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through panels.**

#### Hardwire Junction Box – New York Code (page 89)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry. 
- For use in panels 30" W to 72" W.
- When used in 30" W and 36" W panels, power can be routed only in one direction.
- When used in 42" and wider panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

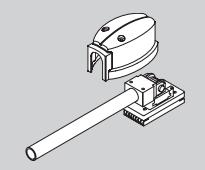

#### Hardwire Wiring Harness – Chicago Code (page 89)

- Hardwire (Chicago Code) wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components.
- The base pathway junction box (model A871500) clips direct into receptacle locations for single sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway.
- Power entry can be routed from the ceiling, via an Optimize power pole, or from the floor into a junction box (model A871500).

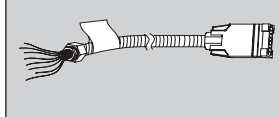

### Electrical Infeeds

- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

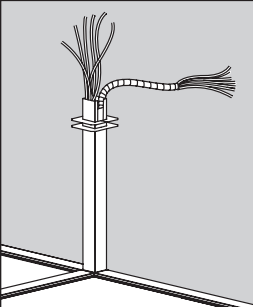

#### Base Pathway Power Infeed (page 89)

- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area. 
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.

#### Ceiling Power Infeed (page 89)

- Ceiling power infeed connects to a prewired electrical harness in the base pathway, traverses through an adjacent panel, and terminates in the junction box at the top of the integrated power pole. 
- Use integrated power pole model P278PP.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

#### Integrated Power/Communication Pole (page 89)

- Integrated power pole accommodates ceiling power infeed and communication/data lines. 
- Provide capacity for routing power infeed and cables to the base pathway of a panel.
- Conduit of the infeed cable serves as the division of electrical and communications cabling.
- Installs into 42½"-65" H or 15" H stacking 90°, "T", and "X" connections.
- Integrated power pole includes trim kit.
- Single cavity with removable cover.
- Field-cut to desired length.
- Outside Dimension: 2" square.
- When using a ceiling power infeed, consider that the infeed must connect into an electrical harness located in an adjacent panel. (See page 89 for cable capacity.)
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable, Model A871912, A871912C, A871912A, A871912AC, A871918, A871918C, A871918A, or A871918AC must be purchased separately.
- For applications requiring longer integrated power poles, a 156" H model is available.

Integrated Power and Communications Pole

**To Order:**

- Determine which electrical system you will use after consulting your electrician and computer support personnel:
  - The four-circuit system (4-Hot/2-Neutral/2-Ground)
    - 3 + 1 option
    - 2 + 2 option
  - The three-circuit system (3-Hot/3-Neutral/2-Ground)
  - The eight-circuit system (back-to-back four-circuit systems)
- Determine location, quantity, and circuit of duplexes.
- Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
- Specify appropriate power harnesses\* and pass-thru cables.\*
- Determine the location, quantity, and type of power infeed needed.

\* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

**Flexconnect™ Electrical System Options**

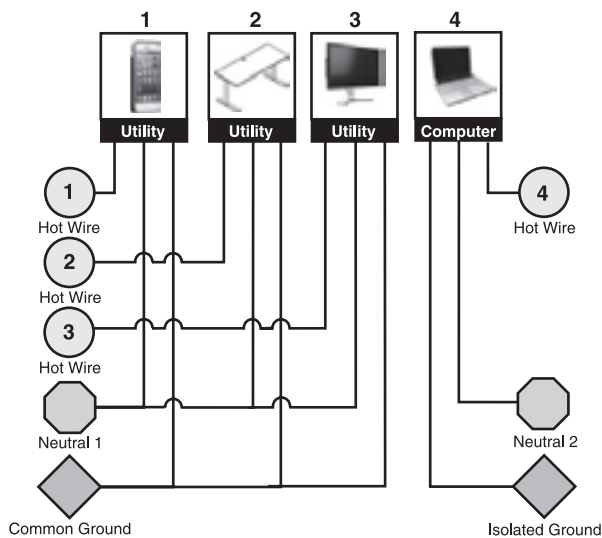

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this price.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 200.

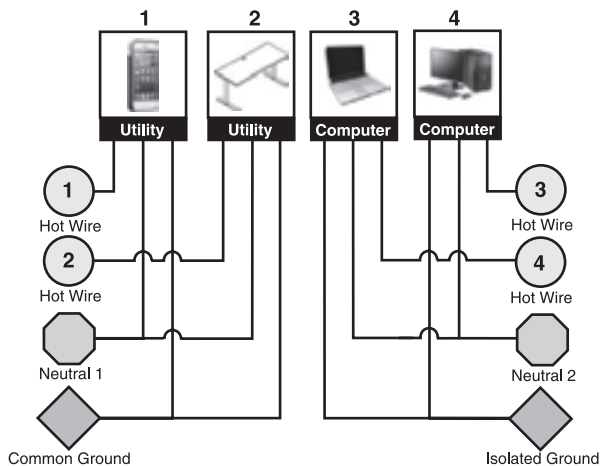

**Four-circuit, 3 + 1 Receptacle Option**

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

**Four-circuit, 2 + 2 Receptacle Option**

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

Optimize System Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 A871501	Common Circuit-2 <sup>(1)</sup> A871502	Common Circuit-3 A871503	Iso/Dedicated Circuit-4 A871504
	2 + 2	Common Circuit-1 A871501	Common Circuit-2 A871502	Isolated Circuit-3 A871506	Isolated Circuit-4 A871504
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 A871501A	Common Circuit-2 A871502A	Iso/Dedicated Circuit-3 A871503A	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

**Notes:**

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

**Duplex Receptacle**

15 amp Receptacle

## Power Harnesses, Pass-Thru Harnesses, and Dual Electrical Harnesses

Electrical power harnesses are used to distribute power in Optimize panels. Harness power blocks snap directly onto brackets in base pathway. Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical Power Harness

Electrical Pass-Thru Harness With Power Block

Electrical Pass-Thru Harness Without Power Block

Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", "120" intersections, and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.

Requires minimum of one power harness.

Requires minimum of two power harnesses.

Use of a ceiling infeed at this location requires an additional power harness.

### Electrical Power Harnesses (page 88)

- Electrical power harnesses are used to distribute power in panels.
- Optimize electrical can only be located at base pathway.
- Specify harness length to match panel width.
- 24" power harness accepts one receptacle on each side of the harness, all other length power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway.
- Use of a ceiling infeed requires one additional harness.

### Electrical Pass-thru Harness With Power Block (page 88)

- Electrical pass-thru harness with power block have capacity to handle one duplex receptacle on each side of the panel when exposed.
- Specify harness length to match panel width or combined panel widths.
- Power harnesses accept one duplex receptacle per panel side.
- Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.
- All electrical power harnesses and pass-thru harnesses with power block will stretch 3½", allowing them to span "T", "X", "A" intersections, and "S" extended straight connections.

### Electrical Pass-thru Harnesses Without Power Block (page 88)

- Specify harness length to match panel width or combined panel widths.
- Electrical pass-thru cables distribute power through any panel(s) where receptacles are not required. Cable length cannot be stretched.

### Dual Electrical Eight-Circuit Power Harness Kits (page 88)

- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables.
- Specify harness length to match panel width.
- Requires two four-circuit infeeds.
- Uses four-circuit receptacles.
- Models must be positioned back-to-back in the panel — single-side use is not permitted.
- Components can only be routed in a single run — a single run can branch to single panel runs at "T" and "X" junctions.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity.
- Two power infeeds are required to connect the back-to-back runs. Power A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed
- Power infeeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

## Receptacles

Duplex Receptacle

### Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Designer White — PJW .....	Designer White — DW
Bungalow — P7C .....	Muslin — EU
Carob — P52 .....	Black — E4
Champagne Metallic — PR5 .....	Muslin — EU
Cinder — P7Q .....	Brownstone — EY
Fossil — P28 .....	Flint — E9
Gunmetal Metallic — PR3 .....	Brownstone — EY
Parchment — P93 .....	Muslin — EU
Pebble — P8R .....	Loft — EV
Pewter — P8D .....	Flint — E9
Platinum Metallic — PR2 .....	Loft — EV
Salt — P8C .....	Silver — ES
Titanium — P8T .....	Silver — ES

### Duplex Receptacles (page 89)

- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses with blocks.
- Duplexes are available in multiple colors. See page 64 for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical infeed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical infeed.

## Data Components

Voice/Data Receptacles

ATADF3

ATADF4

Base Pathway Cover

### Data Faceplates (page 90)

- Optimize not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.
- Commercially available modular data faceplates can be mounted in vacant base receptacle openings.
- Due to panel depth, back-to-back data modules should not be used at the base on Optimize.

### Optimize Base Pathway Covers (page 90)

- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700" W x 1.377" H up to 60" W.
- Due to panel depth, back-to-back data modules should not be used in the base on Optimize.

## Cable and Wire Management

### Cable Management Tray (page 90)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

### Wire Management Channel (page 90)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

### Cord Retainer Clip (page 90)

- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.
- Package of 50. Available in Black only.

### Wireway Grommet (page 90)

- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

### Replacement Receptacle Cover (page 90)

- Fits into unused receptacle opening in base raceway.
- Package of 25. Specify paint color.

### Cord Organizer (page 90)

- Attaches to bottom of worksurface.
- 4"W x 7/8"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

## Lighting

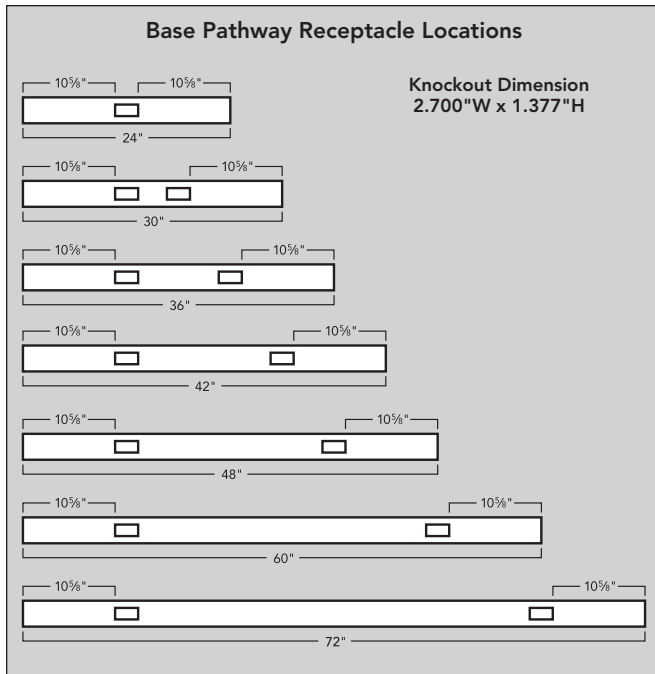

### Task Lights (page 310)

- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.

**Recommendation:** Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

### LED Undercabinet Light (page 310)

- LED undercabinet light can be mounted beneath overhead cabinets with wood screws or magnets.

## Circuit Usage

### Strategy 1

#### Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:  
Circuit 1 — Calculators, fans, etc.  
Circuit 2 — Task lights (could be wired to wall switch)  
Circuit 3 — CRT or flat screen monitors  
Circuit 4 — CPUs

### Strategy 2

#### Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

**Placement of pedestals and lateral files** may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

## Lay-in Cable Capacity

- The base pathway allows continuous voice and data lines to run through and between panels without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Optimize base pathway accepts up to 77 voice/data cables (.25" dia.) (6.27 sq. in.) at 60% fill.
- When electrical system shares base pathway, the cable capacity in Optimize is reduced to 25 cables (2.03 sq. in.).
- Cable capacity of the Optimize integrated power pole is 3.3 sq. in. for a total capacity of 34 cables of .25" diameter.
- Cable capacity of the power pole/communication pole Model A870070 is 4.5 sq. in.
- Cables can enter/exit panel through underside of base pathway on frames.

**Note:** Cable quantities listed are at 60% fill ratio.

\*Chart is recommended for planning purposes. Check device specifications for exact amperage. Consult with your electrician regarding the applicable configurations.

### Examples of Component Usage based on the *Office Equipment Typical Load Values Chart*

#### Power Option 3+1

Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2, 3: Height-adjustable tables and ancillary items

#### Power Option 2+2

Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Dedicated Circuit 4: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

#### Power Option 3 (Circuit-separate neutrals)

Dedicated Circuit 3: 4 desktop computers with 2 monitors each; or 10 laptop computers  
Utility Circuits 1, 2: Height-adjustable tables and ancillary items

For specification information see pages 79-87.

S Shippable by small-package carrier.

Add Suffix "N" to model number for no grommets, no upcharge.

## Laminate with Flat Edge

←→ Arrows indicate grain direction for woodgrain laminates.  
Grain direction on symmetrical corner worksurfaces runs at a diagonal.

Worksurfaces are 1½" thick with particleboard core and with top surfaces finished in laminate. Bottom surfaces are covered with a backer sheet. Worksurfaces can be panel hung or used in freestanding applications. Modesty panels and appropriate supports are required to configure freestanding Cadence® desks.

### Worksurfaces

- **Laminate tops** offer flat edge trim in twenty standard colors (customer specified) to match solid or woodgrain laminates and to complement patterned laminates.
- **Optional wider width primary worksurfaces** are available for use with Optimize panel runs having a "T" or "S" connection — upcharge applies.

- **Wire management grommets** are standard in most worksurfaces (unless specified with no grommets) and specified in plastic or metal. Metal grommets are available in oval or square.
- Rectangular worksurfaces over 42"W have two grommets. Corner cove worksurfaces will have two grommets. Peninsula and corner worksurfaces have one. D-Shaped worksurfaces and countertops do not have grommets.
- Grommets on standard systems worksurfaces are located 6⅙" from the side edges and 3⅙" from the back edge.
- Add Suffix "N" to a model number for no grommets — no upcharge.

### Supports

Worksurfaces can be configured at 29½" H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

#### Worksurface support options include:

- Support column\*
- Flat brackets
- External support channel
- Worksurface bracket kits
- Height adjustable mechanisms
- Cantilever brackets
- In-line support legs\*
- End-panel supports\*
- Support storage units\*
- Pedestal-to-panel attachment kit\*
- Desk-to-panel attachment kit\*
- Corner desk leg
- Bridge and return kits
- Modesty panels
- Gussets

\*Units provide floor support.

#### Support Guidelines — See Drawings on page 93

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support\* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports\* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

*continued on next page*

*continued from previous page*

- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Worksurface runs 60" W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48" W. See pages 97 and 108.

- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72" W. See pages 98-106.

Worksurface bracket kit should be used to tie panels to worksurface for added stability

Cantilevers are recommended in place of an external worksurface support channel where feasible.

Worksurface runs 60" W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48" W. See pages 97 and 108.

### Worksurfaces with Flat Edge

#### Primary Worksurfaces (page 107)

- Primary worksurfaces are available in 20", 24", and 30" depths up to 96"W. Worksurface spans greater than 72" require floor support.
- Nominal worksurface width is equal to nominal panel width.
- Wire management grommets standard, one for widths up to 42", two on widths 48"W and greater. Add "N" suffix for no grommets.
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 20"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Width must correspond with panel width(s). For worksurface to span a "T" or extended straight connection add upcharge and suffix "TM" to model number.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence®, pages 98-106.
- The 9120 Program can be used to order HPL particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120"W x 36"D. See pages 114-115.

#### Bow-Front Worksurfaces (page 108)

- Two wire management grommets standard.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk. Refer to Cadence pages 98-106.

#### Corner Worksurfaces (page 109)

- One wire management grommet.
- Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces.
- Rear corner left-handed support bracket included. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

#### 120° Corner Worksurfaces (page 109)

- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

#### 60° Pie Worksurface (page 109)

- Order support column and two flat brackets separately.

#### Corner Shelf (page 109)

- Diagonal leading edge = 10 1/2"; diagonal depth = 22 1/2".
- Includes panel attachment brackets.

#### Corner Cove Worksurfaces (page 110)

- Two wire management grommets standard.
- Rear corner support bracket included with all surfaces. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner. All other support hardware is ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 98-106.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

### Worksurfaces with Flat Edge

#### Peninsula, P-Shaped, and Jetty Worksurfaces (page 111)

- Wire management grommets standard.
- Support column ordered separately, column includes panel support brackets T6BK.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence® pages 98-106.

#### Quarter-Round Worksurfaces (page 112)

- Use to connect two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

#### D-Shaped Worksurfaces (page 112)

- Order support column and two 24" D in-line support legs separately.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.
- Includes attachment bracket.

#### Countertops (page 113)

- Mounting brackets and attaching hardware ordered separately.
- Countertops are flush with panel top cap.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

#### Countertop Brackets (page 113)

- Countertop brackets must be ordered separately. Models P51500 and P51500-42 each contain one right-hand and one left-hand bracket.
- Specify paint color.
- Model P51500 brackets are for 35"H or 50"H panels. Model P51500-42 brackets are for 42½"H panels.
- Order two model P51500 or P51500-42 for straight countertops. Order three model P51500 or P51500-42 for corner countertops.

#### Height-Adjustable Worksurfaces

- For freestanding applications, see height-adjustable tables in the Seating, Collaboration, and Tables Price List.

#### Non-Standard Worksurface Sizes (pages 114 and 115)

- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ½" increments up to a maximum of 120" W x 36" D.
- Other modification requests should be made through Allsteel Tailored Products Group.

### Worksurface Supports

End-Panel, Closed End, and Open End Supports

Support Legs

Support Columns

Handed Cantilever Brackets

Non-Handed Cantilever Brackets

#### End Supports and Bracket Kits (page 116)

- End-panels are 1½" thick. For use in place of panels at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end-panels.
- 11"D end-panel models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.
- Panel mounted end-panel supports are ordered for right- or left-handed application.
- Open end panel supports are non-handed and are only for panel mounted applications.
- End-panel models can be converted to freestanding with removal of panel mount bracket. End-panel bracket kit converts freestanding end-panel support model to panel mounted.

