Pebble	P8R
Pewter	P8D
Salt	P8C
Titanium	P8T

GRADE P2

Champagne Metallic	PR5
Gunmetal Metallic	PR3
Platinum Metallic	PR2
Silver**	PR6
Solar Black	P8X

**PR6 no upcharge on Involve; available as a Grade P2 color on stanchions; is not available on Concensus, Essentials, and vertical files. PQ8 is not available on vertical files.

GRADE P3

Atom	P8S
Blossom***	P8K
Bullseye	PJF
Cabernet***	P7T
Conifer***	P8H
Ember	P8P
Ion	P8N
Iris	P8J
Krypton	P8F
Regatta	P8M
Succulent***	P8A

*** These colors are intended to be an inspirational option for the trending market. Product application is limited and color availability is approximately two years to coincide with evolving workplace trends.

Metallic paints, due to varying reflectance, may appear to have less visual color consistency than other paint finishes, even when L/A/B values are exactly the same. (L/A/B — measurable aspects of color — values are maintained within a specified range, to ensure consistent appearance of paint colors.)

STRATAWOOD VENEERS

GRADE V1

Add FSC prefix to Stratawood codes listed below for Stratawood veneer trim on Stride and Terrace.
 Example: **FSCSC777**

CHERRY

Burnished Cherry	SC777
Light Cherry	SC701
Wheat Cherry	SC706

MAPLE

Clear Maple***	SE800
----------------	-------

OAK

Clear Oak	SF300
Dark Rift Oak	SF331

WALNUT

Coffee Walnut	ST615
Dark Roast Walnut	ST684
Light Walnut	ST601

NATURAL VENEERS — NATURAL-1

GRADE V3

CHERRY

Burnished Cherry	NC777
Light Cherry	NC701
Medium Wheat Cherry	NC706

MAPLE

Natural Maple***	NE800
------------------	-------

WALNUT

Coffee Walnut	NT615
Dark Roast Walnut	NT684
Light Walnut	NT601

NATURAL VENEERS — NATURAL-2

GRADE V5

Dark Rift Oak	RF331
---------------	-------

***SE800 and NE800 are not available on Stride trim.

The beauty of wood is the natural variation of grain patterns and colors that make each piece unique. This variation is also influenced by lighting conditions, orientation of mated parts, and varying acceptance of the finishing process. The varying colors and physical characteristics naturally occur in all wood species but are most pronounced in lighter colored woods, and are especially evident in natural finishes.

GROMMETS ON VENEER WORKSURFACES

Wire management grommets come standard on most veneer worksurfaces. Choose between metal or plastic grommet option. Note: Plastic grommet color is predetermined based on finish selection. All Maple veneers.....Muslin EU
 All other veneersBlack E4

Notes:

- Screen depths nominal sizes match actual sizes. *Not for use with Stride Benching. See page 15.
- 13H screens are 12.6"H (to match standard Stride Lateral Screens).
- 8H screen nominal height matches actual.
- 20H screen nominal height matches actual, intending to align with 50H panels. These will not align with Stride Benching 20H Beam Mounted Screens or 20H Elevated table mounted screens.
- Screens used on Systems applications must be placed 3" from a seam with a cantilever or center support bracket. If necessary the alternative attachment kit, VHB Tape and End Cap, may be used. Order separately.
- Screens used on Further applications can be placed anywhere, however support brackets may need to be repositioned.

22 1/2"H Frameless Glass Specification Rules

Connector brackets are required to connect all glass screens together.

Every run of glass must have perpendicular support. Must use an L, T, or X connector brackets.

See page 22 for models.

Models are universal and are to be used for Stride, Terrace and Optimize.

Brackets connect to top corners of the glass.

Inline

“S” Ext. Straight

“T”

“L”

Stride COM Insert Spec

Custom material used in grooved top cap trim should be sized according to these dimensions:

Standard Height	Actual Dimensions	Standard Width	Actual Dimensions
7½"H	8.460"H	24"W	23.866"W
15"H	15.960"H	30"W	29.866"W
22½"H	23.460"H	36"W	35.866"W
		42"W	41.866"W
		48"W	47.866"W
		54"W	53.866"W
		60"W	59.866"W
		66"W	65.866"W
		72"W	71.866"W
		78"W	77.866"W
		84"W	83.866"W
		90"W	89.866"W
		96"W	95.866"W

Height tolerance should be +0.000" / -0.188"

Width tolerance should be +/- 0.094"

Thickness of custom material must be 10MM thick -0.120MM / +0.890MM

For COM material heights taller than 15"H.

Connector brackets are required to connect all screens together.

Every run of glass must have perpendicular support. Must use an L, T, or X connector brackets.