#### Support Legs and Bracket Kit (page 116)

- Support legs are 1½" thick. Leg portion is 12¾"D. Supports the junction of two worksurfaces.
- Non-handed for use at either end of worksurface.
- Provided with flat bracket.
- Worksurface in-line support legs are used to support worksurfaces only in a shared position. Worksurfaces require to the floor support every 72".
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Panel mounted models can be converted to freestanding with removal of panel mount bracket.
- Support leg bracket kit (non-handed) converts freestanding model to panel mounted.

#### Support Columns (page 116)

- Used to support one end of curvilinear worksurfaces.
- D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

#### Cantilever Brackets — handed (page 116)

- Cantilever brackets are left or right handed. No assembly required.
- They can be inserted into panel reveals in 1" vertical increments.
- One size is used for both 24" and 30"D worksurfaces.
- 18"D cantilever are for use with 20"D worksurfaces and to support 24"D worksurfaces 66"-72"W that require a cantilever bracket for center support in panel mounted applications.
- 12"D cantilevers are only for use with 12"D secondary worksurfaces.
- Both left and right brackets are required in shared applications.
- Includes tie bracket and attachment hardware.
- Use with runs 72" or less — avoid installation on only one side of a straight connection except to support corner worksurfaces. Floor support is required for runs greater than 72". See page 93.
- Cantilevers can and should still be used in the middle of a worksurface run 72"W or less for proper support and to help prevent worksurface bowing. See page 93.
- DO NOT position at the end of a panel run.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended or peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.

#### Cantilever Bracket — non-handed (page 116)

- Assembly required. Includes attachment hardware.
- Includes two angle brackets for shared applications. Use two cantilever brackets when adjacent worksurfaces are positioned at different heights.
- One size is used for both 24" and 30"D worksurfaces.

### Worksurface Supports

Worksurface Brackets

#### Worksurface Bracket Kit — T6BK (page 116)

- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.
- Kit includes one pair of brackets and attachment hardware.
- Freestanding pedestals can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

#### Worksurface Storage Bracket Kit — T6SB (page 116)

- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts.
- Black only.
- Kit includes one pair of brackets and attachment hardware.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

Flat Brackets

#### Flat Brackets (page 116)

- Includes bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

Pedestal-to-Panel Brackets

#### Pedestal-to-Panel Attachment Bracket (page 116)

- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Works with Essentials™ and Involve® pedestals.

External Worksurface Support Channel

#### External Worksurface Support Channel (page 108)

- Is required on a systems worksurface for additional support for spans 60" W or greater. Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28" H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports. May require spacer kit AKMH.

#### Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See Cadence® pages 98-106.

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

### Configurations

Full Modesty

Half Modesty

Gussets

#### All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

#### Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Optimize, Terrace®, and Concensys®, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel storage solutions and Extensions™ — work tools to provide personalized organization for every workstyle.

**Systems integration** — Cadence works in combination with Optimize, Terrace, or Concensys panels, extending the functionality of each product line.

**Highly adaptable** — Make the most of building architecture by using an existing wall to create a semi-private workspace.

**Space utilization** — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

**Team interaction** — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

#### The Cadence choice

It works in the open plan, the private office, or in combination with Optimize, Terrace, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

## Configurations

### End Panels **E** and Support Legs **L**

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-tops in panel applications.

### Corner Desk Legs **C**

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

### Bridge Kits **B**

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g. using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

### Surface **S**

### Support Column **SC**

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

### Return Kits **R**

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

### Desk-to-Panel Attachment Kits **D**

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right hand unit attaches to right side of modesty).

## Corner w/Desk Panel Attachment Kit **CW**

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

## Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

## In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24" D full end panels may be used at the in-line junction on 30" D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.

## Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 18" D or 20" D peds should be used with 24" D worksurfaces. 18", 20" D, or 23" D pedestals can be used with 30" D worksurfaces. Using 18" D laterals or personal files provide additional pull style and storage options under 24" D worksurfaces.

## Modesty Panels **M**

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

## Stand-Alone Corner Modesty Panels **SM**

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

## Gussets **G**

Gussets can be used in place of a modesty panel with desks 36" W to 60" W. Gussets can also be used with corner desk legs.

## Configurations

### Freestanding Desk

Qty.	Model	Description
1	T52436S	Flat Edge Worksurface 24"D x 36"W
2	CEP2429F	End-Panel Support 24"D x 29½"H
1	CS369	Modesty Panel 36"W x 29½"H

### Panel-Attached Desk

Qty.	Model	Description
1	T52436S	Flat Edge Worksurface 24"D x 36"W
1	CEP2429F	End-Panel Support 24"D x 29½"H
1	CS369	Modesty Panel 36"W x 29½"H
1	DPA29R	Desk-to-Panel Attachment Kit 29½"H - RH C - Concensys® TK - Optimize or Terrace®

CONFIGURATION OPTIONS	Work-surface (S)	End-Panel Support (E)	Desk Support Leg (L)	Modesty Panel			Desk-to-Panel Attachment Kit (D)	Corner Desk Leg (C)
				Same width as Work-surface (M)	6" wider than Work-surface (M+6)	12" wider than Work-surface (M+12)		
Freestanding Desk	1	2		1				
Panel-Attached Desk	1	1		1			1 RH	

### Return Desk (Attached to a primary or return desk.)

Qty.	Model	Description
1	T52436S	Flat Edge Worksurface 24"D x 36"W
1	CS429	Modesty Panel 42"W x 29½"H
1	CEP2429F	End-Panel Support 24"D x 29½"H
1	CRK29	Return Kit

### Return Desk (Attached to a panel-hung worksurface.)

Qty.	Model	Description
1	T52448S	Flat Edge Worksurface 24"D x 48"W
1	CS549	Modesty Panel 54"W x 29½"H
1	CEP2429F	End-Panel Support 24"D x 29½"H
1	CRK29	Return Kit

**Note:** The widest modesty panel is 72"W which limits return worksurfaces to a maximum of 66"W.

CONFIGURATION OPTIONS	Work-surface (S)	End-Panel Support (E)	Desk Support Leg (L)	Modesty Panel			Desk-to-Panel Attachment Kit (D)	Corner Desk Leg (C)	Return Kit (R)

Cadence Supports

End-Panel Supports

**End-Panel Supports** (page 117)

- End panels are 1⅝" thick. For use at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with end panel bracket kit.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

Support Leg

**Support Legs** (page 117)

- Support legs are non-handed. Supports the junction of two worksurfaces.
- Leg portion is 12¾"D and is 1⅝" thick.
- Flat bracket included.
- Levelers provide 2¾" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with support leg bracket (non-handed).
- Must be connected into panel slots for panel hung applications.

Corner Desk Leg

**Corner Desk Leg** (page 117)

- Attaches two modesty panels at rear of corner desk.
- Leveler provides 2¾" vertical adjustment.
- See examples on pages 100 and 103.

Bridge Kit

**Bridge Kit** (page 117)

- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.
- See examples on pages 99 and 103.

Return Kit

**Return Kit** (page 117)

- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat brackets and one modesty panel-to-end-panel bracket.
- See examples on pages 99 and 101.

Desk-to-Panel Attachment Kit

**Desk-to-Panel Attachment Kits for Optimize** (page 117)

- Used to connect a worksurface and modesty panel perpendicularly to a Optimize Panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit.
- “Hand” of unit is determined from the user’s side of the desk (left hand unit attaches to left side of modesty).

Corner w/Desk Attachment Kit

**Corner w/Desk Panel Attachment Kit for Optimize** (page 117)

- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Optimize panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- “Hand” of unit is determined from the user’s side of the desk.

Flat Bracket

**Flat Brackets** (page 117)

- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

OPTIMIZE

## Cadence Supports

### Optimize Wall Track/Tile Attachment Kits (page 117)

- Allows for mounting of system panel components on permanent wall structures.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace® wall track tile attachment kit to install tiles onto Optimize wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- When using Optimize wall track and using Terrace tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

### Freestanding Pedestals

- Can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

### Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See pages 98-104.

Pedestal Compatibility with Cadence and Panel-hung Worksurfaces		
Cadence Desking	24" Deep	30" Deep
18"D Ped	Yes	Yes
19½"D Ped	Yes*	Yes
23¾"D Ped		Yes
29½"D Ped		
Systems Panel-hung	24" Deep	30" Deep
18"D Ped	Yes	Yes
19½"D Ped	Yes*	Yes
23¾"D Ped	Yes*	Yes
29½"D Ped		Yes*

\*Wire management grommet is blocked in these applications.

**Note:** Pedestal placement may affect access to receptacles in base pathway.

### Modesty Panel (page 118)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel, and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is 3¼" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 1¼" of space between bottom of modesty panel and floor.
- Refer to pages 98-104 to select proper width.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels or gussets can be used with corner or corner cove worksurfaces.

### Stand-alone Corner Modesty Panel (page 118)

- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 1¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6⅞" less than the nominal dimension listed in the Systems Price List.
- Modesty panels are inset 2⅞"; when adding pedestals, consult chart below.

### Pedestal-to-Pedestal Modesty Panels (page 118)

- Widths available to work with 60"W, 66"W, and 72"W worksurfaces to create freestanding double pedestal desk using two medal support pedestals.

### Gussets (page 118)

- Provides easy access to wall outlets.
- Cannot be used with suspended pedestals.
- Gussets can be used on corner and corner cove worksurfaces.

### Universal Modesty Panel (page 118)

- Mounts under peninsula, P-shape, jetty, and boomerang worksurfaces. Refer to chart below to select proper width.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for Select paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

Examples: 851524M.LT3B.EX P51500.P02

#### ORDERING

The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120" W x 36" D.

Specify:

- Model Number**  
Specify closest nominal width/depth model (round up).
- Grommet Option** (if desired)  
See grommet specification instructions on this page.
- Grommet Type:**  
**P** Plastic  
**M** Metal (add \$11 per grommet for laminate)
- Grommet Color:**  
(Metal only)  
**EL** Matte Silver  
**NOTE:** Plastic grommet will match flat edge.
- Laminate Choices**  
See page 64.
- Flat Edge Color Choices**  
See EDGE COLORS page 64 for laminates.
- Exact Size**  
Specify the **EXACT Width** and **EXACT Depth** you require.  
Width and depth is specified in 1/8" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

1/8" = 1	5/8" = 5
2/8" = 2	6/8" = 6
3/8" = 3	7/8" = 7
4/8" = 4	no extra increment = 0

For example, when ordering a worksurface that is 34 3/8" W x 20 1/2" D, specification should be 345Wx204D.  
*Example: 9120R3624.G0.TM33.EU.345Wx204D.*

#### PRODUCT SPECIFICATIONS

- Flat Edge on all sides
- 45 lb. particle board
- 1 1/8" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

**Note:** 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

When spanning multiple freestanding storage units with one worksurface, add 1/8" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + 1/8" + 1/8" = 90 1/4" worksurface. Do NOT follow this rule if panel wrapping storage units.

#### CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program Worksurfaces.

#### GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate.

#### PRICING

One Grommet – GC, GL, or GR Position ..... \$17.00  
Two Grommets – G3 or G4 Position..... \$34.00  
**NOTE:** Add \$11 per grommet for Metal grommets with laminate.

#### ORDERING

Specify grommet location and color.  
Example: 9120R10836.GCP.TM33.EU.1022Wx326D

#### Code Grommet Position

- GC Centered side-to-side – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- GL 6 1/16" from left side to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- GR 6 1/16" from right side to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- G3 Pair of grommets each 18" from side edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each 6 1/16" from side edge to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.

Rectangular Top

Grommet positions other than those shown above are considered non-standard.

- **Task lights** can be mounted beneath storage shelves and overhead storage cabinets.
- Additional panel hung and freestanding lighting options are available.
- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.

OPTIMIZE

### Specification Guidelines

- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Overhead storage cabinets and open storage shelves can be mounted on Optimize structural and stacking panels to a maximum height of 80"H.
- Base panel frames with stacking frames that have an overall height of 57½" will not accept overhead storage cabinets if spanning between stacker and base panel.
- Immediate adjacent panels must be equal height to panels with overhead storage cabinets on them.

**When overhead storage units are suspended from stacking frames,** the following guidelines should be adhered to:

- Stacking panels can be added to any base panel up to 80"H.
- Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.

- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

- **Assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets.
- One side of overhead must be held on-module.

- **RTA overhead, RTA shelf, and receding door** width must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

## Overheads, Shelves, and Hutches

Sliding Door Overhead

Flipper Door Overhead

Hinged Door Overhead

Open Shelf

Upmount Kit for Overhead Cabinets

Horizontal Wall Track

### Assembled Overhead Storage Cabinet (page 123)

- Steel cabinet with backstop.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing.
- Easy-Assist flipper door not available on 60"W or 72"W cabinets — specify 2–30"W cabinets or 2–36"W cabinets.
- Self-engaging safety latch to secure cabinet to panel.
- Width can correspond with width of panel, or two panels joined with an in-line connector kit.
- Arch or square pull optional on flipper doors.
- 60"W and 72"W flipper door cabinets have two doors with two independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting (specified separately).
- For locking specifications, see pages 318-320.
- Cabinets are 14¼"D x 15"H.
- 15"H cabinets can also be mounted on a panel equal to or up to 18" narrower than cabinet using provided panel attachment brackets.
- Sliding doors have a built-in pull.
- Sliding, Hinged, and Flipper Door Overhead Weight Limits:
 

24"W .....	59 lbs.	42"W .....	105 lbs.
30"W .....	74 lbs.	48"W .....	121 lbs.
36"W .....	90 lbs.	60"W .....	152 lbs.
- Mounting an overhead on frames that have an overall height of 57½"H is not recommended. Slot modularity in relation to adjacent panels may be compromised.

### Assembled Open Shelf (page 123)

- Metal shelf with back stop.
- Locking clips (2) standard.
- Will accommodate recessed task lighting (ordered separately).
- Weight Limits:
 

24"W .....	61 lbs.	42"W .....	108 lbs.
30"W .....	77 lbs.	48"W .....	124 lbs.
36"W .....	93 lbs.	60"W .....	155 lbs.
- Mounting an open shelf on Optimize frames cannot span base panel frame and stack-on frame — slot modularity is not maintained.

### Upmount Kits for Assembled Overhead Cabinets (page 123)

- Consists of two upmount brackets, full back panel, and required installation hardware.
- Allows mounting of an assembled overhead cabinet up to 15" above height of panel.
- Specify "Z2" prefix model number upmount kits with 15"H, 35"H, 50"H, or 65"H Optimize panels; and "Z4" prefix model number upmount kits with 42½"H Optimize panels.
- Brackets require a clearance of 6½" below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly in-line.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.
- Cannot be used with RTA models.

### Horizontal Wall Track (page 123)

- Allows mounting assembled overhead cabinets on permanent wall structures ONLY. Attachment hardware not included.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- For use with 15"H sliding door overhead, field modification is necessary.
- Available in black only.

Overheads, Shelves, and Hutches

**Assembled Receding Door Overhead Storage Cabinet** (page 124)

- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or square pull optional.
- 60" W cabinet has 2 – 30" W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 318-320.
- Cabinets are 13¼" D x 15" H. When door is recessed, interior dimensions are 12⅝" D x 11⅝" H.
- Weight Limits:
 

30" W .....	70 lbs.	48" W .....	110 lbs.
36" W .....	85 lbs.	60" W .....	138 lbs.
42" W .....	100 lbs.		

**Receding Door Overhead Back** (page 124)

- Optional for use with receding door overhead.
- Order width to match overhead cabinet.

**Ready to Assemble (RTA) Flipper Door Overhead** (page 124)

- Steel cabinet with open back.
- 60" W and 72" W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 318-320.
- Cabinets are 12" D x 15" H. Interior dimensions 11⅝" D x 12¼" H.

**Ready to Assemble (RTA) Shelf** (page 124)

- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.

Stack-On Hutch

**Stack-on Hutch** (page 125)

- Have flipper doors with square horizontal edges.
- Universal model can be converted to an open hutch.
- Doors are standard with a core removable lock (60" W, 66" W and 72" W have two doors and two locks.)
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Hutches have clearance of 19¼" for computers, etc.
- Depth dimensions shown includes thickness of door.
- Universal model inside depth dimension is 12¼".
- Stack-on hutches accommodate recessed task lighting.
- For locking specification see pages 318-320.
- Chicago task light cords cannot be routed through the hutch end panels, due to the large size of the fused plugs.

Tackboards for Hutches

**Tackboards** (page 125)

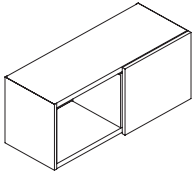

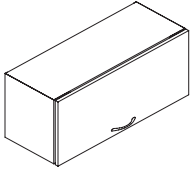

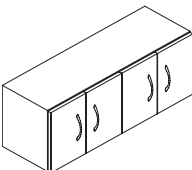

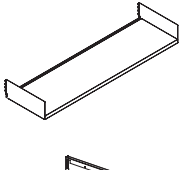

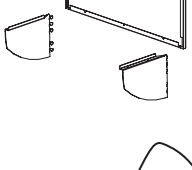

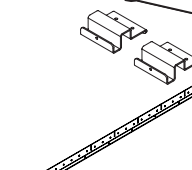

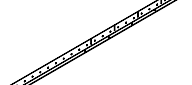

- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72" W tackboards are available in railroad cut only.

# Metal Overheads

*Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)*

#### GRADE P3

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial, and economically viable way. Allsteel received its FSC Chain of Custody certification in 2010 and can offer FSC Certified products. Select wood-based products can be ordered as FSC certified, either by choosing the FSC option or selecting an FSC laminate or veneer finish at the time of order. For more information, please contact Customer Support at 888-255-7833. (FSC Trademark license code: FSC-CO14704.)

Gallery Panels are ideal for bringing natural wood elements to workstations and providing privacy. Allsteel Gallery Panels are designed to work universally across 5 product platforms. Please follow the product guidelines for proper specification.

End Panel (Dual-Sided)

End Panel (Single-Sided)

Mid Panel

- Available to connect to Frame & Tile, Monolithic, Benching systems, and other Gallery Panels
- Standard Gallery Panels connect to Benching, Frame & Tile, and Monolithic systems, and Gallery-to-Gallery panels connect to other Gallery Panels
- Gallery Panels can be used in freestanding applications. See page 140 for specification requirements.

### Standard Gallery Panels

- Standard Gallery panels connect to Benching, Frame & Tile, and Monolithic systems and are available as End-of-Run Single and Mid Panels (panel systems only)
- Made of 1½" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 60"W. Horizontal grain is available on all sizes.
- Single Panel widths are available in 3" increments from 18"W to 84"W.
- Standard Gallery Panel sizes up to 84"W come as a single piece.
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Standard Gallery panel widths are true to size
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- All configurations are non-handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)

GSA SIN 33721

### Standard Gallery Panel Widths

### Gallery-to-Gallery Panel L/T Widths

GSA SIN 33721

### Standard Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset 1½" from each end of the panel.
- Single-piece Gallery Panels for use with integrated glass require glass 3" shorter than the panel width.
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in 7½"H, 13"H, and 15"H.
- Glass is available on all Gallery Panel widths.
- Specify glass models separate from Gallery Panel models.
- Glass Panels at 30"W and under are not UL listed.

Standard Single Panel with Glass

Find the Gallery Glass width appropriate for your Gallery Panel width.

Shaded example:  
For the 18"W  
Gallery Panel,  
Gallery Glass  
should be ordered  
with width of 15".

Gallery Panel Width \ Gallery Glass Height	7.5"H, 13"H, 15"H
	Gallery Glass Order Width
18"W Gallery Panel	15"W
21"W Gallery Panel	18"W
24"W Gallery Panel	21"W
27"W Gallery Panel	24"W
30"W Gallery Panel	27"W
33"W Gallery Panel	30"W
36"W Gallery Panel	33"W

75"W Gallery Panel	72"W
78"W Gallery Panel	75"W
81"W Gallery Panel	78"W
84"W Gallery Panel	81"W

### Gallery-to-Gallery Panels

- Gallery Panels for use with glass offer a routed top edge.
- Glass mounts directly into the Gallery Panel route via a gasket.
- The routing is inset  $\frac{1}{2}$ " from each end of the panel.
- Gallery-to-Gallery Panels for use with integrated glass require glass equal to the panel width.
- Glass is available in 3 colors: Clear, Frosted, Smoked.
- Glass height is available in  $7\frac{1}{2}$ "H, 13"H, and 15"H
- Glass is available on all Gallery Panel widths. Glass panels at 30"W and under are not UL listed.
- Specify glass models separate from Gallery Panel models

Gallery-to-Gallery Panel with Glass

# Gallery Panels

## Optimize™ System - End Panel (Dual-Sided)

GSA SIN 33721

- Provides privacy to one or both ends of the system in a dual sided application.
- Single piece End Panels can be used for off-modular planning. Connector kit location must be field measured.
- End Gallery Panels cannot be shorter than spine panel.
- Optimize Gallery End Panels without integrated glass connect using P3CONGE connector kit.
- Optimize Gallery End Panels with integrated glass that match the height of the spine panel connect using P3CONGEG connector kit. (P3CONGEG only for use with dual-sided end panels with glass.)
- Must follow Optimize panel stability rules.

Front edge of Gallery Panel will sit ½" proud of front edge of worksurface on Optimize.

Detail of P3CONGE  
Invisible connection on standard panels

Detail of P3CONGEG  
Visual of end connector on panels with integrated glass

GSA SIN 33721

- Provides privacy to one or both ends of the system in a single sided application.
- Single-Sided End Panels cap over the System panel. Accommodate for 2 1/8" frame thickness when planning with Optimize panel system.
- All Optimize End Panels (Single-Sided) require connector kit P3CONGE to attach to parent run.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Due to thickness of the Optimize panel Single-Sided End Panel overhangs by approximately 7/8" in front of a worksurface.
- End Gallery Panels cannot be shorter than spine panel.
- Optimize Gallery Single-Sided End Panels both with and without integrated glass connect using P3CONGE connector kit.
- When using stackers on the spine, use stacker bracket provided with connector kit OR fixed worksurfaces with cantilevers must be tied to the Gallery Panels. (See detail 1 below.)

- Mid panels do not overlap parent system panel.
- When specifying single-sided Mid panels, one gallery panel single-sided mid connector kit is required to space the System panels out 1 1/8". Kits include: Connector post, connector strap, bracketry and a top cap.
- When specifying dual-sided Mid panels, one gallery panel dual-sided mid connector kit is required to space the System panels out 1 1/8". Kits include: Connector post, connector strap, bracketry and a top cap.
- Connector models must match the height of the parent run.
- Specify one mid-connector kit per "t" or "x" connection.
- When using a Mid panel, both panel frames in spine must be of equal height.
- Mid Panels may not vary in height of parent run by more than 15".
- Trims can be painted to match the System panel trims.
- Mid Panels are available in 18"-84" widths in 3" increments.
- Gallery Panel sizes 63"W or greater require storage or worksurface tie-in. Please reference storage and worksurface support sections for more details.
- Spanning top cap available through Allsteel Tailored Solution Group.

Mid panel must be 3" shorter than end panel due to panel frame thickness

### Gallery-to-Gallery Panels

- Gallery-to-Gallery panels connect to other gallery panels and are available in L-, T-, and Nonsymmetrical T- configurations.
- When specifying Gallery-to-Gallery panels, the installation template (GTEMP) is required. The recommendation is 1 template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery panels cap over Standard Gallery panels and are oversized by 1/8" to maintain true interior dimensions
- Gallery-to-Gallery panels must be of equal or lower height than the Standard Gallery panel attached. The Gallery-to-Gallery panel cannot be taller than the adjacent panel. If this is required, please reach out to TPG for a custom solution.
- Made of 1/8" board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edge band is 2mm ABS
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 54"W. Horizontal grain is available on all sizes.
- Gallery-to-Gallery panel widths are available in 3" increments from 18"W to 30"W and in 6" increments from 30"W to 78"W
- Gallery Panels offer 2 1/2" leveling capability.
- Overall heights line up with adjacent panel or benching systems.
- Available with and without the integrated glass option.
- Glass is specified separately.
- Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery panels are secured with an inset flat bracket under a painted metal cover.
- L- and Nonsymmetrical T- panels are handed.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in gallery panel width (i.e. storage or worksurface tie-in)
- Nonsymmetrical T Panels are specified in the format GTyyxxzz. Substitute yy as panel height, xx as LH nominal length, and zz as RH nominal length

Note: Gallery-to-Gallery Panels cap over standard Gallery Panels and are oversized by 1/8" to maintain modular interior dimensions. (ex: 18" panel is actually 19 1/8"W)

Freestanding Screens can be specified using Standard Gallery panels and Gallery-to-Gallery (depicted by the shaded panels in the illustrations below). Overall height, including glass, cannot exceed 72.5". Gallery Panel sizes 63"W or greater require storage or worksurface tie-in.

### Freestanding L-Screens

Parent	Minimum Return
18-24	Not Valid
30-36	30
39-60	36
63-84	42

NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

### Freestanding U-Screens

Parent	Minimum Return
18-21	Not Valid
24-48	24
51-60	27
63-84	30

NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

### Freestanding T-Screens

T-Return	Minimum Parent
18-21	Not Valid
24-36	30-84
42-60	36-84
66-78	42-84

NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

### Freestanding H-Screens

Parent	Minimum H-Return
30-84	18

NOTE: Increase minimum return length by 3" or next largest width of panel for every 7.5" variation in panel height.

### Worksurface Mounting Bracket (page 171)

- Used to mount a fixed-height worksurface to a Gallery panel.
- Can be painted any Allsteel Standard Paint color.
- A worksurface stiffener is required for surfaces 60" W or greater.
- One bracket kit (GWSBK) is required for each worksurface end attached to Gallery Panels.
- One bracket kit (GWSBK) includes two large L- brackets and one small corner L- bracket.

### Storage Ganging Kits (page 167)

- The laminate storage ganging kit (GSGKL) is used to connect a Gallery Panel to a laminate storage unit.
- The metal storage ganging kit (GSGKM) is used to connect a Gallery Panel to a metal storage unit.

### Gallery Panel Stiffeners (page 167)

- Required for single-piece panels 75" W and greater that are used in a wing or single-sided end condition and do not have a horizontally-mounted credenza.
- For panels 75" W and 78" W, order model (GSTFN7578). Stiffener width is 72".
- For panels 81" W and 84" W, order model (GSTFN8184). Stiffener width is 78".
- Attaches directly to one side of the Gallery Panel with a painted metal cover, attachment hardware included.
- Placement on panel face must be at least 18" above the floor but is not restricted to a specific location on the panel.
- Stiffener is 1½" x 1½".
- Available in any Allsteel standard paint color

### Tackboards (page 172)

- Provides tackable surface.
- Comes with steel-painted trim.
- Available in the following heights: 15", 22½"
- Available in the following \*widths: 24", 30", 36", 42", 48", 54", 60".  
\*Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.

### Magnet or Marker Boards (page 172)

- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Available in the following heights: 15", 22½"
- Available in the following \*widths: 24", 30", 36", 42", 48", 54", 60".  
\*Nominal widths, true width is undersized by ½"
- Depth of .45"
- Mounts directly to Gallery Panel. Mounting hardware included. Will deface the panel.

Tackboard Accessory on Mid and End Gallery Panels

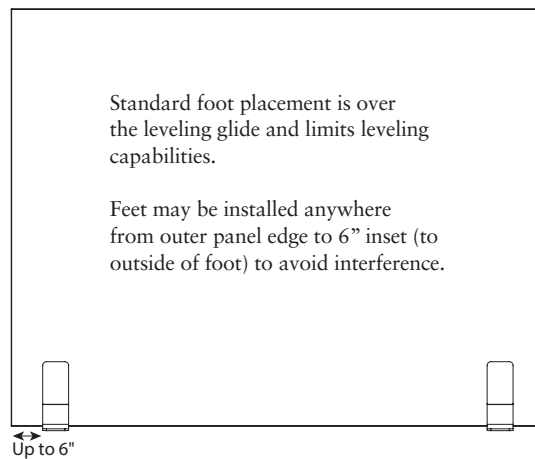

### Hanging Magnet or Marker Boards (page 172)

- Hangs over Gallery panel or sits on top of worksurface.
- Provides writable and magnetic surface when painted in marker board paint.
- Provides magnetic surface, NON-writable, when painted in other Allsteel paint colors.
- Cannot be installed back-to-back when hanging in the same location.
- Available in 30" W and in two heights: 20" H and 26" H.

### Gallery Panel Foot (page 172)

- Single foot provides rigidity to large wing panel.
- Using two feet on a single Gallery Panel allows for a freestanding application on panels greater than 24" W.
- Available in any textured Allsteel paint.
- Foot extends 9" from either side of the panel.

### Floating Laminate Shelves (page 173)

- 6" depth.
- 3/4" thickness.
- Constructed of HPL laminate with 0.8mm ABS edgebanding.
- Available in solid or horizontal woodgrain laminate.
- Available with contrasting or matching edge.
- Widths available every 6" from 12" to 78" W.
- Widths from 54" to 78" satisfy a stiffener requirement and are meant to be mounted to a panel that is 6" wider than the shelf. (e.g., 84" W panel would accept a 78" W stiffener shelf.)
- Shelves narrower than 54" W do not act as a stiffener.
- Weight capacity is 10lbs per linear foot.

GACRL12

GCHRB

G2AGF

G1PTR

GWPSF

GBRSF

### Accessory Rail and Paper Management (page 173)

- Accessory Rail provides mounting for paper management accessories, listed below.
- Rail is 2.6"H and is available in the following widths: 12", 18", 24", 30", 36".
- Rails can be installed in any location on the Gallery Panel, as long as the rail does not extend beyond the top of the panel, and can be placed in-line to span panel length.
- Rail and accessories can be painted any standard Allsteel paint color.
- Mounts directly to the Gallery panel, attachment hardware included.
- Extensions accessories are NOT compatible with the accessory rail.
- These accessories are compatible with panel system tool tiles and rails.
- Includes a rail cover to hide hardware and provide magnetic surface.
- Compatible Rail Accessories:
  - Coat Hook (Rail-based, a mounted version is also available to attach directly to the panel)
    - Rail Based dimensions: 4" x 3" x 1¼"
    - Mounted dimensions: 4" x 3" x 1½"
    - Weight limit: 25 lbs
  - Angle File (Triple, Dual, and Single heights)
    - Depth of 2"
    - Heights: Triple = 15½", Dual = 12½", Single = 9½"
  - Paper Tray (Triple, Dual, and Single heights)
    - Depth of 10"
    - Heights: Triple = 9½", Dual = 6½", Single = 3½"
  - Personal Shelf
    - 9½" x 24" x 10½"
    - Weight limit: 25 lbs
  - Binder Shelf
    - 12½" x 12" x 11½"
    - Weight limit: 25lbs

**NOTE:** When accessory tools are attached to freestanding Gallery Panel screens, excess weight may affect overall panel stability.

### Wall Start (page 171)

- Wall Starts are 1⅞" by 1⅞" rectangular mounting posts that are meant to affix a Gallery Panel to a permanent building wall.
- Wall starts add 1⅞" to panel run.
- Attachment hardware not included.
- Must be specified at the same height as the connecting panel.

### Countertop Brackets (page 171)

- Includes attachment hardware.
- Countertops are flush with the top of the panel and can be flush with the ends of the panel or shorter than the panel width.
- For straight countertops, two countertop brackets must be ordered.
- For corner countertops, three countertop brackets must be ordered.
- Will deface the Gallery Panel.
- May be used in conjunction with Stride, Terrace, or Optimize panels. When transitioning from a Panel spine to a Gallery Panel wing with a corner countertop, use countertop model of the panel system.

### Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

#### SINGLE BRACKET

##### Gallery Panel Application:

**Max Height (with Glass):** 65"H

**Max Width:** 75"W; No top size restrictions

Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

#### DUAL SIDED PANEL BENCH

##### Gallery Panel Application:

**Max Height (with Glass):** 65"H

**Bracket Needed:** Single Panel (75" max) with Brackets on each leg (placed at the same height)

**Strong, fast, and friendly.** Concensys is simple, durable systems furniture that can be delivered in days instead of weeks.

#### Overview

Concensys delivers exceptional quality at an attractive price. Its durable construction, ease of specification and installation, and quick ship delivery options make it the best in its class. Concensys features thin profile panels, multiple options for finishes and fabrics, and thoughtful, functional details.

#### Stronger

With quality details rarely seen in comparable products, including welded steel frames, threaded metal inserts on worksurfaces, metal panel connectors, top caps and kick plates, and a lifetime warranty, Concensys is built to last through multiple reconfigurations and extended use. Plus, panels are shipped fully assembled to reduce installation time and costs.

#### Faster

Standard production lead times average between two and three weeks.

#### Friendlier

A monolithic, slender panel design simplifies planning, specification and installation by reducing the number of parts and the wasted space of panel creep. Panels are available in seven widths, between 18" and 60", with an enormous range of fabric and finish options to maximize design flexibility.

#### The Concensys Choice

Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, the Concensys panel system unifies the essential elements of systems furniture in one high-value, best-in-class package. In a complicated world, Concensys is intentionally simple.

**It's a quality selection made easy.**

## Panels

5 Heights  
7 Widths

**Tackable Acoustical**  
32"H, 43"H, 56"H, 69"H, 82"H  
18"W, 24"W, 30"W, 36"W, 42"W, 48"W, 60"W

**Stacking Fabric**  
13"H  
18"W to 60"W

**Stacking Glazed**  
13"H  
24"W to 60"W

**Half-Glazed**  
69"H  
24" to 48"W

**Door Panel**  
82"H  
42"W

**Sliding Door**  
69"H, 82"H  
42"W for  
36"W opening

**Note:** Nominal heights of "P" low profile panels with glides full retracted are 2" less than heights listed above.

## Panels

### Tackable Acoustic

- Concensys Panels are 2½" thick and available in 5 heights / 7 widths — add ⅝" for each end cover.
  - Frame designed with 4-sided, welded tubular steel.
  - Acoustical panels meet BIFMA recommendations.
  - Acoustical panels meet or exceed GSA standards.
  - Due to panel width, back-to-back data modules should not be used at beltline or in the base.
  - Add 2¼" to panel run for each "L", "T", "X" or extended straight connector.
  - Concensys Panels offer low profile painted/aluminum "P" top caps.
- Note:** Actual panel height varies depending on position of leveling glides (2¼" vertical adjustment).

NOMINAL PANEL HEIGHT	TOP CAP OPTION "P"
32"	30⅝" – 32⅝"
43"	40⅝" – 43⅝"
56"	53⅝" – 56⅝"
69"	66⅝" – 69⅝"
82"	79⅝" – 82⅝"

### Maximum Receptacle Capacity in Panel Base Pathways

Widths	24	30	36	42	48	60
Maximum of 1 duplex per panel side		X				
Maximum of 2 duplexes per panel side		X	X	X	X	X

### Concensys Tackable Super Acoustical design: 4-sided, welded, tubular steel panel frame.

- Knockout dimensions: 2.700"W x 1.377"H

### European and United Kingdom Kickplates:

- Kickplates are available with receptacle openings for European and United Kingdom receptacles.
- Please contact Customer Support for details.

## Panel Specification and Installation Notes

### Panel Door/Locksets

- Door is standard as right-hand; can be field modified to left-hand.
- Configure into layout as an 82"H x 42"W panel (can be wall mounted same as other panels).
- Height of door = 77¼". Access width = 36".
- Door surface is laminate; color must be specified.
- A panel connected to a door with a straight connector kit should be an 82"H panel.
- Order Lockset separately.
- Standard lockset finish: polished brass. Keyed — one side. Two keys provided.
- A commercially available lockset with a 2¾" set-back for a 1⅝" thick door can be used.
- Lever-style lockset finish: brushed aluminum. Keyed — one side. Two keys provided.