See page [22](#) for models

Terrace Blade Feet and Glide Cover Kits — specify paint color			
End Blade Foot* — Dual Sided	SPLA-ACC-SUPPORT.M375836	\$ 618	\$ 633
Mid Blade Foot* — Dual-Sided	SPLA-ACC-SUPPORT.M375837	\$ 618	\$ 633
Glide Tower Cover Kit for Blade Foot** — Single	SPLA-ACC-SUPPORT.M375840	\$ 69	\$ 84
Glide Tower Cover Kit for Blade Feet** — Pair	SPLA-ACC-SUPPORT.M375841	\$ 140	\$ 155

***Blade Feet**

- Blade Feet to be used with Raceway panels only – not compatible with Footed panels
- Glide tower cover kit includes parts to hide glide tower and give “footed” appearance. Will not exactly match standard footed aesthetic.
- Terrace panels must be ordered separately
- Blade feet are intended to be used to create free-standing panel runs
- Panels supported by Blade feet cannot contain hanging elements (shelves; overheads; shared storage)
- Panels supported by Blade feet cannot support worksurfaces
- Maximum height panels: Panels supported by blade bases can be no taller than 50”H (including stackers).
- Minimum quantity of supports: A blade base is required AT LEAST every 96” (8 feet), or every other panel connection, whichever condition happens first. A blade foot must be used at the ends of the panel run.
- Maximum length of run: A freestanding panel run supported by blade bases cannot be longer than 192” (16 feet).
- Note on Leveling: The special bases are designed to screw directly to the panel frame verticals. Therefore, there is no height adjustability once installed.
- Contact TPG to review layouts for potential exceptions or applications outside of free-standing panel runs

****Glide Tower**

- Includes parts to hide glide tower(s) and give “footed” appearance. Will not exactly match standard footed aesthetic.

Terrace Flat Trim COM Insert Spec

Custom material used in grooved top cap trim should be sized according to these dimensions:

Standard Height	Actual Dimensions	Standard Width	Actual Dimensions
7½"H	8.460"H	24"W	23.866"W
15"H	15.960"H	30"W	29.866"W
22½"H	23.460"H	36"W	35.866"W
		42"W	41.866"W
		48"W	47.866"W
Height tolerance should be +0.000" / -0.188"		54"W	53.866"W
		60"W	59.866"W
Width tolerance should be +/- 0.094"		66"W	65.866"W
		72"W	71.866"W
Thickness of custom material must be 10MM thick -0.120MM / +0.890MM		78"W	77.866"W
		84"W	83.866"W
		90"W	89.866"W
		96"W	95.866"W

For COM material heights taller than 15"H.

Connector brackets are required to connect all screens together.

Every run of glass must have perpendicular support. Must use an L, T, or X connector brackets.

See page 22 for models

Terrace Radius Trim COM Insert Spec

Notes:

- 28"H Beam Mounted Screens will align with 57½"H Storage when used with 28"H Further Beams.
- Beam Mount component must be ordered separately.
- Beam Mount models will not be visible in specifying software, but are visible on Allsteel Synergy quoting and ordering tools.

Specification Rules:

- This solution is for New Further Beams only.
- Triangle Base will slightly overhang the beam.
- Special Beam trim to be ordered separately. See detail A.
- Installation requires clamping of the top cap to get it to "snap" on.
- Top cap pressure fit will be tight so the data or electrical in the beam will be more difficult to access after special top cap and screen is installed.

Note: Due to increased height of the glass, there will be noticeable side-to-side movement on the screen.

Please contact TPG prior to placing your order to review your layout if you have questions.

Note: The height of these models are NOT compatible with new frameless glass models (ie: P21536FGS) launched 7/1/21. If 22½"H frameless glass is needed for NEW model design, please contact TPG as product modification requests will be needed.

Optimize Trim COM Insert Spec

Custom material used in grooved top cap trim should be sized according to these dimensions:

Standard Height	Actual Dimensions	Standard Width	Actual Dimensions
7½"H	8.460"H	24"W	23.866"W
15"H	15.960"H	30"W	29.866"W
22½"H	23.460"H	36"W	35.866"W
		42"W	41.866"W
		48"W	47.866"W
		54"W	53.866"W
		60"W	59.866"W
		66"W	65.866"W
		72"W	71.866"W

Height tolerance should be +0.000" / -0.188"

Width tolerance should be +/- 0.094"

Thickness of custom material must be 10MM thick -0.120MM / +0.890MM

For COM material heights taller than 15"H.

Connector brackets are required to connect all screens together.

Every run of glass must have perpendicular support. Must use an L, T, or X connector brackets.

See page [22](#) for models

Note: The dimensions referenced are NOT compatible with new frameless glass models (ie: P21536FGS) launched 7/1/21.

For specification information see current Optimize Price & Specification Guide.

Note: These screens ARE NOT TACKABLE. The properties of Contourett fabric do not allow this feature.