### Half-Glazed Panels

- Glass is clear, tempered safety glass.
- Bottom of glass is 29" above floor level with levelers fully retracted.
- Overhead storage components should be avoided on glazed and half-glazed panels.

For adequate stability, one of two methods of stabilization must be adhered to:

**Method 1:** A parent panel run must be a minimum of 48" and a maximum of 12', and must have a minimum of two return panels totaling 20% of the length of the parent run, extended in opposing directions on each side of the parent run.

**Method 2:** A parent panel run must be a minimum of 48" and a maximum of 12', and must have at least two return panels (one at the beginning and at the end of the parent run) totaling 60+% of the length of the parent run, extended in one direction. The minimum length of return panels should total 72".

#### Note

- Return panels must not be more than 26" shorter in height than the parent run.
- When using 120° connections, 12" must be added to the length of return panels as determined by methods 1 or 2.

(Refer to pages 181-182 when using stacking panels.)

## Working with Stacking Panels

### Frame Dimensions (Nominal)

- Height: 13"
- Width: 18", 24", 30", 36", 42", 48", 60"

### Stacking Panels — Fabric

- Frame design with 4-sided, welded tubular steel.
- Utilizes top cap, attachment hardware, and screws from base panel installation.
- Can be added to any Concensys panel and door from 18" to 60"W.
- Must match base panel width.
- Specify connectors separately.
- End covers can be specified in full end height to include height of stacking panel or in 13"H.
- Maximum 2 high stackable.

### Stacking Panel — Glass

- Clear, double-pane tempered safety glass inserts.
- Frame and components are painted black.
- For best aesthetics, use black painted stacking connectors.

### Building Vertically with Concensys Stacking Panels

- No more than 2 stacking panels can be added to any straight base panel.
- Stacking panels accept overhead storage components (on the lower stacking panel). Refer to instruction sheet.
- Stacking panels can be used on any straight base panel. Adding stacking panels to 43"H, 56"H, and 69"H panels will maintain horizontal alignment between 56"H, 69"H, and 82"H panels, respectively. Horizontal alignment to other standard panel heights cannot be achieved with base support panels other than 43"H, 56"H, and 69"H. For example, stacking panels can be used on 32"H panels, but the resulting 45"H panel will not align horizontally with any existing standard panel height and is therefore not recommended. (See illustration below.)
- Variable height finish kit configurations must not exceed 39".
- Creating a variable height configuration will require a variable height kit.
- When adding a stacking panel to "fill in" an existing variable height configuration, additional connector brackets will be required.

Base panel connectors must be the same height or taller than the tallest adjacent base panel. Substituting stacking connectors is not permitted.

Not Recommended

Recommended

## Working with Stacking Panels (continued)

Single or double high stacking panel configurations must have adjacent return panels or full height connectors.

When using overhead storage on the end of a run, or on a return panel, a full height panel end cover is required for adequate stability.

When overhead storage is not used, a 13" panel end cover can be installed.

**For adequate stability** of Concensys panels with stacking panels resulting in an overall height above 82", one of the following methods of stabilization must be adhered to:

**Method 1** — Refer to illustration above. The width of the parent panel run must be a minimum of 48" and a maximum of 12 feet and must have a minimum of two return panels that are a combined width of 42" wide, or wider, extending in opposing directions on each side of the parent run.

**Method 2** — Refer to illustration above. The width of the parent panel run must be a minimum of 48" and a maximum of 12 feet and must have at least two return panels that are 42" wide, or wider, extending in one direction. The minimum length of return panels must total 84".

**Note**

- Return Panels must not be more than 26" shorter in height than the parent run.
- When using 120° connections, 12" must be added to the length of return panels as determined by methods 1 or 2.

Sliding doors for Concensys® are a great addition to any new or existing installations. The sliding door is system specific; one model for Concensys with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of P1 or P2 paint, the sliding door will create a unique look for any office environment.

The sliding doors are available in 69" and 82"H models and can mount to 30", 36", 42", and 48" W panels. They accommodate a 36" W opening and are 42" W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.

### General Guidelines for Use of Sliding Door

- The system requires the ordering of both a door and a mounting bracket kit.
- The Door is system specific. The Concensys door works with Concensys only.
- All doors are 42" wide to accommodate a 36" W opening and are non-handed .
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48" W).
- Mounting bracket kits are system specific.

### General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 180). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening (A) where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42" W. If the panel is at a corner (B), the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels (C) that are less than 42" W they will interfere with each if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear (D) and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run this is positioned adjacent to a wall (E) or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

## Panels and Doors

**"P" Suffix Designates Top Cap Style:**

"P" Suffix — low profile, painted top caps

- Concensys "P" top cap panels are 2" less than nominal heights listed with glides fully retracted. See page 185.
- Concensys panels are 2½" thick.
- Refer to page 197 for cable management capacities in Concensys panels.

**Tackable Acoustical Panels (page 187)**

- Actual panel height varies depending on position of leveling glides. Refer to page 185 for full details.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors.
- All standard connectors are compatible with non-tackable panels.

**Stacking Panels (page 188)**

- 13" in height.
- Available in the following seven widths: 18", 24", 30", 36", 42", 48", and 60".
- Specify connectors separately.
- Stacking panel utilizes top cap from base panel (no top cap designator required).
- A stacking panel directly attached to a base panel will support overhead storage components.
- Up to two stacking panels may be used on a base panel.
- Glass panels are clear double-pane inserts of tempered safety glass.
- Glass frame and components are painted black.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors.

**Half-Glazed Panels (page 188)**

- Actual panel height varies depending on position of leveling glides.
- Half-glazed panels can accommodate stacking panels.
- Half-glazed panels are constructed of clear, double-pane tempered safety glass.
- Glass framework is painted black.

**Door Panel (page 189)**

- Actual panel height varies depending on top cap selected and position of leveling glides.
- Door is standard as right-hand; can be field modified to left-hand.

**Sliding Door (page 189)**

- One specific door model for Concensys.
- Sliding doors available in 69"H and 82"H and can mount to 30", 36", 42", and 48"W panels of same height.
- Doors are 42"W to accommodate a 36"W opening.
- Order system specific mounting kit for each door ordered.
- Threshold free design for best aesthetics and safety — eliminates potential for tripping.
- Sliding door ships non-handed. Handles are field installed to L or R hand.
- Handle pulls on each side of door are color matched to trim.
- Available in P1 and P2 paint.
- Doors are available in Frosted Translucent insert material only.

**Sliding Door Mounting Kits (page 189)**

- Mounting kits are specific to each system.
- Concensys bracket kits accommodate all top cap trim options.
- Order to match the width of the panel on which the kit is hanging.
- Available in P1 and P2 paint.

## Panel Connectors (page 190)

**NOTE:** Actual panel height varies depending on position of leveling glides (2¾" vertical adjustment).

NOMINAL PANEL HEIGHT	TOP CAP STYLE "P"
32"	30⅞" – 32⅞"
43"	40⅞" – 43⅞"
56"	53⅞" – 56⅞"
69"	66⅞" – 69⅞"
82"	79⅞" – 82⅞"

- Connector kits include all parts required for connecting and finishing — top bracket, vertical fabric-covered or painted filler, lower base plate filler, top cap trim, and necessary screws.
- “L”, “X”, “T”, and extended straight connections provide space to pass a limited quantity of data cabling between the panel base pathway and top cableway.
- **Add 2¼" to overall length of run for each “L”, “X”, “T”, or extended straight connection.**
- **Straight connector does not add to overall length of run.**
- Add ⅞" to panel run for each panel mount-to-wall kit. Adds ⅜" when brackets are used for modularity.
- One carpet gripper is included with end connector kits.
- Porting is standard on all straight connectors.

## Panel End Covers (page 191)

- Order panel end cover kits to finish the end of every panel run (except when attaching panels to permanent walls).
- Panel End Covers add ⅞" to length of run.
- Stacking panel end cover utilizes top cap from base panel end cap.

## Panel Mount-To-Wall Kit (page 191)

- Anchor devices are not supplied with the permanent-wall panel connector kit. Refer to Concensys Installation Instructions for appropriate hardware.
- Adds ⅞" to length of run (⅞" when mounted for modularity).

- Stacking panel wall mount kit utilizes top end cap from existing base panel wall mount.
- Black painted stacking wall mounting kit recommended for use with Concensys glass stacking panels.

## Stacking Connectors (page 190)

- Height: 13".
- Available in standard Concensys profiles. Straight, “L”, “T”, “X”, extended straight, and end covers.
- Stacking connector profile must match base panel connector profile.
- Upholstered connectors used between upholstered stacking panels.
- Black painted connectors recommended between glass stacking panels.
- Supplied with a spacer to match connector profile and horizontal reveal space.
- Stacking connector utilizes top cap from base panel connector installation.
- Painted connectors are designed for use with glass stacking panels.
- Each 13"H connector supplied with a profiled spacer.
- Add ⅞" to panel width for each end cover.
- Add 2¼" to panel run for each “L”, “T”, “X”, or extended straight connector.
- 95" and 108" end connectors offered to support a single and double high stacking panel on an 82"H base panel. Not available in painted option.
- Use of stacking panels on 32"H panels will result in non-standard height — will require use of 13"H stacking connectors. See page 182.
- When stacking panel and connectors are added to existing base panels and connectors that also utilize integrated power poles, electrical and data wires must be pulled through the new stacking connectors.

## Variable Height Finish Kits (page 192)

- Available in painted and fabric finish
- Must specify model for each variable height connection.
- Must order size that is equal to the difference in height between panels.

## Tackboards (page 193)

- Use 13"H with half-height shelves hung on 56"H panels.
- Use 18"H with 69"H and 82"H panels.
- Tasklight cords can be concealed behind tackboards.
- Can only be used on one panel in a 90° junction.
- Brackets come attached for mounting.

## How to Order Variable Height Connections Using Variable Height Finish Kits

- For variable height panel connections.
  - 1) Order a standard connector kit straight, “L”, “T”, or “X” in the height and style of the tallest panel.
  - 2) Order the appropriate number of variable height finish kits.
- All variable height connection combinations can be accommodated by the models shown except as noted in the matrix below. Variable height panels cannot be connected to an extended straight connector.
- Low profile variable heights are ordered to finished height.

Variable Height Finish Kit Matrix					
		High Panel Height			
		82"	69"	56"	43"
Low Panel Height	32"		37"	24"	11"
	43"	39"	26"	13"	
	56"	26"	13"		
	69"	13"			

The examples below use 56"H and 43"H panels, reference above matrix to determine required height of finish kits for other height panels.

### 2-Way

1 “L” Connector Kit (height of tallest panel)  
1 13”H Variable Height Finish Kit

1 Straight Connector Kit (height of tallest panel)  
1 13”H Variable Height Finish Kit

### 3-Way “T”

1 “T” Connector Kit (height of tallest panel)  
1 13”H Variable Height Finish Kit

1 “T” Connector Kit (height of tallest panel)  
1 13”H Variable Height Finish Kit

1 “T” Connector Kit (height of tallest panel)  
2 13”H Variable Height Finish Kits

### 4-Way “X”

1 “X” Connector Kit (height of tallest panel)  
1 13”H Variable Height Finish Kit

1 “X” Connector Kit (height of tallest panel)  
3 13”H Variable Height Finish Kits

1 “X” Connector Kit (height of tallest panel)  
2 13”H Variable Height Finish Kits

1 “X” Connector Kit (height of tallest panel)  
2 13”H Variable Height Finish Kits

For specification information see pages 179-184.

\_\_\_\_\_

*Example:* 861324.LC928

**S** Shippable by small-package carrier.

**To Order:**

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
  - The four-circuit system (4-Hot/2-Neutral/2-Ground)
    - 3 + 1 option
    - 2 + 2 option
  - The three-circuit system (3-Hot/3-Neutral/2-Ground)
2. Determine location, quantity and circuit of

3. Determine the appropriate choice and use of isolated, isolated/dedicated and separate neutrals circuits.
4. Specify appropriate power harnesses\* and pass-thru cables.\*
5. Determine the location, quantity and type of power infeed needed.

\* Select power harness models (A8712XX),

Pass-thru cables (A8710XX) and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L" and extended straight connectors.

**Flexconnect™ Electrical System Options**

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

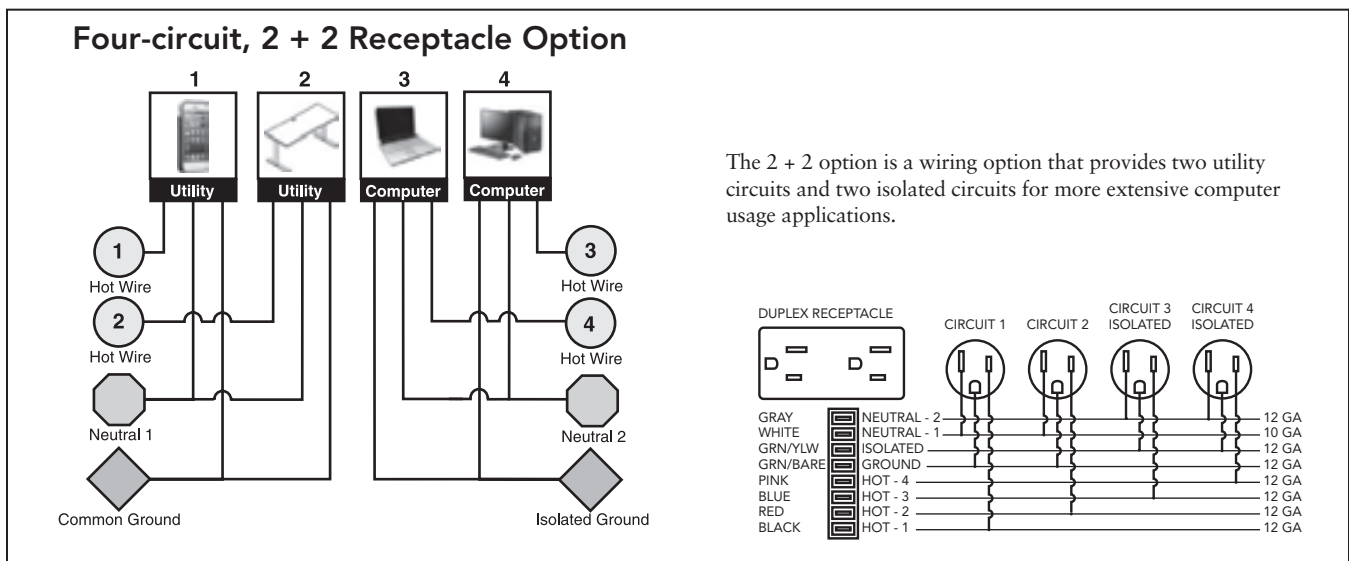

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

Reference the Office Equipment Typical Load Values matrix on page 200.

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

Concensys Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4 Hot/2 Neutral/2 Ground	3 + 1	Common Circuit-1 A871501	Common Circuit-2 <sup>(1)</sup> A871502	Common Circuit-3 A871503	Iso/Dedicated Circuit-4 A871504
	2 + 2	Common Circuit-1 A871501	Common Circuit-2 A871502	Isolated Circuit-3 A871506	Isolated Circuit-4 A871504
Three-circuit 3 Hot/3 Neutral/2 Ground		Common Circuit-1 A871501A	Common Circuit-2 A871502A	Iso/Dedicated Circuit-3 A871503A	N/A

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

**Notes:**

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

**Duplex Receptacle**

15 amp Receptacle

## Concensys Electrical Applications

- Concensys panels are UL 1286 Listed.
- Electrical components are UL Listed and CSA Certified.
- It is the customer's responsibility to ensure that use of the pre-wired electrical system, the number of receptacles used on a given circuit, and connection to a building power source, be in compliance with all local and national electrical codes.

- A licensed electrician must make connections to a building electrical supply.
- To power all panels at a "T" connection, at least one power harness must be used; at a "X", at least two power harnesses must be used.
- Harnesses will stretch up to 3½", to span an extended straight panel connection.
- When multiple 18"W panels are connected at a "T" or "X" connection, an additional 18"W pass-thru cable is required.

- Use power harnesses in all panels adjacent to 18"W panels.
- Pedestals and lateral files, positioned under worksurfaces, may render some receptacles inaccessible, and may prohibit use of grommets.
- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.

Definitions of components:

### Electrical Power Harness

- Used to distribute power in panels 24"W and wider.
- Can be mounted in the base pathway.
- Power distribution in either direction.
- Specify power harness to match panel width.
- Double-sided: receptacles can be inserted into both sides of power blocks.
- Use power harnesses in all panels configured adjacent to 18"W panels (if panel run is to be electrified).

### Electrical Pass-Thru Cables

Pass-Thru Cable Without Duplex Capacity:

- For use in 18"W panels or when no receptacle is required. Specify to panel width.
- Cable length cannot be stretched.
- Allows power distribution through panels where receptacles cannot be positioned.
- When multiple 18"W panels are connected at a "T" or "X" connection, an additional 18"W pass-thru cable is required.

### Electrical Pass-Thru Harnesses

Pass-Thru Harness With Duplex Capacity:

- For use in 24"W and wider panels.
- Use in panels where multiple receptacles are not required.
- Use when specifying both data and electrical at beltline height.
- Added feature: has capacity for one receptacle on each side of a panel. Feature offers future expansion and is an alternative to power harnesses.

### Electrical Jumper Cables

- Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

All electrical power harnesses and pass-thru harnesses will stretch 3½" to span intersections and connections. Jumpers span from beltline to baseline, around corners, and back to beltline.

### Duplex Receptacles

- 15-amp outlet configuration.
- Models A871601 and A871601A have a 20-amp outlet configuration required by some large copiers.
- Fit back-to-back into the power block(s) of power and pass-thru harnesses.
- Labeled with the provided circuit. Circuits connected to the Isolated Ground are identified with an orange triangle; circuits that do not share a neutral or ground have an orange circuit number.

### Power Infeed Base/Ceiling Models A879072, A879072A, A879168, and A879168A

- Used to connect the panel electrical system to the building electrical supply Model A879168 or A879168A is used to connect to the building electrical supply, in a ceiling plenum area. Power pole A870070 must be ordered separately.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into any receptacle position; can be rotated left or right.
- Conduit is UL Listed, black, liquid-tight conduit (outside diameter is 7/8").

### Power Infeed Model A871972 and A871972A

- Used to connect the panel electrical system to the building electrical supply.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into the end of a power block. The end-of-panel base pathway cover can be field cut to provide an access port.
- Model uses UL recognized flex-cable conduit — no portion can be left exposed after installation.

### Power Infeed Models A871912, A871912A, A871918, and A871918A

- Used to connect the panel electrical system to the building electrical supply, in a ceiling plenum area. Power pole A870071 must be ordered separately.
- A licensed electrician must make connections to a building electrical supply.
- Plugs into the end of a power block.
- Models use UL recognized extra-flex conduit.

Illustration is representative of all A8719XX models

**Note:** Infeed cables listed above may be field-cut to desired length. Remove UL Listing/Schematic label and reposition onto the usable length.

Infeeds

77 CAT 6 without electrical  
(60% fill ratio)

Knockout dimensions:  
2.700"W x 1.377"H

Base pathway covers with additional knockouts are available for improved utilization of power and data.

## Electrical

**Electrical Components — Concensys** (pages 194-195)

- Four-circuit components and three-circuit components (with suffix “A”) cannot be used together.

**Electrical Power Harness** (page 201)

- Harness will stretch up to 3½" to span a “T” or “X” connection, by stretching.
- Has an extra terminal connection that pass-thru cables do not have (increases connection capacity — required at some “T”/“X” junctions).
- Use power harness in all panels configured adjacent to 18" W panels (if panel run is to be electrified).
- To power all panels at a “T” connection, at least one power harness must be used; at a “X”, at least two power harnesses must be used. An additional power harness is required when using an integrated power pole.

**Electrical Pass-Thru Harness** (page 201)

- Used to distribute power in panels 24" W and wider.
- Receptacles can be inserted into both sides of power block(s).
- Harnesses will stretch up to 3½" to span “T” and “X” connections.

**Jumper Cables** (page 201)

- Electrical jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

**Electrical Pass-Thru Cable** (page 201)

- Used to distribute power in panels where receptacles are not required.

**Dual Electrical Eight-circuit Power Harness Kit** (page 201)

- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables.
- Requires two four-circuit infeeds.
- Uses four-circuit receptacles.
- Four-circuit components and three-circuit components (with suffix “A”) cannot be used together.
- Models must be positioned “back-to-back” in the panel — single-side use is not permitted
- Components can only be routed in a single run — a single run cannot branch to multiple panel runs at “T” and “X” junctions.
- Four-circuit jumper cables (A8713xx) can only be connected to a power block at one end of a run — power cannot be routed between a run in the base pathway area and a run in the beltline area, except at one end of the run.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity

- Two power infeeds are required to connect the back-to-back runs. Power infeed A8719xx must be connected to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed.

**Duplex Receptacles** (page 202)

- Receptacles are marked with circuit number.
- A871601 and A871601A have a 20 amp plug configuration.

**Power Infeed Cables** (page 202)

- A879072 and A879168 can be plugged into any power block.
- Conduit length: base infeed is 6' long, integrated ceiling infeed is 12' or 18' long and ceiling infeed is 14' long.
- Ceiling infeed (A879168) can be used with power pole model A870070.
- Integrated ceiling Infeed cable connects to a prewired electrical harness in the panel base pathway, transverses through the panel connector, and terminates in the junction box at the top of the integrated power pole.

**Hardwire Applications** (page 202)

- Used when local electrical codes require hardwire entry.
- A871400 or A871400A mounts into panel 30-60" W. When used in 30" W or 36" W panels, power can be routed in only one direction. When used in wider panels, a pass-thru cable for that panel width can be used to route power back in the opposite direction.

**Pull-up Receptacle** (page 202)

- 6' cord w/plug; circuit breaker; mounts in worksurface grommets.
- May interfere with the placement of optional pedestals.
- Included grommet may not match Allsteel worksurface grommets.

**Power/Data Dome** (page 202)

- Fits into existing grommet hole to provide two surface mounted receptacles and two data ports.
- May interfere with the placement of optional pedestals.
- Can be mounted into field-cut, 2¼" diameter hole.
- 6' black power cord.
- 2 simplex receptacles and 2 data positions.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings.
- Many of the AMP, AT&T, Krone, Leviton, and other commercially available data terminals can be used — terminals must be of a design that will snap into .695 x .650, .590 x .790, or .590 x .750 openings, in .064 max. thick faceplates.

(continued on next page)

**Electrical** *(continued)***Power/Communication Pole** (page 203)

- Double cavity used to route infeed cable 879168 from ceiling to panel base pathway.
- Conduit of the infeed cable serves as the division of electrical and communications cabling.

**Integrated Power/Communication Pole** (page 203)

- Installs into 43-82" high or 13"H stacking 90°, "T", and "X" connections.
- In addition to ordering the power pole, an appropriate trim/connector kit must be ordered.
- To power the prewired electrical system, from a ceiling power source, a ceiling infeed cable, model A871912, A871912A, A871918, or A871918A, must be purchased separately.
- Single cavity with removable cover.
- Field-cut to desired length.
- Outside dimension = 2" square.
- For applications requiring integrated power poles longer than 78", an extension kit is available. Contact Allsteel Customer Support for information.
- Not to be used with 120° or 135° connectors.

**Trim/Connector Kits** (page 203)

- Kit consists of:
  - Panel Top Transition Piece
  - 4" x 4" Junction Box and Cover
  - Drop-Ceiling Trim Plates
  - Panel End Brackets
  - Hardware Pack
- A wood option is not available: use a Flint colored model 87007XP.
- Can function at variable height junctures.

**Concensys Connector Bracket Kit** (page 203)

- Used to increase vertical cable capacity through the panel connectors
- Increases vertical wire capacity on a single "T" or "X" connector.

**Data Port Kit** (page 203)

- Allows field installation of additional data ports to Concensys technology panels.
- Knockout dimension: 2.700"W x 1.377"H.

**Wireway Grommet** (page 203)

- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

**Wire Management Channel** (page 203)

- Self-adhesive backing to attach to panels and underside of worksurfaces.
- Contains two cavities for routing wires.
- Note: Each cavity provides space for a maximum of six .25" Dia. cables. Total capacity = 1 sq. in.

**Cable Management Tray** (page 203)

- Attaches under the worksurface to contain cables. Hardware included.
- Metal tray shelf is 4" deep. Can hold most electrical power strips and/or surge protectors.

**Cord Retainer Clip** (page 203)

- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each tasklight cord.
- Package of 50. Black only.

**Cord Organizer** (page 203)

- Attached to bottom of worksurface.
- 4"W x 7/8"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

**Base Pathway Covers** (page 204)

- Features an additional knockout for improved utilization of power and data. Knockouts are 2.700"W x 1.377"H.

**Data Faceplates** (page 204)

- Fit into receptacle and data port openings in panel base pathway covers, or into data port (CDP).
- Due to panel depth, back-to-back data modules should not be used at beltline or in the base.

**Specialized electrical may be available through Allsteel Tailored Products Group.**

### Support Guidelines — See Drawings below

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.
- When using overheads at the end of a panel run, floor supports are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.
- Cantilever brackets cannot be be used at the end of a worksurface

- panel run in place of a return panel or floor support.
- Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 212 and 223.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 213-221.

Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.

When using overheads in panel mounted worksurface run applications 72" and greater, floor support is required.

Worksurface bracket kit should be used to tie panels to worksurface for added stability

These floor supports can substitute a return panel at the end of a panel run: storage, open or closed end support panel, O-legs.

Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return or floor support.

Cantilevers are recommended in place of an external worksurface support channel where feasible.

Worksurface runs 60"W or greater require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 212 and 223.

## Flat Edge Worksurfaces

**Worksurfaces** (pages 222-230)

- Worksurfaces can be specified without grommets by adding suffix “N” to model number for no grommet, no upcharge.

**Primary Worksurfaces** (page 222)

- 24", 30", 36", and 42"W worksurfaces have one grommet, centered; two on widths 48"W and greater.
- Width must correspond with panel width(s). For worksurface to span a “T” or extended straight connection add “T” suffix and upcharge. (All T-span worksurfaces are available in Express Solutions™ except 72"W models.)
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces 60"W or greater require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 20"D and 24" cantilever on 24"D and 30"D worksurfaces.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence®, pages 213-221.

**Bow-Front Worksurfaces** (page 223)

- Standard with two wire management grommets.
- Wave and bow-front worksurfaces can be used with a modesty panel and supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.

**Corner Worksurfaces** (page 224)

- Panel-hung application requires two panels of corresponding width joined at 90°.
- Rear corner support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.
- Leading edge of radial leading edge units has an inside radius of 10%".
- With woodgrain laminate, grain direction is diagonal to grain of adjacent worksurface(s).
- Corner worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.
- One wire management grommet in corner standard.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

**Corner Shelves** (page 224)

- Diagonal leading edge = 10½"
- Diagonal depth = 22½"
- Includes panel attachment brackets.
- Laminate with flat edge.

**Corner Cove Worksurfaces** (page 225)

- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 24"D, and 24" cantilever on 30"D worksurfaces.
- Standard with two wire management grommets.
- Corner cove worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages 213-221.
- Rear corner support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

**Altitude® Height-Adjustable** (page 225)

- For freestanding applications, see height-adjustable tables in the Seating, Collaboration, and Tables Price List.

*(continued on next page)*

**Flat Edge Worksurfaces** *(continued)***Peninsula, P-Shaped, and Jetty Worksurfaces**(page [226](#))

- Standard with one wire management grommet.
- Support column ordered separately, column includes panel support brackets 831099.
- Peninsula worksurface must correspond to the width of its support panel.
- Peninsula and P-shaped worksurfaces can also be attached perpendicularly to a primary worksurface using flat brackets. Do not attach to a worksurface supported with cantilever brackets.
- Worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working with Cadence, pages [213-221](#).

**Quarter-Round Worksurfaces** (page [227](#))

- Connects two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

**D-Shaped Worksurfaces** (page [227](#))

- Order support column and two 11"D end panels separately.
- Not recommended for use with cantilever brackets CCB24L or CCB24R for shared applications.
- Worksurface includes attachment brackets.
- Use only with other worksurfaces with matching edge.

**Countertop Brackets** (page [228](#))

- Countertop brackets must be ordered separately. Model 851500 contains one right-hand and one left-hand bracket.
- Specify paint color.
- Order two model 851500 for straight countertops. Order three model 851500 for corner countertops.

**Countertops** (page [228](#))

- Countertops cannot be used with 32"H panels.
- Corner countertops require two panels of corresponding width joined in an "L".
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.

**Non-Standard Worksurface Sizes** (pages [229-230](#))

- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

## Supports

**End-Panel Support** (page 231)

- Non-handed for use at either end of worksurface.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel-hung applications.
- Can be converted to freestanding with removal of panel-mount bracket.
- Straight worksurfaces adjacent to 120° and 135° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

**Support Leg** (page 231)

- Non-handed for use at either end of worksurface. Leg portion is 12¾"D.
- Use in a shared position or at 90° panel junctions to support adjoining worksurfaces or to support a worksurface adjacent to a dual-surface worksurface.
- Flat bracket included.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel-hung applications.
- Can be converted to freestanding with removal of panel-mount bracket.

**Support Column** (page 232)

- Used to support one end of curvilinear worksurfaces. (Includes panel support brackets.)
- Levelers provide 1½" vertical adjustment.

**Permanent-Wall Hanger Kit** (page 232)

- Mounts to permanent dry-wall to hang panel-hung components.
- Wall track has ⅛" x ½" slots on 1" centers.
- Customer to furnish connecting hardware. (Refer to Concensys Installation Instructions for appropriate hardware.)
- Worksurfaces should not be supported with cantilever brackets when using permanent-wall hanger kit.
- An integral channel is provided for vertically routing task light cords.
- Includes a cover for top of channel.

**Cantilever Brackets** (page 231)

- Use with runs less than 96". Floor support is required for runs 96" and longer.
- Where applicable, cantilevers are recommended over an external worksurface support channel. Worksurface runs over 60"W require an external worksurface support channel when a cantilever cannot be used.
- Do not use at the end of a worksurface where no 90° return panel is positioned.
- Includes tie bracket and attachment hardware.
- Avoid installation on only one side of a straight connection except to support corner worksurfaces.

- DO NOT use to support worksurfaces from which a hanging pedestal is suspended, or to which a peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.
- Do not use with wall track or to support a worksurface to which a return worksurface is attached.

**Cantilever Bracket — Handed** (page 231)

- Cantilever brackets are handed (left or right) and can be inserted into panel reveals in 1" vertical increments. No assembly required.
- Left- and right-hand brackets required in shared applications.
- 24"D cantilevers are required to be used for both 24"D or 30"D worksurfaces.
- 18"D cantilevers are required to be used for 20"D worksurfaces or center support for 24"D.
- 12"D cantilevers are required to be used for 12"D worksurfaces.

**Cantilever Bracket — Non-Handed** (page 231)

- Cantilever brackets are non-handed and can be inserted into panel reveals in 1" vertical increments. Assembly required.
- One bracket in shared applications — includes two angled brackets.
- Bracket accommodates 24"D or 30"D worksurfaces.

**Worksurface-to-Panel Bracket** (page 231)

- Model 831324 mounts to a 24"W panel to support a 24"D worksurface.
- Model 831330 mounts to a 30"W panel to support a 24"D or 30"D worksurface.

**Worksurface Bracket Kit** (page 231)

- Used to connect the end of a worksurface to a panel of the same width.

**Flat Brackets** (page 231)

- Flat Brackets can be used to connect one worksurface perpendicularly to another worksurface.

**Pedestal-to-Panel Attachment Bracket** (page 231)

- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Is compatible with Align™ and Essentials™ pedestals.

**External Worksurface Support Channel** (page 223)

- Is required on a systems worksurface for additional support for spans greater than 60"W. Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface. Installs 7" from user's edge.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports.

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

## Configurations

Full Modesty

Half Modesty

Gussets

### All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

### Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Optimize™, Terrace®, and Concensys, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel storage solutions and Extensions — work tools to provide personalized organization for every workstyle.

**Systems integration** — Cadence works in combination with Optimize, Terrace, or Concensys panels, extending the functionality of both product lines.

**Highly adaptable** — Make the most of building architecture by using an existing wall to create a semi-private workspace.

**Space utilization** — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

**Team interaction** — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

### The Cadence Choice

It works in the open plan, the private office, or in combination with Optimize, Terrace, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

## Configurations

### End Panels **E** and Support Legs **L**

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

The 11" D end panel is used to freestand peninsulas, curvilinear shapes, and D-tops in panel applications.

### Corner Desk Legs **C**

Corner desk legs have a 90-degree bend and welded construction. The strong construction, allows gussets or half-height modesty panels to be used with corner legs.

### Bridge Kits **B**

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

### Surface **S**

### Support Column **SC**

### Return Kits **R**

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

### Desk-to-Panel Attachment Kits **D**

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk attachment kit. “Hand” of unit is determined from the user’s side of the desk (right hand unit attaches to right side of modesty).

## Corner w/Desk Panel Attachment Kit **CW**

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. “Hand” of unit is determined from the user’s side of the desk (left hand unit attaches to left side of modesty).

## Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

## In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24" D full end panels may be used at the in-line junction on 30" D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.

## Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 18" D or 20" D peds should be used with 24" D worksurfaces. 18" D, 20" D, or 23" D pedestals can be used with 30" D worksurfaces. Using 18" D laterals or personal files provide additional pull style and storage options under 24" D worksurfaces.

## Modesty Panels **M**

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

## Stand-Alone Corner Modesty Panels **SM**

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

## Gussets **G**

Gussets can be used in place of a modesty panel with desks 36" W to 60" W. Gussets can also be used with corner desk legs.

## Configurations

### Freestanding Desk

Example Shown		
Qty.	Model	Description
1	T52436S	Flat Edge Worksurface 24"D x 36"W
2	CEP2429F	End-Panel Support 24"D x 29½"H
1	CS369	Modesty Panel 36"W x 29½"H

### Panel-Attached Desk

Example Shown		
Qty.	Model	Description
1	T52436S	Flat Edge Worksurface 24"D x 36"W

## Cadence Supports

**End-Panel Support** (page 232)

- End panels are non-handed.
- Freestanding end panel is the same as the Concensys panel-mount end panel except removable panel-mount bracketry not included.
- End panels include attaching hardware and leveling glides.
- Leveling glides provide 2¼" of adjustment.
- End panels are universal, shipped with a left and right-hand attachment bracket.
- End panels cannot be used for in-line junctions and are only used at the end of a panel run.

**Support Leg** (page 232)

- Support legs are non-handed.
- Freestanding support leg is the same as the Concensys panel-mount support leg except removable panel-mount bracketry not included. Leg portion is 12¾"D.
- Supports junctions of two worksurfaces.
- Includes a flat bracket.
- Concensys in-line support legs are used to support 24"D worksurfaces only in a shared position.

**Panel-mount Bracketry** (page 232)

- Includes hardware to convert freestanding end panels and support legs to panel-mount.
- Non-handed.

**Support Column** (page 232)

- Used to support one end of curvilinear worksurfaces.
- Includes panel support brackets.

**Permanent-Wall Hanger Kit** (page 232)

- Mounts to permanent dry-wall to hang panel-hung components.
- Wall track has ⅛" x ½" slots on 1" centers.
- Customer to furnish connecting hardware. (Refer to Concensys Installation Instructions for appropriate hardware.)
- Worksurfaces should not be supported with cantilever brackets when using permanent-wall hanger kit.
- An integral channel is provided for vertically routing task light cords.
- Includes a cover for top of channel.

**Corner Desk Leg** (page 232)

- Attaches two modesty panels at rear of corner desk.
- Leveler provides 1½" vertical adjustment.

**Bridge Kit** (page 232)

- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.

**Return Kit** (page 232)

- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat bracket and one modesty panel-to-end-panel bracket.