Note: Installation brackets are now attached to the screen from the factory.

<p>How to specify — Select the Model Number from above.</p>	<p>1st Option: Select the Screen Fabric: See inside back cover for selections and color codes.</p>	<p>2nd Option: Select the Screen Bracket Paint: P1 P2 See inside front cover for selections and color codes.* P2 (\$13 extra)</p>
<p>Examples:</p>		

Specification Notes:

- Interior wing dimension is 27.825"
- On a 30"D Altitude work surface (true depth is 29.25") the extended wing screen will not extend to the front edge of the work surface, the screen will end 1.5" before the front edge of the work surface.

- On a 24"D Altitude work surface (true depth is 23.25") the extended wing screen will extend 4.5" past the front edge of the work surface.

- Adding a screen adds 1" to the width of the table per return wing.
- All Altitude worksurfaces are 2" under nominal width to accommodate screens.
- RH L-screens have return wing on user's right; LH opposite.
- Textile offering is limited to Nobel.

For specification information see page 67.

EMS ENERGY MANAGEMENT SYSTEM

Summary of Title 24

The 2014 California Title 24, addresses building energy efficiency standards with an objective to reduce energy use in California. The owner or tenant is responsible to meet these specific requirements. This impacts:

- All building permits, new or renovation
- Office improvements, including moving or reconfiguring existing furniture

Office Furniture Impact

In Subchapter 4, Section 130.5(d), controlled duplex receptacles are required and non-controlled duplex receptacles are allowed. A factory-marked controlled duplex receptacle is required within 6 feet of any non-controlled receptacle. Circuit controls for 120 volt duplex receptacles will run on timers, sensors, or both. A power strip or surge bar does not meet the standard. These requirements are for new spaces and retrofits, with all building permits, and any time furniture with electrical is moved. A post-installation inspection is also required. Controlling duplex receptacles can be accomplished at the building power controls or within the furniture power system.

FAQ

Q. What should I discuss with customers now?

A. Ask if Title 24 compliance will be necessary on the project, and how they intend to comply. Be ready to discuss options.

Q. How will this affect planning and specification?

A. Plan for the 6' rule when placing controlled and non-controlled duplex receptacles. The Allsteel IDS team is versed in Title 24 and ready to help you with your planning needs.

Q. Does this work with existing Allsteel electrical?

A. Yes, the infeed must be the EMS version but the other electrical components downstream from the infeed will remain Allsteel standard electrical components. Please see notes below for more information.

Q. When will the EMS (Energy Management System) be orderable?

A. Components are available now through Tailored Solutions.

Q. Can you sync more than 1 occupancy sensor to a Monitor Controlled Device (MCD)?

A. Yes, you can sync multiple occupancy sensors to each MCD.

Q. How do I know whether to specify the base/ceiling infeed or power harness MCD?

A. The MCD needs to be as close to the power input as possible. If your last panel in a run needs to have powered duplex receptacles, the base/ceiling in-feed version must be used. If not, it is recommended to use the power harness MCD. (Context: The power harness MCD is concealed within the panel kickplate. The base/ceiling in-feed is mounted to the outside of the kickplate on the panel.)

Furniture Controls

Specify Allsteel EMS Base/ceiling in-feed or power harness. Each Monitor/ Controlled Device (MCD) includes programming instructions. Controlled labels for duplex receptacles are available as well as duplex receptacles marked with 'controlled'. Occupancy sensor is specified separately.

- Follow 6' rule when placing controlled receptacles
- Label controlled receptacles

Allsteel EMS, features "CircuiTrac™ by Byrne" energy management system. EMS is compatible with new installations or can easily retrofit to existing Allsteel electrical systems. Simply program the circuits at the time of installation and sync to the occupancy sensor(s).

Key components:

- Monitor/Control Device (MCD) (Base/ceiling in-feed or power harness)
- Occupancy Sensor
- Label controlled duplex receptacles with stickers or order pre-marked, "controlled", duplex receptacles

Building Controls

A certified electrician wires in-feeds for select circuits to be controlled using an occupancy sensor or timer. All controlled duplex receptacles must be labeled as such.

- Follow 6' rule when placing controlled duplex receptacles
- Label controlled duplex receptacles
- Use standard electrical components
- Coordinate with electrician on which circuit(s) to control
- Electrician provides controlled circuits

ALLSTEEL PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, allsteeloffice.com.

For memo samples, please contact our partners:

- Camira, memos@camirafabrics.com
1.616.288.0655
- Carnegie, carnegiefabrics.com
1.800.727.6770
- CF Stinson, cfstinson.com
1.800.841.6279
- HBF Textiles, hbftextiles.com
1.877.494.5727
- Maharam, maharam.com
1.800.645.3943
- Ultrafabrics, ultrafabricsllc.com
1.877.309.6648

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.