**Desk-To-Panel Attachment Kit** (page 232)

- Used to connect a worksurface and modesty panel perpendicularly to a Concensys panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit
- “Hand” of unit is determined from the user’s side of the desk (left hand unit attaches to left side of modesty).

**Corner w/Desk Panel Attachment Kit** (page 232)

- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Concensys panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- “Hand” of unit is determined from the user’s side of the desk.

**Flat Brackets** (page 232)

- Flat brackets can be used to connect one worksurface perpendicularly to another worksurface.

*(continued on next page)*

Cadence Supports and Modesty Panels (continued)

**Modesty Panel** (page 233)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is 3¾" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels or gussets can now be used with corner or corner cove worksurfaces.
- Refer to pages 213-221 to select proper width.

**Stand-alone Corner Modesty Panel** (page 233)

- Use only when freestanding one or both sides of a corner or corner cove worksurface.
- Specify width the same as width of worksurface.
- See examples on page 218 on how to specify.
- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 14¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6⅙" less than the nominal dimension listed below.
- Modesty panels are inset 2⅞"; when adding pedestals, consult the chart below.

**Gussets** (page 233)

- Can be used in place of a modesty panel with desks 36"W to 60"W.
- Provides easy access to wall outlets.
- Can be used with corner desks.
- Cannot be used with suspended pedestals.
- Modesty panels are inset 2⅞"; when adding pedestals, consult the chart below.
- Gussets can be used on corner and corner cove worksurfaces.

**Universal Modesty Panel** (page 234)

- Mounts under peninsula, p-shape, jetty, and boomerang worksurfaces.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for P2 paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

Universal Modesty Panels for Concensys Worksurfaces

Model	Peninsula			P-Shape	Jetty		Boomerang
	60"L	66"L	72"L	72"L	66"L	72"L	72"L
PMP41	•						
PMP47		•		•	•		
PMP53			•			•	•

**Metal Center Drawers** (page 234)

- All metal center drawers feature pencil trays with three compartments for storage.
- For locking specifications, see pages 318-320.
- Ball-bearing slide suspension.

Pedestal Compatibility with Cadence Desking and Systems Worksurfaces

Pedestal Depth	Cadence Freestanding		Systems Panel-hung Worksurfaces	
	24" Deep	30" Deep	24" Deep	30" Deep
18"	Yes	Yes	Yes	Yes
19⅞"	Yes*	Yes	Yes*	Yes
23⅞"		Yes	Yes*	Yes
29⅞"				Yes*

\*Wire management grommet is blocked in these applications.

**Note:** Pedestal placement may affect access to receptacles in base pathway.

# Worksurfaces

For specification information see pages 205-212.

#### ORDERING

The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120" W x 36" D.

Specify:

1. **Model Number**  
Specify closest nominal width/depth model (round up).
2. **Grommet Option** (if desired)  
See grommet specification instructions on this page.
3. **Grommet Type:**  
**P** Plastic  
**M** Metal (add \$11 per grommet for laminate)
4. **Grommet Color:**  
(Metal only)  
**EL** Matte Silver  
**NOTE:** Plastic grommet will match flat edge.
5. **Laminate Choices**  
See page 176.
6. **Flat Edge Color Choices**  
See EDGE COLORS page 176 for laminates.
7. **Exact Size**  
Specify the **EXACT Width** and **EXACT Depth** you require.  
Width and depth is specified in 1/8" increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

1/8" = 1	5/8" = 5
2/8" = 2	6/8" = 6
3/8" = 3	7/8" = 7
4/8" = 4	no extra increment = 0

For example, when ordering a worksurface that is 34 3/8" W x 20 1/2" D, specification should be 345Wx204D.  
*Example: 9120R3624.G0.TM33.EU.345Wx204D.*

#### PRODUCT SPECIFICATIONS

- Flat Edge on all sides
- 45 lb. particle board
- 1 1/8" top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

**Note:** 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

When spanning multiple freestanding storage units with one worksurface, add 1/8" for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" + 1/8" + 1/8" = 90 1/4" worksurface. Do NOT follow this rule if panel wrapping storage units.

#### CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program Worksurfaces.

#### GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate.

#### PRICING

One Grommet – GC, GL, or GR Position ..... \$17.00  
Two Grommets – G3 or G4 Position..... \$34.00  
**NOTE:** Add \$11 per grommet for Metal grommets with laminate.

#### ORDERING

Specify grommet location and color.  
Example: 9120R10836.GCP.TM33.EU.1022Wx326D

#### Code Grommet Position

- GC Centered side-to-side – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- GL 6 1/16" from left side to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- GR 6 1/16" from right side to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- G3 Pair of grommets each 18" from side edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each 6 1/16" from side edge to grommet edge – 3/8" from rear to grommet edge; 4 1/2" from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.

Grommet positions other than those shown above are considered non-standard.

## Hutch

Square Flipper Door

# Overheads & Shelves

Overhead storage components maximize the use of space in the workstation and also provide convenient access to binders, reference materials, software packages, and miscellaneous supplies.

## Product dimensions

### Overhead Storage Cabinet

**Width** 24" (except receding door), 30", 36", 42", 48", 60" (with 2 doors)

**Inside width** ⅝" less than width

**Depth** 14¼" (Receding Door is 13¼"D)

**Inside depth** 12⅞" (Receding Door is 12⅞"D)

**Height** 15" (Receding Door is 15"H)

**Inside height** 12¾" (Receding Door is 11⅝"H)

### Bookshelf

**Width** 24", 30", 36", 42", 48", 60"

**Depth** 14¼"

**Height** 6"

**Task lights** can be mounted beneath storage shelves and overhead storage cabinets. Additional panel hung and freestanding lighting options are available.

**Cord retainer clips** fasten into panel slots to anchor power cords. Available in black only. Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately. Painted or fabric covered cord covers are available for Concensys.

## Specification Guidelines

In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. Do not suspend more than one overhead storage unit per side from panels in a panel run which is mounted, at one or both ends, with an off-module connector kit.

**When overhead storage units are suspended from stacking frames,** the following guidelines should be adhered to:

Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.

A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.

With Concensys, a full height panel end cover is required for adequate stability when using overhead storage on the end of a run, or on a return panel.

No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

**Storage shelf and receding door overhead width** must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.

**Overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet, or on panels wider than the overhead cabinet when using off-module kit. One side of overhead must be held on module.

**Overhead storage cabinets** and open storage shelves can be mounted on Concensys structural and stacking panels to a maximum height of 69" (above left). They may be placed up to the top level of 82"H Concensys structural panels.

**Overhead Cabinets, Upmount Kit, Bookshelves, and Tackboards**

**Overhead Cabinets with Flat Doors for Concensys**

(page 240)

- Storage cabinets have flat flipper doors with square horizontal edges.
- Standard with a factory-installed core removable lock located on the underside of the cabinet.
- Width must correspond with width of panel or 2 panels joined with a straight connector.
- Cabinet has backstop.
- When mounted at an outside “T” connection or at an Extended Straight connection, there will be 2¼" between storage units.
- All units feature an anti-dislodgement device.
- 60" units are one-piece cabinet with two doors and locks.
- Accommodates recessed task lighting (specified separately).
- Storage cabinets are shipped pre-assembled.
- For locking specification, see pages 318-320.
- Cabinets are 14⅜"D x 15"H with inside dimensions of 12⅞"D x 14⅞"H.
- Concensys Essentials overhead cabinets can be mounted on a panel up to 18" narrower than the cabinet by using off-module overhead mounting kit COMBKT. Requires removal of existing vertical bracketry. (For units produced after 2/1/2004.)

**Horizontal Wall Track** (page 240)

- Allows for mounting Essentials™ overheads on permanent wall structures ONLY.
- NOT for mounting old style Essentials overheads or for receding door units.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- Available in black only.
- Attachment hardware is not included.

**Upmount Overhead Conversion Kit** (page 240)

- Consists of two upmount brackets, full back panel and required installation hardware.
- Available in P1 and P2 colors.
- Allows mounting of overhead case up to 13" above height of panel.
- Brackets require a clearance of 6½" below bottom of overhead cabinet.
- Width must correspond with width of panel, or 2 panels joined without a connector.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.
- For use with overhead cabinets (except RTA and receding door units) produced after February 1, 2004.

**Receding Door Overhead Storage Cabinet** (page 240)

- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or square pull optional.
- 60"W cabinet has 2 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 318-320.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅞"D x 11⅞"H.
- Weight Limits:
  - 30"W ..... 70 lbs.
  - 36"W ..... 85 lbs.
  - 42"W ..... 100 lbs.
  - 48"W ..... 110 lbs.
  - 60"W ..... 138 lbs.

**Receding Door Overhead Back** (page 240)

- Optional for use with receding door overhead.
- Order width to match overhead cabinet.

**Open Bookshelves** (page 241)

- Width must correspond with width of panel or 2 panels joined with a straight connector.
- When mounted at an outside “T” connection or at an extended straight connection, there will be 2¼" between shelves.
- All units feature an anti-dislodgement device.
- Accommodates recessed task lighting (specified separately).
- Weight Limits:
  - 24"W .....61 lbs.
  - 30"W .....77 lbs.
  - 36"W .....93 lbs.
  - 42"W .....108 lbs.
  - 48"W .....124 lbs.
  - 60"W .....155 lbs.

**Tackboards** (page 241)

- Use 13"H with half-height shelves hung on 56"H panels.
- Use 18"H with 69"H and 82"H panels.
- Task light cords can be concealed behind tackboards.
- Can only be used on one panel in a 90° junction.
- Brackets come attached for mounting.

## Hutches, Dividers, and Tackboards

### Stack-on Hutches for Cadence (page 242)

- Stack-on hutches have flipper doors with square horizontal edges. Universal model can be converted to an open hutch.
- Stack-on hutches with doors are standard with a core removable lock (60"W, 66"W, and 72"W have two doors and two locks).
- Hutches mounted on a 29½"H x 1¼" thick worksurface corresponds with the height and look of Essentials overhead cabinets mounted on 69"H Concensys panels.
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Stack-on hutches have a height clearance of 19¾" for computers, etc.
- Depth dimensions 14½" includes thickness of door, inside binder depth 12¾.
- Stack-on hutches are shipped easy-to-assemble.
- Accommodates recessed task lighting (specified separately).
- Chicago task light cords cannot be routed through the hutch end panels, due to the large size of the fused plugs.
- For locking specifications, see pages 318-320.

### Dividers (page 242)

- Shelf dividers for use with stack-on hutches.

### Tackboards (page 242)

- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72"W tackboards are available in railroad cut only.
- Tackboards for use with stack-on hutches.

Height-Adjustable Worksurfaces, Bases, and Controls

Height-Adjustable Worksurfaces (page 261)

- Height-adjustable worksurfaces are available in laminate with flat edge and rectangular veneer with matching square edge.
- T-mold is used on the edge of curved worksurfaces. This will have a noticeable visual difference when directly adjacent to straight worksurfaces.
- Worksurface dimensions are nominal. Actual widths are reduced by 2" (1" each side) and worksurface depths are reduced by ¼". Corner cove depth is nominal, actual is 1" less.
- **Rectangular undersized worksurface models' (model number ending in -U) actual widths and depths are reduced by 2".**
- **Corner Cove undersized worksurface models' (model number ending in -LD) actual dimensions are reduced by 2".**
- Altitude worksurfaces are pre-drilled with mounting location for bases.
- Rectangular worksurface grommet location is limited to center location due to mounting of worksurface supports at each end of the worksurface.
- **A6 load capacity is 250 lbs for 2-leg models, 320 lbs for 3-leg models, 350 lbs for 2-leg Max models, and 500 lbs for 3-leg Max models. This includes the weight of the worksurface.**
- **Certain two-piece top configurations may require two stiffeners depending on the footprint of your station.**

Height-Adjustable Bases (pages 258-259)

- Electronic height-adjustable base units are available in six styles: A6-T Base with 2 legs, A6-C Base with 2 legs, A6-T Base with 3 legs, A6-C Base with 3 legs, A6-T Max Base with 2 legs, A6-C Max Base with 2 legs, **A6-T Max Base with 3 legs, and A6-C Max Base with 3 legs.**
- A6 2-stage 1.2"/sec, A6 3-stage 1.4"/sec, A6 Max .8"/sec. Motor devices have a continuous cycle time of 2 minutes with an 18 minute rest period before it can be cycled again.
- Control box is powered by 110-120V/60Hz/4A. Standby power is < 0.1 Watts. Power cords on A6-T models are 10'.
- Pedestals taller than 24½" for 2-stage models and 19½" for 3-stage models when placed under table will limit range in lowest position.
- Mobile box/file pedestals will clear feet on height adjustable base but will extend past edge of worksurface in that position. See chart on page 255.
- Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
- All tables have adjustable glides providing ½" adjustment on A6.
- Slide glides offered as a .option and model level. Only available on 2-leg bases.
- **3-Leg standard bases can accommodate worksurface configurations from 24"D x 48"W x 36"W to 30"D x 72"W x 48"W.**
- **3-Leg Max bases can accommodate worksurface configurations from 24"D x 48"W x 36"W to 30"D x 72"W x 72"W.**
- Casters available on model level for retrofitting on 2-Leg Bases ONLY.
- Altitude A6 tables feature **collision detection**, a feature designed to stop table travel when the table detects an obstacle.
- Altitude A6 bases specified with a work surface 60"W and greater require the use of an external stiffener. An external stiffener is included in Altitude work surface models 60"W and greater (all models ending with letter -D). If a non-Altitude work surface is being used, an external stiffener may need to be specified separately.

A6 Control Options

- Memory Controls are now a .option.
- Up/Down: Basic Up/Down control.
- Memory Control: 4 memory pre-set options allow the user to adjust their height to their preferred heights.
- Paddle: Simple, aesthetic control with 1 memory pre-set option and reminder mode.
- Foot Control: Basic up/down wireless, hands free control. Can be paired with hand controls for multi-control option.
- Bluetooth Capability: A6 optional Bluetooth capability is sold as accessory model A6BLUETOOTH. Bluetooth is enabled through smartphone app AiDesk. Bluetooth control will only work with 2-leg A6 tables. Bluetooth control will **not** work with 3-leg A6 tables.

Altitude Basic (page 260)

- Altitude Basic can accommodate either 24"D or 30"D work surfaces
- Altitude Basic can accommodate work surfaces ranging from 48"W to 60"W, 60"W is the maximum work surface size for the Altitude Basic
- Supports weight capacity of 180 lbs.
- Control Box: 100-240V, 3.6A, 50/60Hz, 400W
- 9' grounded power cord
- 1½"/second travel speed
- Available in silver only
- Available with up/down control only
- Features "easy-to-assemble" installation

Foot Controls

- Wireless, hands free control.
- Can be paired with hand control for multi-control option.
- 2 AAA batteries needed. Batteries not included.

Cross-sectional Area Inside Under Worksurface Troughs

## Cable & Wire Management

Cable Management Tray

Wire Management Channel

### Cable Management Tray (page 266)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

### Wire Management Channel (page 266)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

### Cord Management Chain (page 266)

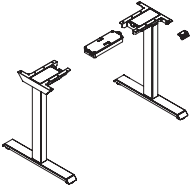

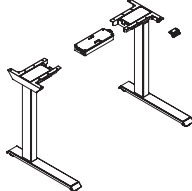

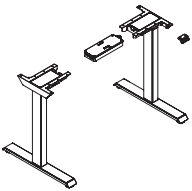

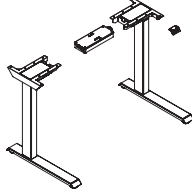

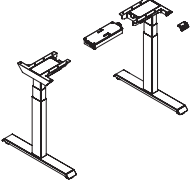

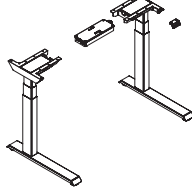

- Works with Approach and Altitude **A6-units**.
- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware and a plate to secure to a leveling glide.
- Houses 6 cables @ 0.300" diameter.
- Made of plastic chain with plastic attachment brackets at each end. Only comes in Black finish.

### Under Worksurface Trough (page 266)

- Used to conceal wires and control box below worksurfaces. Trough can be configured at various height/width combinations to meet capacity needs — see illustrations below.
- On 48"W and 54"W worksurfaces use one 17"W trough. 54"W has space to use 2 – 17"W, if necessary.
- On 60"W, 66"W, and 72"W worksurfaces use the 36" trough.
- On 84"W worksurface use 2 – 17"W troughs.

### Quad Tap (page 266)

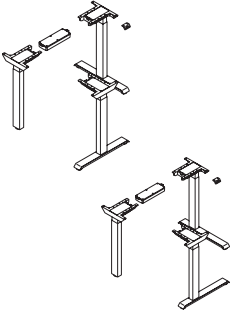

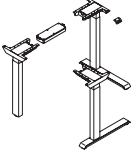

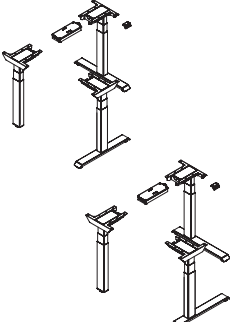

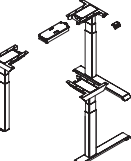

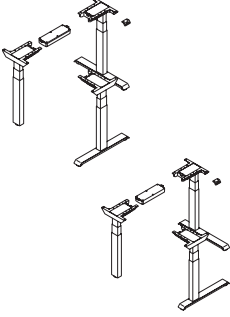

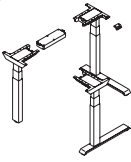

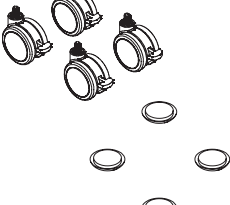

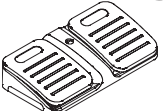

- Under surface mounting, used on any worksurface.
- 10' Power cord. UL Listed
- 4 Simplex receptacles.
- May be used in conjunction with hinged trough to reduce the number of cords routed from a worksurface to a beam.

Shippable by small-package carrier.

Screens

- See Table 1 for overall table width and depth for each screen shape.
- Adding a screen adds 3" to depth of the table.
- Adding a screen adds 1" to the width of the table per return wing.
- RH L-screens have return wing on user's right; LH opposite.
- **When using a 24"D worksurface with Altitude screens, you must specify a T-foot.**

Power Module

- Contains 5 simplex outlets and 1 dual USB.
- Available in plastic or metal. Metal power module is required for Chicago code.
- Cord options include straight and curly.
  - Straight cord is 144"
  - Curly cord is 120"

**Altitude — Metal Screens** (page 288)

- Powder coated magnetic metal privacy screen.
- Metal surfaces can be easily disinfected with cleaners. See cleaning guide for more details at AllsteelOffice.com.
- Available in all standard paint colors.
- Provides 1" gap along the back for accessory mount and cord drop.
- Available in 48"W, 54"W, 60"W, 66"W and 72"W.
- 66"W and 72"W screens include 3rd center bracket.
- Available in Straight, L- and U-shape configurations. Above and Above/Below desk applications.
- L- and U-Shape screens are not compatible with shrouded Height Adjustable Table legs.
- Optional tackable accessories specified separately.
- 66"W tackable accessory comes as a set of (2) 24"W.
- 72"W tackable accessory comes as a set of (2) 20"W.
- Available in standard and extended wings.
- Wings mount flush to the edge of the surface with an L-Bracket.
- 20"W tackable accessory must only be applied to both standard and extended wings without accessory slots.
- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.
- Do not hang more than 5lbs of weight on wings.
- Screens are compatible with Radii undermount storage.
- Not compatible with standard 120-worksurfaces. Contact Allsteel TPG for custom sizes.
- **When using a 24"D worksurface with Altitude screens, you must specify a T-foot.**

**Size Reference Matrix**

Tackboards	Wing	48"W	54"W	60"W	66"W	72"W
Actual Dimensions	20"W	30"W	36"W	42"W	20"W	24"W
Set of Tackboards	1	1	1	1	2	2

**Accessories — Tackboard** (page 289)

- Tackable accessories come with metal frame available in standard paint colors and fabric options.
- Attach to the screen using a dual lock tape (included in hardware).

**Accessories — Radii** (page 289)

- Wings are available with accessory slots that accept Radii Hot File, Side Saddle and Coat hook.
- Top slot can accept one Radii accessory.
- Bottom slot can accept a Coat hook and one other accessory.
- Accessories can hang on either side of the wing.
- TIP: If the Hot File is used in the top slot, it will block access for accessories in the bottom slot.

**Accessories — Further Worksurface Rail Mount** (page 298)

- Accessory rail must be field cut to fit between the screen brackets.
- The following accessories are not compatible with screens: U9WTC and U9TM.

Routing Power ..... 277

**GENERAL OVERVIEW**

- Accommodates power and lay-in capacity for data cables.
- Available in 48", 54", 60", 66", and 72" lengths.
- Maximum of 2 duplexes and 2 data ports per side of rail.
- Models come equipped with hardware for in-line connections.
- Fiber optic cables can follow 90 degree turns at the intersection of the power rails.
- Power harnesses snap into electrical brackets within the power rail and accept duplex receptacles.
- Electrical power harness accepts up to 2 duplex receptacles per side of rail.
- End caps are required at an end-of-run, unless connected to an end-of-run power pole or a hub.
- Power rail can be set low to the floor using the floor legs or raised off the floor at 20½" H with elevated legs.

- 1) Power Rail
- 2) Power Rail Support
- 3) Universal Connector
- 4) End Cap

ALTITUDE

**WORKING WITH ALTITUDE POWER RAILS**

**Low Rail with Floor Legs:**

- Each power rail is supported by (2) floor legs.
- Floor legs have a leveling mechanism that can adjust up to 1¼"H.
- Legs are specified separately and come in qty of 1. Each leg is 7¼"D x 2¼"W.
- Leg is inset 2.8" from end of the power rail.
- Universal connector allows "L", "T" and "X" configurations.
- Can connect directly to another power rail in linear applications without use of the universal connector.
- Cannot mount screens on the low rail.
- Power infeed can access the power rail in multiple ways:
  - through a receptacle position on the power rail (side infeed).
  - through the end cap on to the first power block.
  - through power pole using a power pole connector kit.

**Raised Rail**

- Power rails can be raised up to 20½"H using Elevated Legs and/or Hubs.
- Elevated Legs and Hubs can be used in conjunction to create the desired capability and aesthetic.
- Can be in Linear, L-, T- or X-configurations using Elevated Legs, Hubs or Universal Connector.
- Supports screens. See screens section for more details.
- Elevated Legs
  - Inset 2.8" from end of the power rail.
  - Can be shared in between the two rails in linear configuration.
  - Cannot route power and/or data.
  - Specified separately and come in qty of 1. Foot is included.
  - Leg is 15¼"D x 2¼"W x 17¾"H.
  - Order RFDRAWAB separately to anchor to floor. Appropriate fasteners per floor type sourced locally.
- Support Hubs
  - Connect directly to the power rail.
  - Can be shared in between the two rails.
  - L-, T- and X-hubs can be shared in between power rails.
  - End of Run hub is only specified at end condition.
  - Can route power and/or data.
  - Can integrate power pole. Power Pole connector kit is specified separately and come in qty of 1. Foot is included.

**Screens**

- Constructed of painted steel material.
- Standard Allsteel paint options can be applied.
- Screen height is 20"H, provides overall height of 42"H above fixed floor.
- Painted steel is magnetic and cleanable. Refer to cleaning solutions page at Allsteel Office website.
- Attachment hardware included.

ALTITUDE

Altitude Desk + 60"W Low Rail + WKSVMC

Altitude Desk + 60"W Raised Rail + A9CLWMC

### WORKING WITH CABLE MANAGEMENT

- Used to route and conceal power/data cables from control box and other devices. Includes all mounting hardware.
- Houses 6 cables @ 0.300" diameter.
- Specify WKSVMC for 58" chain. Only comes in Black Finish. Recommended for use with Low Rail.
- Specify A9CLWMC for 36" chain. Comes in Black, White and Silver. Recommended for use with Raised Rail.
- Links the power rail to a height adjustable desk.
- Has two connecting points: Top section connects underneath the Height Adjustable Desk and the bottom section connects underneath the power rail using a double-sided tape. Hardware included.
- When mounting the chain to underneath the rail, an adapter link is required. Included in the hardware.

## WORKING WITH POWER RAIL ELECTRICALS

### General Notes about Electrical and Circuitry:

- Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
  - See Altitude Pricer section “Working with Electrical” for a detailed explanation of each electrical system.
  - All four systems utilize an 8-wire electrical system, rated at 20 amps.
- Per circuit (15 amps Canadian) — 16 amps plannable in U.S.
  - Power Rail and electrical components are UL Listed. Electrical
- Components are also CSA certified.
  - Installation and use of the electrical system, the number of receptacles.
- Used on a given circuit and connections to the building power supply.
- Should follow all local and national electrical codes.

### Electrical Infeeds

- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.
- Refer to rail supports for infeed access points.

**Routing Power**

- Power infeed can access the raised power rail in multiple ways:
  - Through power pole using a power pole connector kit.
  - Through Support Hubs.
  - Through the infeed vertebrae.

ALTITUDE

**Electrical Systems**

**General Notes about Electric, Circuitry, and Chicago Code:**

- Power Rail offers a choice of four electrical systems:
  - Four-circuit, 3 + 1
  - Four-circuit, 2 + 2
  - Three-circuit, separate neutrals
  - Eight circuits; two four-circuit systems provided back to back.
- See pages 279-280 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian) — 16 amps plannable in U.S.
- Power Rail and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

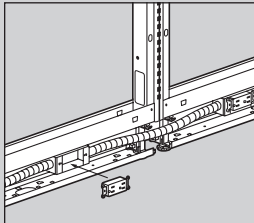

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.**

**Note: No more than one conduit that is connected to a harness mounted to horizontal can be routed through the same cut out in the same horizontal at beltline. Attempting to use more will cause binding of conduit and may affect reveals on receptacles.**

**Hardwire New York Code (page 284)**

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry. 
- For use in panels 48" W to 72" W.
- Unit must connect to a power harness.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.
- For NY infeed through the end cap:
  - Order 24" pass-thru harness with power block A871124.
  - Will not have power at first cut-out from infeed.
- For NY infeed through a power rail cut-out:
  - Order 48"-72" pass-thru harness with power block. *Harness width must match power rail width.*
  - Will not have power at cut-out location used for infeed.
- For any power rail not used for infeed, order standard electrical power harness.

**Hardwire Chicago Code (page 286)**

- Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all-metallic components.
- The base pathway, junction box (model 873600) clips directly into receptacle locations and can be used both single- and double-sided.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway and conduit, wiring, designer-type receptacles, and receptacle covers for the beltline.
- Power entry can be routed from the floor into a junction box (model 873600). 

**Electrical Infeeds**

- Power infeed cables deliver power from building to panel's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling infeed cables depending on individual power requirements.

**Base Infeed (page 285)**

- Sealtight base pathway power infeed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.
- A jumper is required to connect base pathway power to beltline.

**Sealtight Electrical Infeed (page 285)**

- Sealtight electrical infeed cable is used with footed panels.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of panel out to be connected to power.
- Cannot be connected to power harness in panel frame that infeed is brought into unless additional pass-thru harness without power block is used to feed from below beltline to above beltline.

**Power Infeed (page 285)**

- Power infeed connects to a prewired electrical harness in the power rail.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

**To Order:**

- Determine which electrical system you will use after consulting your electrician and computer support personnel:
  - The Four-circuit system (4-Hot/2-Neutral/2-Ground)
    - 3 + 1 option
    - 2 + 2 option
  - The three-circuit system (3-Hot/3-Neutral/2-Ground)
  - The eight-circuit system (back-to-back four-circuit systems)
- Determine location, quantity, and circuit of duplexes.
- Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
- Specify appropriate power harnesses\* and pass-thru cables.\*
- Determine the location, quantity, and type of power infeed needed.

\* Select power harness models (A8712XX), with the last two digits corresponding with the panel width into which the component is to be positioned.  
The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

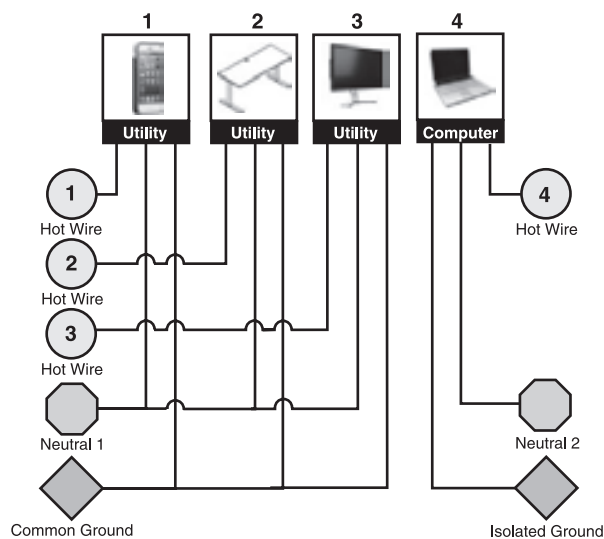

**Flexconnect™ Electrical System Options**

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this price.

All three systems utilize an eight-wire electrical system rated at 20 amps per circuit (15 amps Canadian). Concensys panels and electrical components are UL listed and CSA certified.

**Four-circuit, 3 + 1 Receptacle Option**

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

**Four-circuit, 2 + 2 Receptacle Option**

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

Altitude System Receptacle Usage					
Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 A873501	Common Circuit-2 <sup>(1)</sup> A873502	Common C ircuit-3 A873503	Iso/Dedicated Circuit-4 A873504
	2 + 2	Common Circuit-1 A873501	Common Cir- cuit-2 A873502	Isolated Circuit-3 A873506	Isolated Circuit-4 A873504
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 A871501A	Common Circuit-2 A871502A	Iso/Dedicated Circuit-3 A871503A	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

**Notes:**

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel model numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust-colored.

**Duplex Receptacle**

15 amp receptacle

### Infeeds

- Power infeed cables deliver power from building to Power Rail's electrical system.
- Infeed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of infeed cables depending on individual power requirements.

### Base Infeed:

- Sealtight base pathway power infeed mounts into any receptacle position in the power rail housing.
- A heavy rubber sheathing shields conduit, allowing infeed to be exposed.

### Sealtight Electrical Infeed:

- Sealtight electrical infeed is used for power entering through the end cap.
- Should not be ordered prior to installation to have pre-wired as infeed must be routed from inside of the power rail out to be connected to power.

### Power Harness

**Electrical power harnesses** are used to distribute power in the power rail. **Power blocks** on electrical power harness accept duplex receptacles.

- Electrical power harnesses are used to distribute power in Power Rails. Harnesses must be installed in each power rail housing.
- Specify harness length to match rail housing length. Each power harness accepts four duplex receptacles (two on each side of power rail housing).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in power rail housing.

### Power Blocks

- Power blocks snap directly onto brackets in the power rail and accept receptacles (sold separately) on each side of harness.

### Duplexes

Duplex Receptacles

### Receptacle Color Recommended to Coordinate with Paint Color

Paint Color	Receptacle Color
Bungalow — P7C .....	Muslin — EU
Champagne Metallic — PR5 .....	Muslin — EU
Cinder — P7Q .....	Brownstone — EY
Fossil — P28 .....	Flint — E9
Gunmetal Metallic — PR3 .....	Brownstone — EY
Parchment — P93 .....	Muslin — EU
Pebble — P8R .....	Loft — EV
Pewter — P8D .....	Flint — E9
Platinum — PR2 .....	Loft — EV
Platinum Metallic — P42 .....	Silver — E5
Salt — P8C .....	Silver — E5
Titanium — P8T .....	Silver — E5

- Duplex receptacles snap into power blocks of power harnesses.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3 or 4.
- Duplexes are model specific to support either 3 + 1 and 2 + 2 electrical infeed; or have an "A" suffix and are designed to support a three-circuit separate neutral electrical infeed.
- At least one duplex must be installed in upper housing side of rail housing assembly (see page 283, "Working with Electrical and Data").

### Data

#### Data Faceplates:

- Fit into data port openings in Power Rail Housing.
- Due to rail housing depth, data modules should not be used back-to-back.

- Ports 1 and 4 accept duplexes, port covers and base infeeds.
- Ports 2 and 3 accept data and port covers.
- Either U1 or U4 must always contain a duplex.
- Data cannot be back-to-back (data in L2 + U2 or L3 + U3 combinations are not permitted).

### Port Cover

- Port covers must be used where no duplex or data faceplate is present.
- Fits into Power Rail port locations in place of duplex receptacles and data faceplates.
- Does not fit into port sizes of other product lines.

### Cable Capacity

- The power rail housing allows continuous voice and data lines to run without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Lower cavity allows 6 voice/data cables (1/4" dia).
- Upper cavity lay-in allows 6 voice/data cables (1/4" dia).

### Power Rail Receptacle Locations

- For example, in a four-circuit system:
  - Circuit 1 — calculators, fans, etc.
  - Circuit 2 — task lights (could be wired to wall switch)
  - Circuit 3 — CRT or flat screen monitors
  - Circuit 4 — CPUs
- Use circuit 4 for power-sensitive electronic equipment.

**Placement of pedestals and lateral files** may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

For specification information see page 281.

### Height Adjustable Table Tie-In Brackets (Gallery Panels)

- Improves panel rigidity. Does not function as a panel stability solution.
- AGBKT to be specified for connection to a T leg HAT
- AGBKC to be specified for connection to a C leg HAT
- Reusable mounting template is required and must be ordered separately (AGBKTMP).
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine.

#### SINGLE BRACKET

##### Gallery Panel Application:

**Max Height (with Glass):** 65"H

**Max Width:** 75"W; No top size restrictions

Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

#### DUAL SIDED PANEL BENCH

##### Gallery Panel Application:

**Max Height (with Glass):** 65"H

**Bracket Needed:** Single Panel (75" max) with Brackets on each leg (placed at the same height)

Freestanding Gallery Panel Application

## Height Adjustable Table Tie-In Brackets (Optimize, Stride, and Terrace)

- Improves panel rigidity.
- ABKTL to be specified for connection to a LH T-leg HAT
- ABKTR to be specified for connection to a RH T-leg HAT
- ABKCL to be specified for connection to a LH C-leg HAT
- ABKCR to be specified for connection to a RH C-leg HAT
- Brackets mount into slotted standard.
- Brackets telescope to account for 24" and 30" worksurface depths and screen attachments.
- A6 C legs with a 30"D worksurface and a screen must be specified with T leg brackets
- NOT compatible with Altitude MAX bases
- Height adjustable table brackets must be installed to both sides of the panel to substitute for a return panel in a dual-sided panel bench application. When a single bracket is connected to a wing panel as shown in the 4-pack image, the HAT bracket can substitute for a return panel.
- Freestanding panel can be connected to height adjustable table if it is supported by HAT brackets on both sides of the table and panel spine for A8, A3, and A6.
- Dual sided A5 tables cannot support a freestanding panel. (A5 was discontinued on 12/31/2020)

Note: Wire chain cannot be installed on the same leg as a HAT tie-in bracket.

### SINGLE BRACKET

Systems Application (not compatible with Concensys):

**Max Height (with Glass):** 65" H

**Max Width:** 96" W; Note: tops greater than 72" W will not align.

**Overheads cannot be used without return panel**

### DUAL SIDED PANEL BENCH

Systems Application (not compatible with Concensys):

**Max Height (with Glass):** 65" H

**Bracket Needed:** Every 96" on both sides (placed at the same height).

Note: tops greater than 72" W will not align.

**Overheads cannot be used without return panel**

Front View

### Worksurface Mounted Rail (page 298)

- Aluminum extrusion designed to mount to flat edge worksurfaces. Comes with rail and hardware for mounting.
- Mounted rail extends 3/4" on underside of worksurface which may interfere with the mounting of storage and screens.
- Widths available for Altitude tables 12" through 66" in 6" increments. Can pass across seams of ganged worksurfaces in tethered applications.
- Passes behind worksurface bracket on tethered applications.
- For freestanding applications rail should be 6" shorter than worksurface (i.e. 54" rail for 60" worksurface).

### Rail Mounted Accessories

Not recommended for use on panel systems with attached worksurfaces due to fit up issues created with worksurface and panel. Adding accessory rail shifts worksurface — 3/8" away from panel along that edge. Forcing worksurface into place crushes fabric tile and with tiles of other material (steel, marker board, etc) is likely to scratch, dent, or otherwise damage tile during installation.

### U9TM Phone/Tablet Stand (page 298)

- 6 1/2"H x 4 1/4"W and angles back 1 1/4".
- Has a 1/4" x 1" slot in bottom flange to allow for routing cables. Requires 1 1/4" space behind worksurface edge in order to be used.

### U9TP Pencil Holder (page 298)

- 2 3/8"H x 6"W x 3"D.
- Holds approximately twenty #2 pencils.

### U9TS Rail Mounted Shelf (page 298)

- 8"W x 4 1/2"D and sits 2 3/8" higher than top of worksurface.
- Holds up to 8 pounds.

### U9TF Vertical Paper Tray (page 298)

- Sits 12"H x 1 1/2"W x 12"D from back of worksurface.
- Folder front stands 9" high from worksurface top, 1 1/4" space holds about 280 sheets of copy paper.

### U9WTC Cord Organizer (page 298)

- Can attach to both bottom of worksurface or slides into rail.
- 4"W x 7/8"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 - .250" diameter and 2 - 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

### Universal Hook (page 298)

- Mounts to underside of worksurface and provides storage for bags, coats and purses. Can be used as a horizontal wire manager.

## Extensions — Introduction

Extensions accessory line by Allsteel is designed to help you create your own space.

- **Create a unique space**

Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your worksurface space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

- **Create a comfortable space**

With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

- **Create an organized space**

Tired of all the piles of paper building up on your worksurface? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

- **Organization tools**

Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pencil holders that hang off the slat rail and each other.

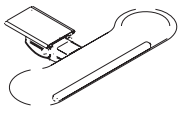

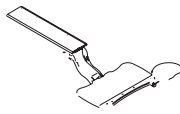

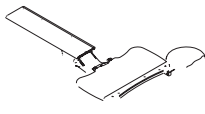

Increase your efficiency with organization!

- **Ergonomic tools**

Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

- **Illumination tools**

Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

**AKTSHORT Keyboard Support (page 301)**

- Lift and lock intuitive height adjustment.
- Compatible with Altitude Height Adjustable Tables
- Positive and negative tilt for best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms and wrists while accommodating multiple working postures.
- Surpasses ANSI/BIFMA standards.
- Black powder coat finish.
- Patented secondary slide and unique arm design provide minimal footprint.

**Keyboard Spacer Kit (page 301)**

- Keyboard Spacer Kit required for mounting under Altitude worksurfaces.
- Kit provides ten spacers and hardware for mounting keyboard supports beneath an external worksurface support channel.
- Spacers are 2 1/8" H providing more room beneath surface for mounting.

**CPU Hammock (page 301)**

- Features 360-degree swivel with an 11" track.
- Load capacity is 75 lbs.
- CPU must be minimum of 3/4"W with maximum dimension of 64" in perimeter.
- Handy adjustment tool stores within unit.
- Safety feature prevents accidental release of straps and straps can be adjusted while CPU is installed.
- Can be used on Height Adjustable Tables as long as it is attached with spacer model AKMH. Take into account required leg room for users.

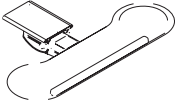

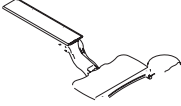

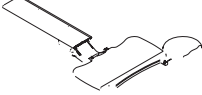

**AKTMID and AKTLONG Keyboard Support (page 301)**

- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

For specification information see page 300.

**How to specify —**

Select the Model Number from above.

Examples: AKMH ACPU1

 Shippable by small-package carrier.

Allsteel's tool rail works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip

Additional accessories that work with the **tool rail work tools** aesthetically are:

- Bookends
- Freestanding Mail Box

Coat hooks, marker boards and center drawers round out the organization offering.

Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.

### Tool Rails and Work Tools (page 305)

- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60" W Tool Rail on two 30" W panels.

### Tool Rail for Hutches (page 305)

- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

### Mail Box (page 306)

- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

### Folder Holder (page 306)

- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

### Phone Caddy (page 306)

- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

### Binder Bin (page 306)

- Holds folders, binders, and manuals.

### Tool Box (page 306)

- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

### Clip Caddy™ (page 306)

- Holds paper clips and other small objects.

### Sidebar™ Personal Shelf (page 306)

- Holds office supplies and personal effects.

### Paper Wave™ (page 306)

- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

**Gripper Clip** (page 306)

- Binds project papers together.
- Mounts to tool rail or tool tile.

**Bookends** (page 306)

- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

**Freestanding Mail Box** (page 306)

- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1 3/4" H.
- Stacking brackets are black.

**Coat Hook APMC6** (page 306)

- Hangs directly into slotted Terrace®, Optimize™, or Concensys® panel frame.
- Use for coat or bag.
- Package of six.
- Available in black only.

**Power/Data Modules — Clamp On Worksurface** (page 312)

- On-surface mounting option, fits on any worksurface with a 4" overhang.
- 6' Power cord. UL Listed.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings. Many of the AMP, AT&T, Krone, Leviton and most commercial data terminals can be used.

**Power/Data Modules — Clamp On Worksurface** (page 312)

- Worksurface clamp can be used on any surface with a 2 1/2" overhang.
- Must be installed at time of initial worksurface installation if installing between a worksurface and panel.
- 6' Power cord. UL Listed.
- The USB hub allows simultaneous powering of 2 USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capacity is limited and may not charge all devices.
- Qi compatible wireless charging available on select models.

**Power/Data Modules — Under Worksurface** (page 312)

- Under surface mounting can be used on any surface with a 5" clearance.
- 6' Power cord. UL Listed.
- Hardware not included.

**Worksurface Power/Data Module** (page 312)

- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires 3/8" gap. Consider whether 3/8" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining 3/8" gap may not be possible with worksurfaces that are panel wrapped.

**Miki Power Modules** (page 312)

- Table top and undermount units.
- Hardware not included on undermount.
- 6' Power cord, UL Listed.
- 1 AC power and 1 dual USB configuration.

**Vesta Mobile Power** (page 312)

- 3 AC power simplex, 1 dual USB-A, 1 USB-C configuration.
- 10' Retractable power cord, UL Listed.
- Unit weighs 13 lbs.

**Flat Brackets**

Front View

Top View

**Metal Center Drawers (page 307)**

- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24" D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 318-320.
- Ball-bearing slide suspension.

**Laptop Drawer — U7WDA (page 307)**

- Drawer body made of sheet metal.
- Drawer front made of 3/4" particleboard with laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17 5/8" W x 18" D x 3 3/8" H Outside (interior 13" W x 16" D x 1 7/8" H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24 3/4".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbit edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

**Polymer Center Drawer - ACD1 (page 307)**

- 20 1/2" W x 17" D x 2" H
- Available in black only
- Made from ABS.
- Minimum clearance for mounting: 23" W x 16 1/4" D x 2" H.
- Retracts on 16" ball-bearing slides.
- Can be used on worksurfaces with Height Adjustable Bases as long as it is attached with spacer model AKMH.
- Can store up to 25 lbs.

**Name Plate (page 306)**

- Comes in a 10-pack.
- Metal backer installs under a Terrace or Optimize top cap, can be used with frameless glass.
- Cover is a transparent polycarbonate insert.
- Full plate is 8 1/2" W x 2 5/8" H.

For specification information see pages 302-303.

Allsteel Extensions offers Illumination in three styles — Undercabinet LED Light, Wand Light, and **Splitly Light**.

**Recessed Undercabinet LED Light**

Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with LED strips.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

**Undercabinet LED Light**

The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek 1/2" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PIR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

**CONNECTION SEQUENCE\***

\*Cannot deviate from this sequence

**Recessed Task Lights (page 310)**

- Black Metal Construction with 9' long black cord attached to right rear corner of the fixture.
- LED strip comes installed within light.
  - 50,000 hour life span
  - 120V-277V
  - CCT 4000K
  - CRI 80+
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.

**Undercabinet LED Lights (page 310)**

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.

LED Light Combinations Must Not Exceed 60W in Combination	Power Usage
6X 17"	60W
3X 31"	60W
1X 31" + 4X 17"	60W
2X 31" + 2X 17"	60W

- The combinations that could max out 60W are featured above. *Daisy chained units have a power limit of 60W from one power entry. 17W units use 10W and 31W units use 20W.*
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).  
*Example: Daisy-chain 4-17" undercabinet LED lights:*  
Specify: 1 ALED17U60  
Specify: 3 ALED17UJMP30 with 10" jumper cord
- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug: allow 1 1/8" D space at outlet.
- On 60 watt models, power drive brick is in center of cord.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

Overhead Length	Suggested LED Sizes
24	17
30	17
36	17
42	31
48	17 + 17
60	31 + 17
72	31 + 31

Note: LED lights may need to be positioned along length properly to allow jumping to additional overheads. Suggested sizes above are recommendations for single overheads to provide as much light along length of overhead as possible.

The suggested sizes factor in 4 inches of room for the power inlet and occupancy sensor (optional).

**Wand™ Task Light**

Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Occupancy sensor and/or charging models available.

**Wand LED Freestanding Task Light (page 311)**

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% – 10% with last state memory.
- Uses 5W at highest setting and as low as 1 watt at its lowest setting, providing 75 to 12.7 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life.
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 15 minutes if no motion is detected.
- USB model features USB-A (1), USB-C (1) charging within base of unit.
- USB model also features occupancy sensor. 7.5W (A) & 18W (C) power consumption.

**Splitty Task Light**

Splitty's organic and modern design compliments the workstation while also bringing rich features to the user. In addition to illuminating the space, Splitty can also be a teleconferencing tool through Splitty's 360-degree light head adjustment and soft touch, continuous dimming. Integrated charging allows for small personal device charging crucial to the modern worker's workplace toolkit while minimizing clutter within the station. Optional clamp or tool tile mounts available as accessories.

**Splitty Task Light (page 311)**

- Available in Silver, White, or Black (accessories available in silver only).
- Cord is 12' long.
- Cord is silver when black or silver finish specified, white when white light is specified.
- Soft touch on/off, dimming.
- Continuous dimming (100% – 3%) with last state memory.
- 5.8W of energy consumption. 7W at highest setting, 0.6W at lowest.
- 5" 360-degree swivel light head, 6.54" round swivel base and 17"H arm. Arm has full 180 degree rotation and 360 degree swivel.
- Designed for 60,000 hours of life.
- Color Temperature: 3500K, Color Rendering Index: 90.
- Materials: aluminum, plastic.
- USB-A has 5W of power consumption.
- USB-A (1) charging at bottom of light arm stem. Charging feature compatible for any mounting method.
- Clamp mount compatible with surfaces ¼" – 2¼" thick.
- Tool tile mount has 1½" adjustment range, minimum slot height of ⅜".

For specification information see pages 308-309.

\*Use of APACSM Slider Model will allow for wider monitor capabilities

### Pivot Standard Weight Monitor Arms

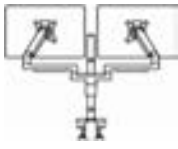

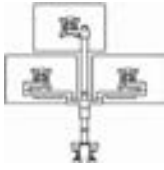

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 18.75" extension, and 10" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Standard weight arms utilize a tension spring that allows for effortless adjustment of monitors to proper ergonomic positions.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6-17 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ¾" – 2" thick surfaces; grommet mount requires hole diameter of ⅜" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

### Pivot Slider Mount

- Provides 11.8" of horizontal movement.
- Allows for wider monitors to be used on dual monitor arms and sit flush side by side.
- Not compatible with Pivot Heavy Duty Series.

### Pivot Heavy Duty Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with optional 180 degree lockout, 20.75" extension, and 12" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 8-35 lbs.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require ¾" – 2" thick surfaces; grommet mount requires hole diameter of ⅜" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Black models ship with all black cable management pieces, Silver models ship with grey wire management but optional white pieces ship in the box and can be installed on site.
- Dual monitor arm supports up to 2 monitors weight 4-17.5 lbs each.
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

### Pivot Post Series

- Adaptable and adjustable to user preference the Pivot monitor arm offers a slim and refined design coupled with easy fingertip adjustment.
- Multiple points of adjustment including 360 degree swivel with 21" extension and 10.6" of height adjustment.
- Monitor tilts +25/-25 degrees.
- Tension adjustment at multiple points allows for proper adjustment for monitors weight between 6.5-17 lbs per arm.
- Model includes grommet and worksurface mounting options.
- Desk clamp mounts require 7/8" – 2" thick surfaces; grommet mount requires hole diameter of 3/16" to 2" wide and accommodates up to 2" thick surfaces.
- Integrated cable management included with each model. Silver color option with grey wire management only.
- Dual monitor arm supports up to 25" wide monitors. Wider monitors may require use of optional slider mount model.
- Single and dual models have a post height of 17.7"; Triple monitor model has a post height of 27.5".
- Pivot arms are VESA 75mm and 100mm compatible.
- Quick release feature simplifies monitor installation and changes.

### Pivot Counterweight Kit

- Counterweight Kit to be used with monitors weighing less than 6 lbs.
- Gray color only.
- Counterweight weighs 1 lb. 6 oz.

### Pivot Conversion Kits

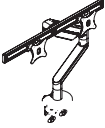

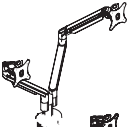

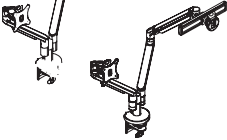

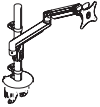

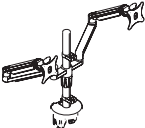

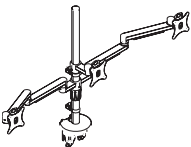

- Kit allows user to transform single monitor arm (Standard, Heavy Duty, or Post) into Dual Arm configuration
- Available in black and silver, Post arm only available in silver
- Required wire management included
- Once assembled, will aesthetically emulate dual configuration of chosen arm

## Laterals, Pedestals and Storage, Painted Wood Storage

### Standard Options

- Random Keying — The factory will assign key(s) arbitrarily using key numbers from chart below.
- Omit Lock Core — The factory will omit lock cores. Removable lock core kits with specific key number must be ordered to facilitate keying alike in the field.

### Vertical Files

#### Standard Options

- Random Keying — The factory will assign key(s) arbitrarily (see below chart for key numbers).

#### Key Alike Process

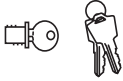

- Order standard product which will be shipped with factory installed locks and random numbered cores.
- Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
- Simply replace the factory installed core with the replacement cores after product has been installed.

#### Replacing Lock Cores

- Lock must be in the unlocked position.
- Insert core removal key and pull core straight out. (Reach units require rotating key 90° clockwise past unlocked position.)
- Insert new core with core removable key, hold core into lock and withdraw core removal key.
- Retain original core for future use.

	Random Keying	Omit Lock Core	Key Numbers	Lock Core Kit	Master Key

	<b>Brushed Chrome Removable Lock Core Kit* **</b>	<b>Key Numbers 101N-225N</b>	
	Includes one core, two keys, one core removal tool, adapter, and instructions	ALKF23CN 	\$ 27
 Open Market	<b>Master Key*</b> (One key) Available to authorized dealers only on electronic orders. Will open ALKF23CN and LKF23CN locks numbered 101N-225N.	AMF22 	\$ 28

N series lock cores (ALKF23CN) are a replacement part for legacy Allsteel products. N series lock cores were used in all Persona pedestals produced between January 1996 and August 2009 as well as Receding Door Overheads produced between January 1996 and August 2010. N series lock cores are NOT used in current product and should not be ordered for product produced after these dates. E series lock cores are used in current product, see above.

\*On existing Premium and Asset lateral, use N-Series locks.

\*\* Removable Lock Core Kits are intended for use with Allsteel systems furniture and are approved under GSA SIN 33721. When purchased separately and used without Allsteel systems furniture, those Removable Lock Core Kits marked by (\*\*) are considered Open Market.

 Shippable by small-package carrier.

## EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except Receding Door Overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — Random, Specified or Sequential.

### Random Keying

The Random Keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

*Example: There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

### Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

*Example: There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

### Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

*Example: A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

*The first 40 offices have 4 silver locks each that need to be keyed-alike.*

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

*The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.*

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

### HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

SAMPLE ORDER FOR EXAMPLES GIVEN:

Model	Key Type	Quantity
LKFE5BLK.	X.	15
LKFE2SLV.	X202.	10
LKFE4SLV.	SEQ/101.	40
LKFE3SLV.	SEQ/141.	20

**NOTE:** Quantity required is last number in model.option string.

Description	Model / Color	List Price
<b>Easy Lock Lock-Core</b>		
Lock Core Kit — 1 core, 2 keys	LKFE1 _____	\$ 27

Add color suffix to model: <b>SLV</b> Silver, <b>BLK</b> Black, <b>MTS</b> Matte Silver		
<b>Note:</b> One core removal key minimum per order. One additional core removal key per 25 lock-cores will be shipped.		
<b>Master Key</b>		
(One key) Available to authorized dealers only on faxed orders.		
	AMKF22	\$ 28

### How to specify using Easy Lock Program:

**Step 1** — Count the number of lock cores and color required in each workstation that need to be keyed alike.

2 overheads with 1 lock-core each = 2  
 2 pedestals with 1 lock-core each = 2  
**Total silver lock-cores per station = 4**

**Step 2** — Count the total number of workstations needing 4 lock-cores.

**4 total workstations**

**Step 3** — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.

**LKFE4SLV.X.4**  
 Lock-Cores per station  
 Color of Core  
 Number of workstations
